UNIQUE

There is no use comparing the latest and best Screw Driver—

Thomson's Indestructible—

with any other make. So well is it made that you can pound on its head with a sledge hammer and the blows will not even split the handle.

It is unique in every respect. — We guarantee its indestructibility because it's drop-forged from the best steel—cap, ferrule and blade, which is of one piece, extending through handle to cap. Sizes 2½ to 30 inches. You ought to handle it. It's a profitable seller.

We make all kinds of drop-forgings.

Thomson Drop Forge Co
Plantsville, Conn.

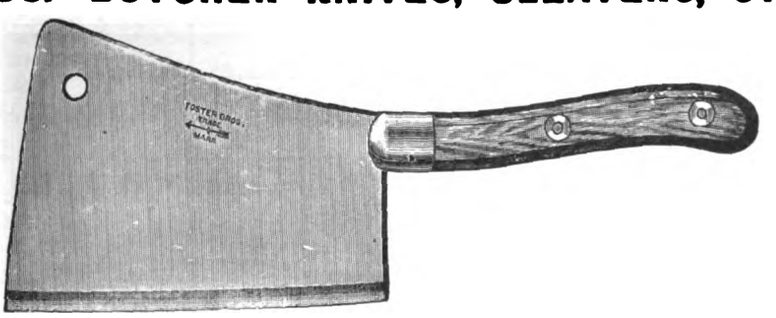
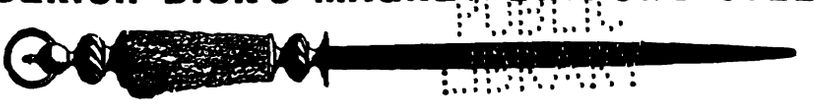
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York, U.S.A.



and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

GENUINE BUCKEYE PRUNER

EVERY dealer should handle the Genuine Buckeye Pruner, because he can carefully push it to his best trade, in preference to any other pruner made.

Because it has stood the test of actual use for over 30 years.

Because it is the strongest made---the blades being hand-forged.

Because no other made cuts so easily.

It operates just opposite from other pruners. Grasp the limb with the hook, and cut towards you. It's quicker and easier than the other way.

Size 25—inch.

One dozen in a case.

ASTOR, LENOX AND TILDEN FOUNDATIONS
1905

Ten per cent. of the fuel of the Paris, Lyons and Mediterranean Railway consists of coal briquettes made from the slack and dust of that company's mines. The engineers find that they can raise steam more quickly with briquettes than without them.

The Van Wagoner Co., Cleveland, Ohio, has moved its New York office, in charge of A. A. Fonda, to Room 503, 105-107 Chambers Street. At this eastern headquarters it will carry a full stock of Van Wagoner Ball Bearing Spring Hinges, Top of Door Spring Hinges, Screen Door Spring Hinges and other goods of its manufacture.

The Western Brass Manufacturing Works, Chicago, announce that they have moved into their new factory, 47-51 North Elizabeth Street, near Lake, and that they are now in a position to fill all orders promptly for Hardware or any special metal work. The new factory is equipped with all modern machinery and the firm has on hand a very large variety of patterns for all kinds of special work.

The wire nail exports amounted to 1,811 tons in August. Europe and Australia were the largest buyers. Five hundred and eighty-eight tons went to the first-named part of the world, 474 tons of which was forwarded to ports in the United Kingdom, Liverpool, Manchester and Belfast having been sent single lots of 108 tons, 135 tons and 119 tons, respectively, while London, Bristol, Hull and Glasgow took the balance in about equal proportions. Aarhuss, Copenhagen, Constantinople, Beyrout and Bremen were sent 114 tons in all. Three hundred and fifty-three tons went to Australia in five lots. To China and Japan, 307 tons were forwarded in four lots. Two hundred and nine tons went to South America, Chili taking 103 tons, while 106 tons were sent to the Argentine Republic. One hundred and forty-two tons went to Mexico. Shipments were also made to South Africa, Tripoli, Trebizund and Messina.

MORRIS HARDWARE MF'G. CO.

A novel manufacturing company was formed in Marion, Ind., recently. It is to be known as the Morris Hardware Mfg. Co. It is capitalized at $20,000. All the stock has been subscribed and paid in by forty commercial travelers. C. F. Morris, formerly a traveling salesman, now proprietor of the Morris Hotel, in this city, promoted the company. A meeting was held in the hotel to-day and officers were elected. Hardware specialties are to be manufactured and the forty traveling salesmen, who represent as many different lines of goods, will handle the product of the new company and will introduce it in every State in the Union. A factory site has been procured in Marion and it is the intention of the company to have its goods on the market by December 1. C. F. Morris, the promoter of the company, has patents on building Hardware. The officers and directors were elected at the meeting. The officers are: President, C. F. Morris, Marion, Ind.; vice-president, W. T. Coulter, Columbus, Ohio; secretary, B. F. Reynolds, Saginaw, Mich.; treasurer, C. L. W. Krouse, Indianapolis. The above officers will be directors in addition to J. N. Phenis, Richmond, Ind., and J. E. Mirrill, of Muncie, Ind.

APPLICANT FOR POSITION.

United States Minister Barrett writes in a recent report:

"No man seeking a position as clerk, stenographer, typewriter, engineer, foreman, or any similar position which the average American will be willing to fill, should come to the Isthmus unless he has made some previous arrangement for employment, or has sufficient funds to pay his expenses in Panama and his passage back to the United States if he finds no opening. More men of these classes are now coming to Panama and Colon than there are positions to be filled. The cost of living is very high, prices having increased nearly 300 per cent in the last six months, and there is a great shortage of cheap and good lodging and board accommodations.

"While Panama, Colon and towns in the Zone and in the interior of Panama proper are sure to experience a considerable measure of material and industrial progress through the digging of the canal, there are not at present many opportunities for the establishment of new mercantile business and professional pursuits, and there should not be an inrush of merchants and business and professional men in the expectation of finding ready openings. It would be best for men desirous of locating here in business enterprises to come first and look over the field before finally closing up their offices in the United States."

THE ANNUAL REVIEW OF THE FOREIGN AND INTERNAL COMMERCE.

The Annual Review of the Foreign and Internal Commerce of the United States for the fiscal year ending June 30, 1904, which appears in the July Summary of Commerce and Finance, has just been issued by the Department of Commerce and Labor, Bureau of Statistics. It contains many statements regarding the commerce, finances, production, transportation, etc., of the United States for which frequent inquiries are now being made. Great care has been exercised to bring them down to the latest possible date, with the purpose of supplying the latest and most complete information possible to those desiring the same. Attention is especially called to the tables "Progress of the United States in Its Material Industries," beginning on page 172, to which the figures of the fiscal year 1904 have been added wherever possible, thus supplying the very latest available data in regard to the commerce, production, transportation, finance, currency, population, etc., of the country; while the tables beginning on page 155, showing the commerce, revenue, expenditures, currency, etc., of the principal countries of the world have also been brought down to the latest available date. The tables beginning on page 64 show the imports and exports by articles during the fiscal year 1904 compared with 1902 and 1903, and on pages 48, 50 and 52 are shown the totals of the trade of the United States, with each of the principal countries of the world, in each year from 1894 to 1904. The series of tables on pages 32 to 35 shows the growth in exportation of manufactures, and tables on pages 37 to 39 show the growth in commerce with the non-contiguous territory of the United States. A table on page 49 shows the figures of commerce between the United States and Canada for a long term of years.

EARLY USE OF GUNPOWDER.

General Joseph Wheeler, U.S.A., in a lecture a short time ago, remarked that in many localities in China and India the soil is impregnated with nitre, and the probable discovery of gunpowder there, many centuries before the Christian era, may be explained in this way. All cooking at that time was by wood fires, and the people lived in tents and huts with earth for their floors. Countless fires made of wood upon ground strongly impregnated with nitre must have existed every day, and when such fires were extinguished a portion of the wood must have been converted into charcoal, some of which would, of necessity, become mixed with the nitre in the soil. By this means two of the most active ingredients of powder were brought together, and it is very natural that when another fire was kindled on the same spot a flash might follow. This would lead to investigation, and then the manufacture of gunpowder was conceived. Whether this be true or not, there is abundant evidence that the origin of gunpowder and artillery goes far back in the dim ages of the past. The Hindoo code, compiled long before the Christian era, prohibited the making of war with cannon and guns or any kind of firearms. Quintus Curtius informs us that Alexander the Great met with fire weapons in Asia, and Philostratus says that Alexander's conquests were arrested by the use of gunpowder. It is also written that those wise men who lived in the cities of the Ganges "overthrew their enemies with tempests and thunderbolts shot from the walls." Julius Africanus mentions shooting powder in the year 275. It was used in the siege of Constantinople in 668; by the Arabs in 690; at Thessalonica in 904; at the siege of Belgrade, 1073; by the Greeks in naval battles in 1098; by the Arabs against the Iberians in 1147, and at Toulouse in 1218. It appears to have been generally known throughout civilized Europe as early as 1300, and soon thereafter it made its way into England, where it was manufactured during the reign of Elizabeth, and we learn that a few arms were possessed by the English in 1310, and that they were used at the battle of Crecy in 1346.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

Business is improving as the weather grows colder, and the prospect now is that a moderately active October will be followed by a busy November, with the balance of the Winter yet to be heard from. A fine holiday trade is expected for which unusually good preparations are being made to produce the best results.

The trade in Nails and Wire Products since the last prices were announced has been unusually brisk and far in advance of the customary trade at this season of the year. As the orders are rush orders to complete assortments, it signifies either that the dealer has been lingering too long before ordering or that his stock is pretty well exhausted. Present quotations are low enough by comparison, so they might as well be ordered as he has given up anticipating lower quotations this Fall.

The Country, taking into consideration the fact of a presidential election being near at hand, is in a promising condition, and when the agitation and excitement attending it has quieted down, it will be found in a thoroughly satisfactory condition all over, with the Holiday trade ahead of us, purchases for which will take a good assortment of goods, having had the experience of last Holiday season to assist in the selection, when the assortment of fine goods gave evidence, as it never had before, of the growing tastes of the consumer and his willingness to spend money on sales that left little to be desired.

About as many advances as declines on Hardware are taking place, so that one offsets the other, making it difficult to calculate just where "to stand pat" or to stock up. Coffee Mills, sold for a long time at unremunerative prices, are now quoted at an advance of five to forty per cent. and there is no complaint of the new quotation.

A movement, showing that a large early business is being developed in shovels, but as no combination among manufacturers checks the prices, quotations are badly demoralized and the dealers are kept guessing.

The coming season will see an advance on the leading steel goods, hay and manure forks particularly. The leading manufacturers, being well able to control prices on the whole line, will justify any possible change. Some lines will show an advance, which at any rate give every indication of stability. There are some few reductions in price also, which the new cost of raw material will justify.

The makers of hatchets, etc., have dropped their prices at least fifteen per cent., resulting from the trade having given such large Spring orders before the advance last Spring, there stocks lasted until dull trade set in in June, and they were able to get along pretty well until September. The present low quotations will hold, so they say, only until November 15th, so it behooves the large buyers to send along their orders; it may be all the concession they will get.

There is less disposition noticeable to cut prices than usual, indicating that stocks are not extravagantly large and they cannot juggle with the surplus. The longer the retailer waits before ordering, the less he is going to bother himself about wanting prices "cut." Collections are reported improving, but they could be in much better shape than this to justify comment.

Special Brands.

There is one question which the manufacturers are going to push to the furthest extremity, and that is "Special Brands," and the settlement of this one thing will take a good deal of discussion. The jobber is strongly inclined to fight for this privilege, as the brands are controlled by his house, and when they represent the "best" the manufacturer can produce, they add very largely to the jobber's market, to the detriment of the manufacturer. This is where the shoe pinches. The manufacturers having been years in building up trade, knowing how good is everything he makes, is asked to put on the stamp of a jobber and let him have the advantage, perhaps for a single year, of the high quality of his goods, giving them character and reputation at once without effort.

The following season, for a difference of 5% or less, the manufacturer loses his chances to sell him, and he is thrown over for the goods of a company not having an established reputation, and sold as extra quality which is based on his reputable goods of the season previous. The whole business is unfair, as the manufacturer of really high grade goods loses his identity, selling as well at a lower price, and the jobber gets the reputation and profit, while the manufacturer does not secure his trade for a dead certainty.

A manufacturer knows that a large percentage of goods sold under special brands are made from "seconds", or at any rate made from the "run" of the goods at the best, and sold always as a grade better than they are and thus reduce the number of high grade goods by their disposition. The retailer is not asked to give his views, otherwise he would be heard from to this extent. The high grade goods of the manufacturer would in their case be preferred by him instead of advertising the jobber's "special brand" which he would think more highly of, did he but know the maker of them, and the fact they were in no need of the jobber's guarantee.

BRAZIL.

By HENRIQUE SCHUELER.

SECOND ARTICLE.

The area of the republic of the United States of Brazil covers almost one-half of the South American continent and extends over more than 3,200,000 square miles, with a population of about 20,000,000 souls. On November 15, 1889, Brazil adopted a federal republican form of government, with a constitution closely after that of the United States. This great step from a monarchy to a republic, as well as the emancipation of the slaves, which occurred in the previous year, resulted in serious inner troubles from which the republic finally extricated herself in a most satisfactory manner. Since then, the succeeding governments of the country have been very successful in strengthening the credit and finances of the country, thus laying a strong and safe foundation for the development of commerce and industries.

STREET SCENE IN BLUMENAU STA. CATHARINA.

The government has started work on immense harbor improvements in the port of Rio de Janeiro, and is extending the railroad system, which at present has a length of about 8,000 miles; 4,000 miles are under way of construction, while nearly 6,500 miles have been surveyed. No wonder, therefore, that the great industrial States of Europe are paying more and more attention to Brazil. Especially England and Germany seem to be well aware of the fact that great opportunities are offered in Brazil, and it is to be regretted that the United States plays but the third role in this fight for commercial supremacy.

The magnitude of Brazil's commerce may be seen from the following figures:

In 1902, the latest year for which official returns are available, the value of the total imports into Brazil amounted to $96,655,780; an increase of about eight and one-half per cent over the imports of the preceding year. Estimates made for 1903 indicate an increase of about $2,000,000 over 1902. The share of the different countries participating in this trade was as follows:

United Kingdom	$26,250,808
Germany	11,474,000
United States	11,266,275
France	9,019,513
Argentina	8,893,946
Portugal	6,639,290
Uruguay	5,341,363
English possessions	5,043,449
Italy	3,661,982
Belgium	2,288,171
Austria-Hungary	1,843,469
Sweden and Norway	1,055,510
Switzerland	819,196
Holland	791,153
Other countries	2,267,655
Total	$96,655,780

The exports of Brazil, which are steadily largely increasing, amounted to the following figures:

United States	$92,786,816
Germany	31,686,821
United Kingdom	27,871,850
France	25,084,576
Argentine	4,804,693
Other countries	32,971,419
Total	$215,206,175

It will be seen from these figures that the trade balance of Brazil is a very favorable one, for the value of the exports is more than double that of the imports. The above figures also demonstrate that the United States buys almost as much from Brazil as all the other countries of the world combined, while the exports to Brazil are small when compared with those from Europe. The fault of this situation cannot be said to be on the part of Brazil, which, in every respect, is willing to meet its great northern sister republic in every possible way. It will be remembered that by special decree of April 16, 1904, the Brazilian Government allowed a reduction of twenty per cent in the import duties on American flour, condensed milk, manufactured rubber, watches, dyes and varnishes. All this, however, does not seem to be an inducement to the United States to pay more attention to the Brazilian markets. Our great country is still *terra incognita* to many American manufacturers. On the other hand, England, Germany and France have established influential banks in Brazil, and have invested large amounts of money in railroads and mines; these countries have established their own great steamship lines, which are in regular touch with the principal Brazilian ports. Things like those are, of course, in favor of European manufacturers and exporters, who are doing a growing business with Brazil. Up to the present time very little American capital is to be found in our country, and it is especially to be regretted that our shipping facilities with the United States leave so much to be desired.

Brazil is entering at present upon a great period of development. The country has enjoyed quietude and peace for years, and an intelligent and serious government is doing all in its power to develop the great natural resources of our country, in which efforts it is supported by the industrious population. I think it will be of interest to the readers of HARDWARE if I quote part of the message which President Rodriguez Alves presented to the Brazilian Congress at its opening session, May 3, 1904.

The message begins with a reference to the treaty concluded with Bolivia on November 17, 1903, for the exchange of territories and other compensations, which thus settled definitely and with honor to both countries, a boundary dispute of long standing.

Attention is next called to the important works that were inaugurated within the past year in the port and city of Rio de Janeiro for the purpose of improving their sanitary condition. The Department of Public Health organized a regular campaign against the yellow fever, with the result that the number of cases during the past summer was the smallest recorded in the last thirty-one years.

Referring to the condition of agriculture, the President states

STREET SCENE IN BLUMENAU, STA. CATHARINA.

that it is more encouraging as the result of the interest taken by the State governments in adopting measures to promote production and of the better prices prevailing in the markets abroad. Among the measures recommended to the consideration of Congress in this connection are greater transportation facilities and the organization of rural credits.

The message calls attention to the need of a mining law which will insure the safety of capital invested in this industry, defining doubtful points and facilitating transactions between private parties. The richness of the subsoil of Brazil is becoming more and more evident and adequate, mining legislation alone is needed to attract capital on a large scale to this industry.

Under the head of railways, the message states that during the year construction work was begun on great extension.

According to the trade returns for 1902 furnished by the Bureau of Commercial Statistics, the exports amounted to 736,586,324 mil-

Digitized by Google

reis, and the imports to 492,822,082 milreis. The trade statistics for 1903 (not yet complete) show exports to the value of 144,704,836 milreis, and imports 498,954,392 milreis. This shows an increase of 14,280,822 milreis in the foreign trade in Brazil in 1903 compared with 1902. On account of the low price of coffee it was feared that the total value of the exports in 1903 would be less than in 1902, but the year closed showing an excess of 6,692,153 milreis compared with the exports of 1902. The decrease in the price of coffee was more than counterbalanced by the high price of rubber. The exports of cotton in 1903 showed an increase in value of 2,320,000 milreis, notwithstanding that there was a decrease in the production of 3,901,683 kilograms as the result of the droubht. The exports of manganese have increased, while those of sugar and tobacco have decreased. The imports in 1903 showed an increase over those in 1902 of 11,214,408 milreis. The total receipts for the year 1903 amounted to 41,300,908 milreis gold and 264,130,004 milreis paper, which shows an increase over the estimated receipts of 3,,332,966 milreis gold and 218,645,004 milreis paper. Receipts compared with expenditures show a balance of 1,319,780 milreis gold and a deficit of 17,061,954 paper. The amortization fund represents a total value of 16,731,200 milreis. The internal loan of 1868 has been reduced to 6,389,000 milreis. The amount of paper currency in circulation on March 31st was 674,400,013 milreis.

Thus far the message of the President. I would like to analyze the export figures for the year 1903, as they show the possibiliites of the country for the extension of this market for foreign goods and capital.

The net increase of $2,581,125 was due principally to rubber, which shows an increase of only 6.7 per cent in quantity, but, owing to the sensational rise of prices, of over 33 per cent in value. Dry and salt hides show the considerable growth of $828,205, and raw cotton, in spite of the falling off of 12 per cent in quantity, due to drought and bad harvest, gave $599,905 more than last year. The other products that show an increase are: Manozite, cotton seed, Brazil nuts, carnahuba wax, ox horns, cassava flour, fruit, timber and manganese; the expansion of the lumber trade is particularly satisfactory, and shows that this industry is slowly though surely developing.

DEATH OF OLIVER WILLIAMS.

Oliver Williams died at his home in Catasauqua, Pa., September 17. Mr. Williams was born in South Wales, April 23, 1831, and when two years old was brought to this country by his parents, who settled in Schenectady, N. Y. He was educated in the common schools, and afterward attended Allentown Academy for one year. He learned the trade of iron molder and worked at it until 1849, when he entered the optical establishment of McAllister & Co., Philadelphia, remaining with them until 1853, when he joined James W. Queen, one of the McAllister firm, in establishing the J. W. Queen Co. In 1855 Mr. Williams moved to Milwaukee, where he roomed for three months with Chester A. Arthur, who afterwards became President of the United States. Mr. Arthur soon returned to New York, and while visiting him in 1858 Mr. Williams met Peter R. L. Hardenberg, who proposed to go to Chicago and open a leather store, which was done. Abraham Lincoln was attorney for the firm. In 1866 Mr. Williams was appointed general manager of the Catasauqua Mfg. Co. and moved to that city, where he lived up to the time of his death. He was also one of the founders of the Bryden Horse Shoe Works, of which he was president. He was also president of the Union Foundry and Machine Co., of Catasauqua, president of the Cement National Bank of Siegfried, Pa., and vice-president of the Whitehall-Portland Cement Co. For three years he was president of the National Iron Association; for fifteen years president of the Eastern Bar Iron Association, and a member of the American Institute of Mining Engineers.

FREIGHT RATES TO SOUTH AFRICA.

(From United States Consul Halstead, Birmingham, England.)

A Birmingham merchant writes to the Birmingham Daily Post calling attention to a recent development in the matter of the rates charged by the British ship combination for freight from British ports and from New York to South Africa. This is an advertisement of the Prince Line offering "to take freight from England to South Africa at American rates, but for conveyance via New York." The rest of his communication reads as follows:

"Surely this is the climax, and it is to be hoped foreshadows that the Prince Line will soon have the courage to apply these rates without the above-mentioned stipulation. Does it not seem absurd that an English company is only able to offer low rates for goods to an English colony if shipped via a foreign port and if some thousands of miles are added to the normal voyage? Whether the Prince Line, if it openly competes, will be more fortunate than the Houston Line is, however, doubtful, for the rebate system remains as a stumbling block. To get the rebate system declared illegal by our courts seems the only way relief can be attained, and I trust that this way will be pursued, as the continued favoring of United States exports is becoming more and more dangerous to our trade."

In the June number of the Birmingham Chamber of Commerce Journal the following instances of discrimination favoring New York in the South African conference rates were given:

Rates to Cape Town and Algoa Bay.

	British Rates.	American Rates.
Iron bedsteads, bolts and nuts, iron chains, general hardware, tinware, tools	$7.60	$3.65
Brass goods	10.34	3.65
Spades, shovels, etc	6.08	3.65
Galvanized iron	4.86	3.65
Bar iron	5.47	3.65

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Libel—Defamation of Business.

QUESTION: I have recently opened a Hardware store. Another Hardware dealer who has kept a store for some time directly across the street from mine has printed and distributed circulars, in which he states that his goods are much superior and "that an unscrupulous Hardware dealer by the name of Blank has recently opened a store in the immediate vicinity for the purpose of advertising and selling inferior goods to deceive the public." Can I do anything to prevent this?

REPLY: While your rival had the undoubted right to praise his own goods, he had no right to single you out and denounce your goods and charge you with dishonesty in business or with conducting your business with a view to deceiving the public. We think that such a publication could have but one purpose, namely, to injure you in your business, and it is, therefore, if false, clearly a libel. We advise you to institute against him a suit for libel, in which you can recover, not only any actual damages that you may have suffered, but also, in case you can show that he was incited by actual malice, punitive damages, or "smart money" as well.

Death Caused by Negligence.

QUESTION: My brother, who was employed as a day laborer on a building which was being completed, fell down an elevator shaft which was left unprotected and was killed. He was unmarried. Can I recover anything?

REPLY: It was well settled by the common law that no action for damages lay for injuries causing the death of another. But this rule has been abolished by statute in most of the States. The ordinary statutory provision is that an action may be maintained by the executor or administrator of a decedent for the benefit of the surviving husband, wife or next of kin, to recover damages for a wrongful act or neglect by which his death was caused. In such action the measure of recovery would be the reasonable expectation of pecuniary benefit from the continuance of the decedent's life, taking into account his age, income and the persons dependent on him for support. In some States this amount is limited by statute to five thousand dollars.

Liability of Steamship Company for Money Stolen from Passenger.

QUESTION: Some time ago I was a passenger on a steamship and procured a state room for the journey. On retiring for the night I left about $50 in money in my clothing in the state room, having locked the door and fastened the window. During the night the money disappeared. My belief is that it was stolen by somebody who apparently reached through the window of the room. Have I a right of action against the steamship company?

REPLY: The question you ask is a somewhat novel one, but it has been held in New York, in a case involving substantially the same facts as yours, that the steamship company is liable as an insurer of the money or personal effects of its passengers, under the circumstances stated.

It has been held that a railroad company is not liable for the loss of money taken from a passenger while in his berth on a sleeping car during the night, without some proof of negligence on its part. But it seems that a steamer carrying passengers upon the water and furnishing them with rooms and entertainment, is for all practical purposes to be regarded as a floating inn, and the duties of its proprietors to be determined by the principles applicable between inn-keeper and guest. The undoubted rule of the common law in such case is that the inn-keeper is deemed an insurer of the money or personal effects of his guests against all loss not caused by the act of God or the public enemy.

RECENT TRADE PUBLICATIONS.

The Folsom Manufacturing Company, South Bend, Ind., manufacturers of the Folsom Steel Ranges, have recently distributed to the trade their catalogue No. 10. It is a handsome book, well printed on excellent paper and finely illustrated. The general appearance and workmanship of their Steel Ranges throughout is strictly first class. Every Range is carefully made by experienced workmen. They state their patterns are made especially to get the necessary strength and weight in the right place to produce the best results. The ovens are square and extra large. The oven bottom is made of extra heavy steel and securely braced with heavy steel bars riveted to the under side to prevent buckling or warping. The top of same is supported by a heavy casting, which also acts as a support for the top centres and covers. The grate is their own design, Duplex Style, and they claim is the simplest and most durable grate in existence. It can be removed from the fire box without disturbing the side linings or grate rest, and is adapted to burn hard or soft coal, coke or wood. They make these ranges in black enamel style, and finish them with the best grade of nickel plated trimmings. They can furnish all trimmings in plain black where wanted in place of nickel plated. Many other advantages of their Ranges are given in detail in their new catalogue, which will be sent free upon request.

The H. W. Johns Co., 100 William Street, New York City, have issued a price list in envelope size pamphlet form, embracing their Insulating Materials. They state they are in position to supply all requirements in India or Amber Mica. They buy their India and Amber Mica direct from the miners, thereby insuring good quality and prompt shipments. They will be glad to furnish samples in ample quantities and quote prices on any insulating materials in which a customer is interested. They make special mention of their Vulcabeston for Electrical purposes, which is usually moulded into the various forms in which it is required, thereby avoiding the drilling and workng necessary with some materials formerly used for electrical work. Prices for special work will be furnished upon application, accompanied with moulds or drawings. Samples for testing furnished upon request. Send for one of these pamphlet Price Lists for further information.

The Henley Bicycle and Roller Skate Works, Richmond, Ind., have issued a very attractive pamphlet catalogue devoted entirely to the exploitation of their Roller Skates. The book is strictly high grade, finely printed on coated paper, and illustrated throughout. Among the styles they mention are the improved "Monarch" and "Challenge" rink and club roller skates; also Henley's new ball-bearing noiseless roller skates, skate parts, sundries, rink supplies and polo goods. M. C. Henley, the proprietor of the above concern, is the oldest patentee and manufacturer of roller skates in the United States. Their skate works, they state, are the largest in the world, having a capacity of about 2,000 pairs per day, a larger number than all other skate factories combined. Among the many reasons why they claim the Henley skate to be the best, they state "Because it is scientifically constructed, and by the use of rubber cushions, in connection with pressure plate, it is given the requisite tilting or lateral moton so essential to easy and graceful skating, and which desirable quality is possessed by no other make of skates. The largest Henley skate will easily turn a two-foot circle, all the wheels resting squarely on the floor." Those interested in roller skates should not fail to secure one of Henley's catalogues.

The Herring-Hall-Marvin Safe Co., 400 Broadway, New York City, have sent us a copy of a little pamphlet recently issued by them, which is a most attractive and clever one. When closed the little book represents a safe enveloped in flames. However, by opening the door of the safe, the books and valuable papers are found to be intact. The booklet is entitled "Sparks from the Baltimore Fire," which includes a large number of testimonials from firms who saved their valuables during the big fire at Baltimore by having them secured in a safe manufactured by the above concern. Under the head of "Safe Points Worth Remembering" they give a number of hints which they have learned by experience protect the contents of a safe during a fire. Send for one of these little booklets. It will be found of interest in any line of business.

The Gem Cutlery Co., 34 Reade Street, New York, have issued an envelope size pamphlet catalogue exploiting their "Gem" Safety Razors, with which they sent us a small circular calling particular attention to their new line of Holiday Goods, which are illustrated in the above mentioned catalogue containing 32 pages, of which they offer to send a supply upon request. Besides razors, they make stropping machines which can be used on any razor strop without the least danger of hurting the blade or cutting the strop. A trial or examination will demonstrate what a wonderful invention this really is. They also have a large and varied line of "Gem Outfits" to suit the needs of each particular person, all of which make very handsome Christmas gifts. One of their very best sets is Case No. 9. As they say, "It is a perfect beauty." The interior of the case is doe skin and the covering is fancy leather. This set contains a Gem frame, four blades, stropping machine, combination strop, soap, brush, cosmetic, comb and a handsome shaving mirror. The base is 6x9x2½ inches, and weighs 35 ounces, and retails at a moderate price. Send for their catalogue for further information.

J. Wiss & Sons Co., 15 to 23 Littleton avenue, Newark, N. J., manufacturers of high grade shears, scissors and razors, have placed before the trade a new catalogue exploiting their products. They state that since the name of Wiss was originally put on a piece of cutlery it has always been their aim to place on the market the finest article that skilled labor and fine material could possibly make. Their guarantee is unlimited, and every detail of manufacture has their personal attention. Owing to the vast additions they have lately made to their factory, they are in better position than ever to fill all requirements promptly and satisfactorily. They call especial attention to their line of razors, which they claim are the most perfect shaving instruments on the market, made as they are of the finest steel obtainable, correctly tempered. Each one is carefully tested and inspected and set ready for use before leaving their factory. They will replace, free of charge, any razor which does not prove satisfactory, if returned in good condition. All of their razors are full polished blades, crocus finish tang and back, unless otherwise specified. Send for a copy of the above mentioned catalogue.

The Romer Axe Company, Dunkirk, N. Y., have issued a new catalogue, having a most artistic cover of dark green, and bound by a red silk cord. It is an illustrated catalogue, and exploits their axes, which include single and double bitted, in all patterns; boys' axes, hunters' hatchets, sportsmen's hatchets, etc., and Romer's patent saw gummer. The illustrations contained in their catalogue are exact photographic representations of the leading patterns which they make. Other patterns not shown they will be glad to make as ordered, and to quote prices on anything of a special nature which may be submitted to them. This firm having completed the twenty-eighth year of their career as manufacturers of axes, feel that they are well equipped to take care of the wants of the trade, and state they will be glad to give all inquiries their prompt and careful consideration. For further information regarding their goods, write to the above firm for a copy of this excellent catalogue.

The Columbia Grey Iron Co. (Inc.), corner Second and Linden streets, Columbia, Pa., have distributed recently an attractive pamphlet catalogue containing 112 pages, illustrative and descriptive of the products of their manufacture, including Hardware, iron novelties, house-furnishing specialties and toys. They are now manufacturing a more extensive line than ever before, and they respectfully call attention to the fact that they have, in some instances, lessened the list prices of their former line, which has been done to establish the list prices on a more equitable basis. They state that since their incorporation they have sold goods extensively throughout the United States, and they have given satisfaction. Having recently enlarged their foundry, and with greatly improved facilities, they can produce goods at short notice and fill orders promptly. Included in their line of Hardware are hammers, hatchets, floral tools, vises, shears, brackets, chest handles, door pulls, bolts, store door handles, gas stoves, etc. Write for one of their catalogues for further information in regard to their goods.

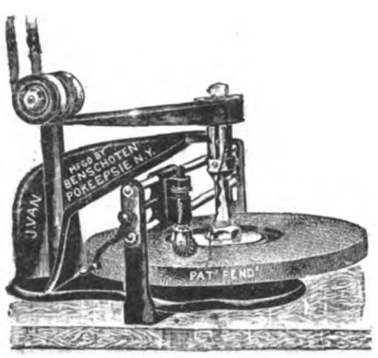
NEW GOODS AND SPECIALTIES.

THE MILWAUKEE BREAD AND CAKE MIXER.

The Milwaukee Bread and Cake Mixer, recently placed on the market by the Stowell Mfg. & Fdy. Company, South Mil-



THE MILWAUKEE BREAD AND CAKE MIXER.

waukee, Wis., is illustrated herewith. It is claimed for this mixer that it will easily mix the stiffest batter or will cream butter and sugar and that it will mix any batter that can be mived with a spoon; that it will mix bread in three minutes, or a cake in less time. It is made of the best malleable iron and tool steel, and can be used on any 12-inch cake bowl.

VAN BENSCHOTEN'S CLIPPER GRINDER.

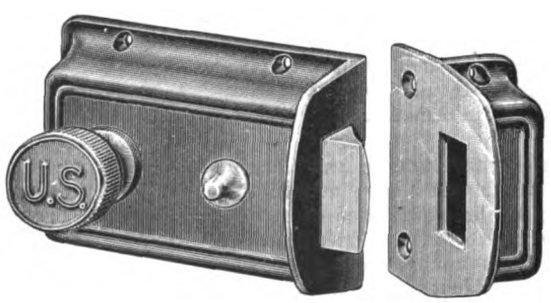
John Van Benschoten, Poughkeepsie, N. Y., is placing upon the market the Patent Clipper Grinder, an article which has been demanded by the trade for the sharpening of clippers, which has long been confined to the manufacturer, as grinders previous to this, have been too expensive. The Grinder is simple in operation. A depression of ⅛ inch at a 4-inch circle in the centre of the stone, allows a flat 5 inches outside grinding surface on which clippers are held parallel, moving them laterally a trifle over the

VAN BENSCHOTEN'S CLIPPER GRINDER.

two edges while grinding, thus keeping the surface perfectly flat and true. A rigid and absolutely positive truing attachment permits of the stone being trued at will, removing all unevenness and glaze. An emery 14 inches in diameter of special grade and construction is furnished with each Grinder and should be run at 1,400 revolutions, having a pulley wheel on grinder two inches in diameter for a one-inch belt. Clippers require constant grinding, so a well established business may be inaugurated, as it requires less than five minutes to grind a pair, for which the universal price is fifty cents. Horse and barbers' clippers, meat choppers, sausage cutters, dies, keys, box knives, plane irons, chisels or anything requiring a flat surface can be ground with this machine.

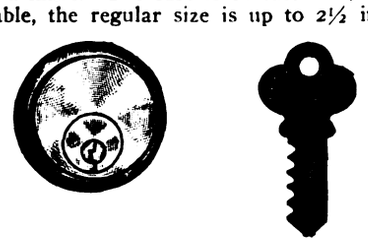
FOR WINDOW DISPLAY.

A new device known as the "Self Propelling Color Reflecting Light" has been placed on the market recently by Glogau & Co., of Chicago, and is especially recommended for use in the windows of Hardwaremen. The light, which we illustrate herewith, is described by its manufacturer as follows: "Before an artistically constructed concave mirror-reflector a beautiful globe, covered with magnificent stones in different colors, is supported on chains



FOR WINDOW DISPLAY.

by a fan-wheel, which runs with its steel point in a jewel knob. The light has its place in the centre of the globe, wonderfully glittering and shining through the colored stones and the skillfully placed openings in the metal parts of the globe. The heat from the electric bulb, gas or the oil light brings the fan-wheel into rotation and the globe revolves around the light. The whole mirror-screen is covered with the reflecting of the bright stones, always running from left to right and always changing colors. It is practically costless to operate, needing only one electric incandescent globe. If run by gas or oil light the cost is about three to five cents per day.



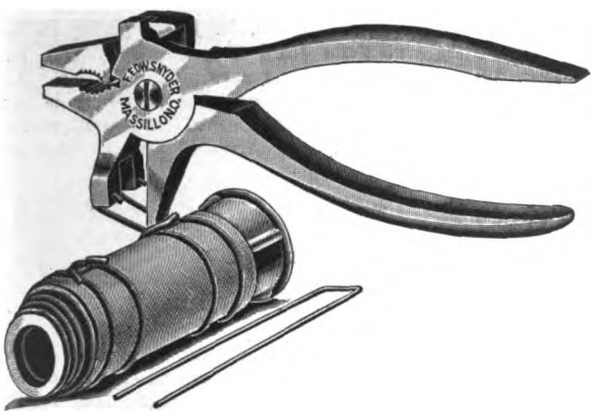
U. S. CYLINDER RIM NIGHT LATCH.

The United States Steel Lock Co., Lyons, Iowa, are the manufacturers of the "U. S." Cylinder Rim Night Latch and Automatic Dead Lock, combined. The mechanism is extremely

U. S. CYLINDER RIM NIGHT LATCH.

simple. When the latch bolt is engaged by the strike it is automatically dead locked, and cannot be pressed back or tampered with by a knife. The case is of cast iron, has box strike, and is adjustable, the regular size is up to 2½ inches, and for

ESCUTCHEON AND KEY.



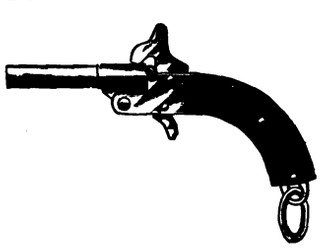
other thickness as ordered. In size it is 2½x3½x1 inch. The lip is 1½ inches. It is reversible, right or left. The illustration shows regular bevel, but reverse bevel can be supplied. It comes in four finishes, ivory, japan, nickel plate, old copper and bower barff. The Lock is operated by key from the outside and by knob from the inside. The bolt can be held back by a stop. It can also be master keyed. The company is also making a regular Night Latch with the same style case.

SNYDER'S COMBINATION PLYERS.

F. Edward Snyder, Massilon, Ohio, is the manufacturer of Snyder Improved Combination Plyers, which is a novel and con-

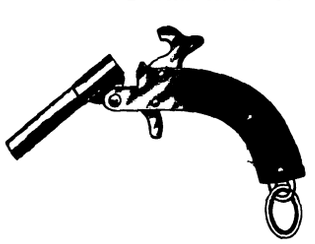
Digitized by Google

venient wire cutter, flat plyers or burner plyers, thus making a most complete and desirable tool for everyday use, and no one handling or using rubber hose can well afford to be without it. The advantages of these plyers are referred to by the manufacturer as being over all other devices for wire couplings on hose, among which may be mentioned: "While being a complete tool for the manipulation of wire in securing couplings, etc., on rubber hose, it also contains other useful devices for everyday use.



SNYDER'S COMBINATION PLYERS.

Wires of all sizes suitable for this tool need no preparation other than cutting to length and bending in the form of a staple. There being no brazing of wires required, hence they will not break when being applied, and are far better, more convenient and much cheaper than any other hose strap on the market. A length of wire for any size hose is suitable for all plyers of that size, and can also be used for any hose of smaller size; thus it does not require so many different lengths when buying prepared wire, and only requires one application of the tool to put the wire on perfectly secure. Any one having this tool and not having any prepared wire on hand has the advantage of using any scrap of suitable wire and making a complete job at no expense. With this tool in hand, you have the whole outfit required for the removal of old wire and the manufacturing and application of new wire or band. The fact of this tool being so constructed as to use any common wire, or prepared wire bands that can be bought very cheap, and combining also other novel features commends it to everybody as the most convenient and economical device ever produced.

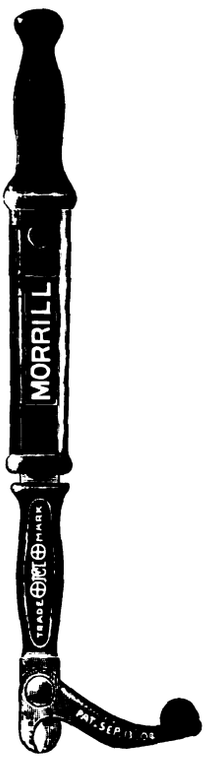


DAVISON'S MINIATURE PISTOLS.

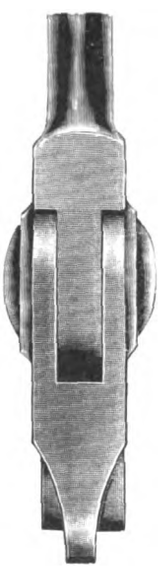
Already famous as manufacturers of Miniature Tools, the Davison Manufacturing Co., of Brooklyn, N. Y., have recently added to their popularity by their latest novelty, which we illustrate herewith. As will be seen, it is a perfect reproduction of the large dueling pistol and will shoot a small blank cartridge,

CLOSED.

making a loud report. It is claimed to be the smallest pistol in the world shooting a real cartridge, and is handsomely finished in nickel plate and furnished with either ebony or ivory han-



OPEN.

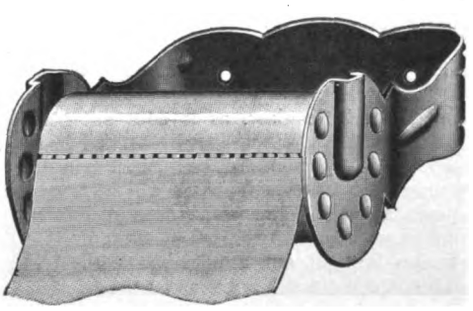


dles. Dealers have in the past found that the miniature tools and other novelties manufactured by this concern have never proven dead stock and it would seem reasonable that this newest novelty would prove to be an even better seller than its predecessors.

MORRILL'S NEW NAIL-PULLER, NO. 1.

Charles Morrill, 277 Broadway, New York, has brought out a Nail-Puller known as the Morrill No. 1, which embodies many new and novel improvements. As can be seen by the illustration, the foot is mounted, male and female, instead of the regulation scissor-like fashion. This reduces the wear on the pin to a minimum and always insures a correct alignment of the jaws. In the ordinary Nail-Puller, after it has been used a while, the rivets wear away and spread outward, causing the jaws to spread apart sidewise when the strain of pulling a nail is brought to bear

NO. 1.



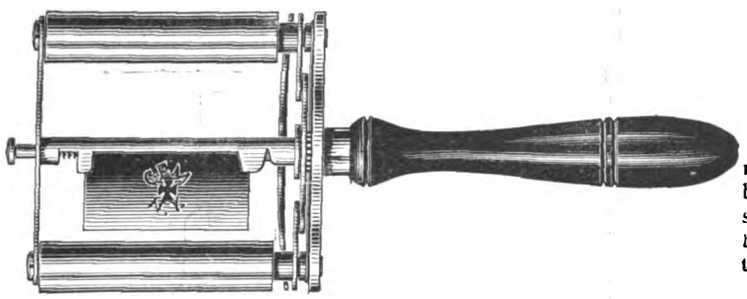
IMPROVED JOINT.

upon them. Mounting the jaws, male and female, enables a pin to be used instead of a rivet, reduces the wear, and the side walls will not permit the jaws to spring apart sidewise. The foot is so shaped that twice as much power can be developed as in the ordinary shaped foot, the result being that harder holding nails can be pulled than with any other puller. No springs are used, a small ball of metal on the end of the foot serving as a counter-weight and taking its place. The shank has a handle and hand-guard forged integral with it. This prevents the hand from being pinched or bruised by the ram. The shank is built on the model of an eye-beam, thus combining the greatest strength with extreme lightness. Throughout the rest of the tool the same scientific construction has been carried out, giving as a result a perfectly balanced and handsome appearing tool. The shank and foot are drop-forged from a very high grade steel and combine the greatest strength, together with toughness. The tool is fully warranted, and will pull all kinds of nails, either with or without heads.

THE SATIN TOILET PAPER HOLDER.

We illustrate herewith a new Toilet Paper Holder which is being put upon the market by the Shelby Spring Hinge Co., of

THE SATIN TOILET PAPER HOLDER.



Shelby, Ohio. This holder is stamped out of heavy spring steel and is nicely nickel-plated, making a neat appearing holder. The roller is of hard maple, with an axle which slides into the holder

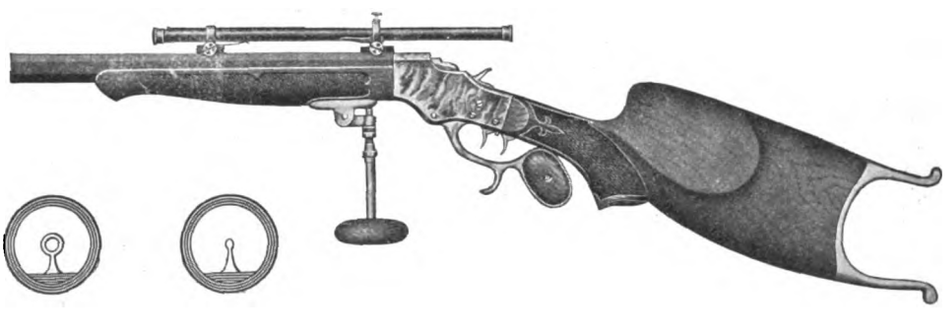
Digitized by Google

in a recess at each end, slipping over a small lug, which prevents its lifting out of place accidentally. When the paper is on the roller and the same is in place it is so locked that the sides of the holder cannot spring out and release the roller with paper. The fixture is a very neat and simple appliance, thoroughly practical in every respect and the manufacturers invite inquiries upon it.

AN IMPROVED STROPPING MACHINE.

The Gem Cutlery Co., 34 Reade Street, New York, are offering to the trade a new Double Roller Stropping Machine that possesses a long array of good talking points which should make it a ready seller. The machine, which we illustrate herewith, is strengthened by a strong bar across the top, which holds both the roller and blade holder in perfect alignment and in such a

GEM DOUBLE ROLLER STROPPING MACHINE.

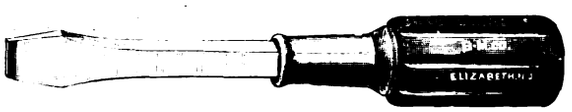


position that they cannot possibly get loose or out of order. It is claimed that this feature is to be found on no other stropping machine. This machine can be used on any razor strop without the least danger of hurting the blade or cutting the strop. The attaching of the safety razor blade to the machine is a very simple operation, as will be seen in the illustration. After this has been done a few movements back and forth on a good razor strop puts the knife in perfect condition.

STEVENS' LITTLE OFF-HAND RIFLE, WITH TELESCOPE.

The demand for telescope sights has more than quadrupled during the last two years, and we think this is largely due to the popular prices that have been placed on high-grade goods by the Stevens Arms & Tool Co. Their line today is the most complete offered by any maker of telescopes, and they are just placing on the market the Stevens' "Little Off-Hand," of which we give an illustration. The tube is only one-half inch in diameter and 12½ inches long, with proportionately small detachable mountings, can be instantly removed from the rifle and replaced without disturbing its adjustment; has a narrow, steel rib sliding in a grove in the forward mount, with fine screw adjustment for both windage and elevation. The field is not as large as the ordinary telescope, but as this telescope is designed for target work the matter of field is not important. As regards brilliancy and definition it is equal to the larger scopes of the same power; is a most convenient little glass, as it does not necessitate an extra case for the rifle. The rifle can be carried in the regular case, the 'scope instantly removed and carried in the pocket. Although intended for a target glass, it will be very useful for hunting purposes as well. The power is 4 diameters, and the price, including mountings and rib, is $25; without rib, $20.

They have also brought out a telescope with Aperture and Pin Head. This is a decided innovation in the telescope market. Heretofore the rifle telescope has been fitted with cross hairs, and, while it is generally conceded to be the best form of sight, there are some who think they cannot use them, and to accommodate this class of shooters they have designed a telescope with aperture and pin head. (See illustration.) They are made in exact proportion to the ordinary sights, and in one size only. The telescope is especially designed for these sights, and they cannot be applied to telescopes of other makes. They are furnished with detachable mounts; power, 5 diameters; price, $18.



All Stevens telescopes can be fitted to rifles of any standard make.

STEVEN'S LITTLE OFF-HAND RIFLE, WITH TELESCOPE.

THE BULL DOG SCREW DRIVERS.

Braunsdorf-Mueller Co., Elizabeth, N. J., are placing on the market what they call their "Bull Dog Screw Drivers" for machinists, automobilists, etc. They are made of crucible tool steel, carefully hardened and tempered. The points are finished ready for use. They have nicely polished hardwood grooved handles. Each one is tested and warranted perfect. They are made with round blades, 2, 3 and 4 inches, and with square blades 2, 3 and 4½ inches. A wrench can be clamped on the square blades, giving extra purchase or leverage. They will fill the demand for a driver that will start rusted screws without twisting or snapping.

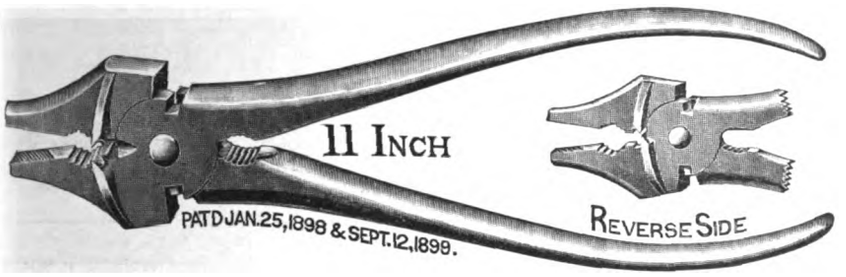
THE BULL DOG SCREW DRIVERS.

THE CLIPPING SEASON.

The hair certainly flies in earnest about this time, and keeps it up for three or more months. The clipping of horses has now become general, not only in this country but abroad, and everything that wears hair in the equine world runs a pretty good chance of losing it at this season.

The practice of clipping for a long time was confined to liverymen, and others who got their living out of the horses they kept, and who were more interested, perhaps, than others in doing everything possible for its health. Now, however, the livery horses are but a small percentage of those clipped, for practically all horses in use in this country have their hair removed either in the fall or spring. Even farm horses are now clipped to a very large extent.

At this season of the year more, perhaps, than any other, a horse is liable to colds and pneumonia, brought about by standing around with a long, heavy, damp coat of hair. When clipped they dry out as fast as the perspiration is secreted, and although the weather may be very cold, the animal is really warmer than he would be should he have on a long coat, and that wet with sweat.



Very few stables are now without a clipping machine, and the operation that used to cost a horse-owner several dollars can now be performed by a stable hand in less than an hour's time. Clipping machines have also been greatly reduced in price the last few years. Formerly a good machine cost from $35 to $50, but one company, the Chicago Flexible Shaft Co., of 106 LaSalle avenue, Chicago, realizing the demand for a good machine at a popular price, went into the making of clipping machines on an enormous scale. They not only brought prices down to a fraction of what they were, but they actually improved the machines at the same time, and today offer a machine for $10.75 which could not have been produced for $100 five years ago. It is said to have taken highest awards wherever exhibited. Why wouldn't it? It certainly did carry off all honors at the Pan-American.

The main reason the dealers and horse owners buy these is because the machine pays, makes a horse live longer, work longer, and worth more. They publish a very handsome catalogue.

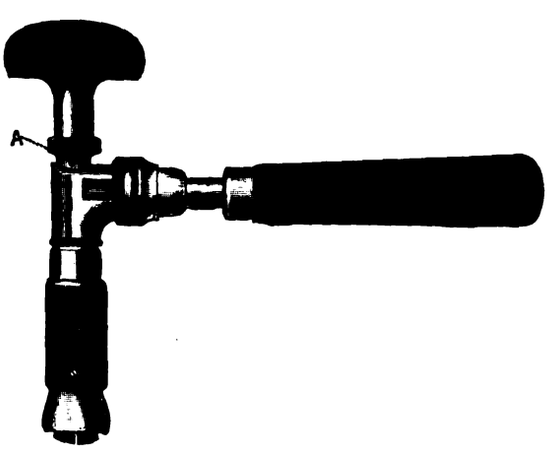
CRONK'S STAPLE PULLING FENCING PLYER.

The Cronk & Carrier Mfg. Co., Elmira, N. Y., are the manufacturers of the Cronk Staple Pulling Fencing Plyer, of which we present an illustration. It is a unique combination of all the tools needed in the erecting and repairing of wire fencing. It really is about nine tools in one; plyers, three cutters, hammer, staple puller, nail puller, splicer and stretcher. It forms an effective staple puller. The claw won't slip off and the eleven-inch lever enables the longest staple to be pulled quickly. There are three sets of cutting blades, enabling one to cut any wire up to

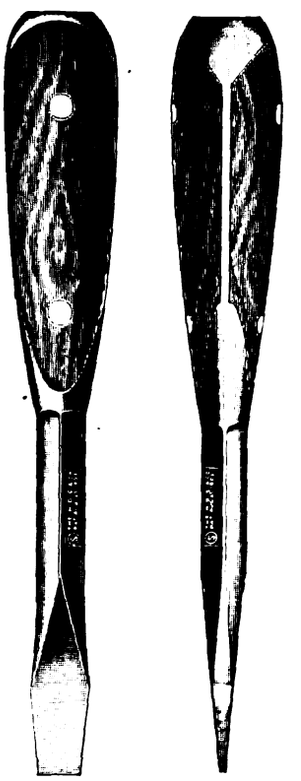


CRONK'S STAPLE PULLING FENCING PLYER.

No. 8 gauge. The set of cutting blades on the side of the tool is so arranged that the end of the cut wire can be grasped at the same time it is cut. You have the choice of two grips for holding wire to be spliced. The difference in size affords an opportunity to hold large or small wire firmly, so that a smooth and effective splice can be made. It can be used also as a stretcher, by grasping the wire in the inside grip and getting a bearing with the point of the plyers on the post, one has a leverage on the wire which will bring it tight. A turn around the post holds the wire while the staple is driven. For driving staples it presents unequalled advantage. The two hammer faces on the tool are large enough and its weight—slightly over a pound and a half—is just enough to make it a convenient and efficient hammer for staple driving.

CORNER RATCHET BIT BRACE.

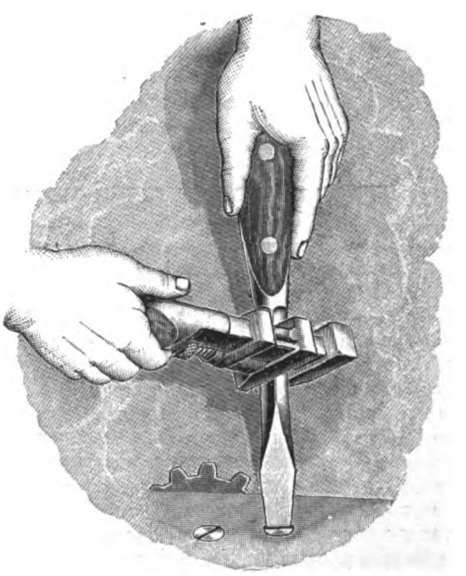
John S. Fray & Co., Bridgeport, Conn., are introducing to the Hardware trade their new corner Bit Brace, of which we present an illustration. It is designed for use in cramped positions where ordinary braces could not be used. The chuck is the same as used on this firm's No. 106 line of braces. The entire tool, both in material and labor, is first class. Metal parts are nickel plated, head and handle of cocobolo wood. Between the



CORNER RATCHET BIT BRACE.

head and ratchet frame is placed a knurled collar marked "A" on cut; the use of this is to assist in starting a bit or tool previous to its entering the wood or other material sufficeintly so that the friction thereof shall hold it from turning back while the handle is turned to take a fresh hold on the ratchet; the operator, with the finger and thumb of the hand supporting the head, bearing slightly on this collar, holds the chuck, preventing its turning, except as driven by the ratchet. The braces are packed two in a box.

THE PERFECTION HANDLE MACHINISTS' SCREWDRIVER.



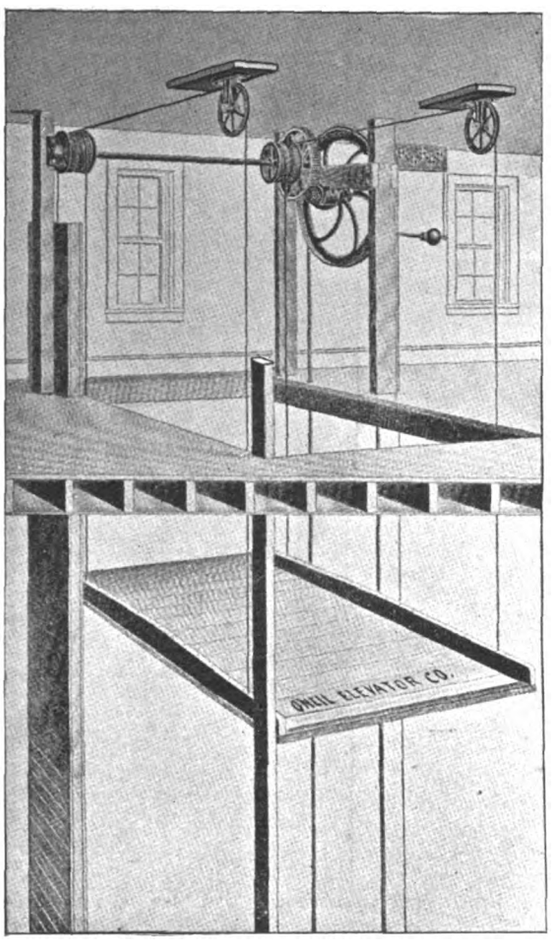
H. D. Smith & Co., Plantsville, Conn., are introducing to the Hardware and Supply Trade the "Perfect Handle" Machinists', or Heavy Service Screw Driver, claimed to be the first tool of its kind ever made worthy of the name "machinists'"—or worthy of the patronage of the mechanics to whom such a tool is a necessity. Put a wrench onto the square shank when you want to tighten or loosen cap screws, set screws, etc. Put all the power you wish back of the wrench. The maker's unqualified guarantee is back of the screw driver.

For practicalness the screw driver leaves nothing to be desired, and while there have been some made styled "machinists'," they were such only in name. Their great merit is so self-

THE PERFECTION HANDLE MACHINISTS' SCREW DRIVER.

evident and their price so reasonable that they need no extensive argument to effect a sale.

CAN BE USED WITH A WRENCH.



Made in Two Sizes.	Nos. 9½.	10½.	
Length over all	9½	10½	inches
Length of Blade	4½	5	inches
Size of Square	7-16	5-16	inches
Width of Point	½	¾	inches
Thickness of Point	1-16	5-64	inches
List Price, Per Dozen	$12.00	$13.00	

Packed one-half dozen in a Slide Cover Wooden Box. Six dozen in a case.

O'NEIL'S CARRIAGE OR WAREHOUSE ELEVATOR.

The machinery of the O'Neil Carriage or Warehouse Elevator, which is illustrated herewith, consists of two steel shafts, two drums, one spur gear, one shrouded pinion and a hand rope wheel, which are securely fastened to the shaft with keys; two tail-end sheaves, and a powerful band brake. The band brake operates on the outside diameter of the large rope wheel. It is applied by a downward pull of the check line, which will hold the load at any point, and is released by an upward movement.

O'NEIL'S WAREHOUSE ELEVATOR.

The platform has no obstructions above, and can be made any size, and is constructed of the best well-seasoned lumber, strongly braced with irons and fastened together with through bolts; the floor is tongued and grooved, and is guided by iron guide on one side only, and is suspended by four wire cables, one on each corner winding on spirally grooved drums to prevent cables from chaffing and wearing, and thereby greatly increasing durability. They are attached to car by leaded sockets. The counter-balance is adjustable and can be made heavy enough to suit the platform or load to be lifted, and is suspended by one separate fine wire cable. This elevator is manufactured by the O'Neil Elevator Co., 628 Cherry street, Philadelphia, whose line includes hand elevators and dumb waiters of every description.

The manufacturers state:

"We guarantee our elevators to be the best and lowest priced machines on the market and guarantee them against defective workmanship and material for one year. Our patterns are of the latest and most improved design that science has discovered, none of them being over two years old.

"We ship our elevators to all parts of the United States and foreign countries; our customers experience no difficulty in having them put in place, for with the assistance of drawings sent with each shipment any competent carpenter is enabled to place our elevators in perfect running order."

✤

A traveling man at a hotel found a hair in the honey. He went to the proprietor. "I can't help it," said the latter. "I bought it for combed honey." The next day at dinner he happened to run across a small hair in the ice cream and the landlord could not account for it. "The ice is shaved," he said. The guest was boiling, for the next day he picked a raven hair out of his portion of the pie, and angrily jerked up the proprietor, who turned him down effectually as follows: "In the apple pie, hey? Well, that beats the Dutch! I bought those apples for Balduns."

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED SEPT. 20, 1904.

370,048. Combination Wrench. H. W. De Courtenay, Newton, Mass.
370,150. Metallic Shovel-Handle. J. O. Mantor, Northampton, Mass.
370,166. Combined Glass Holder and Number Plate for Doors. W. H. Taylor, Stamford, Conn.
370,183. Lock. W. D. Doremus, Washington, D. C.
370,185. Coal and Ash Sifter. D. L. Falardeau, Cohoes, N. Y.
370,197. Boot Jack. J. H. Kennedy, Eola, La.
370,201. Lantern. A. Loeffelholz, Milwaukee, Wis.
370,202. Pillow Sham Holder. S. F. Marchant, Chicago, Ill.
370,236. Carving Fork. F. W. Brittin, Birmingham, Conn.
370,253. Lifting Jack. E. B. Griffin, Freedom, Pa.
370,254. Combination Lock. J. W. Hard, Chicago, Ill.
370,255. Screw Driver. D. R. Hart, New York, N. Y.
370,325. Combined Latch and Lock. W. D. Doremus, Washington, D. C.

PATENTS ISSUED SEPT. 20, 1904.

770,257. Seal for Screw Nuts or the Like. E. J. Brooks, East Orange, N. J.
770,262. Adjustable Window Shade. B. F. Childress, Lynchburg, Va.
770,266. Lock and Rose. N. W. Crandall, New Britain, Conn.
770,273. Cutting Tool. H. Dyer, Detroit, Mich.
770,294. Weighing and Computing Scale. T. A. Killman, Liberty, Tenn.
770,315. Appliance for Opening and Shutting Windows. K. Rodelstab, Bruchsal, Germany.
770,316. Skylight or Transom Lifter. K. Rodelstab, Bruchsal, Germany.
770,347. Shears. J. H. Brown, Kansas City, Mo.
770,374. Nut Lock. E. A. Laughon, Roanoke, Va.
770,380. Combination Tool. Wm. H. McLeod, Kansas City, Kansas.
770,382. Wrench. J. Newns, Chester, England.
770,407. Buggy Wrench. R. M. Ware, Stockdale, Texas.
770,408. Lock. N. D. Wells, Dayton, Ohio.
770,413. Detachable Tool Handle. Wm. Ashert, Des Moines, Iowa.
770,422. Nut Lock. E. E. Drury and W. E. Storer, Glouster, Ohio.
770,426. Coffee Pot. C. Frank, Albany, Ga.
770,435. Nut Lock. J W. Lawrence, North Tonawanda, N. Y.
770,542. Night or Dead-Lock Latch. S. R. Slaymaker, Lancaster, Pa.
770,551. Shears. E. Blasberg, Detroit, Mich.
770,574. Spanner or Wrench. M. Halsted and J. Chandler, Birmingham, England.
770,590. Bracket. J. F. Kress, W. Loshelder, H. O. Gross and H. Loshelder, Jr., Pittsburg, Pa.
770,594. Rake. P. A. Letendre, Suncook, N. H.
770,595. Hinge. W. Lovette, Mariner Harbor, N. Y.
770,595. Door or Window Lock. W. F. Martin, New York, N. Y.
770,699. Wrench. O. S. Randall, Newark Valley, N. Y.
370,394. Jar Fastener. T. B. Howe, Scranton, Pa.
370,395. Handle for Ladles or Dippers. L. K. Hurford, Canton, Ohio.
370,404. Sheet Metal Can, and the Art of Manufacturing the Same. E. Norton, Chicago, Ill.
370,406. Egg Beater and Mixer. D. Peters, Cincinnati, Ohio.
370,414. Seal Lock. J. S. Roark, Augusta, Ga.
370,447. Adjustable Wrench. C. M. Brown, Rockford, Ill.
370,457. Nut Lock. J. F. Duff, Murphysborough, Ill.
370,458. Grate. W. B. Dunning, Geneva, N. Y.
370,468. Door Spring and Check. C. E. Griffing and J. W. Ashborn, Danbury, Conn.
370,480. Alarm Clock. U. V. Jaeggi, Auburn, South Australia.
370,485. Adjustable Miter Clamp. A. J. Linney, Cambridgeport, Mass.
370,503. Pie Turner. G. H. Thomas, Chicopee Falls, Mass.
370,505. Safety Razor. J. Turner, Worcester, Mass.
370,506. Safety Razor. J. Turner, Worcester, Mass.
370,507. Wrench. V. J. Van Horn, Shannon, Kans.
370,526. Sash Fastener. F. J. Briggs, London, and S. Pardoe, Kilburn, County of Middlesex, England.
370,552. Soldering Iron Heater. W. Mellor, New York, N. Y.
370,563. Paper Bag Holder. W. A. Simmons, Excelsior, Mo.

Digitized by Google

370,568. Permutation Lock. A. Stoner, New York, N. Y.
370,571. Brush. C. E. Thompson, Lansingburg, N. Y.
370,586. Gate Latch. W. H. Woodford, Owensboro, Ky.
370,588. Nut Lock. W. Adair, Leesville, Ohio.
370,594. Steam Cooker. A. M. Amos, Buffalo, N. Y.
370,596. Ax. J. Ballard, Wausau, Wis.
370,638. Cork Extractor. F. T. Marwood, Blackburn, County of Lancaster, England.
370,639. Milk Pail. J. F. McMillin, Mount Pleasant, Pa.
370,650. Spike. J. S. Pessenger, Brooklyn, N. Y.
370,654. Slide for Extension Screens. E. N. Porter, Burglington, Vt.
370,665. Towel Arm. C. G. Udel, North Indianapolis, Ind.
370,676. Jar Fastener. R. Bloeser, Scranton, Pa.
370,677. Alarm Lock. W. B. Bradsby and E. W. Hagee, Greenville, Ill.
370,734. Ratchet Screw Driver or Drill. J. Fryxell, Moline, Illinois.
370,748. Curry Comb. M. Sweet, Troy, N. Y.
370,752. Pipe Wrench. J. H. Guiley, East Saginaw, Mich.

PATENTS ISSUED SEPT. 27, 1904.

770,767. Safety Razor. M. A. Mihills, Highland Park, Ill.
770,837. Door Check. E. J. Wells, Nashua, Iowa.
770,843. Cooking Utensil or Other Vessel. F. H. Blankley, Terre Haute, Ind.
770,858. Trolling Spoon. R. C. Hornung, San Francisco, Cal.
770,881. Self-Oiling Plane. J. Weyland, Los Angeles, Cal.
770,925. Device for Holding Spoons. R. R. Pyle, Wilmington, Del.
771,116. Trolling Bait. H. P. Barnhart, Logansport, Ind.

J. D. WARREN MFG. CO.'S "WORLD'S FAIR SERIES."

The J. D. Warren Mfg. Co., Chicago, manufacturers of the Warren Patent Glass Front Hardware Shelving, have just brought out the most advanced and practical designs of Hardware Shelving they have ever issued, in Portfolio form, known as their World's Fair Series," in which are combined a portion of the Cabinets exhibited in the Varied Industries Building, with

AS THEY USED TO LOOK.

other practical Cabinets. These combinations, printed in color on sheets thirty inches long by twelve inches wide, illustrate their Cabinet Shelving in lengths of 25 feet, which their experience has taught them is the most correct way of assembling their Unit Cabinets, as no merchant can go astray in ordering any one of the Combinations, and as many stores will require fifty or

AS THEY LOOK WITH WARREN'S SHELVING.

seventy-five feet in length, these combinations can be joined or special Cabinets selected from them. Other Cabinets can be added in front or rear, as may be desired. On the cover they have very forceful illustrations showing the contrast between the "old" and "New" way of store arrangement, with the following explanation of what inspired J. D. Warren to undertake the evolution of store arrangements, to which he has devoted ten years to accomplish, as shown in the illustration of the up-to-date store.

WHOLESALE AND RETAIL HARDWARE JOINT COMMITTEE.

We have received the following interesting communication, having reference to the work participated in by the Hardware Joint Committee since it was formed. It will be read with interest:

Gentlemen: The Wholesale and Retail Hardware Joint Committee, which was formed at a meeting of the representatives of the retail and wholesale dealers, held in St. Louis, June 23d and 27th, have been actively at work since that time calling attention of the trade in general to the catalogue house question, and inducing manufacturers to use their best efforts to prevent in some way a demoralization of prices.

The manufacturers have generally admitted that the quantity of goods sold by the catalogue houses was extremely small when compared to their total production, and have begun to realize that it is not to their interest to have quotaions made which prevent those who distribute their goods to retailers and to consumers from making at least a margin of profit to cover the services rendered.

The committee has not attempted any coercive measures, beheving that our contention was just, and that it was but necessary to properly present the matter to have the manufacturers apply the remedy. We are standing on the platform adopted in St. Louis, which was fully outlined in your columns. A very large number of manufacturers have signified their intention of immediately discontinuing the sale of goods to catalogue houses. The compiete list will be furnished the retailers of the country from time to time through your columns.

Some of the most prominent manufacturers who have taken this stand are the following:

Henry Disston & Sons, Stanley Works, American Axe & Tool Co., Fayette R. Pump (Inc.), H. B. Black & Co., Covert Mfg. Co., Norton Tool Co., Hermann Boker & Co., Hamilton Rifle Co., James H. Mann, Mann Edge Tool Co., Eagle Lock Co., Dunn Edge Tool Co., Russell & Erwin Mfg. Co., Hussey & Binns Shovel Co., Evansville Tool Works, Kelley Axe Mfg. Co., Finley Axe & Tool Co., Germantown Tool Works, Hopkins & Allen Arms Co., White Mountain Freezer Co., J. Stevens Arms & Tool Co., McKinney Mfg. Co., F. E. Myers & Co., Schollhorn Co., and many others.

We most respectfully invite communication with the jobbing and manufacturing trade on this question. The retail trade will please address their communications to M. L. Corey, secretary, Argos, Ind. We find the leading jobbers of the country are opposed to selling this class of dealers. The members of the National Hardware Association have reaffirmed the position which they took several years ago.

One of the catalogue houses has recently issued a new book, in which we find quite a number of prices have been advanced to a proper standard. Thus it will be seen that the work of our committee is bearing fruit.

We have read with interest the articles appearing in the trade papers from time to time on this subject. We regret that these did not appear over the signature of the writer. The members of our committee would be pleased to answer communications which have an identity, but we have felt that articles that appear in trade papers without the signatures of the writers should not be dignified with a reply over the signature of our committee.

Respectfully submitted,
T. James Fernley, *General Secretary.*

THE IMPLEMENT & VEHICLE JOURNAL, OF DALLAS, TEXAS.

We have received a copy of the Implement & Vehicle Journal, Volume 1, No. 1, which has been added to trade journalism of the south by the Texas Trade Review Publishing Co., of Dallas, Texas, after the need for such a publication was made manifest by their having had for a long time an "Implement & Vehicle Edition" of their paper, devoted to these growing trades, and the increasing importance of Dallas as a distributing centre for Farm Machinery, Implements and Vehicles. We extend the right hand of good fellowship to Col. A. B. Taber, its editor, and welcome him to the labors of the position, trusting they will be found congenial, for which his familiarity for thirty years with the Implement trade amply qualifies him. We shall look for the monthly appearance of the Implement & Vehicle Journal with more than the usual interest.

HARDWARE FACTS AND FICTION NOT GENERALLY KNOWN

(Specially Contributed)

Seventh Article.

A TALE OF SPOONS.

It is evident that spoons were unknown to early man, but a Scotchman has remarked they were quickly discovered when the first bowl of broth was cooked. At the epoch of hot broth in the evolution of man a spoon was found to be indispensable. As the ladle to the pot, so is the spoon to the bowl. Savages used spoons of wood, but even before the formation of a bowl nature provided scallop shells for the savage whose caldron smoked by the seashore, and those who dwelt in the forest glade found spoons at hand. All the most necessary utensils of the kitchen have their originals in the workshop of nature—the knife is in the flint, the fork in the pronged stick, the gourd is the model both of saucepan and bowl, the divided cocoanut provides a perfect cup and the broad leaf or round piece of bark a plate. The spoon was found by forest dwellers in the shells of lesser nuts, and he soon learned to attach a handle in the shape of a cloven twig. By and bye inland man began to carve his own spoons out of wood. Long before the Romans began to work in horn the ancestors of the buffalo presented men with finished examples of the spoon; wherever animals roamed at large horns were at hand, and were used in their natural state both as cups and spoons. In early days spoons were only used for hot liquid, such commodities as boiled rice and semi-solid foods being eaten with sticks and forked twigs. The people of Barbary used neither knives or forks and rarely spoons; in most cases the Oriental uses a spoon for drinking purposes only. Coming down to times nearer our own, it would appear that early British silversmiths and goldsmiths made some excellent and artistic spoons, examples of which may be seen in the British Museum. Curiously the spoon has been entirely neglected in heraldry, although nearly every household article of utility was pressed into the service in the construction of crests and armorial bearings.

In the crown treasures of Great Britain there are several famous spoons, the most notable being the Coronation spoon, used for anointing the sovereign. It is made of gold and is a fine piece of work, an elegant arabesque pattern being engraved on the inner surface. It is of great antiquity, being known to have been used in the twelfth century. At one time spoons for taking snuff were constantly used, and in connection with their use it has been said that spoons are used in every function. They are with the king in his crowning, with the babe at his christening, the corpse at his burying and the rest of the world at snuff-taking. The tea drinkers of a century ago were very proud of their caddy spoons and collections of old silver contain many beautiful examples of decorated tea-caddy spoons. Spoons have always been used as gifts—the christening spoon given to children and the wood spoons to brides for good luck. Silver spoons figured conspicuously among the inventories of silver plate in the past, today they only take a place with many other table plate according to the wealth of the owners. All persons know how to drink a health or receive a toast at feasts, but the ancient custom of holding up spoons in honor of the donor of the feast is a forgotten habit.

The gift of spoons by sponsor or visitor is an old English custom still maintained, although not to the extent it was formerly. St. Paul's Day, the first festival of an Apostle in the year, was often the occasion of gifts, hence the custom of giving Apostle spoons. Buyers and sellers of old silver know the value of Apostle spoons, and how their worth increases as the set preserved becomes more complete. Many persons gave one or more spoons to their god children, always including a spoon with the representation of the Apostle to whom the child or the donor was dedicated. Only wealthy donors gave full sets, consequently some of the less favored apostles are very rare, and spoons bearing their image now sell for exceedingly high figures.

"What has he given her? A faire high standing cup and two great 'postle spoons." The hat or flat covering on the head of each figure preserved the features of many of the apostle spoons from defacement.

In a lengthy inventory of the effects of Rowland Dutton, of Hatton Hall, Cheshire, date March, 1604, the following item appears: 21 apostle spoons, weighing 41 ozs., at 4/8 per oz. What would these sell for now?

A very scarce book on "The Spoon," of American origin, published in 1845, contained about one hundred illustrations of different types of spoons dating from the earliest times, showing the number of different patterns of spoons which had been introduced from time to time by enterprising silversmiths and leaders of fashion. In foreign countries spoons have also been used for centuries. In China porcelain spoons were employed until quite recent years, but chopsticks have always been used in China for eating rice and other preparations for which western peoples would require spoons.

Coming down to times when spoons were regarded as necessary table appointments, we find that certain fashions in patterns and shapes have prevailed at all periods. At the present time when there is a revival of art, and a general adoption of reproductions of all old types, it is difficult to understand how tenaciously the housekeepers of bygone days clung to the style of the period in which they lived, and even sacrificed priceless antiques in order to have their silver plate refashioned. So in the past, after the days of "seal heads" and some of the cruder patterns rat-tails came into vogue. Among the more ornate patterns which have prevailed during the past century or so may be mentioned "thread," "bead," "shell," "lily" and king's" patterns. The fiddle has had a longer and more extended life than most other patterns, and is still very generally employed for household use.

FORKS; ANCIENT AND MODERN.

"Then must you learn the use and handling of your silver forks at meals."—Ben Johnson.

In the list of jewels belonging to Piers Gaveston, the favorite of Edward II., who was executed by the discontented Barons in 1312, there was an entry referring to silver forks, which he appears to have used to eat pears with, and which were doubtless an article of luxury not generally known at that period. It seems not improbable that the fork as in this instance, may have been used at first for eating fruits; ancient records only refer to forks made of silver, and in no instance to commoner forks made of other metals similar to the records of knives and spoons.

Forks are said to be an Italian invention, and were first introduced into Great Britain by Tom Coryate, who brought silver forks from Italy to his home in Somersetshire in the year 1600, and in consequence was nicknamed Furcifer by his friends. Another record states that silver forks were used by invalids about the year 1690. A traveler who visited Venice in the early years of Queen Elizabeth records his surprise at finding each person served "with a fork to hold the meat while he cuts it." There is no authentic records of the ancients, either Greeks or Romans, using forks, but it is stated that in 1834 among other articles of silver found along with a hoard of Saxon pennies at Lavington North Wilts, several articles of personal use and adornment, including a spoon and fork, were discovered. The article in question, however, may have been used for some other purpose. A writer in the eighteenth century says that forks were regarded as luxurious toys for the great and noble in the later middle ages, and were used in eating fruits on state occasions. Forks were not used in England regularly at table until the reign of James I. There is no doubt that the use of forks was much ridiculed in England, and the fork-using traveler was spoken of with contempt. Until comparatively recent years the table forks used by the middle classes in Great Britain were made of steel, and had three prongs. Carving forks and larger forks for kitchen purposes having only two prongs. The large dinner forks commonly called table forks were introduced in France in 1645. It is said that Prince Rupert was one of the first to bring over a set into England; he bought new plates and procured twenty-four silver forks in 1670. Sixteen years later Prince George of Denmark followed his example and bought some. Sir Richard Edgcumbe, about that time procured some also. Some years ago a flat, three-pronged fork, made in 1680, was dug up in Covent Garden, London, but one possessed by the Musgrave family is the oldest silver fork made for table purposes known to exist.

The early portion of the reign of George III. was a grand time for the fork makers, and indeed, for all silversmiths, for a great impetus was then given to manufacturers of silver plate. At that time most of the forks were made with three prongs, but gradually four were found to be more convenient. For nearly a century steel table forks, with handles like the knives they were used with, were in everyday use in most of the homes of middle class Englishmen. The introduction of German silver, whitemetal, Britannia and other composite materials quickly led to the introduction of four-pronged forks in these metals similar in form to those hitherto made only in silver. Their general use quickly spread throughout the country, and now steel table forks

Digitized by Google

may be regarded as obsolete. The patterns used in the manufacture of forks have always been in line with those of spoons and are generally made to correspond in every way with spoons and other table appointments, the prevailing styles being followed.

It would be wearisome to pursue further the tale of table cutlery and its development, as there are few matters of interest worth recording in its march and progress. It is worthy of note, however, that many persons devote considerable attention to old silver forks and spoons, and some have gathered together interesting and valuable collections of such articles.

CASH PRIZES FOR CLEVER ADVERTISERS.

We wish to call special attention to the National Sweeper Company's advertisement in this issue, which brings to the attention of the trade for the first time their proposed plan to offer monthly cash prizes for the best three advertisements of their product appearing in the local papers of the dealers handling "National Roller-Bearing" Sweepers. In this day of advertising all live dealers take advantage of every advertising plan or scheme that they possibly can, and the dealers are coming to appreciate more and more every day the value of the assistance in the advertising line offered by the manufacturer, and are readily giving such manufacturers preference.

The plan of the National Sweeper Company is, so far as we know, original. We have never come in contact with anything like it. It is certainly unique and shows not only an unbounded faith of the National Sweeper Company in their product, but their extreme willingness to assist the dealer in advertising "National Roller-Bearing" Sweepers. Every live advertising manager can benefit by studying the plan, if nothing more, and those who take advantage of the offer made by the National Sweeper Company do not only have thirty-six chances in a year to get a cash prize, but they have the benefit of the ideas and thoughts of the numerous other advertising managers, copies of whose advertisements will be furnished them from time to time, but it will increase the sale of this profitable line for their firms. The National Sweeper Company has led in advertising plans ever since they started in business, four years ago, which has much to do with the wonderful progress they have made, and the establishment of their product on a substantial basis in all parts of the world. Write the National Sweeper Company for full details. We assure you they are interesting.

LONG ESTABLISHED BUSINESS TO BE CONTINUED.

New Partnership Formed Under the Old Name To Continue the Business of the Metal Jobbing House of Bruce & Cook—Is the Oldest Establishment of Its Kind in the Country.

Owing to the death of Spencer A. Jennings, formerly the senior partner of the firm of Bruce & Cook, the old partnership existing between the members of this firm has been dissolved and a new one formed by the surviving members. These members are Philander R. Jennings, Frank C. Jennings and A. Gardiner Cooper, and they will continue to conduct their business under the old firm name of Bruce & Cook.

The metal jobbing house of Bruce & Cook is the oldest of its kind in the country and undoubtedly the best known. It was established way back in 1812 by John M. Bruce on part of the same site now occupied by the firm—Nos. 186, 188 and 190 Water Street, and Nos. 248 and 250 Pearl Street. Some years later Mr. Bruce associated his sons with him in the business and in 1854 the late John C. Cook became a partner and the name of the firm was changed to its present style of Bruce & Cook. Later on the Messrs. Jennings and A. Gardiner Cooper became partners in the firm.

During all of its long life this house has done a large business and has been exceptionally prominent in its line. The members of the firm have always been very progressive and the secret of their success has been due largely to this fact. They have carried on a large importing business and for many years brought over an important part of the tin plate used in the United States. They continue to make large importations of specialties in the metal line. They handle metals of all kinds, tin plate, sheet iron, sheet zinc, block tin, solder, wire, copper and metal working tools and machinery. Under the management of the present members of the firm probably as large and as extensive business as ever will be carried on, while the excellent reputation which the old house has had for years will without question be retained.

THE ENLARGEMENT OF THE GOULD MFG. CO.'S WORKS.

The Gould Manufacturing Company, of Seneca Falls, N. Y., has come into possession of a large tract of land adjoining their No. 2 works in the Second Ward. The purchase includes about twenty-two acres of the Heath farm, for which Mrs. Mary J. Heath received $9,000. The entire purchase of the company consists of about forty acres lying contiguous to the original plot of ground on which the No. 2 works were erected, and is to be made available for the uses and requirements of the company's proposed enlarged works. The necessity for increased and more convenient facilities for manufacturing has been felt by the company for a long time past, and it is not surprising that it is availing itself of all the advantages of modern methods for manufacturing. The No. 2 works of the company, as large and efficient and well equipped as they are, are totally inadequate to meet the demand for their products. Should the Lehigh Valley Railroad fulfill its option of purchasing the present large warehouse of the company in Bayard street, as is now contemplated, the facilities of the concern would be so reduced as to require the removal of much of its machinery to other and better quarters. The whole scheme of enlargement contemplated by the Goulds is on an extensive scale, and when completed will add greatly to the manufacturing interests of the town. The dominant force in this project of enlargement is Mr. S. S. Gould, president of the company, who has exhibited a degree of aptitude and ability in the management of the business of the company most gratifying to the people of Seneca Falls.

AD. WRITING.

It requires time and patience to write a good ad. You have seen many good, catchy, smart ads in the newspapers, advertising a remedy, some new household devices, or a new food or cereal; you have thought them good and clever; they perhaps have appealed to you to the extent that you have purchased the article from the strength of this clever bit of advertising; but never for a minute think that the ad. was written off-hand on a piece of wrapping paper with a dull lead pencil. That same ad. which appealed to you quickly, that you read and digested in half a minute, probably took weeks to prepare, encyclopedias were searched for a name, the opinions of clever men were passed upon it, phrases were constructed and abandoned, long sentences were boiled down, it was written and re-written, words were crossed out and others inserted, different sized types were tried, valuable time was spent, until finally the right combination was formed; then, behold, the finished ad. It appealed to the public, it touched the spot, it made something famous. You will notice that the ads. that appeal to yourself are the ads. that are made up of simple words and simple sentences. There are some advertisers who use such profound knowledge in the phraseology of an ad. that they forget all about their argument. *Why?* The public want to know *why* they should come to you for anything; there *must* be some argument in your favor; now *what is it?* In all of your advertisements think before you speak.

All men have an inherent faculty for advertising, from the farmer who tacks a sign on his fence, "PIGS FOR SALE," and thus brings the fact before the passers-by, to the politician who spreads broadcast his photograph to advertise the fact that he is a candidate for election; each in his own way thought out the best way to reach the people.

The more one writes ads the more interesting it becomes; get in the habit of employing your spare moments in writing copy; you will find that if you spend more time in the preparation of your ads the public will spend more time in reading them. During the day around your business, as thoughts come to you, jot them down (do not try to remember them; you can then at your leisure embody these ideas into an ad that will bring results.

Lay out your space twice the size your ad is to occupy; thus you have plenty of room to write a plain copy Around this space draw the border you have selected; you get an idea by doing this how your ad will look when printed. Furthermore, it is a good copy for the printer to follow. Write at least one ad each day. Keep on hand a reserve copy of at least a dozen ads; occasionally you require an ad in a hurry; this reserve copy will come in handy. Learn the terms used by printers. Use good paper; write with ink; write on one side of the paper only; insist on the printer following copy; get a proof of your ads; correct them; and, lastly, be in earnest about your advertising.—*The Optical Journal.*

PROOF.

What "proof" means as applied to the quality or the measurement of the strength of whiskey is not understood by many people. The standard of the United States revenue is a liquor half of which by volume is alcohol. This is 100 proof. If a whiskey, then, is described as 90 proof, it means that it contains 100 measures of water and 90 measures of alcohol. Whiskey of 100 proof contains equal measures of each. Whiskey of 120 proof contains 100 measures of water and 120 measures of alcohol.—*Kansas City Journal.*

WESTERN HARDWARE BUSINESS GOOD.

(From Our Regular Correspondent.)

As one travels West fewer complaints are heard of poor business or slow collections. Indeed, the general conditions are better in some parts of the West than they have been for years. This is especially true in the State of Idaho and parts of Utah. One Hardware jobber of Salt Lake City spoke of the activity in business thus: "Here in Utah, as well as in Nevada and Idaho, during the past eighteen months many new mines have been opened. Most of these are low-grade ore, which, to be worked successfully, must be worked on a large scale; and thus a large amount of employment has been found for labor. The farming and fruit raising in the same States has been developed, and these products have found a ready market. And now, with the Federal Government taking up the problem of irrigating these desert lands, a new and greater stimulus has been given to farming and fruit raising in this Western country." Few Eastern people realize what irrigation means to the West. Land on which sage brush only grows—a desert, wild country—with irrigation becomes wonderfully fertile, and often in Utah three crops can be produced, where before absolutely nothing grew. And the undertakings are so large (some of the canals planned by the United States Government being from thirty to fifty miles long, twenty feet wide, and four to six feet deep)—so great an undertaking that private capital could not do the work. This work by the Federal Government, now well started, is bringing many settlers of a very desirable class into the far West—is already making an increased demand for building materials, for Hardware made in Connecticut, for Saws made in Philadelphia, for all kinds of goods manufactured in the East; so that the money loaned by the Government for this work is not alone helping the arid districts and the people of the West, but the effect for good is far-reaching.

The making and passing of the Irrigation Bill by Congress, and the signing of the bill by the President the making of that law, has done more, and will do more, for the West and for the entire country than any previous act of Congress for many years past. It is doing much now in this country to prevent the hard times due in 1904.

In Idaho about every third man one meets either talks mining or irrigation, and some both. Boise, the capital and largest city in the State, is a hustling, wide-awake town of about 14,000 people. It is famous for its natural hot water city heating plant, and also for its large Hardware stocks. The total amount of Hardware, Mining Tools and Implements probably is greater than in any other city in the world of Boise's size.

In explaining this Mr. Teller, of the firm of Fletcher, Eastman, Teller Co., said: "We are a great distance from the big cities; there are no other large stocks between Denver or Salt Lake City east, and Portland in the west; the country here and all between these points is fast being settled, and Boise is the natural supply market. In mining supplies it is absolutely necessary to have the goods on hand, which are generally wanted in a hurry by mining companies. They are people who will not wait." The Fletcher, Eastman, Teller Co. occupy a large double store, running back through the block, besides having two warehouses stocked to the roof with Wagons, Mining Tools and Implements. A large business is done in Stoves and Ranges, especially in their country trade. Both wholesale and retail trade is carried on, Fletcher, Eastman, Teller Co. going into Sporting Goods, Powder, etc. Mr. Fletcher, the head of the concern, is one of the best-posted Hardwaremen in the State, while both Messrs. Eastman and Teller are young, pushing, enterprising, good business men—a combination that's hard to beat.

The only exclusively wholesale Hardware house in the State of Idaho is the Northrop Hardware Co., of Boise. This concern proved their enterprise and push two years ago, when a fire completely destroyed their warehouse and most of their stock. Within two days a new building was under way, and within a week's time the Northrop Hardware Co. were again doing business. Four traveling men represent the firm in central and western Idaho, working the territory closely. The new warehouse now occupied by the Northrop Hardware Co. is a model of modern mill construction, light and roomy. A siding from the Oregon Short Line Railroad runs along the rear of the building. A special effort is made to ship goods the day the order is received, and a good business is being done. Each year new lines are being added, and the business is being enlarged. The Northrop Hardware Company are successfully competing with the largest Hardware jobbers in the country.

Doing a nice retail business in Boise, the Kerr Hardware Co. carry a good stock. The store is well arranged, and a special feature is made of the window display.

Another retail concern of Boise is Loree & Son, which firm occupies a large, well-lighted store, and carry an extensive line of Stoves and Ranges, in addition to general Hardware.

One of Boise's large concerns is the Coffin-Clinton Hardware Co., the arrangement of whose store is especially good for the wholesale and retail business. From the rear all shipping and receiving is done, and by thus keeping the retail separate from the wholesale department, the business is carried on in both departments without a hitch. J. E. Clinton, Jr., who is vice-president, said that trade was good and no complaint could be made of the general business outlook. An extensive stock of Implements and Mining Tools is carried, in which goods the Coffin-Clinton Hardware Company do a large business.

The Marshall-Belcher Hardware Co., of Pocatello, Idaho, are a pushing, up-to-date concern. Each month a large poster or circular is issued by the concern, illustrating and describing new and seasonable goods. These are circulated all through the southern part of the State, and are found to be good business bringers. The Marshall-Belcher Hardware Co. make a specialty of Plumbing and Heating Supplies, carry a good line of Sporting Goods, and a complete line of Builders' Hardware.

A. B. Bean & Co., of Pocatello, Idaho, do a large retail business and have a well-arranged store. One side of their large store is devoted to shelf and builders' Hardware and Tools, while the opposite side, on attractive shelving, is displayed Kitchen and Agateware. Mr. Bean said that business was good, and judging from the number of customers one Monday morning recently, your representative would say that it was exceedingly good.

The City of Salt Lake can boast of many attractions. It is famous for some great buildings, its beautiful streets, and for the largest retail one-floor Hardware store probably in the world.

The Salt Lake City Hardware Co. are now well settled in their new store, one large room eighty-five feet by two hundred feet long, a floor space of 17,000 square feet. Everything in Hardware and kindred lines is carried, and a good retail business is being done by the Salt Lake City Hardware Co.

Another of Salt Lake City's well-conducted Hardware stores is that of the King Hardware & Stove Co. Large windows are used to good advantage in displaying Hardware. In speaking of window display advertising Mr. King said: "That merchant who neglects to use his windows is slow. Newspaper advertising is good, but articles displayed in the window make business for Hardwaremen with a class of customers who never read a newspaper advertisement.

K. A. Andrews started a few years ago in a small way in the Hardware business in Salt Lake City, and by close attention to business has succeeded in building up a good retail trade. Mr. Andrews makes a specialty of Cutlery and Small Tools.

Most of the Hardware stores of Salt Lake City do some jobbing business, but there is only one exclusively wholesale concern in the city—in fact, the only one in the State—the Strevell-Patterson Hardware Co. Starting in the wholesale Hardware business about two years ago, the goods from this concern are now shipped into three States, the firm being represented on the road by seven hustling salesmen. The store and warehouse of the Strevell-Patterson Hardware Co. is unique, being formerly used for a general market. The stock being all on one floor, no time is wasted in getting out orders, and there is no expense for elevators. The concern makes a special effort to promptly ship orders complete, and in this way are building up a good trade.

The city trade of Ogden, Utah, is closely looked after by Wheelright Bros., who carry a large stock of general Hardware and make a specialty of house-furnishing goods and crockery. Mr. Wheelright said business was good and that the outlook was very satisfactory for Fall and Winter trade.

The building of the new railroad southwest from Salt Lake City into Los Angeles, Cal., by the Oregon Short Line interests, will open up a great mining country and will help to make Salt Lake City more of a jobbing centre.

Here in Salt Lake City, as in most of the larger Utah towns, the stores of the Zion Co-Operative Mercantile Institution handle a good line of Hardware. This department of the Salt Lake City store is very well arranged, the store having up-to-date fixtures and the goods being well displayed.

Manufacturing is as yet a secondary industry of Utah, but great strides are being made in this line, woolens and beet sugar now being made on quite a large scale here in the Salt Lake Valley. It seems that it will be only a question of time when the Hardwaremen here will carry a complete line of Mill Supplies.

HAMMERNAIL.

He Couldn't Have Meant It.

THE WORLD'S FAIR EXHIBIT OF KEUFFEL & ESSER.

The exhibit of Keuffel & Esser Co., of New York, at the World's Fair, St. Louis, is located in the Palace of Liberal Arts, block 43, in the centre of the building. It occupies 1,500 square feet of space, and as will be seen by the accompanying illustration, it is very artistically arranged. It contains an exhibition of almost all of the products of the factories of this well-known firm, which are said to be the largest of their kind in America. The exhibit consists of surveying instruments of all kinds,

THE WORLD'S FAIR EXHIBIT OF KEUFFEL & ESSER.

draughting instruments, furniture of the draughting room, blue print material and apparatus, including frames for printing by electric light, all kinds of nautical instruments, measuring tapes of great variety, instruments for Forest work and a number of very interesting articles for military purposes now being furnished by this firm to the U. S. Army and Navy.

A DESIRABLE MOVEMENT BEING AGITATED.

The question of forming Supply and Machinery Dealers' Associations in the North, East and West, similar to the Southern Supply and Machinery Dealers' Association, has been given very careful and serious consideration for some little time by quite a large number of the supply and machinery dealers from various sections and we are pleased to state that from the encouragement which has been received, it has been decided to take steps to perfect the organization.

The first and most important step in consummating the preliminary arrangements was to secure the services of some one to act as promoter and organizer. They were all familiar with the very thorough manner in which C. B. Carter, of Knoxville, Tenn., has handled all the details connected with this preparatory work. Mr. Carter is secretary-treasurer of both the Southern Hardware Jobbers' Association and the Southern Supply and Machinery Dealers' Association, having served the Hardware Association for nine years and the Southern Supply and Machinery Dealers' Association since it was organized. He has also had considerable experience in association work in other lines and is regarded as a very thorough and efficient association man.

It has been deemed advisable to call a meeting of the supply and machinery dealers in Cleveland, Ohio, on the 18th and 19th of October, and to this end Mr. Carter will open correspondence regarding these details, etc., with the hope that dealers will promptly and cheerfully answer any inquiries which may be addressed to them, and can see their way clear to attend the Cleveland meeting at the time fixed, and eventually become a charter member of the association. An organization among the machinery dealers in the North, East and West will result to the advancement of their line of business and prove highly remunerative to the individual member.

MEASURING BINDER TWINE.

J. L. Haycock, Canadian inspector of binder twine, gives the following simple rule for determining the length of twine in a ball:

"Take a sample ball, press the strands close together, and note the number required lying side by side to make an inch. Every strand within the inch will represent 50 feet in the pound. If 10 strands lying side by side make 1 inch, then a pound will contain 500 feet; if 11 strands, 550 feet; if 12 strands, 600 feet, and so on. Having this rule in mind, any one can test his twine for length, and need not be duped by short measure."

MODERN TOOLS AND SKILLED MECHANICS.

BY JOHN DRUMMOND.

Is the modern mechanic less able as a craftsman than the mechanic of old? Have modern equipment and method stunted his growth? Or is it mere excess regard for the glory of the good old times that makes one apt to magnify the labors of the pioneer? A professor has recently made some comments upon educational questions and finds fault with the acquirements of the average college product. One of his critics says that the American schoolboy has before him the best text books in the world, and study is made as enchanting as play, more attractive than any recreation of the old-time schoolboy. It is further asserted that there is a drawback to this; "just as the perfection of watchmakers' and machinists' tools has wrought a diminution of skill, so that the clever and resourceful mechanic of former days is becoming rare and more rare, so the very improvements of our text books have perhaps worked harm."

The clever and resourceful mechanic lives wherever a toolmaker or any other machinist is turning out special work at short notice with regular shop equipment. Many mechanics are but "handy" men with a majority of "unhandy" traits. They are developed in one direction only and crippled in all others. They may drill or bore with judgment and precision, but come to grief with further demands upon their reserve skill. Some of the machines they handle, and handle successfully, were beyond the facilities of the old-time machinist. These tools have supplemented his efforts; they have taken a good share of his training and embodied it in metal, and the product of the machines is held uniform to a degree unknown to the old-timer. The machinist trained to the expert working of metal to exact dimensions works naturally away from the position of a mere attendant upon a machine. His stock of experience looms large with the building of intricate mechanism, fixtures and tools of precision, and here his resource and skill are fertile in the application of means to ends. The greater facilities of the modern shop enlarge his opportunities and cut down the outlay of time. In fact, the main advantage of the latest tools is not that they remove the labor exactions, but they enable the workman to do more, and hence so much more should be accomplished.

It is true enough that the old mechanic was able to do a great deal. He made his steam pipes of lead, his connecting rods of wood, his main shafts of cast iron, and they made mechanical history. The lathe was his mainstay, and it is yet the principal shop tool. It was at once boring machine, driller, miller, slotter, gear cutter and dividing engine. And there are shops that still work out the salvation of some unusual job by a revival of an old trick with the lathe. I have all the admiration in the world for the pioneer machinists, but I am not ready to admit that the chance for mechanical resourcefulness passed away with the later tools. They have given us a longer reach in the struggle, but we are expected to grasp and hold all that we can yet grip with handicraft. We have simply increased our means to do things, and men alive to the situation have a better chance. Skill is not a matter of tools only. The fountain pen will not spell better than a quill. Tool improvement certainly means very much to the expert and resourceful. It diminishes the drudgery of the work and leaves the astute craftsman greater freedom in the assertion of his superiority. And no one technically familiar with the very tools which are popularly supposed to prove the opposite, will be ready to admit the inferiority of modern mechanics.

The passing of the chipping tools, the cold chisel and hammer, has come with the advent of pneumatic equipment and the keyseater. The ability to cut a long, straight groove in short order is of little account compared with the demands of other tasks. The latest machinery of the shops is designed for the drudgery of repetition, the cutting of the simpler shapes with minimum demand for each piece of work, and therefore a greater product. The few tools of the early workman are now increased by an elaborate array of mechanical aids that, far from doing away with resourcefulness, increase the general scope and working power of designer and mechanic.—*Iron Trade Review.*

✤

"So you want to marry, young man, do you?" said the bank director.

"Yes, sir," replied the bank clerk.

"What salary are we paying you?"

"Nine hundred dollars a year."

"Don't you know we have adopted a rule that no clerk in our employ shall marry unless he has at least $1,000 a year?"

"Yes, sir, but it's your daughter that I want to marry."—*Chicago Tribune.*

IMPORTS OF EGYPT.

(From United States Vice-Consul-General Murphy, Frankfort, Germany.)

Egypt's importation is constantly increasing and the country offers a good market for American manufactures. The imports of metal wares (machinery, cutlery, tools, ironware, etc.) into Egypt in 1903 amounted to $11,213,885. About half of these imports came from England, but Germany, Belgium and France also participated in the trade to a considerable extent. The United States does not appear to be represented in the Egyptian market, according to a statement of the German Consul at Alexandria, who gives the sources of Egypt's imports of metal goods in 1903 as follows: Great Britain, 49.6 per cent; Belgium, 20.6 per cent; Germany, 17.7 per cent; France, 8.9 per cent; Austria-Hungary, 1.7 per cent; other countries, 1.5 per cent. The gain in the importation of metal wares in 1903 over that of the preceding year was $2,585,115. The importation of iron bedsteads increased largely.

Egypt's imports of textiles in 1903 were valued at $24,785,880, which was about one-third of the total value of the country's imports. Great Britain's share was nearly $15,000,000; Austria-Hungary's, $2,186,000; France's, $2,035,000; Italy's, $1,780,000; Turkey's, $965,000; that of English colonies in Asia, $965,000; Germany's, $955,000.

Most of the textiles imported by Egypt being cotton goods, the United States should be one of its chief sources of supply. During recent years Germany, Austria and Italy have become active competitors of England in supplying the textile goods used by Egypt, as the manufacturers of these countries take pains to suit the taste of buyers. Belgium has also entered the Egyptian market as a seller of textile goods.

REVIEW OF THE MARKETS.

WIRE NAILS.—Demand is exceedingly good, although not so large in volume as to cause surprise. Orders are coming in to the mills to complete assortments and average up broken stocks. Markets firm at present prices. Carload prices are availed of by carload buyers, whether jobbers or retailers. Quotations are as follows: f.o.b. Pittsburg, 60 days or 2 per cent discount for cash in 10 days.

Carload lots	$1.60
Less than carload lots	1.65

New York.—The trade for September was regarded favorably by the jobbers, the trade within fifty miles of New York having purchased freely in fair quantities. The market is firmly held at present quotations. Quotations are as follows:

Single car loads	$1.79½
Small lots from store	$1.85 to $1.90

CUT NAILS.—There is a moderate demand for Cut Nails and prices are nominally held at association quotations, which are as follows: $1.60 and $1.65 for carload lots and less than carload lots, respectively. In the East there is no difference in price between Steel and Iron Nails, but west of Pittsburg, Iron Nails are quoted in carload lots f.o.b. Pittsburg at $1.65, and less than carload lots at 10 cents advance.

New York.—A moderate amount of business is the feature of the local demand. Prices are held firmly at the quotations below. Carload on dock, $1.74. Less than carload on dock, $1.79. Small lots from store, $1.85.

BARB WIRE.—Trade in the West and South is large and increasing in volume, but the demand from the East is inclined ot be moderate. Orders are still confined to the ruling limiting them to 30 days ahead. Quotations remain as follows: f.o.b. Pittsburg, 60 days or 2 per cent discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.75	$2.05
Retailers, carload lots	1.80	2.10
Retailers, less than carload lots	1.90	2.20

SMOOTH FENCE WIRE.—Demand for fencing purposes is large and representing current requirements is considered good. Orders for regular wants are up to the standard. Quotations are as follows: f.o.b. Pittsburg, 60 days or 2 per cent discount for cash in 10 days.

Jobbers, carload lots	$1.45
Retailers, carload lots	1.50

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire takes the usual advance.

COFFEE MILLS.—Manufacturers of box and side coffee mills have advanced prices nominally and are endeavoring to arrange list prices that will be uniform. The quotations are firm in tone.

STEEL GOODS.—The American Fork and Hoe Co., Cleveland, Ohio, have issued a catalogue which gives the goods made by their associate companies. They have revised their lists and the new prices are announced. The company has changed its method of quotation. They have now no printed discounts, but name written prices to each jobber, leaving the selling quotations to be made by the jobber. Steel goods will be handled by the jobbing trade as other goods are.

SHOT.—The following advanced prices for Shot are announced under date September 27, terms net cash, 30 days, or 2 per cent discount for cash in 10 days, with the usual abatement on orders for ton lots and upward, shipped at one time:

Drop Shot, sizes smaller than B, per 25-lb. bag	$1.65
Drop Shot, B and larger sizes, per 25-lb. bag	1.90
Buck and Chilled Shot, per 25-lb. bag	1.90
Dust Shot, per 25-lb. bag	2.25

HICKORY HANDLES.—A new list on Hickory Handles has been adopted by the members of the Hickory Handle Manufacturers' Association. This list, which has just been announced, is dated September 10. The list is materially higher than the one it supersedes and is subject also to larger discounts, the result being, however, a considerably higher price for the goods. As a general price to the smaller trade 60 per cent discount may be named.

HATCHETS.—Reduced prices are announced on purchases of Hatchets not later than November 15, with somewhat higher prices covering the period from November 15 to December 31, such later prices, however, being slightly lower than those now in force. These new prices are also subject to the rebate to be made for good behavior by the commissioner. A similar reduction in price as an inducement to early ordering, is made in regard to goods sold at net figures.

CRADLES AND SNATHS.—The list for Cradles and Snaths for next season is substantially the same as for last season, but a different arrangement of discounts is announced as indicated by the following prices for the smaller quantities of goods:

	Discount.
Grain Cradles, less than 6 dozen	40 and 12½%
Grass Snaths, less than 20 dozen	45 and 10%
Bush Snaths, less than 20 dozen	45%

CORDAGE.—The following prices represent the market:

	Cents per lb.
Pure Manila, 7-16-inch and larger	11½
No. 2 Manila	10¼ and 10¾
Pure Sisal, 7-16 inch and larger	9
No. 2 Sisal, 7-16 and larger	7½

LINSEED OIL.—Under date of October 4, the following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....42 cents per gallon.
In lots of 5 barrels or more.....41 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.

Calcu'a Oil.....55 cents per gallon.

THE PITTSBURGH TRADE.

The improvement in business noted in our last letter continues, and grows as cooler weather approaches. During the past month orders have been placed that will keep the wheels moving in mills and mines almost to their capacity. Our manufacturers neglected export business during the rush years, but are now reaching out for it, and are not likely to let it get away from them again. Later reports from the West indicate a large crop of corn now safe, and the good price for wheat will put consumers in splendid financial condition, so that the doemstic demand for Pittsburgh products will be large. Railroads are again making improvements, and as they take forty per cent. of the output of the steel mills, this is another large consumer to supply. The Merchants and Manufacturers' Association of Pittsburgh will have their second excursion on the 19th to 24th of the month. Southern Ohio will be visited this time, and it is expected that a large delegation of merchants will go. Pittsburgh wants to let people know she is alive and a good place to trade.

Logan-Gregg Hardware Co.

THE DAVENPORT TRADE.

The Sieg Iron Co., the well-known iron and heavy Hardware house, who have been doing a profitable and constantly increasing business in Davenport for more than a third of a century, has passed into other hands, who will continue the business under the same name. About thirty-five years ago, Reinhold Sieg, a wealthy retired tobacconist of this city, and A. F. Williams, who for many years had been a successful traveling salesman for Sickels & Preston, formed a co-partnership under the name of Sieg & Williams. After the death of Mr. Williams, in 1888, it was incorporated under the name it still bears. Reinhold Sieg, its first president, occupied that position until removed by death; this was also true of the second president, A. L. Bollinger. The third, a very prominent and successful business man, Paulo Rodewig, who has just retired, the vacancy being filled by the election of Hon. James W. Bollinger, who is at present also Judge of our District Court and the son of A. L. Bollinger, who was a prominent stockholder and for many years the active business manager of the Sieg Iron Co. With the exception of the stock held by Judge Bollinger, which was formerly owned by his father, the balance has been sold to employees. The names are: R. R. Englehart, Harry Englehart, Frank Yetter, Fred. Yetter, Frank Reavy, E. W. Sass, E. B. Hayes, W. P. Hummel and W. A. Gray.

Following are the officers: President, James W. Bollinger; vice-president and manager, R. R. Englehart; secretary, Frank Yetter.

Notwithstanding they occupy a storeroom of four floors, 150 feet by 44 feet, on the corner of Third and Main Streets, and an

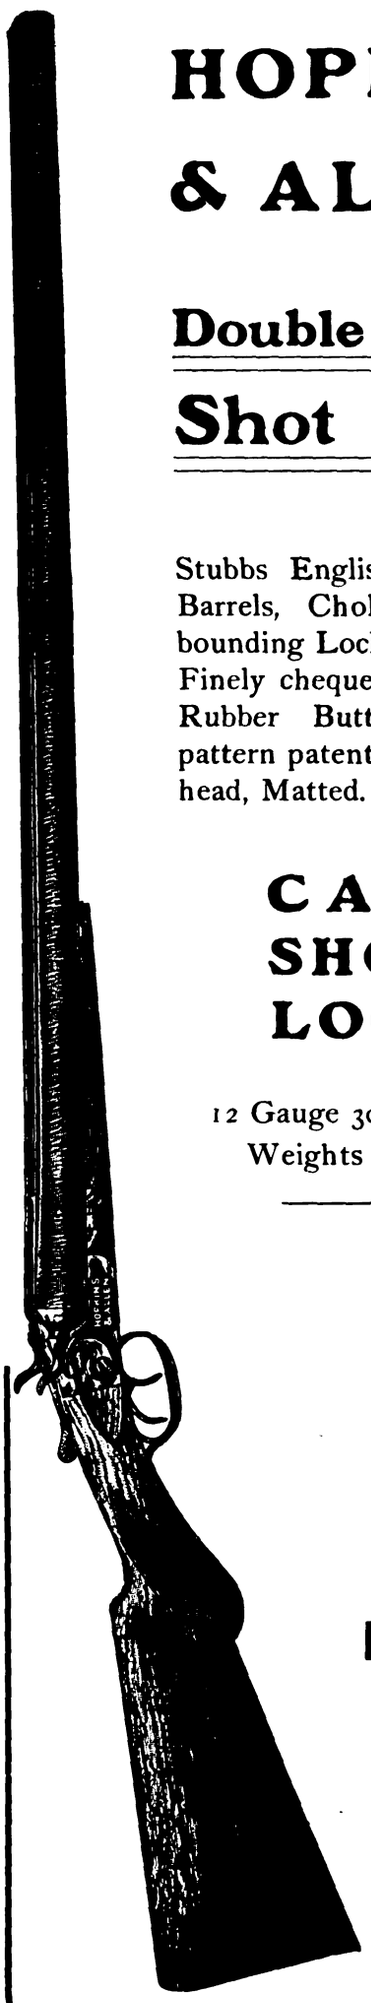
Digitized by Google

extensive warehouse on Fifth Street, with railroad track conveniences, they still find themselves congested for room and are about to erect a large, modern, up-to-date building, which will be one of the finest in the middle west.

Their store is only one door from ours. For thirty years they have been our neighbors and if there has ever been other than the most friendly feeling existing between the two houses, we have not known of it. We are very glad to have this opportunity to wish the new owners the full measure of prosperity, that their loyalty, energy and faithfulness as assistants in the concern so justly entitles them. Their well-directed efforts at lieutenants has done much to place the Sieg Iron Co. on the high plane that it now occupies in the business world, and this experience will insure its successful management in the future.

Orders are numerous, but the quantities are small, indicating the hand-to-mouth policy in buying is again with us. It would be difficult to explain why this is true, or to give a good reason for the present condition of trade. Crops are good and prices are high. There is the usual amount of building; weather propitious for outside work of all kinds; the mills and factories are busy; the arsenal pay-roll is large, and good health prevails generally throughout this locality.

There is very little said and no excitement whatever incident to the coming Presidential election, which has usually interfered more or less with trade. The banks report money scarce on account of the large amount of building, and the amount used in moving the large crop, which condition is augmented by the scarcity of cars to transport the products of the farms, although there is still ample to transact legitimate business at an advance in interest rates of a half of one per cent over the corresponding period of a year ago. One more week of continued favorable weather will place the corn crop beyond the reach of frost, and then we will all breathe easier. Collections hardly satisfactory.



Sickels, Preston & Nutting Co.

THE GRAPHITE TRADE.

We have no complaint to make on the volume of business for the nine months of 1904. Collections have been a little bit slow, but they have nevertheless been quite satisfactorily made. For October, November and December, the promise for good business is certainly very bright. Any one passing along on the Pennsylvania Railroad will see that each year we add to the Dixon plant, and this means only one thing—an increase of business. It takes at least a half-century for the buying public to really appreciate and get acquainted with any good thing, but people every day are getting better educated as to the value of graphite lubricants. Invention is keen in the matter of the vices for feeding mixtures of oil and graphite, and the result is that force feed lubrication is commanding the attention of the public, and with force feed lubrication there is a positive certainty of a greater use of flake graphite. The chief difficulty in the past has been to get flake graphite to the cylinders of engines where it is sadly needed in these days of increased power and speed, and severe conditions. Joseph Dixon Crucible Co.

THE PHILADELPHIA TRADE.

The fall campaign is now on in earnest. Vacations and county fairs have had their day, and once more we are all actively engaged in the pursuit of trade. It is pleasant to report there is a general response. Stocks are evidently low, as shown by the frequent and well-assorted orders now coming in from almost all sections, while the demand for nails and wire has been so greatly stimulated by the lower prices announced a few weeks ago that the output has been phenomenal, and far in excess of the usual trade at this season of the year. Prices on other lines remain without important change, for while there are some declines, they are frequently offset by advances, so that it is difficult to tell what shape the market will take. Cotton is still so high that braided sash cord has made another advance, and all goods in which cotton is a factor are much firmer in price, if not actually higher. For some time coffee mills have been sold, according to the manufacturers' claims, at unprofitable prices, and a heavy concerted advance has just been made in this line. The steel goods combination has announced new prices on forks and hoes for the coming season, and an advance has been made on leading goods, such as hay and manure forks, etc. Shot has also scored an advance, so that the market cannot be said to be one-sided. Collections are improving, and there does not seem to be much reason why they should not be considerably better. Labor is apparently still well employed, while lower prices on materials are doing something to stimulate building operations, so that on the whole the prospect appears to be fair for the balance of the fall. Biddle Hardware Co.

PACIFIC COAST TRADE.

After the usual summer lull in trade, fall business has opened with as much activity as last year. 1903 was a banner year for most Pacific Coast Hardware men, and this year's business is not much behind. Conditions are much better here than in the East, and all fall goods are moving well. This is especially true in builders' Hardware, the demand from the country trade being unusually large.

In San Francisco there is at the present time a large number of building contracts being made, and the local city business is good. Market street of San Francisco is certainly the retail Hardware center of the city. At 414 is located the Osborn Hardware and Tool Company. In addition to general Hardware a very extensive line of Paints and Oils is carried, and an up-to-date Sporting Goods department has recently been opened. The store of the Osborn Hardware and Tool Company is well lighted and stock is attractively displayed. J. P. Eisenmann is president, P. J. S Eisenmann is treasurer, and S. M. Scott is manager. Mr. Scott, who is a close observer of business conditions, said that the outlook was good on the coast for Winter business.

S. J. Dean, at 1502 Market street, conducts one of the best retail Hardware stores on upper Market street. By close attention to business Mr. Dean has succeeded in building up a large, profitable retail trade.

There seemed to be a large amount of business being done at the large warehouses of the Pacific Hardware & Steel Co. This concern is pushing out for an export trade and is building up a good business in Mexico and the East.

L. A. Wolff, of 516 Mission street, is closely identified with the Hardware business, being Pacific Coast agent for a number of Eastern manufacturers of Specialties and Sporting Goods, carrying a complete stock of Fishing Tackle and Sporting Goods.

Baker & Hamilton operate two wholesale warehouses. From the one in San Francisco general orders of Hardware and Gun Goods are shipped, while from Sacramento heavy and bulky goods are handled, such as Bicycles, Wagons and Implements, of which goods Baker & Hamilton are large wholesalers.

The Schaw-Batcher Hardware Co. of Sacramento do a large local jobbing business. The salesmen for this concern travel Northern and Eastern California, and reach into Nevada points. Mr. Schaw said that business was good, and that a very satisfactory trade was being done in the Riveted Iron and Steel Pipe which the firm make in Sacramento.

The local Hardwaremen of the smaller towns on the coast are feeling the benefit of the rapid settlement and growth of the coast country.

Cramer Bros., of Grant's Pass, Oregon, reported trade as very satisfactory, and a good demand for building materials.

The opening of the new gold mines at Goldfield has brought a good business to the Hardwaremen of Reno, Nev. The Nevada Hardware & Supply Co., located at 125-127 Virginia street, carry a large line of Mining Supplies, in addition to general Hardware. The store is large and well stocked.

Another of the large Hardware dealers of Reno is B. J. Genesy, whose store is located at 222 Sierra street. Guns and rifles are carried, but other Sporting Goods are not handled by Mr. Genesy, or by any of Reno's other Hardwaremen.

HAMMERNAIL.

RURAL MAIL BOXES.

That the rural free delivery system has come to stay, and that it will continue to be enlarged is evidenced by the fact that the government has appropriated twenty-three and one-half million of dollars for maintaining the present service and establishing new lines during the fiscal year commencing July 1, 1904. This means the establishment of hundreds of rural routes all over the country. Each route must supply 100 patrons, each patron must have a mail box, and these boxes must have been officially approved. We illustrate herewith one of the boxes manufactured by this concern. The Kelly Foundry & Machine Co., of Goshen, Ind., are becoming well known as manufacturers of these goods, as there are now in use of their make of boxes about 400,000, most of which have been sold through dealers. It must be remembered that a recent ruling of the Post Office Department strictly forbids postmasters or rural carriers acting as agents in the sale of Mail Boxes for profit. In view of this ruling, the business of handling mail boxes naturally falls in the hands of Hardware Dealers. This business should be especially profitable to the Hardwareman in view of the fact that he can use for future advertising purposes lists of names of patrons supplied. The Kelly Foundry and Machine Co. state that they have an excellent plan for securing this business and that they will be glad to give it to dealers on application.

Our Trade Mark stands for

SUPERIORITY

It points the way to good profits and increased sales in selling

WOOD FILLERS VARNISHES AND PAINTS

THAT POSSESS

CHARACTER

It makes all the difference in the world to a Dealer whether his goods are well regarded or not, for when it comes to buying Finishing and Painting materials the majority of people, after all, want the best, and if you do not have the reputation of handling superior goods, the discriminating buyers will go elsewhere.

You can get and hold the trade that is rightfully yours with the

"NICE" BRANDS

They are made and sold on honor. They possess all the qualities that your most exacting customers require and it needs no argument to convince them of this fact when once they have become acquainted with them.

Nobody ever questions the integrity of the contents of a can bearing the "NICE" label.

Catalogue "C," Booklet "Natural Wood Finishing" and Color Cards mailed on request.

SOME LIVE ELECTRIC LINES IN HARDWARE.

(Written for Hardware.)

"Press the button and we'll do the rest. If you want to bask in the rays of prosperity, why, connect yourself with the electric generator. We'll put you in line with anything from an electric piano down to an electric cigar lighter, and if there's anything else you want, why, just ask the electric man." So the talkative drummer of an electric company began as he hustled into a Hardware store in a suburban city. And without once disconnecting the current of his high tension, 2,000 volt, verbiage, he went on:

"Here's great propositions for you Hardware men or anybody else on the street. Get hold of a live electric line, and you'll get your business whirring like an electric fan in mosquito time. Electricity is the greatest thing in the world if you only learn how to use it. It will light your windows and your shop. It will heat your office. It will drive your business at 260 horse power. It will pile up your bank account, will add twenty pounds to your weight in a month. It's better for man's stomach and pocket than any breakfast food or get-rich-quick scheme onto the market.

"Look at what we have here. Here is a private power plant. It's big enough to light your store as bright as a radium glow. Connect your window lights with it, and you'll have a window display that will draw the crowd from the 'ten, twenty and thirty' theatre show down the street. Here are all kinds of switches and lights for fancy and automatic effects. Why, this plant will even turn out its own lamps when curfew rings at 9 o'clock. Just think of the many novelties that you can show up for the Christmas trade under our phenomenal and unrivalled rival of old King Sol.

"Now here's a dandy little electric heater. Put it under your desk in the cold days of Fall and Winter and laugh at Jack Frost and thumb your nose at the coal barons and other 'divine right pretenders.' Show a few samples to your neighbors, and if it doesn't draw trade, then a farmer won't pluck the rosiest apple off the tree for himself.

"Next is a dandy little electric stove. After you look it over you'll feel like telephoning for the junk man to come up and cart off your old-fashioned black coal consuming allies of King Bauer (pardon me while I kneel as I pronounce his name), and also your kerosene consuming cohorts of John D. Rockefeller. Just look at this electric stove, all of shiny nickel. Isn't it a beauty? No coal goes in nor ashes come out to mar it. There's no morning kindling to split, and no dancing around in bare feet on the cold zinc on zero Winter mornings. Just press the button even while you lie on the warm, filtered air mattress, between the antiseptic sheets, and the sterilized breakfast food and coffee less coffee will be hot and steaming by the time you're dressed.

"You might as well toss in your sad irons as a bonus to the junk man for taking off your stoves, too. Just look at these new electric irons. Why they, with our electric stoves, solve the servant girl problem, and put Maria Parloa into the garret as a factor in domestic economy. Bridget and Mary will each fall so much in love with our simplicity ironers that the family linen will be tucked away in the chiffoniers twenty-four hours after wash day, and there'll be no more excuses of staying away from church Sunday morning because there isn't a clean pair of stockings or a clean handkerchief in the house. John Chinaman, too, will be driven out of business, and will hustle back to the Flowery Land to chase the Russians.

"I tell you, our electric irons are corkers. Just turn the switch, and they'll keep at an even temperature until the last ruffle is ironed, and they glide over the starched shirt bosom like a ballet girl over a waxed floor.

'Don't these goods open your eyes? Here's some first row features. This dandy chafing dish ought to tickle any girl for a Christmas gift. She will gracefully deposit it on the parlor table, connect it with the chandelier, and if she cannot make in it a Welsh rarebit that will bring Willie right down on his knees, then she had better at once apply for a suite at the Home for Antique Damsels, or look about for a lusty boy who hasn't ruined his stomach with mangled breakfast mash.

"This electric cigar lighter ought to be an inducement sufficient to keep hubby home from the club, and if these electric curling tongs don't make wifey look ten years younger then the health culture pages of the daily papers must be carefully kept away from her. And if this electric hot pad doesn't cure baby's tummy ache, then it's safe to gamble that the little cuss hasn't got any. but has struck the midnight hour, instead of the noon time, for his lung developing exercises.

"But, say, you Hardware men want to climb right onto the auto, and stock up on a few of these electric goods. Why, they'll not only make money for you, but they'll save it. Look at this burglar alarm. It will call the police, even from their peaceful slumbers, and if you boost it up it will give any light-fingered

Digitized by Google

gentleman a blow that would knock out Jeffries. These electric glue pots are just the thing, especially among the statesmen, and aspirants to jobs as public servants, who clip their own press notices and are amazed at their popularity. Then here are some electric soldering pots for plumbers and linemen, also soldering irons. This electric sterilizer is an A No. 1 contrivance, and if you like yours hot, especially on a cold night, here's a flask heater that will make a Manhattan bubble in about three seconds.

"Yes, my throat is a little dry, but water is good enough for me. We'll connect up this sterilizer, and kill the germs, just to show you how it works. Yes, it's getting near lunch time, too. By the way, does your hotel cook its food on an electric stove? It's the latest and best idea out.

"Can't get an order from you to-day? Let me show you some more goods. Won't? Well, I've got to catch an electric car, anyway. But let me tell you Hardware men that you ought to get connected with a live wire. These electric novelties are right in your line, and the plumbers, the grocers, and the milliners are picking them up and beating you out. Yes, I'll drop in the next time round. I'll have lots of new ideas. Electricity is the greatest thing in the world and we're only beginning to realize it. Good-bye! Don't forget our live lines." F. A. G.

THE BARGAIN SALE.

The firm that makes a practice of always heading its advertisements "Slaughter Sale," "Sacrifice Sale," or "Half Price Sale" and the like, is pretty sure of finally reaching the point where "Bankrupt Sale" is in order, with the sheriff in charge.

Some merchants seem afraid to have customers know they are selling goods at a profit. Quality, or a dozen better arguments, are unimportantly spoken of so that more space is left to dwell upon low price. Department stores offend most frequently in this respect. Many people flee from a so-called bargain sale as they would from the plague, and these are usually of the class that makes for a store's reputation.

To the average reader the different terms used to indicate bargain sales have grown into synonyms of firm names, giving a tone as distinctive as it ought to be undesirable. There is an inseparable relation between special sales and certain stores that seems to mark them as being run upon purely philanthropic principles. The thoughtful reader is left to decide between two questions: Is John Robinson's store with its wholesale price reductions and daily special sales open for the spiritual glory of its owners or are the attractions merely the wordy bait to tempt gullible customers within the store precincts? In either case there must be a loss of confidence on the public's part.

It would seem that the special sale from being an exception has become the rule with many advertisers. The questions remain as follows: How many people are deceived, to what extent and how long will they remain so? If all price reductions are as advertisers represent them, then the profits on regular priced goods must be enormous. It is quite true that goods are rarely advertised at regular prices, but the practice still accuses, for then so-called reductions, being based upon purely fictitious values, are not reductions at all. It may be that the public has been spoiled by too much bargain sale-ing; the fault seems to lie in the rivalry existing between storekeepers as to which will succeed in outdoing the other in offering bargains. On the other hand, it is a noticeable fact that the most reputable stores rarely advertise bargains and yet do a growing business. If goods are bought at wholesale to sell at a below profit figure there must be something the matter with the goods, the store, or general conditions in the retail trade. Stores whose stock is daily offered at special sale inducements are little better classed than the continuous fire sale establishments. The difference is one of name only, and the first will come to grief just as surely as the last named have ceased to find favor or credence in the public. When a legitimate reason is given for price reductions or special sales, confidence in customers is increased rather than lessened, for it can always be made plain why at certain times of year stock must be unloaded; but when the unloading occurs at the beginning of a season and continues every day to the end, *ad finitum*—the public will begin to wonder and at last lose confidence in the store's honesty and the truth of its advertising news. The fact is, wherever the practice has become the ruling principle, the advertising man is at a loss to discover new reasons to offer as riders to bargain items.

And That's No Lie.

"Why, you said you could skate like the wind, and I find you can't skate at all!"

"Well, neither can the wind."—*Browning's Magazine.*

NATIONAL'S

Cash Prizes

for

Advertising Managers

Commencing with Oct. 1st we introduce our original and unique plan of paying monthly cash prizes, divided into a 1st, 2nd and 3rd cash prize, for the three best advertisements of **National** Roller Bearing **Sweepers** appearing in the local papers of the dealers in the United States and Canada.

We have cuts of all our sweepers, also cuts illustrating the special advantages of our sweepers, which we will furnish upon request. Further; will supply cuts to illustrate any special ideas of your own.

The advertisements will be submitted to a disinterested committee of three expert advertisers of national reputation, whose decision will be announced on the 10th of the month following and our checks for the amount of the prizes will be mailed to the winners. The prize winning advertisements will be reproduced in the trade papers, also published by us together with a write-up of the winners and their firms and mailed to our entire list of customers, thereby giving all an opportunity to exchange ideas with hundreds of other advertising managers, which feature alone is worth the little trouble necessary to enter this contest.

Remember, this is monthly and not for a short period or season only. Every customer has 36 chances to win a cash prize. This is but a brief outline of our plan. Write at once for full particulars; whether you enter the contest or not. We believe you will profit by the ideas submitted.

We know that NATIONAL Roller Bearing SWEEPERS have no equal: 85 to 90 per cent of the trade fully admits that NATIONALS are superior in every respect to any other sweeper made. There is a steadily increasing demand for **National.** Let your customers know you sell them and reap the benefit for your firm.

ON EXHIBITION: St. Louis, World's Fair, Manufacturers' Building, 4th and A Streets, Block 12 A.

ON EXHIBITION: Chicago, Furniture Exhibition Building, 1114 Michigan Avenue.

JAP-A-LAC

"WEARS LIKE IRON"

JAP-A-LAC, the new wood finish, has grown in popular estimation until to-day it is the recognized superior of all wood finishes.

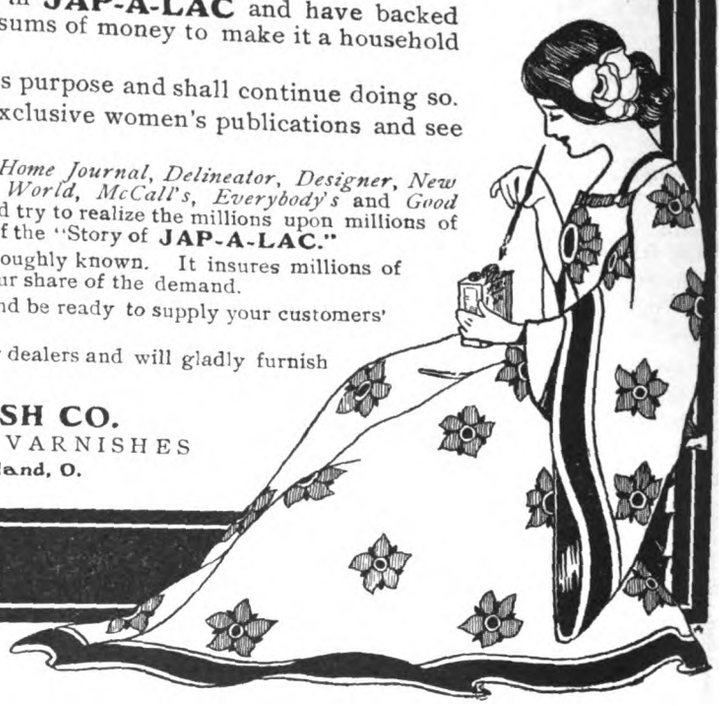
We have had unbounded confidence in **JAP-A-LAC** and have backed up this faith by the expenditure of vast sums of money to make it a household word in every corner of the land.

We are still spending money for this purpose and shall continue doing so.

Watch the leading magazines and exclusive women's publications and see what we are doing.

Start with the April issues of the *Ladies' Home Journal, Delineator, Designer, New Idea, Woman's Home Companion, Ladies' World, McCall's, Everybody's* and *Good Housekeeping* and many other publications, and try to realize the millions upon millions of people who each month read at least a portion of the "Story of **JAP-A-LAC.**"

Never before was a varnish product so thoroughly known. It insures millions of sales for **JAP-A-LAC,** and you will have your share of the demand.



Won't it pay you to place your order now and be ready to supply your customers' wants?

We have a specially alluring proposition for dealers and will gladly furnish information regarding it upon request.

The **GLIDDEN VARNISH CO.**

MAKERS OF HIGH GRADE VARNISHES

No. 44 Williamson Bldg., Cleveland, O.

KITCHENS OF OCEAN LINERS.

Summer kitchens, with their electrical conveniences, and winter kitchens, with all that they can boast of, whether in home or hotel, fade in glory before that kitchen of kitchens, the culinary department of an ocean liner. In point of mechanical apparatus used, in economy of space, in neatness and order, it surpasses all other kitchens in the world. Nowhere else where food is prepared are there so many labor saving devices used, and nowhere else are foods more perfectly prepared or with greater despatch. The most mysterious and delicious products of gastronomic art are made in and served from the kitchens of the great ocean steamships. The most whimsical demands of the overfed gourmet will not disconcert the chef, for so high in his profession is he and so fine are the storage facilities, that whatever can be prepared on land can be prepared here. Planning and working together so that all may run smoothly in this kitchen are the steward and chef.

In reality there are three kitchens on a steamer and each is as "ship shape" as the other. "Galleys" they are called and in connection with each galley is a suite of apartments devoted to the creating of specialties. Here the confectioner and baker concoct their ambrosial mixtures. From the galleys 1,500 or 2,000 persons have to be fed for a week or more. It is no easy task to perform. In past years food for an ocean voyage meant salt meat after the first three days. Mankind to-day, particularly the men kind, will not put up with this fare, so every steamer is equipped with an electri al cold storage plant and by its means every dainty of the season can be supplied at the table of an ocean steamer.

The kitchen itself, through the main galley, reminds one of a great manufactory, so businesslike is its appearance. Every article used has its particular hook or niche. As soon as a cook has finished using anything, it goes to the dishwasher, is cleansed and put away. Nothing is left lying about, as sometimes happens in neat hotel kitchens even.

The range is an affair of forty or fifty tons in weight, and is about the size of an ordinary apartment kitchen. Frequently, at the same moment, a dozen cooks are working at it. Each one is attending to his own particular dish. On one side are the white uniformed cooks, stirring with long ladles the soup, that fills great cylindrical cauldrons, holding fifteen to twenty gallons of the liquid. Close by stand men managing a broiler that holds two dozen chops. Rolls and bread of all kinds are being baked on another part of the stove. Puddings and warm desserts are being cooked also.

Below this main galley of the ship is the source of the kitchen's bounty, the storerooms. No part of these can be more interesting than the butcher's shop, where a benchman with cleaver waits to provide whatever cut is required. Fish, game, eggs and bins of vegetables all are to be found in the storerooms, and the whole is like a great market of stalls. Where the vegetables are kept is a company of little kitchen boys, who seem to be allied to the old time spit turners. They are vegetable cleaners, who scrape away at beets and carrots when they are not peeling potatoes. This takes up most of their time, for the quantity consumed on shipboard, especially in the third cabin, is enormous.

And peculiarly noticeable is the fact that with all the cooking done there is not an odor to be detected, even in the kitchen, so perfect is the exhaust ventilation and the fresh air supply.

Everything that can be is done by machinery. All the dishes but the silver and more fragile china are washed by machinery. Eggs are boiled by electricity. When the indicator reaches the time set, an automatic arrangement lifts the eggs out of the water in their wire basket and sets them on a table. Spits for roasting are turned by electricity. There are electric chafing dishes to be used for cooking special dishes in the staterooms.

RECENT TRADE PUBLICATIONS.

THE WILCOX MANUFACTURING CO., Aurora, Ill., have recently issued an attractive pamphlet catalogue exploiting their Rolling Shelf Ladders. Besides these, this concern makes steel trolley track carrying systems, traveling cranes and hoists, steel fire-door fittings, house and barn door hangers. They state they make all kinds of door hangers, from "the best that's made" to "the cheapest that's good." Their catalogue of rolling shelf ladders not only shows excellent printing and designing, but is an actual copy of the real goods. The ladders illustrated are all modern and embody a great many unique and patented features. They are provided with rubber tires, roller bearings, and the fixtures are made almost entirely of steel. On their "Perfection" ladder and the "Omega" they claim to have one of the finest tracks for rolling ladders that has ever been placed on the market. This hard-wood track is stiffened by means of an insert of Bessemer steel, running the entire length of the track, riveted at various points and the joints dove-tailed, making same very secure. They claim it is almost impossible to deflect this track at any point, no matter what load is brought upon the ladder. Their catalogues are free upon application by writing to the above address.

THE NEW CASTLE STAMPING CO., New Castle, Pa., are the authors of an extremely high grade catalogue, it being their number three. This catalogue annuls all former lists issued by them. Prices are without guarantee and are subject to change without notice. Since the issue of their former catalogue they have increased the capacity of their factory, and are prepared to make prompt deliveries. Their factory, they state, is equipped with the latest and best appliances, and they are producing a ware that combines the best ideas of both the German and American enamelers. Their enamel is composed of the purest and best chemicals, and they guarantee it to be absolutely free from any poisonous substance. In this catalogue they show a number of salable articles they have lately added to their line, and in addition are furnishing tin covers for their seamed tea and coffee pots, straight and Berlin kettles, sauce pans and sauce pots, both with enameled and tin covers. The lists in this catalogue apply to all of the different wares they make. They state that their "Case-Lot" system, which they have lately adopted, insures more promptness in shipment, and greater safety in transportation. Send for one of their catalogues.

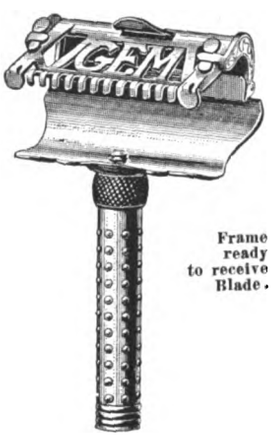
TO SWEAR BY AND TO SWEAR AT

a Trade Mark. Millions of men all over the world swear by the Gem's Trade Mark for the simple reason that it is imprinted upon the most perfect Safety Razor on the market to-day.



Frame with Blade inserted ready for shaving.

It's Up To You—

We have staked out some very strong claims. In fact, if all we have said about The Gem Safety Razor be true, the Hardwareman who sells any other kind is blindly neglecting his own interests.

It'll Cost You Nothing

to investigate our claims and to learn the truth—whether or not we can help you build up your business and your bank account.

Frame ready to receive Blade.

Our Rigid Frame Model

is simplicity itself. Durable? It cannot possibly get out of order—we guarantee that. Most easily cleaned, too, since we discarded all the old hinges, push buttons, etc., except the famous automatic self adjusting clips.

Single Roll Stropping Machine

You ought to see it and try it. It's superior to other kinds because it is neater, better, and more handsomely finished than any of them. Cannot get out of order nor cut strop.

Think Twice—yes, thrice, before placing your order for Safety Razors.

We give good reasons why you should be so careful, in our catalogue. Just send for a copy. Mention HARDWARE.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, etc.

Atmore, Ala.—The Atmore Hardware Company has been incorporated; capital stock, $9,000.

Bennett, Iowa.—The Bennett Hardware Co. has been incorporated; capital, $15,000; J. M. Kremer and others, incorporators.

Chattanooga, Tenn.—Roberts Brothers are now located in their new store building on Rossville avenue, and will carry a full line of Hardware.

Columbus, Ohio.—The Woodsfield Hardware Co., of Monroe county, has been incorporated; capital stock, $25,000. Incorporated by W. F. Koontz, C. M. Yockey, B. F. Paulus, C. H. Moffett and C. W. Yockey.

Green Bay, Wis.—The Morley-Murphy Hardware Co. has been incorporated, to succeed the Wisconsin Hardware Co., which has been dissolved. Because of the prior organization of a company by the same name, and which is in existence at the present. The capital stock remains the same. This is $200,000. Mitchel Joannes, Frank E. Murphy and B. L. Parker are the incorporators. Officers of the Morley-Murphy Company have been elected as follows: President, J. C. Morley, of Saginaw, Mich.; vice-president, Frank E. Murphy, of Green Bay; secretary, A. E. Winter, of Oshkosh, Wis.; treasurer, Herman Heinrichs, of Menominee, Mich. J. C. Morley, Frank E. Murphy, Mitchell Joannes, Herman Heinrichs and A. E. Winter compose the Board of Directors.

Jonesboro, Tenn.—The Shipley Hardware and House Furnishing Co. has been incorporated, capitalized at $15,000. Incorporated by Elberte Shipley, Herbert R. Shipley, Albert L. Shipley, Landon H. Patton and John M. Fuele, of Jonesboro. The company is authorized to deal in Hardware, furniture, undertaking material, etc.

Mason City, Iowa.—The Bailey-Downing Hardware Co. has been incorporated by L. R. Bailey, of Mason City; George Downing and Perry Bailey, of Thornton. This concern was formerly Raymond & Bailey. W. J. Raymond sold out his interest to L. R. Bailey.

Portsmouth, Ohio.—A new business block is being erected on Gallia street, which when completed will be occupied by J H. Farmer as a Hardware store.

San Jose, Ill.—A new Hardware store is being opened up in the Leavitt building, under the management of F. S. Smith.

South Boston, Va.—The Virginia Implement Co. is a new concern, organized to deal in heavy Hardware, vehicles and implements. They will carry a large stock of wire nails, stoves, casings, etc.; in fact, everything in heavy goods.

Changes.

Asheville, N. C.—The Hillard Hardware Company's entire mercantile business was sold yesterday to a Mr. Clark, of New Castle, Pa.

Danville, Ill.—J. B. Chambers & Son have sold their implement establishment to B. H. Fowler, of New Richmond, Ind. The deal is one of the biggest business transactions made in Danville for some time.

Erie, Pa.—H. P. Weller, manager of the Palace Hardware House, announces that he has purchased all the Hardware, machinists' and carpenters' tools, factory and mill supplies, comprising a large portion of the stock of A. S. Pinney's Hardware establishment.

Flint, Mich.—Work will commence at once on the Hardware store occupied by F. J. Horrell, and pushed to completion as fast as possible. The whole front end of the store will be taken down and a new and up-to-date front put in.

Fort Smith, Ark.—With the passing of the month of August, one of the oldest Hardware and tin establishments of the State passes out of existence. It is the firm of Conrad and Henry Triesch, who have been continually in that business in Fort Smith since 1850, with the exception of the time spent by them in the Confederate army, during the civil war. On account of the ill health of Conrad Triesch, the firm has decided to close out their stock and retire from the Hardware business.

Frackville, Pa.—George W. Sebold has moved his Hardware store from Lehigh avenue to his new building, corner Spring and Balliet streets.

Houston, Texas.—The E. L. Wilson Hardware Co. has closed the house here, shipping the stock to Beaumont. The manager, Mr. Mallard, will remain in this territory a short while in the interest of the company.

Lockport, N. Y.—William Walker & Son, the Pine street furniture dealers and sheet metal workers, announce the addition of another department to their growing business. They have decided to add a line of stoves, ranges and light hardware to the business, making it one of the most up-to-date Hardware houses in the city.

Madrid, Iowa.—A new Hardware firm, that of Berglund & Mason, have opened up in the old postoffice building.

Mason City, Iowa.—A deal has been completed whereby Diehl, Rathbone & Wright, who have been proprietors of the Ocheyedan Hardware Company the past four months, transferred their stock to E. T. Miller and A. B. Cobb, both of Eldora. The new firm have already taken possession and will continue the business under the old name.

Mechanicsburg, Pa.—E. K. Humes, of Urbana township, and his son, Homer, who but recently returned from Ironton, closed a deal on Sept. 10 whereby they become the joint members of Sivey's Hardware Store in this town. The younger Mr. Humes will manage the store.

Memphis, Tenn.—A large three-story brick building, to be occupied by the King Hardware Co., has just been completed.

McKeesport, Pa.—Ground has been broken for a new business house to be erected in Fifth avenue near White street by E. I. Clark, the Hardware merchant. The building will front 23 feet and extend back 106 feet to Jerome street. It will be of brick, with buff brick front, three stories at the front and two stories in the rear. Mr. Clark proposes to occupy the entire structure with his Hardware store, and will vacate his present quarters, which are becoming too small.

McKeesport, Pa.—The Weaver Hardware Company is making arrangements to again reopen their store, which was recently gutted by fire. The firm contemplates making some extensive changes, with a view to enlarging the present store room.

Middletown, Pa.—Mr. C. Ober has increased the length of his Hardware store on Union street by a sixteen-foot addition.

Narrowsburg, N. Y.—J. S. Anderson, the hardware merchant, is about to erect on his vacant lot a building 45 feet square and three stories high, which will be used for storing bulky Hardware, farm implements, lime, cement, and plaster. The new building will be constructed of wood.

Nevada, Iowa.—Cole Brothers, Hardware dealers of this city, have disposed of their stock of Hardware and stoves to Frank Lassell, of Maxwell, taking in exchange a quarter section of Indian Creek land. Cole Brothers, who came here from Maxwell some months ago, will probably return to that place, although as yet they have not decided what they will do.

New Castle, Pa.—In addition to the sale of the Cuyahoga wire plant to New York parties, the same company sold its Ellwood plant to the New Yorkers.

Pine Bluff, Ark.—Plans are now being drawn for the erection of a new building for the McGaughy Hardware Company on Main Street between Third and Fourth Avenues. The new building will be three stories high and will be used exclusively by the McGaughy Hardware Company in order to accommodate their increasing trade. The contract has not been let, but the plans are about ready.

Pittsfield, Mass.—Kenneth P. Ritchie has purchased stock in the Peirson Hardware Company of this city. He is to represent the concern upon the road, succeeding Henry Traver, Jr.

Saginaw, Mich.—Messrs. Downing & Son are erecting a new Hardware store, which they expect to have completed by Nov. 1.

Sandusky, Ohio.—Blatz & Beutel have purchased the Jacob Arend's Sons Hardware and stove store on Tiffin Ave. W. J. Beutel is a thorough Hardware man, having been connected with the business for a number of years. Edward Blatz is well and favorably known in Sandusky. He was until recently connected with the Weideman-Fries Company, of Cleveland.

Shelbyville, Ind.—The stock in the Shelbyville Hardware Company, amounting to about $6,000, owned by the late Dr. J. K. Jameson, has been sold to R. Senour for $9,900.

Shenandoah, Ia.—J. J. Cardwell has sold his stock of implements and buggies to E. Y. Hawley, late of Blanchard. Mr. Hawley will take charge of the stock at once and will add to some lines, and being able to give his undivided attention to the business will be in line to make it a big success having had many years of experience in the implement and vehicle business.

Sidney, Ohio.—McKee & Hamilton, farm implement dealers, have dissolved, James C. McKee withdrawing.

THE HAMMOND TYPEWRITER

Talking points sell goods, but if you depend entirely on the power of words to sell doorhangers the chances of sale are much less in your favor than if you had before you a full size display model Bischoff Doorhanger. Then you can indicate its ease of attachment, no cutting of door necessary, its great strength, supporting a weight of 2,200 pounds, and the angle shaped track which prevents clogging from dirt, snow or ice. Your customer sees with his eyes not his ears. It's the practical demonstration of these special features that sells Bischoff Doorhangers.

This piano finished display model doorhanger sent free with one dozen prs. of Bischoff Doorhangers, sent f. o. b. your city for $8.75 per dozen. Track 6½c. per foot.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published,

New Incorporations, Etc.

Akron, Ohio.—The Akron Carriage & Implement Co. has been incorporated, with a capital stock of $25,000.

Beaver Dam, Wis.—The Rowell Implement Co. has been incorporated; capital stock, $50,000; incorporators, Mary I. Rowell, Edla T. Rowell and Edward Beichl.

Boston, Mass.—The Grant Nail & Supply Co. has been incorporated; capital, $50,000. President, Richard L. Foster; treasurer, Arthur S. Ahorn; vice-president, John J. Ayers; secretary, Ferd. A. Laskey, all of Boston. Directors, as above named.

Carroll, Iowa.—The Carroll Wire Fence Co. has been incorporated. The capital is $50,000. The incorporators and directors are: L. A. Gnam, president; F. B. Quinn, vice-president; W. L. Culbertson, treasurer; E. N. Merchant, secretary; J. E. Griffith, C. E. Bentley, L. E. Chubbuck. The corporation will succeed to the business of the Carroll Fence Co., a partnership that has been manufacturing the Carroll field fence for some time.

Chicago, Ill.—Barker & Johnson has been incorporated; capital, $10,000; manufacturing Hardware, stoves and heaters; incorporators, Walter A. Barker, Mary A. Barker, and Howard W. Lewis.

Cincinnati, Ohio.—The Reliance Window Lock Co. has been incorporated; capital, $5,000.

Columbus, Ohio.—The Dodson Plow Co., a new enterprise, has been incorporated. The capital stock is fixed at $25,000.

Fitchburg, Mass.—The Sawyer Tool Mfg. Co. has been incorporated; capital stock, $35,000. J. F. Garfield is president, and E. D. Garfield, treasurer.

Frewsburg, N. Y.—Frewsburg Manufacturing Co. has been incorporated to manufacture tools and machinery; capital, $15,000; directors, E. W. Scowden, E. N. Vandewort, and J. T. Nichols, of Frewsburg.

Fultonville, N. Y.—The White Mop Wringer Co., of Jamaica, Vt., has purchased real estate at Fultonville, where it will establish a manufacturing plant. The company will employ about twenty-five persons, and hopes to start business early in November.

Changes.

Alexandria, Ind.—The Kelly Ax Company will erect a plant at West Charleston, W. Va., on the K. & M. The company will abandon the plant at Alexandria.

Armourdale, Mo.—The Handen Stove and Range Company, in which several citizens of Kansas City, Mo., and Kansas City, Kan., are interested, have commenced the erection of a $25,000 stove and range factory near Eighteenth Street and Argentine Boulevard. It will be one of the largest plants of its kind in the West.

Aurora, Ill.—C. H. Taylor, who formerly manufactured corn huskers and shredders in this city, is now in Joliet superintending the construction of a large factory, to which he will remove when completed

Bridgeport, Conn.—The big plant which the Eaton, Cole & Burnham Company, manufacturers of Hardware, has erected at the west end, has been completed, and a part of it will be put into operation at once. A force of about 150 operatives will be put at work at the start. The new plant has a capacity for the employment of 1,200 hands.

Burlington, Vt.—The Porter Screen Company will erect another large storehouse at their plant in Wonooski. The office building will be removed some distance west of its present location.

Charleroi, Pa.—Contracts have just been awarded for the rebuilding of the shovel works of the Hussey-Binns Co., which were recently destroyed by fire.

Dalton, Ga.—The Union Stove and Manufacturing Company has changed its name and is now known as the Mehaffey Stove and Manufacturing Company.

Elyria, Ohio.—On account of the enormous output of stoves and furnaces at the Fox Furnace factory, that company started recently on the construction of an extension of 100 feet. The new addition will cover a space of 10 000 feet and will be one story high, similar to the other buildings. The addition will be used for storing purposes, the present storeroom being too small to hold the furnaces and stoves while they are being fitted.

Evart, Mich.—The Evart Tool Company has increased its capital stock from $10,000 to $15,000.

Frankfort, N. Y.—The Continental Tool Co. will erect a factory to manufacture handles, which, up to now, they have bought elsewhere.

Homer, Mich.—The plant of the Cook Cutlery Co. has been sold to the National Cutlery Co., of Detroit, and has been moved to that city. James H. Cook, who established the factory several years ago, will be superintendent of the shops in Detroit.

Nashville, Tenn.—Another handle factory is to be established at Ashland City by the Nashville Handle Manufacturing Company.

Nashville, Tenn.—The saddlery and trunk factory of the Gray & Dudley Hardware Company have just been moved to the building on South College Street which was recently secured for those two branches of the business of the company. The building is three stories in height and extends from College to Market Streets. It has 75 feet frontage and is 225 feet in length.

Newcastle, Ind.—The Chicago Steel Manufacturing Company, whose plant burned out more than a year ago at Hammond, has completed a new one in this city and commenced operations with a force of more than 100 persons. The plant will manufacture cut nails and disc harrows.

Pittsburg, Pa.—The Standard Chain Company has reduced its capital stock from $3,000,000 to $800,700.

Providence, R. I.—The Nicholson File Company has increased its capital stock from $2,500,000 to $5,000,000.

Richfield Springs, N. Y.—The Buchanan Hardware Company are making extensive improvements to the appearance of their building, and are also putting up an addition, which is needed on account of their increased business.

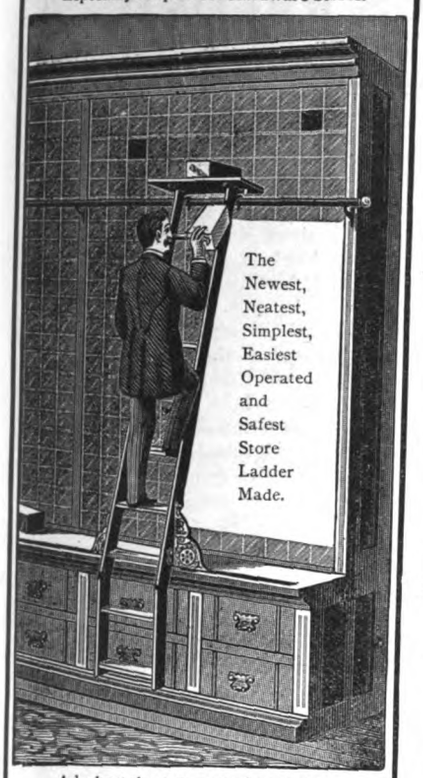
Springfield, Ill.—The bankrupt stock of Solle Brothers, Hardware dealers, which was sold under order of the United States Court, was purchased by Henry Hofferkamp. The invoice price of the stock was $3,165. It brought $2,065.

Springfield, Mass.—The business of the American Casket Hardware Company has been taken up by a concern known as the Rogers & Whitney Company, and the manufacture of casket trimmings will be pushed at the plant near the Westfield River bridge. The new company has organized by electing Gilbert Rogers, president; Ralph G. Rogers, treasurer, and William H. Whitney, vice-president. Eugene C. Rogers is also in the company.

Torrington, Conn.—W. V. Barber has purchased the Hardware business of A. D. McCarty. Mr. McCarty retires from business for a time at least

Unionville, Conn.—H. C. Hart has disposed of his interest in the cutlery business of the Union Cutlery and Hardware Company to Ramage & Tabor, the present managers of the company, and has severed his connection with the industry in which he has for many years been interested.

Waco, Texas.—The McLendon Hardware Company has purchased the quarter of a block of ground situated at Third and Mary Streets and running back to Foster's Alley. The land was purchased for the purpose of securing a site for a big modern fireproof building which will be erected by this company within the next few months, to be used for wholesale and retail business. The growing business of the firm demanded larger quarters.



Worcester, Mass.—C. B. Frost, dealer in Hardware and house furnishings, who now occupies the stores at 30 and 34 West Main Street, has leased the store at No. 28, adjoining West Main Street, and will occupy it after September 10. This new department of the business will be used for the present as a salesroom for stoves and other bulky wares.

Youngstown, Ohio.—John McFarlin and John Bumbaugh, who for several months have been operating the Girard Stove & Repair Co., have dissolved partnership. The business will hereafter be conducted by Mr. McFarlin.

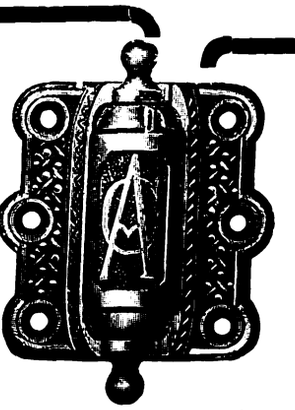
BEAUTY IS ONLY RUST DEEP
IN HINGES



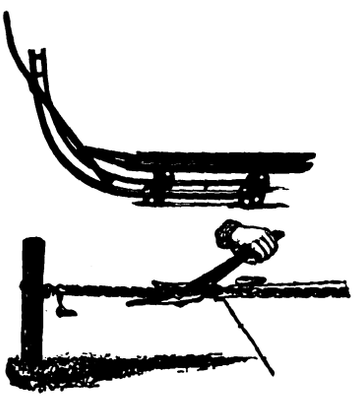
But quality such as we put in the material and construction of our hinges makes them last for years.

For hinges that stand wear, tear and weather we call your special attention to

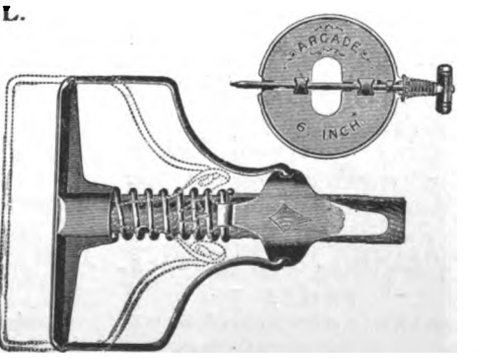
THE ARCADE SPRING HINGES
Numbers 102, 70 and 7

The Arcade No. 102
Non-Hold-Back Screen Door Hinge
Reliable, neat looking, simple, strong and durable. Warranted to give entire satisfaction.

The Arcade No. 7
Designed to give absolutely free action of the spring, holding door open or closed as descird. The spring is constructed of the best oil tempered steel wire.
Fully warranted.



The A C. No. 70.
A New All Steel Hold Back Screen Door Hinge.
These hinges are made of special rolled sheet steel, No. 14 gauge. They have been thoroughly tested and will handle screen doors better than the cast iron hinge. No danger of breakage. The hinge is so constructed as to prevent a dead center and will hold door firmly closed. Finished in black Japan.



We also manufacture the Baltzly Steel Stove Truck, Elwood Pattern Wire Stretcher, Gem Mop Heads and the Arcade Stove Pipe Damper, and fully Guarantee them in every particular.

You need our Catalog of over 223 different Hardware Specialties.
It's yours for the asking.

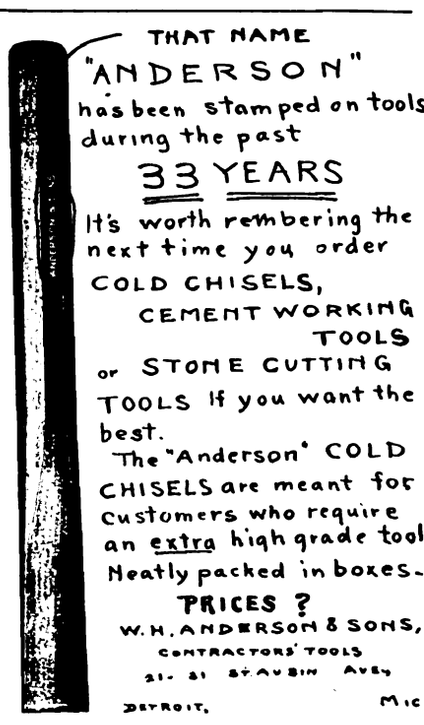
BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Akron, Ohio.—The Goodyear Tire & Rubber Co., which was originally incorporated with a capital stock of $1,000,000, has been re-incorporated, its capital stock being, under the new arrangement, $1,000,000, one-half common and the other half preferred, instead of all common stock, as heretofore.



Au Gres, Mich.—William H. Schairberger, who was employed by Morley Bros., of Saginaw, Mich., for six years, has opened a Hardware and sporting goods store, having purchased the stand and stock of Geo. Grimore, of this town.

Barksdale, Wis.—The immense powder and dynamite plant that is being built here will be ready for the company about November 1st. This will be one of the most important industries of its kind in the Northwest when completed, as it comprises forty-one separate buildings and embraces 600 acres of land. All of the buildings will be steam heated.

Bluffton, Ind.—The Indiana Scale and Truck Co. has been incorporated, with $100,000 capital stock, by Samuel Snell, Robert B. Dakin, George F. Muller, John Benner and Rathbun Fuller, of Toledo. They will make trucks, scales, automobiles, bicycles, machinery and Hardware specialties. This is a reorganization of a company that has been doing business in Bluffton for some time.

Boston, Mass.—The Charles River Powder Co., of Needham, a suburb of Boston, Mass., capital stock $50,000, has been incorporated by William H. Burgess, Walter C. Brown and F. H. Brown, all of Boston.

Chattanooga, Tenn.—The E. I. DuPont Co., of Wilmington, Del., have purchased the plant of the Chattanooga Powder Co. The offices of the Chattanooga Powder Co. are in Chattanooga, and the plant is at Ooltewah, Tenn., not far distant.

Chicago, Ill.—The Bunker Saddle Co. has been reorganized and will continue as the Bunker Saddle & Specialty Co., at the old stand, 208-210 Lake street. H. O. Winkler is president of the new company, and F. W. Winkler secretary and treasurer.

Greenport, N. Y.—A corporation known as the Fraser Hollow Spar & Boat Co. has been incorporated and will do business in this place. The Fraser hollow spars, which have become well-known to all yachtsmen, will be manufactured here, and the same company will also build canvas-covered canoes and boats, dingies, paddles, and a line of very high grade davit boats and launches. The incorporators are: Frederick M. Hoyt, William Gellett, William C. Towen and C. Pliny Brigham. The officers for the first year are: J. C. Fraser, president and manager; William C. Towen, vice-president: C. Pliny Brigham, secretary and treasurer

Plainfield, N. J.—A new bicycle store has been opened on Second street by William Smith.

San Francisco, Cal.—L. A. Wolff has opened a sales agency at 516 Mission street, where he will carry a complete stock of sporting goods made by the Victor Sporting Goods Co., of Springfield, Mass., and fishing tackle made by Clark Horrocks & Co., Utica, N. Y. In addition to these well-known lines some other specialties are being added.

West Palm Beach, Fla.—H. T. Cummings, who recently arrived here from New York, has reopened his bicycle and machine shop in the old stand. He has placed in position a large installment of new and modern machinery.

Changes.

Alton, Ill.—The Lawrence Shot & Lead Co. have commenced the construction of their plant at East Alton

Anaconda, Mont.—Roach & Smith have recently moved into a larger store, and now have one of the best locations in Anaconda. Large plate glass windows are used to good advantage in displaying the various lines of sporting goods carried.

Boston, Mass.—The Boston branch of the Fisk Rubber Co. is now located at 226 Columbus avenue, it having been removed recently from the old stand on Atlantic avenue and a five-year lease taken on the new quarters.

Columbus, Ga.—The Camp Cycle Co. has moved into its handsome new quarters at No. 105 Twelfth street, which it has leased for ten years. There are all facilities for repairing and storing bicycles and auotmobiles.

Denver, Col.—The Consolidated Supply Co. has leased newer and larger quarters at 1562 Broadway. Since the retirement of E. T. Weinant as secretary and manager, the make-up of the company has undergone some change, the officers now being: President, F. C. Robie; secretary, D. R. Platt; treasurer and manager, P. C. Platt.

Galesburg, Ill.—McLean & Holland wholesale dealers in athletic, gymnasium and sporting goods, have removed to better quarters in the Holmes building.

Hamilton, Ont.—The Ontario Lantern Co., whose factory was recently destroyed by fire, have started to rebuild.

Hammondsport, N. Y.—G. H. Curtis is building a motor cycle factory, and expects to occupy it about November 1st.

London, England.—The Savage Arms Co., of Utica, N. Y., now has an agency in London for the sale of its line of rifles and continental as well as British inquiries can be addressed to the Savage Arms Co., 15 Wilson street, London, E. C. The J. Stevens Arms & Tool Co.'s agency is at the same address, the South British Trading Co. managing the sales for both of these manufacturing companies.

Lofty, Pa.—The powder mill buildings here, which last summer were wrecked by an explosion, have been rebuilt, and new machinery installed and put in operation.

New York, N. Y.—The plants in New York City and elsewhere the property of Tatham & Bros., and the entire business of the firm, were sold early in September to the United Lead Co. The purchase price was $1,000,000. Tatham & Bros. began business sixty-four years ago, and have made all sizes of shot for the trade since that time. Not long ago an agency for the old house was established in London, and since that time the demand has been in excess of the supply. This transaction was the consummation of an agreement made one year ago.

Toledo, Ohio.—Harry Brown has purchased from Charles Deveaux the cycle store on Main street. Mr. Brown expects to add to the supply of cycles and cycle supplies, and will conduct the business at the old stand.

Utica, N. Y.—The Utica Cycle Co. has added to its bicycle business Edison phonograph records and supplies, and will carry on a retail and jobbing business at 21 Columbia street.

Santa Barbara, Cal.—The Thompson Sportsmen's Emporium has changed hands and style. It is now known as the Brentner-Payne Company, the partners being B. B. Brentner, of Santa Barbara, and J. Payne, of Bellingham, Wash. The latter is well posted in the sporting goods trade and it is the intention of the new firm to carry a large stock of sporting goods, special attention being given to fishing tackle.

Embarrassments.

New York, N. Y.—George P. Soder, dealer in fishing tackle and Hardware at 2 Fulton Street, has filed a petition in bankruptcy, with liabilities of $4,613 and assets of $2,566. Mr. Soder was employed at this place for ten years, became a partner with his employer in 1893 as Zundell & Soder, and bought out his partner's interest in March, 1896.

Fires.

Charlotte, N. C.—The Relay Mfg. Co., bicycles and sundries, on September 21st were burned out.

Oshkosh, Wis.—Fire starting in a darkroom in the bicycle store and photo developing store of O. H. Manzer, 24 Washington street, damaged the stock on September 12th to an extent of about $600. The fire undoubtedly started from a lamp in the dark room, which Mr. Manzer failed to extinguish before he left for dinner.

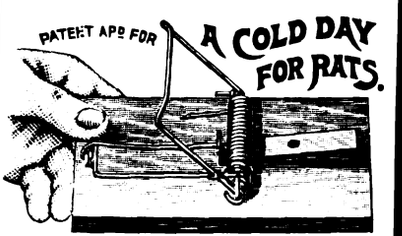
"Odorless" Refrigerators

COLD STORAGE IN PERFECTION.



Low Temperature is Not the Only essential of perfect cold storage—proper ventilation is absolutely necessary to good results. In fact, a higher temperature that has a free circulation of air is better than a lower one that has no air in motion.

The "Odorless" Refrigerators not only produce the coldest storage, with the least ice, but so perfect is the ventilating system that milk, butter, fish and fruit may be kept together without giving the least taint to each other. We recommend them fully. Write for Catalog R.

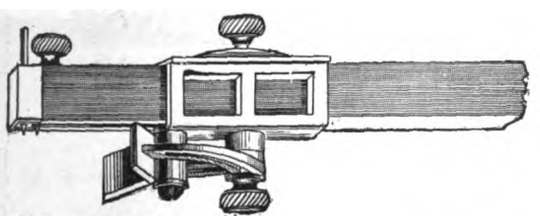
UNSURPASSED

In tensile strength, elongation and elastic limit is the enviable record enjoyed by . . . . .

THE NEW PUTNAM HORSE NAIL

¶ It has stood the highest test. Will not crimp, break, sliver nor cut off. . . . . .



¶ It will hold in the clinch; is easily driven. . . . . .

¶ Samples on request. We have a special offer to Hardwaremen. . . . . .

PUTNAM NAIL CO.,

NEPONSET, BOSTON, MASS., U. S. A.

WITHOUT A PEER

For gauging concave, convex and straight surfaces the latest and best tool is

Winslow's Adjustable Face Marking Gauge

It's unique. Discriminating mechanics are enthusiastic over it. Handy? That's why it sells so quickly. Display it—give your customer a circular—the sale is made.

Let's give you further particulars about prices.

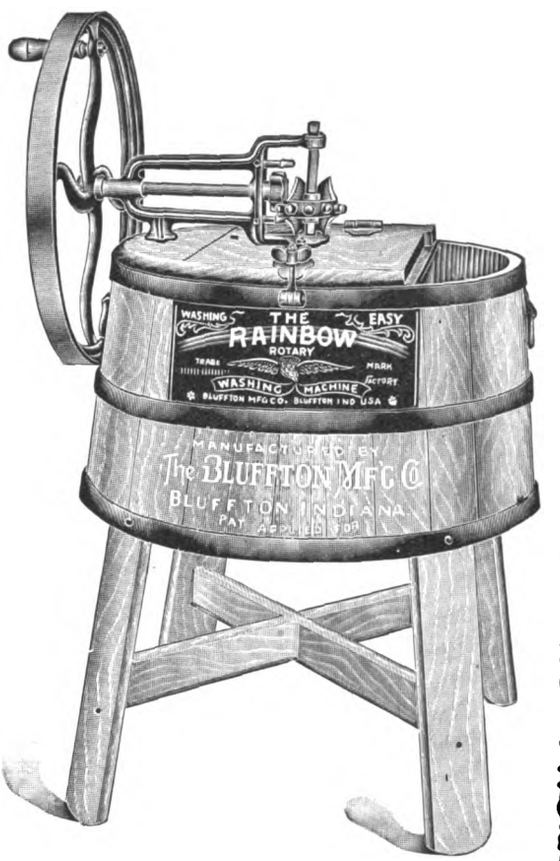
We have superior facilities for turning out light metal stampings, novelties and light machinery.

Mossberg Wrench Co.

Central Falls, R. I.

Like an Open Book

The strong features of the



Rainbow

are so apparent that customers appreciate at a glance.

Its speed in operation

Thorough Cleansing

quality, cleanliness in use and durability.

It is better to get the Rainbow now than it is to wait until your competitor gets the agency. It may be too late then.

Cronk and Carrier

A SIGN of GOOD JUDGMENT

on your part would be to stock up with Pruning Shears of the

Cronk's Oregon Pattern

which, having pleased thousands, will please you—as a seller and—your customer—as to quality and satisfactory service.

We have other kinds, of course, which it will pay you to investigate.

How about Garden Rakes?

A copy of our 1904 catalogue would prove an "eye-opener" to our complete line of Hardware Specialties. May we send you a copy?

The Cronk & Carrier Mfg. Co.

ELMIRA, N. Y., U. S. A.

A Point To Be Considered

By dealers in, and lovers of firearms who want to reload their own ammunition.

We pay close attention to the perfection of the various points required to produce perfect ammunition.

"Ideal" Tools

have made a hit with thousands of discriminating sportsmen. Should hit you, too, just right if you want to reload your own shells perfectly at small cost.

We have "Ideal" Tools for all kinds of shells.

Three stamps for postage will fetch our Ideal Handbook No. 16. It tells all about arms, powders, shot and bullets. Mention HARDWARE.

Ideal Mfg. Co.,

13 U. St., New Haven, Conn.

HURWOOD BRAD AWLS

Are the lasting kind. One piece of best quality crucible steel from point to head—through the ferrule, wood and steel, a rivet—have given our Brad Awls the name and fame of outlasting six of any other kind made.

Built for business they are business builders.

READY NOW
TWO NEW WINCHESTERS

Winchester Thumb Trigger, Single Shot, Bolt-Action Rifle.

A decided novelty. Trigger is located on upper side of grip at rear of bolt and is operated by downward pressure of thumb, obviating "pull-off" in firing. Weight 3 lbs. List Price $3.50. Ten rifles to a case.

Winchester Model 1904 Single Shot Rifle.

21-inch Heavy Round Barrel, Blued Steel Butt Plate, Finely Finished Schuetzen 13¼ inch Butt Stock. Weigh 4 lbs. List Price $6.00. Ten rifles to a case.

Both above are "Take Down" and have the bolt action that made the Winchester Model 1902 rifle famous and so widely imitated.

Send for Illustrated Detailed Description.

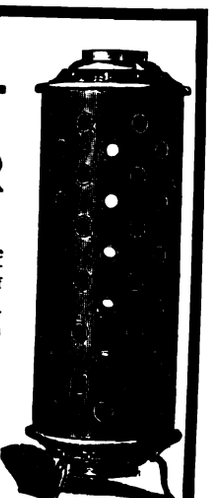
SAVE 1-2 YOUR FUEL

BY USING THE

ROCHESTER RADIATOR



IT WILL DO IT

TAKE a common sense view of heating—if you wish to heat a poker you will hold it over the fire, not at the side. We hold 96 to 120 pokers or tubes over the fire, each having a hollow air space in centre through which a current of air rapidly passes, sending the heat to all parts of the room, getting much greater results than any DRUM or side heater can give.

Inquiries from your town in answer to our advertising in all the leading Magazines and Family Papers are referred to you when you carry our goods in stock. Thus we sell them to you and then sell them for you.

Over 100,000 of them in use.

Write for Descriptive Catalogue and Prices.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

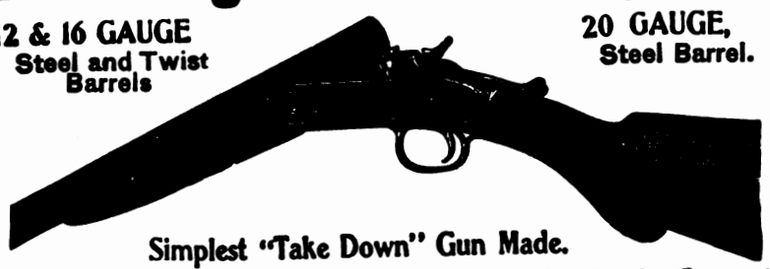
SAVE 1-2 YOUR FUEL
BY USING THE
ROCHESTER RADIATOR
IT WILL DO IT

TAKE a common sense view of heating—if you wish to heat a poker you will hold it over the fire, not at the side. We hold 96 to 120 pokers or tubes over the fire, each having a hollow air space in centre through which a current of air rapidly passes, sending the heat to all parts of the room, getting much greater results than any **DRUM** or side heater can give.

Inquiries from your town in answer to our advertising in all the leading Magazines and Family Papers are referred to you when you carry our goods in stock. Thus we sell them to you and then sell them for you.

Over 100,000 of them in use.
Write for Descriptive Catalogue and Prices.



The Part that does the Business. **ROCHESTER RADIATOR COMPANY,** **150 Furnace St. Rochester, N. Y.**

"Cheer Up and Seven Other Things"

By CHARLES AUSTIN BATES.

"Charles Austin Bates always wields a vigorous pen, but his latest work "Cheer Up and Seven Other Things," contains eight of the most stirring business talks that have ever appeared over his name.

The titles "Cheer Up," "Making A Front," "Making Good," "Other Peoples Brains," "The Ill Fortunes of Brother Bill," "Things That Can't Be Done," "And All Is Advertising," and "How Shall A Young Man Succeed?" indicate the nature of the book. Rugged, straight-from-the-shoulder common sense is the keynote, yet the vein of humor running through every page makes it wonderfully entertaining.

The head of the firm can read "Cheer Up" with much profit, and every young business man who wants to make his mark will find the book worth many times the price.

"A small volume packed with sharp edged chunks of wisdom. Mr. Bates is an expert writer on advertising and what he does not know about the right way and the wrong way of advertising so as to attract public attention is hardly worth knowing.

"His bright little essays in the volume are all on the subject of advertising or business hints, and business men can hardly fail to profit while being entertained by reading them. Other people will also enjoy the little book for its practical wisdom and the cheerful spirit pervading its pages."—*The Cleveland Plaindealer.*

"In his own way Mr. Bates has the same kind of shrewd humor that made the "Letters From a Self-Made Merchant" so popular, and a good deal of the common sense business morality that marked the equally popular "Letter to Garcia." There are fun and snap in this little book."—*The Outlook*, New York.

ALL SHEET METAL WORKERS

WILL APPRECIATE ONE OF OUR

"APOLLO Best Bloom" Weight Cards

AMERICAN SHEET & TIN PLATE CO. APOLLO BEST BLOOM TRADE MARK REGISTERED PITTSBURGH

We have just found a quantity of these at one of our Plants, and while they bear the name of the American Sheet Steel Company, and are, therefore, a little out of date as to the name of our Company, the information they contain is as valuable as ever and will be of great help to any person who uses Galvanized Sheets.

The "APOLLO" Weight Cards not only tell the size, gauge, weight and number of sheets per bundle, but also the number of square feet in all the various sized sheets.

The Apollo Best Bloom Galvanized Sheets and the Apollo Weight Cards are much alike; they both save the user lots of time, money, worry and guess work.

If you can use an Apollo Weight Card, write to W. C. Cronemeyer, Advertising Agent, 222 Frick Building, Pittsburgh, Pa., and one will be sent by return mail.

HARDWARE

HAMMACHER, SCHLEMMER & CO.

Hammacher, Schlemmer & Co., 207-209 Bowery, New York, have moved their old store, which they have occupied since the business was established in 1848, to a large building at Fourth Avenue and Thirteenth Street, which has been especially fitted up for their particular requirements. They deal in Tools for machinists, metal workers, carpenters, wood workers and manual training schools, making a specialty of the latter feature. The general line is shown in a catalogue of nearly 1,000 pages. Special catalogues are also issued of Cabinet Hardware and Fancy Cabinet Trimmings, Builders' Hardware, Refrigerator Hardware and Bar Trimmings. Another line that they deal in comprehensively is Piano Hardware, Tools and Materials of all kinds; in such goods they carry the most complete line in the country.

F. A. NELLEGAR COMPANY.

Wells & Nellegar Company, a progressive Hardware jobbing house of Chicago, Ill., having sold a portion of its capital stock to Robert C. Bialy, a prominent Hardware merchant of Bay City, Mich., he will become actively associated with the company about December 1st, when he will take charge of important departments of the business. The capital stock of the company will be increased, a new wholesale catalogue issued and in other ways the business will be given new impetus as a result of Mr. Bialy's admission to the company. There will be no change in the personnel of the company, as J. B. Nellegar, Robert M. Wells and J. B. Bettles, who have been officers of the firm for 26 years, will retain their same active interests.

BLACK SATIN POLISH.

The efforts of the Black Satin Polish Co. to push its product before the attention of consumers is meeting with its reward. Retailers everywhere are reporting a great increase in sales, and prospects are strong of a still greater demand, as the Black Satin Polish Co. will greatly increase its advertising expenditure between now and the first of the New Year.

FIFTY YEARS' SERVICE.

Edward B. Rice, one of the employees of the Walworth Manufacturing Co., Boston, Mass., was presented last week with a loving cup as a mark of appreciation and esteem upon his rounding out fifty years in the employ of the company. October 19th, 1854, Mr. Rice entered the employ of the Walworth Manufacturing Co., at the age of fourteen, and now occupies a prominent position in their Federal Street office.

FREE TO METAL WORKERS.

We wish to draw the attention of Galvanized Sheet Metal Workers to the offer of the American Sheet and Tin Plate Co. in this issue.

Some time ago a quantity of "Apollo Best Bloom" Weight Cards were found at one of their plants. These were printed for the American Sheet Steel Co. before it and the Ameircan Tin Plate Co were merged, and therefore bear the former's name.

This, however, does not affect their value, and as they give the size, gauge, weight per sheet, number of sheets per bundle and square feet of surface in each sized sheet, they will not only be found valuable to every person who estimates upon cornice and other sheet metal work, but will save them a great deal of time, worry and work.

Rather than have this valuable information wasted, the company offers to send one of these cards, which are 19½x14 inches in size, printed in two colors upon tough cardboard and ready for hanging in the most convenient place, to all metal workers who will send their names and mention HARDWARE to W. C. Cronemeyer, Advertising Agent, 222 Frick Building, Pittsburg, Pa.

JOHN YEAGER HOLDS THE WORLD'S RECORD.

On Wednesday, October 12th, in the Live Stock Pavilion at the World's Fair, St. Louis, in conjunction with the sheep shearing contest under the auspices of the International Sheep Shearing Festival Association, the world's record for fast horse clipping was broken by John Yeager, of St. Louis. He clipped the well-known pacer "Keno" (record 2.06) in 13¾ minutes. About 10,000 people were present, and it excited a great deal of enthusiasm. Mr. Yeager now holds the world's record as a fast horse clipper. The machine with which this record was made was manufactured by the Chicago Flexible Shaft Co., and is known as their 1902 Stewart Clipper. It sells at $10.75.

NEW YORK STATE JOBBERS.

The annual meeting of the New York State Association of Hardware Jobbers was held at the Buffalo Club, Buffalo, N. Y., on Thursday, October 6th, at 10.30 a. m. The following officers were elected for the ensuing year: President, Griff D. Palmer, Rochester, N. Y.; vice-president, Henry W. Millar, Utica, N. Y.; secretary-treasurer, Joseph Born, Syracuse, N. Y.; directors, Hobart Weed, Buffalo, N. Y.; Irving D. Booth, Elmira, N. Y.

After the meeting the members present were entertained by the Buffalo Jobbers at the Buffalo Club.

The following firms are members of this association:

Troy, N. Y.—J. M. Warren & Co.

Albany, N. Y.—Albany Hardware & Iron Co.

Utica, N. Y.—Wright-Dana Hardware Co., Chas. Millar & Son Co., Roberts Hardware Co.

Syracuse, N. Y.—Burhans & Black Co.

Binghamton, N. Y.—Babcock, Hinds & Underwood.

Elmira, N. Y.—Barker, Rose & Clinton Co., Irving D. Booth.

Rochester, N. Y.—Mathews & Boucher, Weaver, Palmer & Richmond.

Buffalo, N. Y.—Weed & Co., Sidney Shepard & Co., Buffalo Wholesale Hardware Co.

Kingston, N. Y.—J. T. Johnson.

Watertown, N. Y.—W. W. Conde.

Ithaca, N. Y.—Treman, King & Co

Wilkes-Barre, Pa.—Phelps, Straw & Co.

POSTAL PROGRESS LEAGUE.

Another batch of circular matter has arrived from The Postal Progress (?) League with a circular letter requesting favorable mention. Included in the list is a booklet giving a list of subscribers for the support of Mr. Cowles and incidentally the business of the League. The largest subscribers are Magazine publishers, to whom, of course, the passage of a parcel post law would be a great boon; among the others are book publishers and firms in other lines, a large amount of whose business is transacted by mail.

An "open letter" is also enclosed, in which it is stated that the People's party candidate for President is heartily in favor of the parcels post, and a long sheet full of "Postal Trouble" paragraphs, giving, as it were, the different symptoms of the disease and recommending as a cure-all a membership in the League and treatment under "Dr." Cowles.

ORGANIZATION MEETING POSTPONED.

The organization meeting of the supply and machinery dealers of the Northeast and West, which was to have been held in Cleveland, Ohio, on the 18th and 19th of October, has been postponed, the new dates not yet having been decided upon. The meeting will be held in Cleveland and due notice of the time and place will be given.

The reason for the postponement of the meeting was that the details of the organization had not been as fully perfected as was desired, and many of the dealers had not had time to make proper arrangements as to attending the meeting. The success of the movement is assured, but those interested are anxious to get matters in as near perfect condition as possible before the meeting convenes.

OLDEST PLOW IN AMERICA.

The oldest plow in America is owned by Theodore Pidcock, a farmer of Washington Township. He purchased the implement at an auction sale held by the Tellibelly family, of Schooley's Mountain, in which household it had been kept for 250 years, having been brought by the Dutch to New Amsterdam (New York) in 1654. It is built on the same lines as modern plows, has a wooden mold board and a wrought iron share. It has but one handle, this being held in the left hand.

EAGLE MOP WRINGERS.

The Eagle Cooperage Works, Shelbyville, Ohio, manufacturers of the Eagle Mop Wringers, are now placing these goods on the market in three sizes. The "Domestic" is for general household use, and holds ten quarts of water; the "Standard" is the same as the old original size and holds fourteen quarts, and the "Janitor" size holds twenty-two quarts of water. This arrangement should add very materially to the already large demand for the goods made by this firm.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

A great improvement is noticeable throughout the trade during the last fortnight and more confidence is now felt in trade transactions which will bring 1904 to the front as still enjoying a prosperity continuing the conditions of a good business with a more eager demand, and with a prospect for the future that few could have anticipated a month ago. The crops have turned out to be much larger than we could have anticipated with the promise of being marketed at prices that will make the farmers happy; the absence of any disturbance of a financial character to upset calculations; the strong stock market in Wall Street, which, however much we may deride it, is felt all over the country to be significant of sound, unyielding confidence in the future, the presidential election to the contrary, notwithstanding.

Orders have been flooding the factory to bring the stocks up to a standard where all orders may be filled promptly so that nothing may be lost to the genera business, and showing by the frequency that the stocks are depleted to a larger extent than usual. There have been fewer changes in prices during the past two weeks and the few that have occurred were advances, strengthening the market if nothing else and making the dealers feel that conditions of the future were of a safe and satisfactory character.

The general feeling now prevailing in the market is that Nails, either wire or cut, were a safe purchase at present prices, and the dealer who secured them was lucky to get a full supply at prevailing quotations. The fact of the manufacturer limiting the time of supply to thirty days, and the return of large orders demanding new conditions as to time, being turned down, indicate the fact that no very profitable business can be transacted at the present terms.

Purchases for Holiday requirements are now the order of the day, and they will be made early enough to be made useful for Thanksgiving Day as well. Cutlery of every description, which is the long suit of the Hardwaremen, can be counted upon as a ready sale. Carvers and steels will be selected for Thanksgiving, and the Christmas trade will be benefited by Table and Pocket Cutlery and various specialties in the line of Plated ware that are without number. Jobbers' stocks are full and complete with everything that will tempt the country buyer to add to an assortment already considered large enough.

The Joint Committee's Action.

On another page of this issue of HARDWARE appears a communication from the Wholesale and Retail Hardware Joint Committee, which should be read by every one in the trade. It would seem that a good beginning had been made and the committee is to be congratulated on the result of the summer's work. In our estimation the committee bears down a little too hard on the "great privileges and large fortunes" enjoyed by Manufacturers of Hardware and places on that branch of the trade too large a share of the blame for the present condition of affairs. At the same time it is hoped the committee will receive the full support of every one connected with the trade in whatever branch they may be interested. This paper is not inclined to believe that the fight is won or that it can be won entirely, by the method proposed. Not all Manufacturers and Jobbers of Hardware in this country are members of the two associations; how, then are the actions of non-members to be controlled? Suppose every Manufacturer and Jobber in this country should agree to refuse to sell goods to Catalogue Houses, and that each and every firm should adhere absolutely to the terms of the agreement; is it to be supposed that these catalogue houses, backed by their enormous capital, would not find some way of getting the goods? It is possible that by the carrying out of this action the sale by catalogue houses of the goods bearing standard, well-known brands may be controlled to some extent, and their Hardware business in a measure curtailed; but it is our opinion that no very material reduction will be made in the amount of Hardware business done by catalogue houses until work is commenced properly at the other end of the line—the Retail Hardware Dealer. In our opinion, here is the greatest opportunity for good, effectual work by the State Associations. When the country retailer cleans up his store, arranges his goods tastefully and makes his place of business one in which both men and women will feel comfortable; dresses his windows and spends a little money on paint and printers' ink; keeps his stock and his knowledge of it up to date; then, and not till then, will he have such a control over the trade in his neighborhood that the catalogues of the mail order house will no longer occupy the place of the family Bible on the farmer's table.

Digitized by Google

A WORD TO OUR SUBSCRIBERS.

Did it ever occur to you, Mr. Dealer, that if, in writing to our advertisers, you would always add "Saw it in HARDWARE," you would be helping us to make HARDWARE a better paper, and that without any increase in the subscription price you pay us, you would get more and better things in HARDWARE to help you in business?

You ask why? Because by far the greater part of the income of any trade paper comes from its advertisers; advertisers want results; they want inquiries from dealers who mention the paper in which they saw the goods advertised. The more such inquiries they get where HARDWARE is mentioned, the more space they use in HARDWARE; as the advertising pages of HARDWARE increase, the editorial pages are increased proportionately. See the point? Just the addition of those four words, "Saw it in HARDWARE," helps the manufacturer in selecting papers in which to advertise his goods; helps the publishers of the paper mentioned; and helps the dealer himself by bettering the quality of his trade paper.

COMPARISON OF RETAIL PRICES.

(Written for Hardware.)

By F. F. PURDY.

That there is ample basis for the contention that the prices of the stock of regular Hardware dealers are on a lower level than those of the department stores, notwithstanding their claims to pre-eminence in that line can be proven by any one who will take the pains to make an investigation. An inquiry into the situation in Greater New York verified this statement as far as circumstances admitted of exact comparisons.

Take Mrs. Potts' irons for instance. Three department stores sold them at prices ranging from 98 cents to $1.05. Two of the Hardware stores priced them regularly at 88 and 89 cents. Ordinary coal hods, of equal quality as far as could be ascertained, were sold by the department stores at from 30 to 33 cents; by the Hardware dealers at from 25 to 28 cents. Ash sifters ranged from 55 to 68 cents at the department stores; from 50 to 60 cents at the Hardware stores. Ash cans ranged from 98 cents to $1.15 in the department stores, and from $1.09 to $1.20 in the single line stores, though as ash cans are of such varied make that comparisons are difficult.

It seems, from the aspect of the stocks of the department stores, to be the policy to control lines as far as possible in as wide an extent of territory as can be secured, or at least to avoid duplicating the goods of nearby departments. This, of course, prevents the possible price cutting that might be inaugurated if two or more neighboring houses sold several advertised brands of the same kinds of goods.

Dealers in Hardware, when seen, expressed regret that contrary to the practice in many cities and States, no organization had been formed in the metropolitan district in the several boroughs to co-operate in meeting the questions that have so long been forcing themselves on the attention of the trade. The dealers, while they have lost to a certain extent the trade in house furnishings and kitchen utensils that should be controlled by them, by the encroachments of the department stores, are by no means the easy mark that some of the dealers in other lines have been. A great portion of the sales of Hardware are made to men, and men do not fancy making their way through silks and corsets to get to a hammer, saw and nails. There is an excellent basis for co-operation among the Hardware dealers that does not exist in other separate trades. One achievement might be the fixing of a scale of prices for as large a number of staples and specialties as possible after a sufficient number of dealers had become interested in the association. Organization has proceeded to a commendable extent in the retail Hardware trade throughout the country, but there are many localities, Greater New York among them, where much might be done by united effort. The manufacturers and wholesale dealers naturally follow the lines of least resistance in fighting for trade and wherever they run up against a solid argument by a united body it meets with their respectful consideration. Besides, there are many ideas that may be obtained by a comparison of experiences and the asperities of competition may be softened to a large extent and a better feeling engendered among neighboring merchants.

The past methods of stockkeeping is a question that occasionally comes to the front for consideration. It is of prime importance to the Hardware trade, considering the great variety of the goods in stock. A comparison of methods here should be of value. One dealer has inaugurated a card system which he says has worked very satisfactorily. Most dealers, however, still seem to cling to the regular "stock" and "want" books which have served so well in the past. If there are better methods of stockkeeping they should be brought to light, and we shall be glad to hear from any of our friends who have good ideas in this direction. The best methods of knowing in a moment just what is on hand and what is not, is not only a time saver and a great convenience, but assists on many occasions in making a sale which would otherwise be lost by having the goods that are wanted on hand at the right moment.

THE JOINT COMMITTEE'S ACTION.

ON THE CATALOGUE HOUSE QUESTION.

The wholesale and retail Hardware Joint Committee have sent out to the members of the National Hardware Association a digest of the prices issued by the two principal Chicago catalogue houses, the object being to familiarize jobbers with the lines of goods handled by these houses and the prices quoted to consumers. Following is a portion of the communication sent with the digest by the secretary of the committee, T. James Fernley:

"Notwithstanding some of the hair-splitting articles written on this subject, this catalogue house question is a very simple one. Some of the side issues which have been raised are intended to divert attention from the main principles involved. Shorn of all technicalities and expressed in an A B C manner, the facts in regard to the catalogue house question are as follows:

"More than ninety-five per cent of the Hardware, Cutlery and Sporting Goods sold in the United States is distributed through jobbers and retail dealers. Until recent years manufacturers have been satisfied with this method of distribution. Of late, however, several mammoth establishments have developed that buy direct from manufacturers and sell direct to consumers. Their voluminous catalogues are distributed broadcast throughout the land. These catalogues do great damage to the jobbing and retail trade, not so much on account of sales that are made, but because they establish the standard of prices on many well-known lines of goods for retail dealers. The success of several of these houses has encouraged others in the large trade centres to enter the same business, and a point has been reached when jobbers and retailers who are distributing ninety-five per cent of the goods consumed in the country on their lines must ask the manufacturers where they stand on this question. The methods of distributing goods through jobbers and retailers, and through catalogue houses selling direct to consumers, cannot exist side by side. Either one system or the other must prevail.

In this issue the interests of the retail dealer and the jobber are identical. Every dollar's worth of goods sold by the catalogue house is not sold by the retail dealer or jobber. If this system of distribution increases it means a decrease in the distribution of goods through jobbers and retailers. A manufacturer who claims to be a friend of the jobber and retailer cannot consistently help build up a system which means the elimination of both jobber and retailer.

"The manufacturers of this country have been very generously treated by its people. More and larger fortunes have been made in manufacturing in the last twenty-five years than in either jobbing or retailing. Notwithstanding the protection of patents and the protection of the tariff, in order to protect themselves against competition in their own ranks a large number of the important manufacturers in our line of business have formed combinations or selling arrangements, which have practically eliminated competition and have guaranteed to them large profits.

"To these things the jobbers and retailers of the country have submitted. But when many of the leading manufacturers, upon whom we depend for our supplies, go still further and encourage a system of doing business which means, in its natural development, the wiping out of the jobbing and retailing business as it exists to-day, we think it is high time for both jobbers and retailers to enter an emphatic protest.

"This committee respectfully asks every jobber who receives this digest to give the prices shown therein his most careful consideration, not forgetting the twenty-five per cent the retail dealer must add to the jobber's selling price in order to make a net profit of five per cent. We ask the jobbers to take up this matter with their buyers, and to have their buyers take up this question in a forcible manner with the representatives of the manufacturers whose goods are shown in this digest.

"It is our opinion that a manufacturer can best show his friendship for the jobbing and retail Hardware trade by not selling catalogue houses that sell direct to consumers. But if he insists upon selling this class of trade, then he should regulate

Digitized by Google

their prices so that the retail dealer can meet these prices and have a fair margin of profit left after paying the necessary expense of doing business. A differential of ten per cent does not protect the retail dealer, as that is very much less than the average cost of doing business of the retailers of this country.

"All the prominent Hardware jobbers in the United States, without exception, have agreed not to sell any goods to catalogue houses. They have sacrificed a large volume of business in taking this stand. Is it too much for us to ask the manufacturers, from whom we buy our goods, to stand by us in this movement? The manufacturers of the country, having had their profits protected by the patent laws, by the tariff and by various combinations, pools and selling arrangements, should certainly be willing to grant some share of this 'protection' to their wholesale and retail customers by considering the interests of those dealers who distribute ninety-five per cent of their products."

MAIL ORDER BUSINESS AND FARMER TRADE.

A large percentage of the sales of the catalogue houses are to the rural population, and particularly since the advent of the rural free delivery system the big catalogues of these establishments are an important part of the furnishings of many farmers' homes. It would therefore seem that one of the best methods of preventing a further growth of the mail order business would be for the retail Hardwaremen to devote more attention to cultivating the friendship of the farmer, catering to his desires and seeking to direct his attention to the home store. Hardware and other stores in all parts of the country number among their regular patrons not a few who are engaged in the business of tilling the soil. Now, as a matter of fact, the average farmer is above the average city man in respect to character and sterling merit. Even if you deny this, you will admit that he is thrifty, generally honest and able to pay for what he buys; and from his natural situation a good prospective customer of the Hardware store. And yours should be *the* Hardware store, in his opinion. Any dealer whose store is accessible to agricultural districts should bend every effort to make friends with the farmer, and to secure his trade. To this end it would seem advisable that the dealer carry in stock farm tools, implements and machinery, poultry accessories, seeds and some special sundries, and, of course, a line of kitchen goods, milk pails, tin cans and pans and the like. You are in business for money; and if a few shelves of tin and wooden ware can be profitably added you should have them and the business they represent. Besides, they would help the sales of other goods. The farmer, or the farmer's wife who walks through your store to look at a cream separator or stall rope or feed trough, is pretty sure to see something among the standard goods which is wanted. This, if your stock is comprehensive and properly displayed. Hide duplicate stock in nearby dark corners, if you must, but display clean samples of everything you carry. But to return to our farmer. If you want him for a permanent customer you must "treat him handsome" and make him feel thoroughly at home in your store. Frank and hospitable by nature, himself, he appreciates these qualities in another; and opens his heart—and pocketbook—to those who give him hearty welcome and show interest in his affairs. Teach him to look upon your store as headquarters when in town, and take pains to really get acquainted with him, not as a "class," but individually. The *Ad. World* says: "When Mr. Farmer comes to your store, fastens his horse at the door or nearby, or still better, in your horseshed and comes in, have a cheerful word of welcome for him. Call him by name; give him the freedom of the whole place. In doing this, don't be over officious, so as to annoy or embarrass him. Remember how ill at ease some over-zealous clerks have made you feel on past occasions, and avoid frighetning him away, while yet never neglecting him. Have a comfortable chair for him where it's warm in winter and cool in summer; and a seat for his 'sisters and his cousins and his aunts' when they chance to drop in with him. They'll be apt to come oftener, and we must remember that the farmer's wife steers the farmer's buying. Entering the shop, very likely after a long ride, such thoughtfulness will be appreciated, and it costs more in planning than in time or money. In any event, these people are very human, like the rest of us, and respond to attentions extended to them in good spirit, sincerely, heartily and without fuss and pretension.

REMEMBER THE HOMELY HABITS

and virtues of Uncle Ab, and Aunt Jane, and while you are generous and liberal in treatment be careful not to put matters on a plane too far above theirs of everyday. And be sure your sin will find you out if you don't treat Ab. right in quality and price. Abner's whiskers may be long—but so is his head; and if his coat is common—so is his sense! The fact is, our agricultural customer, even if he comes to town from a long distance, is better posted than we are apt to believe; and at all times his native shrewdness stands him in good stead.

"Then, too, he carries away the story of your favors, and once established in the esteem of Uncle Ab., your bargains, your little kindnesses, your invariably cheery welcome, your honest dealing and continued fairness are expressed in no measured terms outside your presence. The result is—more farmer customers; more sales of farm machinery with good, juicy profit on every transaction; more friends, and less business for mail order houses in your section.

"The rural mail delivery and suburban telephone service are all adding to the desirability of the farmer as a customer. Begin right away to cultivate him. Put yourself out to oblige him. Get lists of nearby families and mail to Abner and his folk business literature—printed invitations to come in and see you 'whether ready to buy or not.' Keep this matter down to the plain, everyday style of address, easy to understand and to respond to. Follow up the list and keep the people on it well posted as to new goods in their line; there are plenty of such. When these callers wander around the store curiously, show them 'how it works'—when you catch their attention directed to a patent device or a new mechanism of any kind.

"Put prices on everything you can, marked in plain figures. Omission of the price will make one go away ignorant of the most important item involved—the cost. Not seeing it he will, nine times out of ten, guess it to be more expensive than it really is; or, failing to ask price (and every customer cannot ask the price of everything) he may thereby put off buying something which he might have bought in that hour, and bought of you.

"Some of the brightest men of our times came from the country—perhaps you are one of them. The farmer is the backbone of the Union. He buys more goods than any other class of citizen. His credit is better than nearly any other. He has more money in the savings bank. His needs are constant, so his trade is of a permanent kind."

WORLD'S FAIR AWARDS.

The awards on exhibits in the Machinery and Mines and Metallurgy buildings at the Louisiana Purchase Exposition have just been made by the Superior Jury of Awards. Gold medals have been awarded to the following firms, in whom those in the Hardware trade are interested:

Keuffel & Esser Co., New York, Mine Surveying Instruments.
Vermont Slate Co., Zanesville, Ohio, Slate.
L. S. Starrett Co., Athol, Mass.
Walworth Manufacturing Co., Boston, Mass.
Cleveland Stone Co., Cleveland, Grindstones.
Yale & Towne Manufacturing Co., New York.
J. H. Williams & Co., Brooklyn, N. Y.
Rider-Ericson Engine Co., New York.
Linkenheimer Co., Cincinnati, Ohio.
Eureka Fire Hose Co., Jersey City, N. J.
Carborundum Co., Niagara Falls, N. Y.

Grand prizes were awarded to the following:

Pike Manufacturing Co., Pike, N. H.
A. Leschen & Sons Rope Co., St. Louis, Mo.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Liability of Unincorporated Association.

Question: I sold bread and rolls for a year to a social club for use in a restaurant, kept by one of the members. He paid me some amounts on account and finally left town, leaving a balance of fifty dollars unpaid. Can I sue the club?

Reply: You do not state whether the club is or is not incorporated. If it is a corporation and you can prove that you sold the bread and rolls to the corporation, and not to the man who conducted the restaurant, you can probably recover. If it is only an unincorporated association, as most clubs are, you will be obliged to sue all the members, or, as is permitted in most States, the president or treasurer representing them. You cannot recover in such an action unless you can show that the person conducting the restaurant was the agent of all the members, which is ordinarily impossible in this class of cases.

♦

A man may not be able to manage his own affairs, but he will give you advice about yours.

Those riding in carriages are not as happy and comfortable as those on foot think they are.

These things that are cooked in a chafing dish late at night taste terribly like crape on the door.—*Atchison Globe.*

RECENT TRADE PUBLICATIONS.

The Goulds Manufacturing Co., Seneca Falls, N. Y., and 16 Murray Street, New York, have sent us a copy of their latest pocket catalogue, which they have distributed among their patrons. It is of envelope size pamphlet form and contains 120 pages, exploiting their pumps and hydraulic machinery, the descriptions of which are confined largely to mechanical details, making them brief and concise. This information, with the table of sizes, etc., gives a comprehensive idea of the above mentioned goods. They also issue a large general catalogue covering all of their goods, and special catalogues of mine pumps, paper and pulp mill pumps, spray pumps and apparatus for spraying vacuum and air pumps, ship and bilge pumps, besides separate circulars describing all of their different types of pumps, any of which they will be pleased to furnish you upon application.

Joseph Bardsley, 147-151 Baxter Street, New York City, has sent us a copy of his latest catalogue, which is one worthy of the house it represents, being excellent in every particular. It is finely illustrated throughout and describes their line of oil door checks and springs, checking and other floor spring hinges, door holders, wood door knobs, door stops, etc. This catalogue takes the place of all previous editions, and they call particular attention to the change in prices. They state regarding their 1904 Improved type oil door check and spring that it is the only device of its kind which can be applied to either hand or either side of a door without any change whatever. All that is necessary is to take it from the box and screw it to the door. The spring is of crucible steel wire, oil-tempered after winding. Specially prepared oil is used as a checking medium, which is practically non-freezing, and does not dry up and gum. It has a checking device by means of which the checking power is removed when the door is nearly closed. This feature is valuable for doors closing against a draught or hard to latch. It is brought into play by merely lengthening the extension arm. Send for a copy of their catalogue, which will be forwarded upon request.

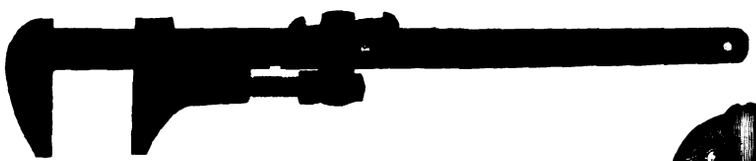
The Avery Stamping Co., Lake and Coe Streets, Cleveland, Ohio, have sent us one of their catalogues of their line of "Never-Break" goods, which include wrought steel cooking utensils, improved solid steel sled skates, wrought steel washers, steel fence posts, steel post hole diggers, garden trowels, cattle troughs, intricate hydraulic forgings, etc., etc. They state that "Never-Break" wrought steel ware is a complete revolution in cooking utensils—constant daily use hardening, tempering and polishing them until the surface is like glass—better adapts them for all kinds of cooking and making them the most valuable for the housekeeper. With the same use that would actually destroy other kinds in a very short time, they claim the "Never-Break" is constantly developing its best qualities, making it not only the most durable, but the cheapest and most economical cooking utensil that can be used. They put metal into the required shape from the flat sheet, without displacing any of the metal, leaving the metal the same thickness throughout as in the original sheet. This catalogue will be found of value to those interested and will be forwarded upon request.

Silver & Co., 304-314 Hewes Street, Brooklyn, N. Y., have issued a number of catalogues in pamphlet form, among which are: "Silver's Brooklyn Artistic Bath Fittings," finely printed and thoroughly illustrated, and included in which are everything needful for use and ornamentation in the bath room; this catalogue contains eighty pages. Another is devoted to their "Brooklyn Blue Flame Oil Cook Stove," which includes a one, two and three-burner cook stove, also two and three-burner high cook stoves, with and without ovens; their Brooklyn broiler and triple sauce pan, with which it is possible to cook three separate dishes at the same time over one hole; and the Brooklyn bread toaster, which, they claim, will toast an entire loaf of bread in three minutes. "Household Inventions" is a pamphlet catalogue of sixty-two pages, and is somewhat of a general catalogue and illustrates and describes their Marion Harland coffee pot, also several other styles; covered roasters, bread pans, egg beaters, alcohol stoves, coffee urns, oil heaters, also their cook stoves, bath tub seats, bath cabinets, etc., etc. All of the above books should be in the hands of interested dealers, and would be gladly sent upon request.

The Buffalo Manufacturing Co., Buffalo, N. Y., are the authors of a large and handsome catalogue intended for trade distribution. This illustrates the large line of specialties which they manufacture, comprising water coolers, water filters, chafing dishes, table kettles, coffee and tea extractors; coffee, tea and bar urns, candlesticks, coal vases, cuspidors, bathroom fixtures, etc., and they invite your especial attention to the many new articles which they have added this season, making, they claim, their line the most attractive and complete on the market. This company make a specialty of the Jewett Asbestos force-draught lamp, which, if desired, they can furnish with all their table kettles and chafing dishes, of which they make an extensive line. The lamp is so arranged that a constant supply of air is drawn into the lamp, where it mixes with the alcohol gas (both inside and outside the flame) in such proportions as to produce the most perfect combustion, with the greatest economy in fuel and without smell or smoke. The extinguisher is arranged so that the flame can be reduced when only a moderate heat is required. The lamp has without doubt much to recommend it and will be found a valuable addition to the chafing dish outfit. Send for one of their catalogues for further information regarding their line of goods.

The American Fork & Hoe Co., Cleveland, Ohio, are the authors of a very handsome catalogue, it being their Catalogue "C," which is bound in dark red morocco. The book is finely printed on excellent paper, and is very handsomely illustrated throughout. In this, their latest catalogue, they have adopted, in the main, new list prices, new numbers and new code words. The change in list prices has been made for the purpose of adjusting the relative value of each article with its cost. The new numbers and new code words were necessitated by their issuing this new, full and complete catalogue, covering products of all their works, also covering regular or light steel goods; heavy steel goods of all kinds; specialties; handles, etc. They state that they are confident that this one catalogue, from which can be ordered any of their many makes of goods, will be found especially convenient, as it takes the place of any and all catalogues issued in the past by them or any of their constituent companies. They recognize market conditions, but refuse to make a guarantee against competitors in any form whatever. The above catalogue will be found a valuable addition to the catalogue library of interested dealers.

The Incandescent Light & Stove Co., Cincinnati, Ohio., have issued a new catalogue, it being their Number Eight, which is in pamphlet form, of the long envelope size, and contains thirty-two pages. It exploits the "F-P" Lighting system, which system, they claim, is "fireproof and foolproof," and they challenge any one to prove to them how a person could cause an accident with the "F-P" machine if it is properly set up and has the average number of burners required to light a room, and if filled with their Safety Filling Can, unless a hole were purposely punched into it. They manufacture attractive single and double fixtures, chandeliers, etc., for use with the "F-P" system, finished in polished or oxidized brass. They manufacture their own mantles, and carry a full line of globes, shades, tips, etc., etc., on which they state they would be pleased to quote prices on application. Write for one of their catalogues for further information regarding their lighting system.



Charles Forschner & Sons, 296 East Nineteenth Street, New York, have recently issued a new linen covered pamphlet catalogue of their scales and beams, butchers' machinery, tools and supplies. The book, which contains 186 pages, is illustrated throughout, and all goods are accompanied by list prices. This is their sixteenth catalogue, in which they have added quite a number of new scales to their already extensive line. They state that with increased facilities and new machinery they are now better able than ever to give orders prompt attention. Every balance stamped "C. Forschner & Sons" is warranted correct, and full guarantee of the same is always given. All prices which they have heretofore quoted by letter or salesman, and all price lists, appendixes and discount sheets issued by them previous to September 1st are now declared by them to be null and void. They will make to order all balances adjusted to foreign standards of weight. Send for one of their catalogues.

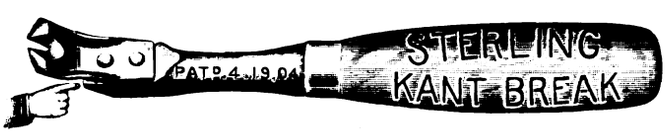
NEW GOODS AND SPECIALTIES.

COES' "KEY MODEL" WRENCH.

The Coes Wrench Co., Worcester, Mass., are introducing to the Hardware and Supply trade a new wrench which is called the Key Model. It has an adjustable bolster, a forged bar and screw and steel jaw and extra heavy parts throughout. It is only made in 28 and 36-inch sizes for heavy work, being intended

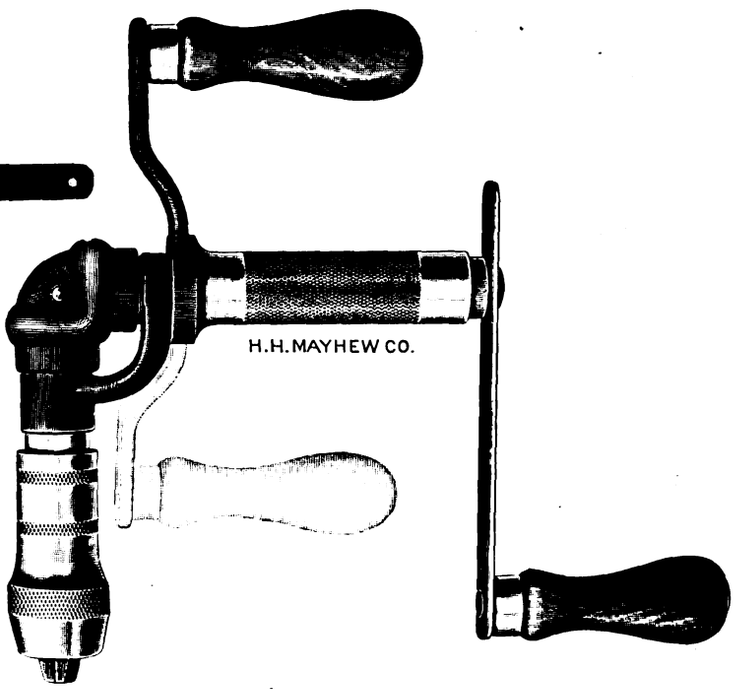


COES' "KEY MODEL" WRENCH.

for large nuts and finished work that is beyond the capacity of a 21-inch wrench. There is nothing in it to get lost, very little to wear out, and a broken part is almost unknown. The strap has two positions for large and small work, and when locked is practically a part of the bar. The key has a double head and is always on the wrench instead of on the floor. It is claimed by the manufacturers that this wrench is a necessity in every shop where construction is going on, and the engineer who once uses it will never willingly use any other to handle large nuts, unions or other heavy work that calls for a long, strong, durable wrench. The 28-inch has a capacity for nut union for 4-inch pipe, and 36-inch for 5-inch pipe. The 28-inch weighs 17 pounds and the 36-inch weighs 27 pounds.

STERLING KAN'T BREAK TACK CLAWS.

A noticeable improvement has been made in the construction of the Tack Claws which the W. G. Brown Mfg. Co., of Kingston, N. Y., have been placing upon the market, which makes the article stronger and more efficient. The metal part of the tack claw was formerly fashioned of straight steel, and when subjected to a greater strain than usual, would bend or break, but now the edges are reinforced, as shown in the illustration, which causes the weakest part to become the strongest. The Kan't Break tack



STERLING KAN'T BREAK TACK CLAWS.

claw is finished in nickel, has a polished handle, and is packed in a display box that helps to make it attractive on the counter. A line requesting their catalogue will bring an illustrated pamphlet describing their latest productions, chief among which will be found the I. X. L. Can Openers, the "Nonesuch" corkscrew and can opener combined, the "Perfection" ice picks, the "Royal" vegetable masher, and the "Cyclone" egg-beater, all of them special novelties worth inquiring about.

MAYHEW'S NEW CORNER BRACE.

The H. H. Mayhew Co., of Shelburne Falls, Mass., write us that after experimenting for a year or more in the endeavor to get out what they would term a real corner brace, they are placing on the market the one illustrated herewith. It is stated that with this brace it is possible to bore a hole parallel with the side of the room in the corner within three-quarters of an inch of it. The most valuable feature of this brace is the ease with which holes are bored in most difficult places, and it is stated that the manufacturers have never yet found a place where a hole was needed that they could not get at and bore with this brace. Its construction is simple and it is designed for strength. Its sweep is adjustable for nine and eleven inches. It has a bevel gear drive and the various parts are trussed very strongly. There are really two supporting handles, one permanent, and

MAYHEW'S NEW CORNER BRACE.

the other adjustable to eight different positions. All parts, with the exception of the truss and gear case, are nickel plated, these being black enamel. The handles are cocobolo.

WROUGHT STEEL SNAPS.

Two illustrations of the Niagara Wrought Steel Snaps are given herewith. They are made of sheet steel wrought into shape

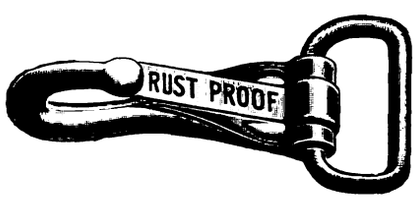


FIG. 1. STIFF FORM HARNESS SNAP.

cold by means of press and die work. This necessitates the use of uniformly first-class material. The body parts are made of cold rolled or open hearth steel; the loops of the best drawn wire formed by automatic machinery, and the springs of the best

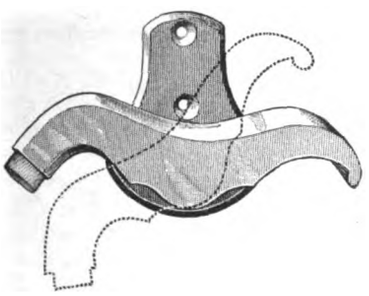

FIG. 2. HINGE JOINT HARNESS SNAP.

quality of rust proof flat drawn spring wire. As will be seen in the illustrations, they are made both in the stiff form and with the hinged joint. These goods are made by the Niagara Falls Metal Stamping Works, Niagara Falls, N. Y.

Digitized by Google

THE EMPIRE DOOR HOLDER.

A number of improvements have been made recently in the Empire Door Holder, manufactured by the Caldwell Manufacturing Co., Rochester, N. Y. The pressure against the floor has

THE EMPIRE DOOR HOLDER.

been increased so that it is claimed to be 50 per cent greater than that of any other holder. It is also claimed that it will hold securely the heaviest doors on smooth floors. It is made in a neat pattern, as will be seen by the accompanying illustration, and should prove a very salable article in any Hardware store.

HOCKEY SKATE AND ANKLE SUPPORT.

Barney & Berry, Springfield, Mass., New York office 114 Chambers Street, manufacturers of ice skates, have made several additions to their large line of this class of goods, among which is a moderately priced detachable hockey skate and Model B

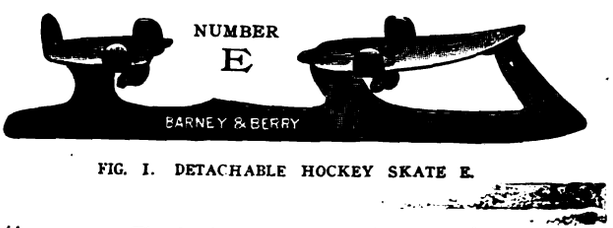

FIG. 1. DETACHABLE HOCKEY SKATE E.

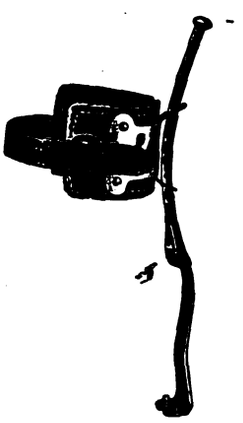
ankle support. The hockey skate, E, Fig. 1, is all clamp and fastened to the shoe by means of double threaded screw clamps at sides of sole and heel. The blades are of cast steel, polished, and the tops of cold rolled crucible steel. This style is regularly made in seven sizes by half inches, 9 to 12 inches, inclusive. Fig. 2 represents the Model B ankle support, which closely resembles their Model A, so long on the market, except that it is designed for use with the ordinary lever skate, such as their A, Z, Ameri-



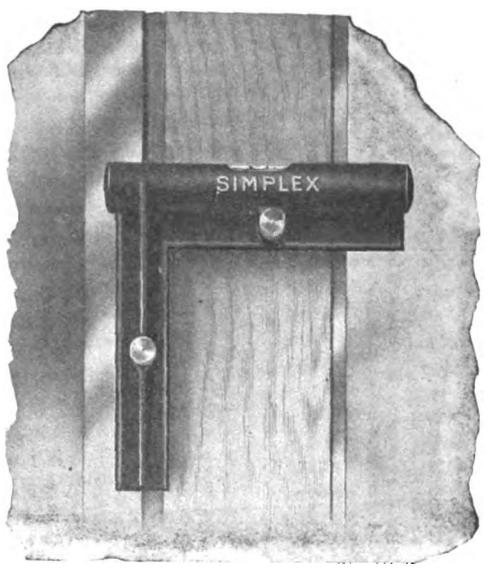


FIG. 2. MODEL B ICE SKATE ANKLE SUPPORT.

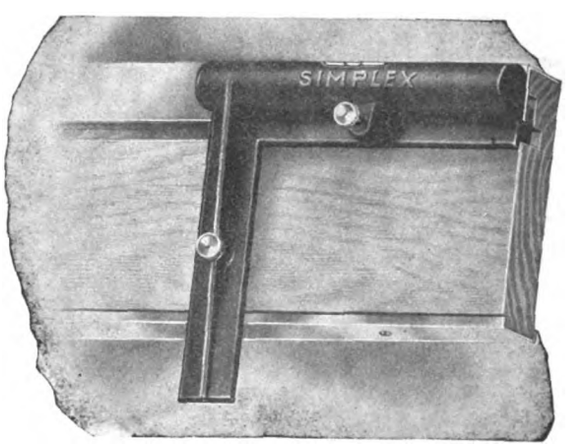
can Club, Lock Lever, &c. In this style two small holes are to be drilled in the heel clamp and the support riveted securely to it by means of the rivets furnished with the support, thus adapting it to any skate of the character named. This support is made



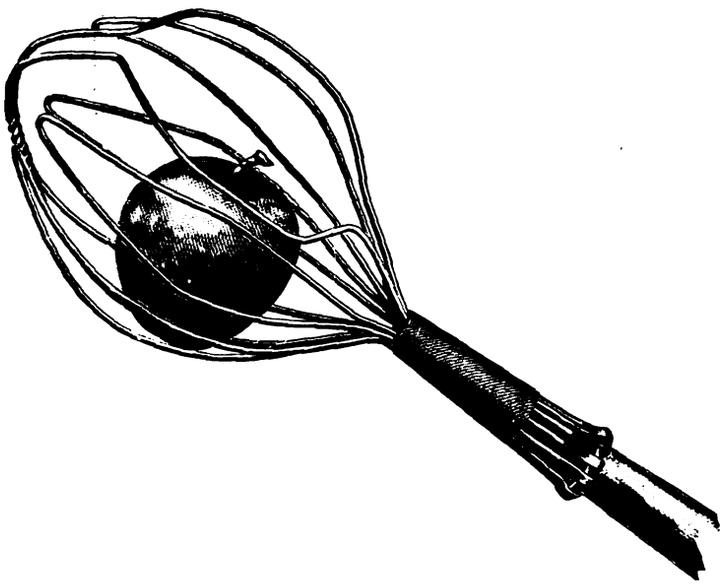
THE SIMPLEX COMBINED PLUMB AND LEVEL.

The Webster & Perks Tool Co., of Springfield, Ohio, are just putting on the market a very ingenious and labor-saving tool for the use of the paper-hanger, i. e., The Simplex Combined Plumb and Level, shown in the accompanying illustrations, from which it will be noted that the tool is designed for use on the regular trimmer straight edge, the first illustration showing its application as a plumb, and the other as a level. It will also be noted that the tool engages with the straight edge, and may be placed at any desired point on the same and securely held there by but half a turn of the small knurled screw, thus it is impossible for

SHOWING ITS APPLICATION AS A PLUMB.

same to drop, slide or shake off, and entirely obviates the necessity of holding it on or against the straight edge, leaving the hands free for marking. It is made of bronze, entirely eliminating the possibilty of damage or breakage if accidentally dropped. It is handsomely finished in oxidized copper, measures but 3x3¼ inches, and weighs only three ounces net.

WHEN USED AS A LEVEL.



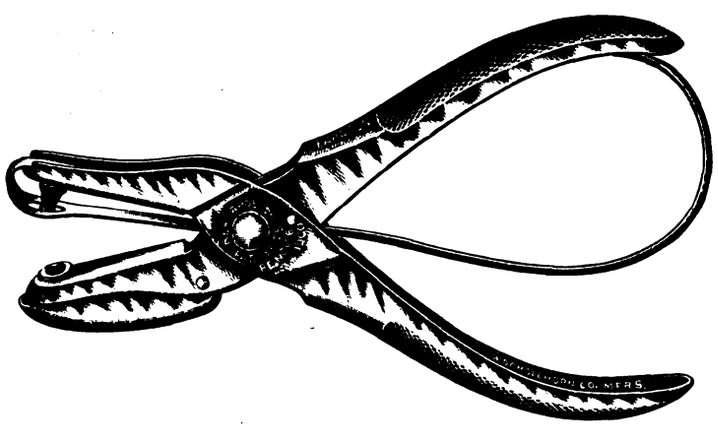
The use of this tool obviates the necessity of climbing up and down ladders to drop a plumb, or the driving of nails, and consequent cracking of plaster, and in securing a level, an assistant is not required to snap the line. It can be used on or against any style or shape of casing.

THE PERFECT FRUIT PICKER.

The Wire Goods Company, Worcester, Mass., are placing upon the market The Perfect Fruit Picker, illustrated herewith. In use, the fruit enters the picker through the side opening. The stem of the fruit naturally swings into the pick wires, after which a gentle pull disengages the fruit. The picker is constructed so that it may be worked until filled, and then lowered to the

Digitized by Google

ground without spilling. It is pointed out that there is an absence of projecting fingers which might become entangled in the



THE PERFECT FRUIT PICKER.

tree branches, and no sharp ends of wire to come in contact with the ripe fruit. The picker is retinned wire and is 13½ inches long over all.

THE "PARAGON" RESERVOIR TICKET PUNCH.

The Wm. Schollhorn Co., New Haven, Conn., are placing before the Hardware trade the Paragon Reservoir Ticket Punch of which we give an illustration, where it is shown full size. It

THE "PARAGON" RESERVOIR TICKET PUNCH.

is simple, moderate in price and durable, being made of sheet metal and full nickel plated. The reservoir catches all the punchings that are made, and thus prevents the littering of the floor. It is especially designed for use at card parties. The reservoir is kept closed by a spring but can be readily opened and the contents emptied into waste basket or stove.

TIME AND MONEY.

Whistler, on the witness stand one day, was asked the price he had obtained for a certain picture.

"One thousand guineas," said he.

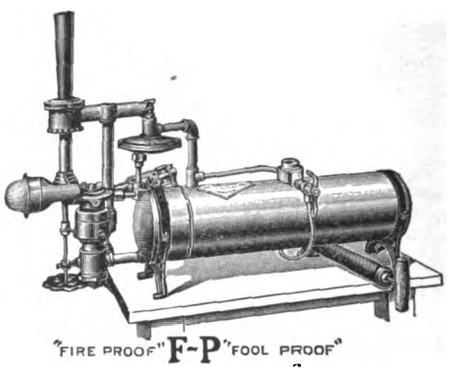
"How long did it take you to paint it?"

"About a day and a half."

"And do you mean to tell the court, Mr. Whistler, that you have the audacity to charge 1,000 guineas for the work of a day and a half?"

"No, sir; I ask it for the knowledge of a lifetime."

AN EYE FOR AN EYE.



"My cook, an old darky, informed me one morning: 'Miss Annie, I's goin' to be married to-night. Is you got a present for me?'

"'But, Maria,' I said, 'you've got a husband alive and haven't been divorced. It would be bigamy!'

"'Well, Miss Annie, I don't care; he's done bigotted fust.'"—*Lippincott's Magazine.*

FIRE PROOF AND FOOL PROOF.

During the past ten years or more hundreds of patents have been issued for machines for using gasoline for illuminating purposes. A few of these machines have been practical, but few indeed have proven safe when in the hands of any other than an experienced operator. The Incandescent Light & Stove Co., of Cincinnati, introduced their first machine in 1896. It was of course crude when compared with their present machine, yet it produced a good light and many of these machines are still in operation. Later they placed in the market a Gasoline Air Light Machine, in which they introduced an automatic regulator to govern the pressure in the tank. In 1900 a still further change was made in this firm's machine, consisting chiefly of the substitution of copper for galvanized steel in the tank. This machine was, after a

careful examination, pronounced by the Underwriter's Laboratory of Chicago "as safe and suitable for use as it is possible to make a device operating under similar principles." However, this firm was not satisfied even after this examination that they had reached perfection, and improvement after improvement has been made until they now feel that in their "F-P" (Fire Proof and Fool Proof) machine they come very close to perfection, if they have not entirely reached it. Lack of space prevents a detailed description of this lighting system, which we illustrate herewith, but it is described in a very interestng manner in the handsome booklet issued by this concern, which will be sent to any dealer on application. This lighting system is especially adapted for commercial purposes, in fact, it can be used to an advantage in any place where the number of burners is not frequently changed.

The gas made by this machine can also be used conveniently and profitably for cooking, heating of tailor irons, for laboratory use and many other purposes. The use of the machine creates no smoke, soot and smell, and after it is started it requires no effort other than turning on or off the lights.

PREPARING FOR INVENTORY.

When inventory time comes a few months hence, many a merchant will be disappointed at the small returns which he is able to show on his investment. Oftentimes the trouble is not with the size of his trade, but with the way in which his investment stands.

To show earning power, the invested capital must be kept at work. The man who is able to hold his stock down to the actual needs of his business is the one who will show the biggest net profits on his investment. The idea of buying cheap in carload lots is all right, but it will not work when the dealer's trade is not adequate to quickly move the carload lot out of the warehouse or back room. Stock which is piled up out of sight is not earning anything. The chances are that it is depreciating in value. It does well if it holds its own.

Hence the disadvantage of carrying dead stock. The merchant's money which is tied up in stock can only be earning him money when it is out in sight of the customers, when it is moving out of his store and bringing in money.

This is a suggestion for inventory time. Surplus stock should be cut down. Stock which has been hanging fire should be moved out and the actual working investment will then be left for the merchant to figure on.

The man who has more money to invest in his business often makes the mistake of stocking up heavily, and thinking that he thereby increases his chance for making money. The net income will not be benefited by dead stock. Far better that he invest the surplus in a new line of goods, if he can make room for them, and keep his old stock down to the actual needs of the business. The more stock he can get the better, provided it is all active stock, working for him every day.

By keeping the dead stock whittled down, the inventory is simplified, and the results are more encouraging.—*Merchants Journal.*

THE HISTORY OF LAMPS.

Evolution of Illuminating Devices from Primitive Times to the Present.

The use of the burning brand as a torch may be regarded as the earliest form of artificial illumination, for ever since our great first father saw the flaming sword at the entrance to his little garden, man has never been ignorant of fire and perhaps never will be. The primitive lamp was a very crude affair. An unworked stone having a natural cavity, a sea shell or the skull of an animal constituted the earliest forms. A bit of moss or a twist of vegetable fibre served as the wick, while fat, grease or fish oil became the illuminant.

When or where or by what people the first lamps were made has never been determined, but it is generally regarded that the introduction of the lamp marked the first stage of man's advancement toward civilization. Terra cotta lamps of good workmanship and of various forms were in common use thousands of years B. C. They consisted at first of a shallow, saucer-shaped oil or fat reservoir, but were quickly followed by those which were oval in shape and had an enclosed reservoir with one or two wick supports. These constituted the types that were common to all eastern lands.

The later Greek and Roman lamps, both terra cotta and bronze, were remarkably rich in ornamentation and graceful in form, and it is these that really serve as the dividing line between the crude primitive inventions and the finished product. The earliest terra cotta lamps were made in one piece, but eventually the Greeks and Romans made them in two principal parts—the oil reservoir and its covering. Each of these parts were joined together after being molded and baked. Large terra cotta lamps were frequently made with as many as twelve wick supports.

Plain iron lamps were used by the common people at a later period than the terra cotta lamps. They were either cast or forged in a single piece, and were mostly copied from the terra cotta and bronze lamps, but without decorations.

It must be noted that the study of the ancient lamp maker was devoted solely to the external form of his wares. Grace, beauty and elegance, as expressed in outlines and decoration were his chief concern. For ages no attempt was made to improve the light, and the smoky, flickering flame continued to shed its uncertain light from the costly candelabra of the wealthy, just as it had from the simple stone and terra cotta lamps of their ancestors.

The first real improvement designed to increase the brilliancy of the flame was the introduction of the flat, woven, ribbon-like wick and the securing of the wick in a close-fitting support. This arrangement permitted only a small surface of the wick to be exposed to the flame, and the wick being narrow, the flame came in contact with the centre as readily as with the outward parts, so that most of the free carbon was consumed, consequently there was less smoke than with the old-style loose wick. M. Legers, of Paris, introduced this improvement in 1783.

The same year M. Argand, a Swiss chemist, put on the market a new burner, which consisted of a tubular wick inserted in a tube which extended through the oil reservoir and opened into the base of the lamp, thus affording a means of centre draught, which supplied an abundance of oxygen to the flame and created sufficient heat to consume all the free carbon and so prevented the escaping of smoke. This was the beginning of a new era in lamp making, for the art entered upon what may be termed the inventive age of the lamp.

Science now came to the aid of the artisan, and principles involving an understanding of the laws of combustion and the science of light were applied to new constructions in illuminating devices. The result was more and better light.

Argand's first lamps were simply huge oil reservoirs with his new burner attached to the top. He used sheet iron chimneys formed with an opening over the flame. But in a purely accidental manner glass chimneys were discovered. A workman in the factory, in attempting to heat a bottle over the flame of a lamp cracked off the bottom, and because the glass had become too hot for him to hold, he momentarily placed the bottle over the burner. The result was surprising. The brilliancy of the flame was not only increased, but the light became steady, and in every way superior to that produced with a sheet iron chimney.

With this discovery, attention was now paid to manufacturing small hand lamps of tin, brass and pewter, and a long step was taken toward producing the models that are so common to-day. In this American ingenuity and skill took an active part.

Prior to 1680 most of the lamps used in the colonies were imported from England. They were of iron, fashioned in the shape of a pear and flat on the top and bottom. The colonists called them "Betty lamps," and the pointed hook was used to suspend the lamp from the high back of a chair or from a crevice between the great stones beside the open fire place. In 1680, a tinsmith of Newbury, Mass., began the making of tin "Betty lamps," thus becoming the first manufacturer of this class of merchandise in the New World. He was immediately followed by a score of others in Boston, Providence, and other cities.

Among the earliest American experimenters in lamp construction was Benjamin Franklin. Not content with perfecting an improved stove, known as the Franklin heater, he very early turned his attention to the improvement of domestic lamps. From this point it was not a far cry to the introduction of coal oil and kerosene lamps, which have developed into the wonderful light-giving creations we have to-day. America is now the greatest lamp manufacturing country in the world, and the productions of domestic factories are unsurpassed in their endless variety of form and their richness of ornamentation.—*Exchange*

THE MEETINGS AT ATLANTIC CITY.

That there will be a good attendance at Atlantic City November 16th, 17th and 18th of Jobbers and Manufacturers, goes without saying, as the largest amount of interest is being worked up over the discussions which will take place, and a great deal of good is expected from the manner in which all these ideas will be handled. Never before at conventions have the subjects of Special Brands and the contention over this subject between Manufacturer and Jobber, been brought to the notice of the trade in so prominent a manner. The Jobber has always regarded Special Brands favorably, as on them he makes a satisfactory profit, and the cost is not exposed, while on the Manufacturers' best brands, the exact percentage of profit is more readily ascertained. While the Manufacturer does not enjoy the displacing of so many of his best goods for which the Special Brand goods are purchased, the goods under Special Brands are more troublesome to produce, and no stock can be heaped up in the meantime in anticipation of future orders. This question will take precedence over Catalogue house prices, for the more that question is looked into, they will find a good average profit is made by the catalogue house, leaving a margin on the sale when made, and only disappointing when the cost to the Retailer is out of proportion to that of the Catalogue House.

Upwards of 125 houses will be represented from all parts of the country, each house with several delegates, and as the place of meeting is an attractive spot at this season of the year, many of the delegates will bring their wives and daughters to participate in the enjoyment of the good things provided.

The session will be opened with a collocation on the subject, "What Are the Proper Avenues for the Distribution of Hardware and Kindred Lines?" which will be responded to by one or more of the prominent manufacturers. The representatives of Canadian Wholesale Hardware Association will be introduced and add their endorsement by being present.

An executive session will be held on the afternoon of the first day; a reception of the American Hardware Manufacturers' Association being tendered the delegates in the evening. Thursday and Friday will be given up to the consideration of the business of the association, the work of the past year, and its policy for the coming year. The delegates on Thursday afternoon will attend a meeting of the American Hardware Manufacturers' Association. There will be two notable changes in the usual programme. To interest the ladies in the convention proceedings they will have the honor assigned them of distributing the various souvenirs from manufacturers who desire to advertise their products, which will consist of articles of utility, and on Friday evening the National Hardware Association will give the annual banquet at the Hotel Rudolph, the subscription price to be $5.00 per cover, which it is expected will prove very successful, especially in the usual speeches, etc., that will enliven the proceedings, further particulars regarding which will be announced later. The fares from the different parts of the country will be on the certificate plan, one and one-third fares for the round trip. The officers' headquarters of the association will be at the Hotel Rudolph, the rates being $3, $4 and $5 a day, American plan.

EXHIBIT OF DICK'S STEEL GOODS.

Friedr. Dick, Esslingen, Germany, for whom John Chatillon & Sons, New York, are sole selling agents in North America, has a very handsome exhibit of Butchers' Tools, etc., at the World's Fair, St. Louis. This display, which we illustrate herewith, and which is being managed by Chatillon & Sons, is installed in Block 22 of the Machinery Building, and includes Butchers' Knives,

WORLD'S FAIR EXHIBIT OF DICK'S STEEL GOODS.

Carving Sets, Cleavers, Butchers' Belts, Files and kindred tools, manufactured by this firm. The business of Friedr. Dick, established originally in 1778, has always been conducted under the same name, and at present employs 450 workmen, using 300 steam horse power. The house has been the recipient of fifty medals and awards from various expositions, including that of Chicago in 1893. The goods of this factory are largely marketed in Europe, and all over the world, and it is stated that this house is the largest producer of Steels and Files in Europe, using in their manufacture, it is added, only the best quality of material.

HUSTLE.

A business or a patch of ground was never yet so far gone but that the right kind of a man given a free hand, could not make it thrive, for there are few situations where getting sixteen and a half ounces out of every pound will not make success. Here comes the successful man. His watch ticks seventy seconds every business minute. Watch him. His first step is to apply system. He brings results up and expenses down. System to this, system to that. Out with guess, in with fact. He prunes with one hand and fertilizes with the other. His fruits are large. His predecessor clubbed the tree for a barrel of immature fruit. He gets a full bushel of round, luscious apples, sound to the core. Each detail overcome in the bud has given to them growth. He commands for a bushel the price of a barrel, and in place of going to market the market comes to him. For not in the whole barrel of "qualified" fruit could be found the flavor with which every one of the specialist's apples is packed. He has developed his possibilities. He is a good captain of industry because he has been a good private, and in the humbler days he learned to pack his own knapsack, to black his own boots.—*The Draper.*

THE SAN FRANCISCO TRADE.

Considering that this is a Presidential year, when, according to all precedents, trade should be dull, the signs of the times are certainly cheerful.

The withdrawal of the Oregon and Washington membership from the California Association known as the Pacific Coast Hardware and Metal Association, and their formation entitled Pacific Northwest Association, is indicative of no weakening of the strength of the California society. Both associations will work as a unit in all trade matters of importance to the coast generally, as they are altogether united in the best of fraternal feeling. It will be in matters of more or less local significance that the two bodies will now confine their individual efforts.

The recently noted resignation of A. C. Rulofson from his thirty-five-year connection with the house of Baker & Hamilton, was brought again to mind this week by seeing in charge at his desk Charles F. Sharrocks, who has been promoted to the position of manager of the Hardware department of the house, the official position made vacant by Mr. Rulofson's resignation. Mr. Sharrocks has had the rare advantage of being a co-worker with Manager Rulofson in his headquarters office during the last seventeen years. Industrial Press Ass'n.

W. B. Jarvis Co., Ltd., 28 Canal Street, Grand Rapids, Mich., have recently issued a large and handsome catalogue exploiting their goods, which include sportsmen's supplies, firearms, ammunition, hunters' clothing, gun sundries, skates, etc. They are the only exclusive dealers in sporting and athletic goods in Michigan and carry a complete stock. They are Michigan and Indiana distributors for Draper & Maynard Co., Plymouth, N. H., makers of high-grade baseball, football, tennis goods, etc., and carry a complete stock of everything pertaining to indoor and outdoor athletics. They claim to carry the largest and most complete stock of bicycle tires, tubes, brakes and sundries of all kinds in the State. The above catalogue is finely illustrated throughout, showing their full lines of goods, and each article is accompanied by list price. They state they carry only goods of known reputation and they believe their prices will compare favorably with any other jobber or manufacturer. Send for their illustrated catalogue of athletic goods.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED OCTOBER 4, 1904.

370,765. Hanging Device for Picture Frames. A. Campbell, Brooklyn, N. Y.
370,770. Candle Lantern. S. C. Drumheller, Sunbury, Pa.
370,771. Lawn Mower. Wm. J. Fitzgerald, New Haven, Conn.
370,773. Bolt. P. Forg, Somerville, Mass.
370,827. Coffee Pot. J. S. Stringer, Columbia, Ala.
370,848. Wrench. A. J. Barber, Auburn, N. Y.
370,861. Potato Masher. G. M. Drum, Los Alamos, Cal.
370,878. Combination Lock. C. Launer, Minneapolis, Minn.
370,902. Carpet Stretcher. A. Stockdale, Wolcott, Iowa.
370,913. Tool Handle. C. Willms, Baltimore, Md.
370,933. Ash Sifter. Wm. Coughlin, New York, N. Y.
370,937. Vise. J. Ernst, Bay City, Mich.
370,951. Clothes Horse. H. B. Lambert, Chelsea, Mass.
370,960. Pliers. E. B. Manley, East Meriden, Conn.
370,961. Tongs. W. H. Mannes, Colorado Springs, Colo.
370,974. Milk Boiler. C. D. Salfield, San Francisco, Cal.
370,991. Ironing Board. G. R. Taxis and D. Nickel, Morris, Ill.
371,023. Coal Hod. E. Barrath, Cincinnati, Ohio.
371,060. Flat Iron Stand. O. E. Goodrich, Allegan, Mich.
371,066. Ice Tongs. A. S. Hollenback, Philadelphia, Pa.
371,068. Jack-Screw. C. H. Hopkins and G. W. Knight, Lyndonville, Vt.
371,105. Combined Tack Hammer and Puller. J. Souders, Greentown, Ohio.
371,117. Top Knot for Blacking Brushes. J. Ames, Jr., Toledo, Ohio.
371,128. Combined Step Ladder and Chair. R. G. Dudley, Newark, N. J.
371,134. Heating Stove. J. W. Fowler, Brooklyn, N. Y.
371,149. Nut Lock. W. A. Pungs, Detroit, Mich.
371,151. Portable Oven. M. C. Root, Toledo, Ohio.

PATENTS ISSUED OCTOBER 4, 1904.

771,263. Fishing Cork. A. J. McCord, Chattanooga, Tenn.
771,276. Sash Balance. W. Schuch, West Hoboken, N. J.
771,333. Carpet Cleaner. N. V. Steel, Missouri Valley, Iowa.
771,350. Hose Nozzle. F. J. Christman, Syracuse, N. Y.
771,422. Flat or Sad Iron Waxing Pad. A. L. Drake, New York, N. Y.
771,455. Razor Stropping Device. J. W. Bouchard, Canastota, N. Y.
771,654. Separable Hinge. S. F. Meek, New York, N. Y.
771,697. Can Opener. A. F. Bethge, Omaha, Neb.
771,732. Lawn Mower Sharpener. F. B. Johnson, Addison N. Y.

PATENTS EXPIRED OCTOBER 11, 1904.

371,215. Sad Iron Handle. N. L. Post, Cleveland, Ohio.
371,225. Screw Driver. Amos Stevens, Philadelphia, Pa.
371,226. Screw Driver. Arthur L. Stevens, Philadelphia, Pa.
371,259. Pneumatic Door Check. G. Geer, Peterborough, N. H.
371,294. Plumb Level for Boring Bits. G. Woods, Needham, Mass.
371,369. Door Hanger. W. H. Samson, Medina, N. Y.
371,474. Metallic Door Mat. T. Perrins, Philadelphia, Pa.

PATENTS ISSUED OCTOBER 11, 1904.

771,842. Fruit Picker. G. O. Stansbury and E. Z. Cummins, Cherryvale, Kan.
771,843. Cheese Cutter. C. G. Strubler, Detroit, Mich.
771,856. Adjustable Ironing Board. W. O. Bowman, Oakland, Cal.
771,925. Aerial Punching Bag Supporting Bracket. J. J. O'Connor, Montreal, Canada.
772,001. Window Screen Hanger. E. G. Rust, Dallas, Tex.
772,095. Automatic Door Closer. J. E. Gates and F. Eihstadt, St. Joseph, Mo.

PATENTS EXPIRED OCTOBER 18, 1904.

371,560. Sash Holder I. B. Edington, Waterloo, N. Y.
371,612. Dust Pan J. D. McDougal, Columbus, Ohio.
371,639. Pliers for Securing Fasteners to the Corners of Boxes. T. A. Taylor, Poughkeepsie, N. Y.
371,646. Door Check. S. J. Vance, Norton, Kan.
371,687. Catch for Hinged Lantern Tops F. Kaczerowski, Chicago, Ill.
371,689. Scissors Sharpener. H. U. Kiztner, Bordentown, N. J.
371,756. Pruning Shears. J. T. Henry, Hamden, Conn.
371,846. Tennis Racket. V. Kent, Seekonk, Mass.
371,882. Potato Masher and Fruit Crusher J. Fitzgerald, Newark, N. Y.
871,897. Sled Propeller. R. J. Murphy, Middletown, Conn.
371,899. Fountain Brush. C. H. Osborne, Forestville, Conn.

PATENTS ISSUED OCTOBER 18, 1904.

772,447. Collapsible Step Ladder C. Wheelwright, Cincinnati, Ohio.
772,481. Coffee Pot D. H. Talbert, Indianapolis, Ind.
772,514. Door Check. R. W. Hubbard, Ashtabula, Ohio.
772,524. Mop Head and Implement Clamp. S. C. Lawlor, Duluth, Minn.
772,542. Knife Sharpener G. L. Sullivan, Kansas City, Mo.
772,593. Screw Driver Paul A. Wagner, Carlstadt, N. J.
772,686. Sliding and Swinging Sash Window. E. H. Ullner, Woodcliff, N. J.
772,716. Window Washer. Wm. H. Ridder, New York, N. Y.
772,807. Fish Hook Wm R. Ketchum, Portage, Wis.
772,888 Cork Extractor. J. Kaiser, San Francisco, Cal.

THE TRADING STAMP HABIT.

We Americans have long boasted of up-to-date brightness; we have made out that we are all lineal descendants of Sir John Wise. Therefore, it comes as a chill puff of winter, when we face a set of facts that show that we number about as many fools to the square inch as any other healthy and growing nation.

The appetite of the public for fool "souvenirs," totally useless plunder, is well shown at the World's Fair, where women will carefully pick up circulars on the use of carborundum, or tables giving the equivalents of horse-power in units of electric energy, and carry them around all day. Some visitors get the souvenir fever, and spend valuable days in gathering stuff, which, while perhaps useful to persons directly interested, is of no earthly manner of use to them.

The "trading stamp" business, says the *Shoe and Leather Gazette*, rests largely on this idiotic habit of browsing about, looking for "something for nothing." The single stamp has a value so slight that the smallest of Chinese coins would buy a hatful, but people will fight to get them.

A Minnesota dealer is stated by an exchange as having made a showing of this minuteness of value that ought to have some curative effect on victims in his locality. He went at it this way, heading his talk, "A Game of 999."

"Perhaps you have seen, from time to time, the recent advertisements of stampers portraying the liberality of their offers of stamps. Let us look into this 'liberality' business.

"You spend $1.00 and get part goods and 10 stamps of a stamper.

"These 10 stamps are worth not one cent in cash in one kind of stamps. It takes 100 stamps to make one cent in cash. To get the 100 stamps you must spend $10. Of what vintage is the 'liberality' that gives you one cent if you give the one-center $10 first? 'Liberality' is easy when all you need to do is take $10 and keep $9.99 of it. It is a beautiful game of 999. It makes philanthropists faster than the famous 999 locomotive makes the miles.

"Hereafter when a stamper begins to tell you of his 'liberality,' just say to him, '999,' and if he still persists, give him a penny without waiting for him to give you $10. He plays it the other way. He gets your $10 before you get the one cent.

"NO TRADING STAMP PRICES HERE."

This is plain enough, and pointed enough, to make stamp fiends ashamed of themselves, for being such silly marks in struggling to get such nearly worthless coupons as the average trading stamps are.

GETTING OUT OF DEBT.

"What was it your husband wanted to see me about?" inquired Mrs. Newliwed's papa.

"I think he wanted to borrow a couple of hundred dollars from you," she said. He's so anxious to get out of debt."—*Philadelphia Ledger.*

IT DIDN'T WORK.

"This'll be good for a hundred anyhow," said young Sow His Wild Oats to his pal. "Every young fellow needs a stake when he is of age, so I'll send this telegram collect to the old man:

"'Dear Father—I am twenty-one to-day and broke.'"

An hour later the fond father wired collect:

"So was I when I was twenty-one."

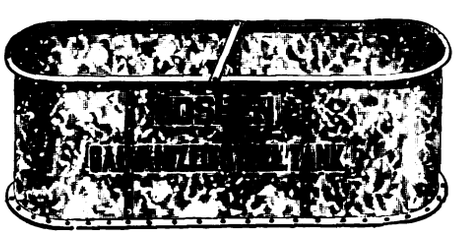
IMPROVED COMBINATION RAZOR BOX.

One of the special features which distinguish the Star Safety Razors, manufactured by Kampfe Brothers, New York, is the newly improved Combination Razor Box which we illustrate herewith. This is intended for the safe keeping of the knife and

COMBINATION RAZOR BOX.



protection from rust, as will be seen by the illustration. Two views of the Star Razor are also given herewith; one showing the front view with the razor ready for use, and the other the handle without the knife showing the automatic lock. This fea-

ture of the Star Razor is a particularly simple one, at the same time, very valuable, as it makes possible the attachment or detachment of the knife with great ease. This is quite necessary in the case of a Safety Razor, as after shaving, the knife should always be removed and thoroughly cleaned, and placed in the carrier frame in the razor box.

GOSHEN STEEL STOCK WATERING TANKS.

The construction of the Goshen Galvanized Steel Stock Watering Tank now being placed on the market by the Kelly Foundry and Machine Co., of Goshen, Ind., as now made, is practically the same as it was fourteen years ago. The top of all Goshen Stock

Watering and Reservoir Tanks is surrounded by 1x 3-16 inches or heavier angle steel. The sides and bottom and the ends and bottom are flanged together and riveted between two bars of 1x3-16 inch or heavier flat iron. All seams are formed by lapping the sheets and riveting together between two bars of 1x3-16 inch or heavier flat iron. In the Goshen tanks are used ¼-inch rivets set 3 inches centres. The side and end seams extend from top to bottom of tank and being bound, as they are, with two heavy bars on either side of the sheets, it not only makes the tank as strong at the seams as any other place, but also stiffens and strengthens the tank, causing it to hold its shape perfectly when full of water. The great strength of Goshen tanks has brought them into prominence, not only for stock watering and reservoir purposes, but they are also extensively used by plumbers, taking the place of lead and zinc tanks for supplying water to bath room and similar purposes. The fact that they are not affected by heat or cold makes them especially suitable for the storage of water for public buildings and factories. The fact that they are antiseptic and give out no odors makes them very desirable for creamery and dairy purposes. The list prices of steel tanks are based on No. 20 galvanized steel. Goshen tanks are built in any gauge from No. 10 to No. 20, inclusive, and in any size and shape up to and including their No. 63 tank, which is 16 feet diameter by 16 feet high.

STEVENS' NOVEL EXHIBIT AT THE WORLD'S FAIR.

The J. Stevens Arms and Tool Co., of Chicopee Falls, Mass., are making a novel and attractive exhibit in the Manufacturers' Building at the World's Fair, St. Louis. They realized how difficult it would be to make an exhibit that would interest the general public, and also that moving attractions always command attention, so they arranged a hunting scene, with a life-size figure of a young lady dressed in hunting costume holding a Ladies' Model Stevens Shot Gun. Out of the brush in the rear of the scene a rabbit appears and runs along a log to the far end, and at this point the young hunter raises the gun, shoots the rabbit and it disappears, to return again every three minutes, and so life-like is the rabbit and its movements that a rural youth, thinking it a real, live rabbit, climbed up over the railing and caught it, thus "putting the attraction out of business" for the day.

STEVENS' EXHIBIT AT WORLD'S FAIR.

An electric, revolving, five-panel "Daily Talks" Sign imparts to the public:

"Stevens' Firearms Are the World's Standard."

"Are Highest in Quality, Lowest in Price."

"All Up-to-date Dealers Selling Firearms Will Give Information or Quote Prices."

"A Postal Card to the Factory Will Bring a Catalog to Your Home."

"J. STEVENS ARMS & TOOL CO., Chicopee Falls, Mass., U. S. A."

And all report that this "Holds the crowd" better than any other exhibit in the building.

At the base the Firearms and Accessories are displayed in glass cases with neat tags attached by ribbon.

The "Facade" is 12x18 feet, and height to top of dome, 20 feet, is of relief work finished in white, blended with green, and "After the Fair is over" the visitors will remember the STEVENS unique exhibit and believe it will impress "STEVENS" on the tablets of their memory better than could have been done in any other way.

THE BARGAIN SALE IN CINCINNATI.

By Wm Thorburn

Anent the bargain sale article appearing in last issue of Hardware, exceptions were taken to the first clause from the fact that exactly the opposite are the conditions prevailing in Cincinnati and instead of reaching a point where "Bankrupt Sale is in order, with the Sheriff in charge," the enlarging of stores and largely increasing number of sales people is the rule. That merchants seem afraid to have customers know they are selling goods at a profit is not the case in Cincinnati; there are the goods, and they are marked in plain figures; you can take them at the advertised price or let them alone; there are no efforts on the part of the sales people to sell them. The Special Sale advertisement has already done that and the sentiment in favor of these sales is so great that extra exertions are absolutely necessary in the small stores to keep alive without resorting to special sales of some sort.

"There are always some goods in every store, no matter how nicely the shelves may be kept or the Hardware arranged," said one dealer, "which have been exposed for sale for such a length of time that they have actually become an eye-sore, and it would really be good riddance to get them off the shelves at any sacrifice." Another said: "There are frequently times when the dealer's judgment is at variance with actual conditions of the people's needs then existing, and an over supply is purchased, the season getting late without a probable chance of selling enough of them to result in any profit; it would be infinitely better to sell them off at a reduced price and not carry them over to next season. Again, some worthy salesman has induced a purchase of an article as a "great seller" which in this particular location becomes a "dead one" simply because the trade visiting the store are not expecting to find it there, and even if they see it, the fact of its being in this particular store loses its identity, therefore its selling power in this particular store is lost, though a very attractive and profitable accessory in another store."

Cincinnati is certainly a "Bargain Sale" city, every day of every year for the past two decades has had its Special Sales, and while at that time but few houses were urging the Special Sale and in but a feeble way, many houses and in no particular location are forcibly presenting Bargain Sales as a regular business today. It is but of a comparatively recent date that the Hardware dealers have entered the Bargain Sale field, but it is evidently a profitable venture, as the Pickering Hardware Company held its forty-ninth weekly Special Sale last week in which were offered Garden City Nail Hammers, 35 cent ones for 21 cents, and 40 cent ones for 23 cents; Landers, Frary & Clark butcher knives at 19 cents; Monarch Bath spray and brush combined, regular price $1.50 at 98 cents, and the Belgium Government Stamped double barrel breech loading shot gun 12 gauge, 30 inch barrel, made of Belgium laminated steel, etc., at $6.25 each. These Special Sales, started almost a year ago as an experiment, following in a limited way the lines adopted by the regular Special Sale Houses, and they say it is in evidence that the experiment has proven a success, so much so they intend continuing along the same lines next year. The Cincinnati Houses in the Special Sale class are very far away from having "Bankrupt Sale" attached to themselves; theirs are the largest houses here, and their commercial ratings will dispense with any thought of seeing "closed shutters" on any of them.

While bargain sales and the like are quite the thing for Cincinnati generally, there are houses here which dare not put a price ticket on any article they display, as is the custom of the Special Sales houses. A certain Fourth Street merchant placed price tickets on a few special articles displayed in the windows to try the effect on sales as an experiment, the very first customer entering directly after, a lady customer of long standing, remarked to the proprietor that if he put in those price tickets he had better take them out as they gave the goods a cheap affair look. He took them out, and when asked if that customer was of enough importance to dictate the manner of conducting his store, remarked that the effect she might have on her social set were he to refuse, was worthy of consideration, and he would rather not take chances. Trade conditions are not the same in every store and what would be a profitable custom in one store might prove a losing proposition in a store as recherche as the one above mentioned where but a limited number of customers are catered to, but competition has become so acute that to obtain results the merchant must need be something special, way up in lodge affairs, or of the four hundred, and his associates, if he has any in the business, must be equally efficient as an attraction if he wishes to continue to do business along old lines. The fact is that to keep up with the procession he will have to resort to Special Sales. Where once they become established it becomes a disease with people hunting or watching for bargains and attending the sales, but prices are expected and the advertising man simply keeps the ball rolling by making leaders of a few things different each week. Very often two advertisements of two different houses will appear in the same paper, both advertising the same article at the same price and both saying "We defy competition." In such case, the house that advertises some other article the reader might want in connection with the article both advertise, is the house which gets the business; the people seem to "play no favorites."

The important point is to make it a specially worth while to visit the store, once inside, the proper display of your goods, and attractively price marked, sells the goods, leaving little else for the clerk to do but to put the money in the money carrier and go on to the next one producing the coin. These kinds of shops don't go bankrupt.

THE GOLIATH OF THE KNIFE FAMILY.

Goliath of the Knife family may occasionally be seen in Hardware stores of leather making districts of the country, for he is too rare and valuable a curio for general public exhibition. Goliath is about 16 feet long, and five or six inches broad, and beats his little cousin, Jack Knife, whose ability to double up has won him fame, by twisting up in graceful curves like a figure eight.

Goliath is an ugly looking customer, and his purpose, either in arts of peace or war, would baffle Sherlock Holmes, as well as the ordinary individual. But properly harnessed, and with a good driver holding the reins over him and plenty of feed in the box, Goliath can do stunts that seem almost worthy of the first pages, with full illustrations, in the wonder book.

Goliath can slit a sheet of leather from the pelt of Mary's little lamb, or Mrs. Leary's famous cow, or their posterity, as thin as a Japanese napkin; and this is his principal means of earning his living. Goliath is sold by the Hardware man, who doesn't like to have such a big ugly looking cuss around, to the first man who has sufficient good Roosevelt dollars to buy him. Goliath's new owner usually at once puts him to work, hitching him to two pulleys of an ingenious machine, called the belt knife machine, whose chief organ is Goliath or his twin brother.

The pulleys revolve, under pressure from Giant Sy Steam, and then Goliath goes whirling madly over and over them time and again.

His keen edge is thrust up between two jaws, between which an operator feeds piece of sheep, goat calf, cow hide or other leather, and Goliath splits them in various thicknesses as indicated by the regulator before him. Some pieces are shaved off as thin as tissue paper, and from this width they range up to a thickness of a quarter of an inch.

Goliath surely earns his living, for he doubles the value of many pieces that he splits. For instance, a man has one cow hide which is twice as thick as the leather he wishes for a pair of shoes. So he gets Goliath to split it in halves, and then he has two hides, each thick enough for a pair of shoes. Goliath isn't at all particular about what he splits, and he'll split a finger as quick as he will a side of leather.

Goliath's birth is shrouded in mystery, though his sponsors guarantee him a respectable individual. He was delivered from the red hot forge of the Lovejoy Machine Works, in Lowell, Mass., where Daniel Lovejoy now enjoys his vigorous 81 years of life and 56 years of active experience as a knife maker, he being the oldest man in his specialty in the country.

Goliath's ancestors came from Pennsylvania steel mills, where they are produced by a secret process. Upon arriving at the Lowell works, the steel plates are cut into lengths of 16 feet and are then welded in gas forges to iron backs, and thence rolled to a thickness of a quarter of an inch.

Then the piece of steel is hammered into the shape of a Goliath beneath a 600 pound drop hammer, and his proportions are forever fixed by heating him and dipping him into a secret mixture. Goliath is a peculiar member of the knife family, for, while he must have great strength, he must also be as flexible as a whalebone so that he may rapidly revolve around the pulleys of his future owner. To make him fit these pulleys, the long drawn out Goliath is doubled up into an endless belt, and welded into one piece. Then Goliath is ground to a razor edge between grindstones, and by the time he is finished he looks capable of cutting some mighty big swaths in the Russian army, providing the Japs only had him.

But Goliath's life is short, though useful. He goes the pace that kills, for he always has to keep an edge on to keep up with his work. He has frequent recourse to a small emery stone for stimulation, and so continually keeping an edge on rapidly burns his life away, as it does men and knives of lesser size. In a month or six weeks Goliath goes to the bad, and then finds rest in the junk pile. But another is always ready to take his place, and go the same rapid pace that kills. Such is the story of Goliath of the knife family.

JAP-A-LAC

"WEARS LIKE IRON"

THE Hardware dealer, who is willing to take his share of the profits accruing from JAP-A-LAC sales, is sure to become an enthusiast on this new wood finish.

We advertise it in the principal magazines and periodicals, and spend immense sums of money in explaining its merits to the millions of readers.

JAP-A-LAC is the quickest selling commodity of its kind in the market.

JAP-A-LAC does not scratch white or show heel marks.

JAP-A-LAC may be used for all kinds of interior finishing, furniture, iron work, doors, etc.

There is nothing just as good. Why not stock what people call for?

Write for special proposition to dealers and full information.

THE GLIDDEN VARNISH CO.
MAKERS OF HIGH GRADE VARNISHES
No 44 WILLIAMSON BLDG CLEVELAND, O.

TYPES OF TRAVELLERS.

Veteran Dealer Discourses on Their Ways— Harm Wrought by Lack of Diplomacy.

"There are all sorts and conditions of travellers, and dealers soon come to know which of them have tact and which have not; which are a help and which a hindrance. We have to be pleasant with all of them, of course, but some of them we greet with hearty and unaffected good will," remarked an old dealer to a Bicycling World man.

"Such a difference as there is, too," he continued. "There is one man who drops in on us two or three times a year, and who transacts his business in about five minutes, leaving the instant he is through, carrying with him a signed order for goods. He is business clean through. No blarneying or beating about the bush, no round-about talk on a dozen topics foreign to bicycling. Instead, he goes right to business, opens his sample bag and shows us his goods We want certain things, and if the prices are right—and they usually are—we buy. The bag is snapped to with a bang and he is on his way down the street in a jiffy. Why, he has been selling us goods for years and I don't even know his name!

"There's another man who is as deliberate as the first man is quick. He comes in and waits our pleasure. He will make himself useful, too, talk to a customer and keep him in play until we can attend to him. He even made a sale for us, once. I was trying to handle two customers at once, and he joined in the talk and as soon as he got the lay of the land he took one of them off my hands and actually sold him a machine, while I was vainly trying to close with the other one. It is hardly necessary to say that he got an order.

"There's another side to the picture, of course. The travelling man who is in a big hurry, and must be waited on at once; the fellow who has been sent on to patch up a row over some guarantees; and the one who is a collector as well as a salesman, all have their ways of getting on your nerves and snarling things up.

"The 'rush' man has to make a train, and he insists on your dropping everything and attending to him. The peace maker who has instructions to come to terms over the disputed guarantees, starts out with the assertion that his people were right and you were wrong; and this riles you and you get into a redhot argument over the matter, so that when the concession is made you are still irritated and think hard things about the man and his concern.

"The man who is both collector and salesman muddles the thing, too. There is a slight balance due, but collections have been slow or you would have squared it. The concern is anxious to sell you more goods, and therefore the collection of the old account should have been gone about diplomatically. Instead, the man broaches the matter first thing, and becomes ugly when you show that you don't like his manner. In a huff you give him a check or a short time note, and then wait for him to change his tune. This he does when he brings out his samples, and you take your revenge by telling him you are not ready to order. By this time he is in a more humble mood, and plies you with solicitations, but you hold off stiffly and give him no satisfaction.

"Such tactless travellers do a lot of harm, and the trouble is that their employers don't know what the trouble is or why they lose trade."—*Bicycling World.*

♣

Telephone mistakes may have their serious sides. A man who wanted to communicate with another named Jones looked in the directory and then called up a number. Presently came through the receiver a soft feminine "Hello!" and he asked. "Who is that?"

"This is Mrs. Jones."

"Have you any idea where your husband is?"

He couldn't understand why she "rang off" so sharply until he looked in the book again and discovered that he had called up the residence of a widow.—New Yorker.

REVIEW OF THE MARKETS.

WIRE NAILS.—The current demand at the mills is an excellent one, and tasks their capacity to fill orders complete. The prevailing impression is that the price of Nails is a satisfactory one and that orders should be forwarded while the assortment is good. The market is a firm one, and fears are entertained that it is liable to be advanced. Quotations on car load lots to either jobbers or retailers are f.o.b. Pittsburgh 60 days, or 2 per cent discount for cash in 10 days.

Carload lots $1.60
Less than carload lots.....$1.65

New York. Small sizes of Nails are in short supply, otherwise the demand is very good for current wants. The market may be considered firm at the following quotations:

Single carloads $1.79½
Small lots from store.....$1.85 to $1.90

CUT NAILS.—Demand good, especially for small lots for prompt delivery. Quotations are as follows: Carload lots, $1.60, and less than carload lots $1.65 f.o.b. Pittsburgh. In the East, Iron Nails are quoted at the same price as Steel Nails, but in territory west of Pittsburgh Iron Nails are quoted in carload lots f.o.b. Pittsburgh at $1.65 with an advance of 10 cents in less than carload lots.

New York. Local demand is a good one, and the tone of the market steady and firm at prices quoted. Quotations are as follows: Carloads on dock, $1.74. Less than carloads on dock, $1.79. Small lots from store, $1.85.

BARB WIRE.—A good demand from the West still continues. The leading Manufacturers refuse to enter contracts except for shipment within 30 days from date. The tone of the market is characterized by firmness. The regular schedule of prices is as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.75	$2.05
Retailers, carload lots	1.80	2.10
Retailers, less than carload lots	1.90	2.20

SMOOTH FENCE WIRE.—The demand is excellent, and the mills are running with order books in good condition. Market is regarded as being a firm one. The same rule applies as to orders, limiting them as to date of delivery within 30 days. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days.

Jobbers, carload lots.....$1.45
Retailers, carload lots 1.50

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advance.

CORDAGE.—The following prices represent the market:

	Cents per lb.
Pure Manila, 7-16-inch and larger	11½@11¾
No. 2 Manila	10¼@11
Pure Sisal, 7-16 and larger	9
No. 2 Sisal, 7-16 and larger	7¼

LINSEED OIL.—Under date of October 19 the following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....42 cents per gallon.
In lots of 5 barrels or more.....41 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity, at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon

THE PITTSBURGH TRADE.

Pittsburgh merchants had their second excursion, 17th to 22nd insts. The route this time covered southeastern Ohio and the excursion was a success both as to numbers and results. Pittsburgh means to keep in touch with the surrounding territory and to let merchants in these towns know that we want their trade and that they will consult their own interest by buying here. Mr. J. W. Wardrop, the secretary of the Merchants Association is the right man in the right place and these excursions are under his management. Manufacturing interests in and around Pittsburgh are showing improvement every week, orders coming in freely and more men and machinery being put to work than for a year past. It is expected that this condition will continue through the winter and that by next Spring there will be full employment for all mills and mines. Another dam in the Ohio River improvement was opened for use on Saturday, Oct. 15th. As there is very low water in our river at present, it had to be a local affair so far as steamboats were concerned. If the government could appreciate the great need of this improvement, and the economy of constructing it as a whole, the work would be done within two or three years but as it is we cannot look for completion inside of the next decade.

Logan-Gregg Hardware Co.

THE CLEVELAND TRADE.

Neither the talk of short crops, nor the political campaign has prevented a fair trade for the Fall months. Depression was slow in reaching the West and now seems to be taking its departure. Already the signs of improvement have appeared that is strengthening prices. A decrease in the reserves of the New York banks has little effect in the West, and no longer means a panic. The past decade has left the West more independent of such influence. Manufacturers hesitate about entering unlimited orders, but prefer to keep themselves in condition, to be benefited by the anticipated advance. Manufacturers, jobbers and retailers are more and more recognizing the rights of each other, and each attending to their own business, instead of attempting to injure their competitors. Organization has improved and increased the ethics of business. When the "Big Fellows" who have been afraid of organization, learn to respect the rights of others, business life will be more worth living. Nineteen hundred and five is generally expected to be a good business year.

The Lockwood-Taylor Hardware Co.

THE CINCINNATI TRADE.

Cincinnati is experiencing the first serious strike in many years. The strike originated with the molders, with coal teamsters following, for a few days the "skyscrapers" were compelled to run their elevators on short time for lack of coal, and all foundries and coal companies are trying to run with strike breakers, resulting in the usual turbulent skirmishes with sympathizers. The C. H. & D. Pere Marquette combination of railroads has agreed to locate the general offices in Cincinnati and a belt line is in contemplation, and the buildings in the "bottoms" recently purchased for the L. & N. & Cincinnati Southern Railroad freight terminals are being rapidly demolished, that the ground may be speedily utilized. What purpose Third street will be used for is a matter of conjecture; the banking and brokerage interests have left the street for office buildings and Fourth street quarters and Third street is deserted. The Kruse Hardware Co. say they will remain on Pearl Street until forced to move, and with Johnson Bros. on Second Street, they are the only wholesale Hardware houses remaining in the former jobbing district. The Ingram-Richardson Manufacturing Co., Beaver Falls, Pa., has established an office in this city to push iron and steel specialties in this territory. The reports from Hardware salesmen continue good except from Eastern Ohio, which, for some unaccountable reason, is behind in the usual amount of orders.

THE DAVENPORT TRADE.

Robert Sickels, of Sickels & Nutting Co., and our worthy president, has returned to New York after delighting us for a week with his charming companionship and valuable business suggestions. We wish he would come oftener, and remain longer; in fact, we regret that he cannot be with us always. Preparations are being made for the Annual Love Feast, at Atlantic City, in November. Arrangements are now practically completed to run a special train from Chicago and Cleveland. The prices on some lines of heavy goods, including nails, barb wire, etc., are altogether too low, and it would not surprise us if they were higher before many moons pass by. Orders are coming in freely, and Fall trade with its usual hurry and bustle is here in earnest.

Sickels, Preston & Nutting Co.

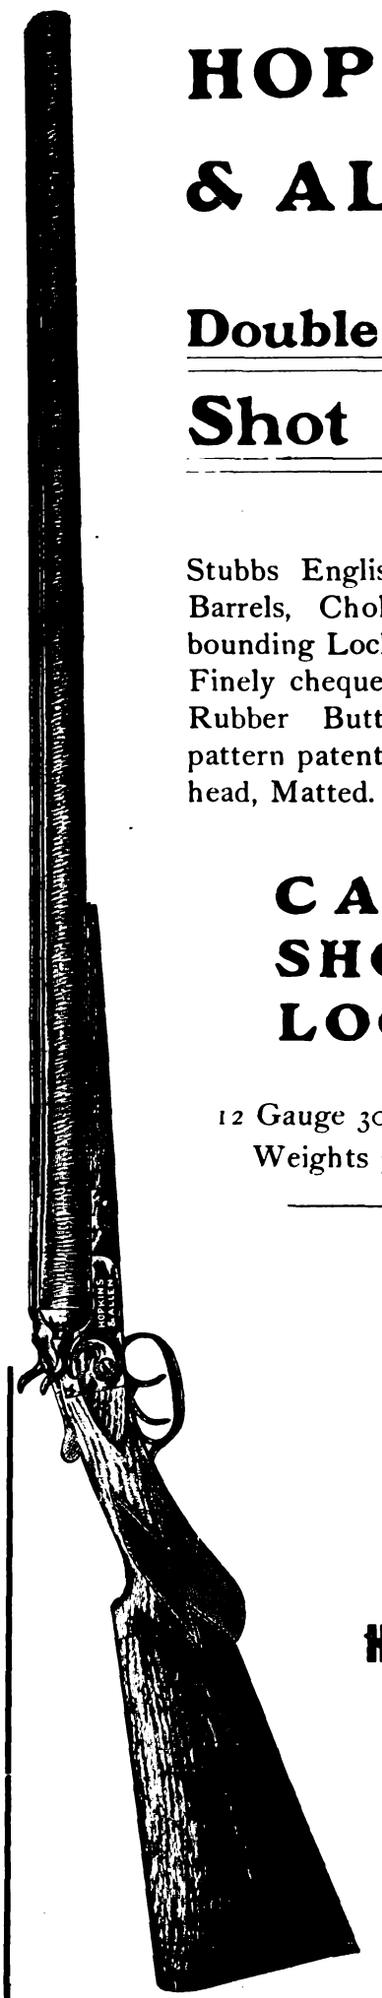
Digitized by Google

THE PHILADELPHIA TRADE.

It gives us pleasure to report that a much better feeling has developed in business circles in the last few weeks, and the trade has shown quite an improvement in consequence. This optimism seems strongly shown in the stock market as illustrated by the heavy advance made in the last few weeks. It seems to us, however, cause for regret that the future should be so largely anticipated in this way, and we do not feel that the situation by any means justifies such an extravagant upward course. It is some satisfaction to know that the Hardware business usually pursues its way unaffected by these gymnastic stock performances, and we are able to report that a steady buying movement is now in progress, and that goods are moving freely, and in considerable volume. Manufacturers are sometimes reporting that jobbers have been ordering so carefully for the last few months that jobbing stocks are badly broken, and that orders are now being placed for future business, so that jobbers may have stocks on hand for the coming trade. There have been very few recent changes in price, although the cotton market is very much unsettled, and higher prices are announced for some goods in this line, including, of course, Braided Sash Cord. The demand for nails and wire has been very heavy for this season of the year and while all these nails may not have gone into consumption we believe there is a consuming demand sufficient to justify a fair trade for these goods also. On the whole, there appears to be no reason why we should not look for a fair volume of business, although we believe that the safest course is to attend strictly to the business of to-day and not anticipate the future.

Biddle Hardware Co.

THE SOCIAL SECRETARY OR WELFARE MANAGER.



Unquestionably, the department store of to-day can only be likened to a vast army thoroughly equipped in every branch for an aggressive campaign. While one man or body of men controls its workings and directs its policy, there are many lieutenants and sub-lieutenants who carry out the plans as devised by the governing staff and look after all the details, so that the whole organization moves along with the greatest speed and the least friction.

Yet, in spite of this completeness, the relations between the head of the house and the employees have spread further and further apart. Outside of the heads of departments, the average employer knows nothing of his subordinates, while they, on the other hand, in many instances, know the head of the house by name only. Thus, the understanding more or less close and cordial, which used to exist, has in most cases ceased to be, just for lack of some one in authority to take a kindly interest in the employees' welfare.

This state of affairs and lack of personal contact between employer and employed has made misunderstanding and suspicion easy on both sides. Not infrequently it has played its part as proximate cause in some far-reaching strike. More often it has resulted simply in a low grade of industrial efficiency, listless, grudging service, a discourteous, don't-care spirit. And all because it has not been taught at every turn that the interests of labor and capital are reciprocal rather than exclusive and incompatible.

All this has been gradually perceived by the keener business intelligence and the social secretary, or welfare manager, has been evolved.

In speaking of this new profession, the social secretary of a large department store said the other day: "I was employed for just two purposes—to insure just treatment of employees and to improve their efficiency. In working for the first end I am pre-eminently representative of the head of the house—his agent with unlimited authority—yet I am also an intermediary, a buffer, between employer and employed. I have to know the store organization from A to Z, and most of the employees. Then by winning their confidence I can keep my finger on the pulse of popular feeling, anticipate discontent, remove irritants, and insure harmony. In a business where strikes are likely to occur a social secretary would, I am convinced, do much toward averting them. When employers generally recognize this fact and adopt the social secretary system, we shall have taken a long stride toward industrial peace. So many times it's the sub-boss, the tyrannical foreman or floorwalker, that makes the trouble. With such men, knowing that there's an *alter ego* of the proprietor looking out for every employee is pretty effective in keeping the brakes on temper.

NICHOLSON FILE COMPANY
GENERAL OFFICES: PROVIDENCE, R. I., U. S. A.

MANUFACTURERS OF
FILES AND RASPS
NICHOLSON, KEARNEY & FOOT, ARCADE, AMERICAN, GREAT WESTERN, McCLELLAN, EAGLE, J. B. SMITH, "X. F.", GOLD MEDAL.

"All complaints and grievances—and they cover a wide range—come to me. Sometimes I am counselor, judge and jury all in one, and sometimes, when important questions of wages or hours are involved, I consult with the superintendent, who has learned to use his authority intelligently, not despotically. Verdicts vary, but whether they be for house or helper, average employees believe in the intelligence and the integrity of the decision.

"But all this is only one part of my work. The other is to increase industrial efficiency here in this shop. Everybody knows in a general way how that is done and how in some way or other the condition of employees must be bettered. Of course, insuring fair treatment is one means toward this end, but the other methods adopted would surprise the ordinary person and especially the niggardly, near-sighted employer. He'd be appalled at spending so much money just on the employees, and he'd whine about the profits being eaten up. Well, business is business, not charity, and if the expenditures are life size, the returns are heroic."

This young lady had reference to the fact that under the same roof with some ten miles of counters there's a gymnasium for the employees, and a library, and a recreation room, with couches and easy chairs and a piano, and four hundred square feet of hardwood flooring. There are baths, tub and shower, where twice a week an employee has thirty minutes of the firm's time for a real bath. There's a sunny infirmary with an all day attendant, and the completely equipped office of a twentieth century physician, who is retained by the house, has office hours both morning and afternoon, is within call at other times, and whose advice is free to every employee.

In serious cases the patient is taken home in a carriage and the expenses of the illness are borne by the Employees' Benefit Association. To this every member of the force belongs, dues being regulated according to the wages received. From this fund, too, is paid for ten consecutive weeks a certain percentage of the sick employee's salary, and in case of death a lump sum is paid over to the personal representative of the decedent.

There has been no little discussion as to which is the preferable name for an incumbent of the new position, "social secretary," or "welfare manager." Perhaps because of the public's reluctance to interpret "social" in its large and original meaning, the title "welfare manager" would signify more to the average citizen.

Besides the provisions for the rational comfort of employees which the social secretary or welfare manager has instituted and personally supervises, educational efforts are also being put forth. These include classes for instruction in saleswork and in elementary subjects for cash boys and girls, and lectures on raw products, textiles and kindred topics, these latter increasing both the intelligence of the sales person about the articles handled and the number of sales made.

Clubs are organized for various purposes. They are seen only in their beginnings in New York, but in other places there are already in full swing literary clubs, social clubs, clubs for general information about woman's progress in the business world, dancing classes, cooking classes, hygiene classes, and classes for Bible study, art needle work and burned wood work.

With all these things, the social secretary has much to do, besides visiting the sick, advising with individuals who seek counsel on outside as well as business matters, and a thousand and one other things that don't repeat themselves. The position is no sinecure, and secretaries are unanimous in saying that the very first qualification for success is a capacity for hard work, plus ever so many other things. Among these attributes are the following: A trained intelligence, tact, sympathy, judgment, discretion, decision, diplomacy, originality, adaptability, close observation, experience of life and a winning personality.

There are many large retailers who openly affirm that they have adopted welfare methods solely because of the better service which is afforded and because they believe that the public appreciates such endeavors and will carry its trade where such methods are employed, indirectly influencing other shoppers to follow their example.

With such conviction rooted in the minds of both classes of employers, continued demand for the social secretary seems assured, and a rapid development of the profession may be prophesied.—*The House Furnishing Review.*

NOT TO BE FORGOTTEN.

A man used to vicissitudes is not easily dejected.

Knowledge is more than equivalent to force.

Example is always more efficacious than precept.

A man is very apt to complain of the ingratitude of those who have risen far above him.

Many things difficult to design prove easy to performance.

The trappings of a monarchy would set up an ordinary commonwealth.

He is no wise man that will quit a certainty for an uncertainty.

If a man does not make acquaintances as he advances through life, he will soon find himself left alone.

It matters not how a man dies, but how he lives.

OUR BRITISH LETTER.

(From our Special Correspondent).

London, October 15, 1904.

LONDON'S NEW PRESIDENTS.

The London & Suburban Ironmongers' Association is fortunate in securing for its president this year Alderman Pond of Finsbury who succeeds Councillor Timpson of Ealing in the presidential chair. Alderman Pond is one of the youngest aldermen of the city of London, he is in the prime of life and full of energy and enterprise. He has long taken keen interest in association work, and is a strong believer in the advantages which may be gained by concerted action contrasted with the utter helplessness of isolated ironmongers. In a recent interview I had with him he emphasized his interest in the I. F. A. scheme of examinations for assistants, and stated he was looking foward with pleasure to the examinations which are to be held in London next year. He thinks the benefits gained from study and preparation by assistants competing cannot be overestimated. The examinations last year in Manchester were very satisfactory, and the advantages of being the happy possessor of an I. F. A. certificate of merit have already been found substantial by more than one of the assistants who secured awards. Alderman Pond has every prospect of a good year of office. He is backed up with an excellent committee and retains the able services of E. H. Timpson, the son of the late president.

The newly-elected Lord Mayor of London who comes into office on November 9th claims some connection with the Hardware trade. Alderman John Pound—the future Lord Mayor—is the head of the well known firm of leather goods manufacturers (John Pound & Co.) of Leaderhall Street, E. C. He is very popular and likely to have at heart the interests of the traders of this country, so many of whom congregate within the bounds of the ancient city.

A GOOD FRIEND TO ASSOCIATION WORK GONE HOME.

Yes, the ironmongers' associations of this country have lost a good friend in the death of George Bevan Lovedee, who for the last dozen years or so has been well to the front as publisher and proprietor of the Hardwareman. He died last month after a sharp attack of typhoid fever contracted during a holiday visit to Margate. The deceased was an enthusiast in all the efforts made by the heads of the association movement for the betterment of the Hardware trade. He was one of the founders of the first association in this country, and he never lost his interest in the work. He took advantage of every opportunity of attending association meetings, and of encouraging the work which he regarded as the salvation of the trade, by his presence. At all recent meetings of local associations as well as of the Central Board of the I. F. A. resolutions of regret and condolence with his family have been passed

FORTHCOMING SHOWS.

Some discussion is now going on in reference to the stand taken by British makers in connection with the Motor shows. The Society of Motor Manufacturers and Traders, Ltd., in a circular letter sent round the trade some little time ago, attempted to point out reasons why manufacturers should not exhibit at the Paris Automobile Show. This advice is regarded as unwise; surely we want French makers at our shows; and if so how can we expect them to exhibit in a country where reciprocity is discouraged. Again, if British makers do not go to Paris and show continental buyers that Great Britain can also make machines possessing special merit there will be little incentive for Frenchmen to come over to our shows with their latest and best types. The Cycle Shows, at which many motors are exhibited, will be held in November at the Crystal Palace and the Agricultural Hall, London. Great preparations are being made for the Automobile show which is to be held at Olympia, London, in February next. A great show is anticipated. Ironmongers are interested in motor cycles and as I have frequently pointed out, are doing good business in motor accessories and supplies.

THE MOTOR AND MOTOR CYCLE TRADE.

The growth of the motor cycle and motor industries during the last year or two has been truly wonderful. Motor traction has become a recognized feature in road locomotion, the transit of produce, and the delivery of goods. Unfortunately but little of the actual trade in the vehicles themselves and in the heavier items connected with the business pass through the hands of Hardwaremen, nevertheless, British ironmongers find a steady increase in the demand for accessories and the different materials and goods necessary in the up-keep of motor vehicles. Petrol is needed and the supply often runs short at points far distant from towns and central depots; consequently, village ironmongers, located at suitable points on main thoroughfares and well known roads frequented by motorists, do good business in this commodity. The Coventry Chain Co., Ltd., have recently brought out a very pretty hanging sign, on which the word "Petrol" figures conspicuously. Many of these enamelled tablets, which have wrought iron frames, are already swinging in the autumn breeze across the footways in front of some of the establishments of enterprising ironmongers.

AGRICULTURAL MOTORS.

The trade which has opened up in consequence of increased motor delivery traction in large towns and busy centres is also evident in rural districts where agriculturists are quickly learning the value of motor traction. The "Ivel," "Scott," and other good makes of agricultural motors for attachment to implements, machines, food-preparing contrivances, as well as for traction purposes are fast coming into general use. When ironmongers manage to sell one of these motors the business is well worth having, especially when it is remembered that a steady trade in sundries is assured, as well as a ready entree to the farm on which the motor is used.

TO REGAIN THE LOST.

British ironmongers freely admit they have been too conservative in the past and have neglected many opportunities of adding new business. The secret of the despondence of retail ironmongers, and the complaints about reduced turnovers in consequence of trade diverted into other channels is the apathy with which new discoveries were formerly regarded. In this world of change and constant development diversion of business and decline of old orders of things must take place. To keep up existing returns, to say nothing of increasing them, new branches must be taken up. It is now realized by ironmongers' associations and individual members that many good things have been lost from want of enterprise, most notably the cycle trade and gas cooker business. An effort is now being made to regain these lines, but it is very difficult to achieve the desired end. Cycle depots and agents are firmly established, and it is only here and there that ironmongers have a look in. For the present the majority of ironmongers must be content with selling accessories and picking up new business in motoralities and petrol. The cultivation of gas business is also difficult. Gas companies hire out cookers at quite nominal rates, and consequently leave little to be done in direct sales, but gas fires are being sold as well as gas irons and the numerous economical domestic contrivances on the market. The bright side of an ironmonger's business in gas supplies consists in the numerous incandescent fittings which are being added to almost daily. Ironmongers have grasped the possibilities of incandescence, and its advantages over old types of burners, and they are to be commended for the way in which they have taken up the sale in fittings and mantles, as well as in the adaptation of old systems to modern methods, not only of domestic lighting but of shop fittings which now largely consist of arc lamps, of one or more of the many types at present on the market.

TALKING MACHINES.

It is interesting to trace the development of a new industry and to see how the conservative ironmonger of other days is forced to accept an innovation, and add to his stock lines which a few years ago he would have ridiculed. One of the most astounding inventions of the present day is the talking machine, under which general term, phonographs, gramophones, graphophones, etc., are grouped. There are many of these machines on the English market and the improvements in the effects produced by them have been rapid, some machines are preeminently in advance of others and give clear and distinct reproductions of the human voice, music and other sounds. Indeed, talking machines have ceased to be toys and perhaps for that reason British ironmongers take more kindly to them. Although sold by different retail traders ironmongers do a very fair share in this new business, and as the winter approaches the more advanced buy talking machines, and add to their stock new records. The Madame Melba records are popular, as well as the beautiful songs sung by that famous Welsh singer Ben Davies.

RECENT TRADE PUBLICATIONS.

The Oneida Community, Ltd., Kenwood, N. Y., are placing in the hands of their patrons and friends their catalogue No. 27A, inside of which is a slip requesting that all previous catalogues be destroyed and that orders be made only from No. 27A, which is an illustrated price list of game traps and chains which they manufacture. In making springs for their traps, nothing but the best crucible steel is used; the stock is a mixture of special Norway iron. The standard is kept up by frequent repetition of these tests, and by daily watching results. The springs are tested in three different ways before leaving the factory; the other parts of the traps are carefully tested and inspected, and each trap is set and sprung to insure its working correctly. Should defects ever appear, they will furnish repairs free upon notification. They make three patterns in chains, the "American," "Niagara," and the "Eureka," and they request that in ordering, the pattern be specified. The American chain is made from flat, cut steel, interlocking links. For halter chains this pattern is decidedly the best. The other two patterns, they state, are economical, beside having great practical efficiency. They are made by automatic machinery, and, having no welds or rivets to give way, are exceedingly strong and durable. The Niagara link is formed on the principle of the square knot. The Eureka, on account of the shape of the links, is especially adapted for agricultural implements. Send for one of the above catalogues.

The Walter W. Woodruff & Sons Co., Mount Carmel, Conn. have sent us a copy of their Catalogue "A" of automobile mountings and specialties. The book is one of the finest of its kind that has come to our notice, the cover being of plain red imitation flexible leather, and neatly lettered in black. The printing, illustrations and paper are also excellent. They state that in putting out this, their first catalogue, they are not entering upon a new undertaking, but simply broadening their field of action, for since vehicles were first built in this country they have been the pioneers in the manufacture of mountings and specialties, until now their goods are known not only throughout this country, but are largely sold and used in many of the markets abroad. Their catalogue presents a very comprehensive line of goods such as every maker of automobiles uses, and they are constantly adding new articles, in an endeavor to keep thoroughly up to date. They make a specialty of producing specialties of the best grade for the trade, and are prepared to make anything in the line of mountings that the trade requires of malleable iron, brass or bronze. They state they make only the highest grade and best quality of goods, not attempting to compete with cheaply made products; at the same time, their facilities and knowledge of the business render it possible for them to make very reasonable prices. They solicit correspondence before placing your orders elsewhere.

Under Size.

Applicant—Thirty dollars a month is very little pay for a school teacher.

THE RETAILER—HIS PROBLEMS.

What is the secret of the big store's strength? Its bigness, do you think—or its prices—or its liberal advertising, special sales, trading stamps, premiums? Not at all. These things are simply attractions—details of the secret. The real inner reason for the big store's hold on the public is that within its walls there's always something doing!

Advertising? Why, of course, it attracts—but only because it tells about something doing. Go to the skilled advertising man in a big department store, and tell him that a certain department is doing well. Ask him to help it along with advertising. Will he? Not if he knows his business. On the contrary, he'll leave that department out of the daily ad. until its manager has begun to make things happen in it.

Special sales? What in the world are they but the very quint-essence of something doing? Premiums? Trading stamps? Pshaw! You can't get anything for nothing.

Years ago the department store was nothing but a dry goods shop, and had just two busy seasons—spring and fall. There were long, dull months in between times. By a process of development, however, and through enlargement and advertising, the original dry goods shop managed to provide merchandise events to interest the public every day in the year. The advertising man will tell you that he did it, and the buyer will swear that it was done by merchandising. Both of them helped, but the whole thing really developed along a dozen channels, growing out of the discovery that people would come to a store where there was something doing, no matter what the season. The big stores have grown just as fast as they have been able to develop ways of providing live merchandising events—general activity—human interest.

The art of providing these attractions has been reduced to exact principles. Monday morning, bright and early, the public is on hand to see the goods offered in Sunday's ads., and from that time until Saturday night, when it goes home with things to eat and wear on Sunday, the something-doing element is worked ceaselessly. There isn't a woman in all this broad Yankeeland but what thinks of a tour through the big stores with anticipation. Even if she hasn't read the morning ad., she can go down town confident that there will be something worth going for.

Well, what has all this to do with the little neighborhood retailer out on Crosstown avenue? Do you think that he can turn his shop into a department store?

Precisely.

For he can provide his smaller public with this very attraction of something doing on a small scale. He works under a disadvantage—but not the disadvantage that he thinks is the main one. It isn't his inability to advertise in the newspapers that keeps him back, nor his inability to compete on prices. His real handicap lies in the fact that he has never discovered what a lot of response there is in a public when you sincerely try to show people that you are alive, and that there is something doing in your neighborhood store.

One very potent form of something doing is that of the special sale. Now, to most small merchants, the very word "sale" carries the thought of

RUINOUS PRICES.

But price isn't everything in a special sale. Why, some of the most successful "sales" are those based on regular prices—just a method of inviting attention to the strongest departments or certain seasonable lines of goods. There's a big store in Philadelphia, for example, that sometimes devotes a whole page in the Saturday papers to a description of its corset or book department with never a price attached. Just as pure descriptive reading matter it creates business that can be traced in those departments for weeks afterward.

The neighborhood store out on Crosstown avenue must go to work in pretty much the same way. The public doesn't expect such complete lines as can be found downtown. It buys there as a matter of convenience. The articles that people go downtown for must be dropped, and the lines that they buy near home, as a matter of convenience, built up so that there will be no need of going downtown for them. The taste of the neighborhood must be studied, and its wants anticipated. Then, when the stock is right, the neighborhood store can let people in its vicinity know that it has joined the something-doing class.

Remember, the people who live off Crosstown avenue have usually had every encouragement to regard the stores on that outlying thoroughfare as "dead ones." When a spool of thread is wanted, or a bag of table salt, they use them, just as a hatchet can be used to open a can of tomatoes in an emergency. As for going in and asking for something really up-to-date, however—well, what would be the result in most stores of this type? The public has often tried to interest the Crosstown avenue dealers in their own stock, but usually without success. So it wants evidence of something doing before it comes again.

It is surprising how little real activity in a neighborhood store will attract attention. It's easier to make a commotion in a fish globe than in a mill pond. Activity isn't

INDIVIDUAL LIGHTING SYSTEMS

necessarily a page in the newspapers. It may be simply a window display of goods that everybody is thinking about this particular week. It isn't cut-throat prices on these goods. The convenience of buying them right near home is worth something. even to the confirmed bargain hunter. It isn't bigness, for the personal note in the little neighborhood shop is something that the big stores can't copy; the bigger they are the farther they get from it.

SOMETHING DOING

at the neighborhood store may be just a circular distributed a few blocks on each side, or a new window display each day, or a demonstration of some interesting goods once a week, or a special sale with live features, or a guessing contest. Something doing is just activity—alertness—responsiveness to the needs of the people roundabout. A very little of it sets the store in a class by itself, and about half as much keeps it there.

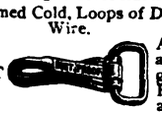
This may read like theory, but it's hard fact.

The little neighborhood shop-keeper may say: "Oh, tush, I tried that once, and it failed." Perhaps it did. Things have a perverse way of failing the first time. But did you find out why it failed? That was the real point. Many a merchant has built a substantial success on the experience drawn from failure.

Try again.

Get busy.

Do something.—*Printers Ink.*



THE DEALER MUST STUDY.

The Hardware line is getting to be so large that unless the dealer studies it industriously all of the time he will lose trade through his ignorance New things are coming onto the market all of the time, and the retail mail order houses are everlastingly after the business. It is truly a day of lively retailing, and the Hardware line will continue to grow livelier. One of the dealers, who has seen twenty-five years' active service, tells me he is getting tired of the fight. He says the Hardware business is just as good and even better for the country dealer than it used to be, but it requires more steam than he has to give it. He has no son who likes Hardware and no young, ambitious fellow to turn the store over to. He has made $25,000 and is preparing to sell out. In spite of the way the business has been cut up, the Hardware retailers seem to be well satisfied with prospects. They are learning to widen their lines along the right avenues and are becoming much better merchants. The contract work in building and heating is doing much for some. Then there are the numerous opportunities for profit and trouble in implements, furniture and harness which I have mentioned.—*Hardware Trade.*

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incoporations, Etc.

Auburn, Ind.—The Culbertson Hardware Co. has been incorporated with a capital stock of $7,000. Hugh R. Culbertson, Frank E. Draggoo and Robert D. Welch are incorporators.

Baltimore, Md.—The J. Seth Hopkins-Mansfield Co. has been incorporated for dealing in household goods, etc. Incorporators: J. Seth Hopkins, Joseph S. West, D. Clifford Mansfield, Robert Prescott Webb and Rignal W. Baldwin. The capital stock is $50,000.

Cottonwood, Idaho.—The Cottonwood Hardware and Implement Co., limited, has been incorporated with a capital stock of $1,700.

Council, Idaho.—John O. Peters has opened a new store and will carry a full stock of Hardware and furniture.

Dodgeville, Wis.—A new Hardware store is being opened, and will be conducted under the firm name of Eagan & Duffy.

Fitchburg, Mass.—Ralph C. Lawrence, until recently of the firm of A. B. Lawrence & Sons Co., has rented the store at 46 Main Street, and has opened a Hardware store there. He has a complete line of everything that goes with an up-to-date Hardware store. Mr. Lawrence has had five years' experience as a traveling salesman, as well as his store experience in the Hardware line.

Houston, Miss.—The Brand Hardware Co. commenced business on October 1. The firm carries furniture in addition to a general Hardware line.

Jefferson City, Tenn.—The Jefferson City Hardware Co. is a new firm that is opening up a store on Branner Avenue.

Lewisburg, Tenn.—The Lewisburg Buggy Company has sold its stock of vehicles to W. H. Hardison, Thomas Arthier and Joseph Fowler. The new firm will add a stock of Hardware to their vehicle stock.

Marion, Va.—The Marion Hardware Co. has been incorporated by C. M. Kabler, president; W. M. Weaver, treasurer and secretary; L. A. Weaver, director, all of Marion, Va. Capital stock, $5,000. The purpose for which this corporation is formed is the buying and selling of Hardware and general merchandise and conducting a general merchandise business.

McKeesport, Pa.—Mr. Gamble, of Lock No. 3, has opened a large Hardware store at the corner of Railroad and Market Streets.

Muncie, Ind.—The W. L. Little Hardware Co. has been incorporated to engage in a general Hardware business. The capital stock is $15,000. Following are the directors: W. L. Little, J. M. Kirby and L. S. Ganter.

Portville, N. Y.—C. F. Townsend has opened a new Hardware store.

Ruleville, Tenn.—The Ruleville Hardware Co. has been incorporated with a capital stock of $10,000. W. F. Wilson, A. C. Wilson, incorporators.

Saratoga Springs, N. Y.—A new Hardware firm has been established on Palmer Avenue. The members are Walter H. White and Frank Potter. Mr. White has been largely interested in lumbering. His partner, Frank Potter, of Glens Falls, has had twelve years practical experience with the Hardware and plumbing firm of G. E. Adams & Co. They are putting in a full line of stoves, Hardware and plumbing goods.

Scranton, Pa.—E. P. Mitchell and Timothy Burke, who for a number of years were connected with the Hardware firm of T. F. Leonard, have formed the Hardware firm of Mitchell & Burke, 116 Penn Avenue. The new firm carries a large line of heaters and ranges.

Scranton, Pa.—Frank Sutton has opened a Hardware store on Jackson Street, near Rebecca Avenue.

Scranton, Pa.—Ignatz Brown will open a large Hardware store and carry a full line of stoves.

Wichita, Kan.—Charles and Fred Smyth will open a wholesale Hardware house for which they will erect a building on Santa Fe Avenue. It is to be an up-to-date building in every particular; about four stories in height.

Youngstown, Ohio.—J. A. Kamerer will open a Hardware store in a short time Plumbing and plumbers' supplies will be a feature, in charge of Irvin Saul. Mr. Kamerer was once employed by the Packard Hardware Co. and is now a commercial traveler for a Youngstown firm.

Changes.

Bangor, Me.—The Hardware firm of Wright & Hall, on Church Street, has been dissolved.

Beaver, Pa.—Ackerman & Jepson will sell out their Hardware stock and leave town. The firm have a store in Titusville and will remove to that place in the near future and devote their whole time and interest to their business there.

Duquesne, Pa.—A. V. Workman has purchased the business and stock of the Kennedy Hardware Co. of West Grant Avenue.

Gasport, N. Y.—Frank Rinn has bought out French's interest in his Hardware store. Hereafter he will carry on the Hardware business alone.

Jackson, Miss.—T. McCleland Hardware Company is erecting a new three-story brick retail Hardware store, 60x150 feet. Besides the new structure the McCleland Company has warehouses with an aggregate floor space of about 50,000 feet. Since recently reorganizing the business, with a capital of $100,000, the house is doing quite a large jobbing trade.

Mascoutah, Ill.—E. C. Kammann, dealer in Hardware, stoves, tinware, paints, sporting goods, etc., has been succeeded by Hucke-Kammann Mercantile Co. The business has been removed to a newly erected and more spacious building, which will permit the carrying of a larger stock than heretofore.

New Bloomfield, Pa.—F. D. Parson retired from the Hardware business, having sold out his share to J. M. Gilliland. The firm will hereafter be known as Gilliland & Clouser.

Peoria, Ill.—Ed. and George Buehrig have purchased the Hardware store of J. M. Hail.

Prairie Depot, Ohio.—T. E. Frisbie, the Hardware dealer, has sold his stock to Brainard Wright and will retire from business.

Pulaski, N. Y.—An addition to the Hardware store of Potter Brothers is being erected, which, when completed, will be utilized as a store room.

Redding, Iowa.—J. K. Herron & Co. have purchased the Hardware and lumber business formerly conducted by F. R. Daily.

Schenectady, N. Y.—Clark Witbeck has bought the property at 416 State Street for the sum of $25,000, and will erect a large steel building as soon as the plans are completed.

Troupsburg, N. Y.—W. Griggs and E. H. Austin, Jr., have formed a partnership and will open a Hardware store.

Troy, N. Y.—Ladd & Wilkins, dealers in stoves and Hardware have dissolved partnership.

Washington, Iowa.—Wilson Hardware Co., has closed out its Hardware stock, and will hereafter devote its exclusive attention to the furnace and heating line.

Whitney Point, N. Y.—The Hardware stock of Tracy Glover, formerly of the firm of Nowlan & Glover, has been sold to a party in Ithaca.

Fires.

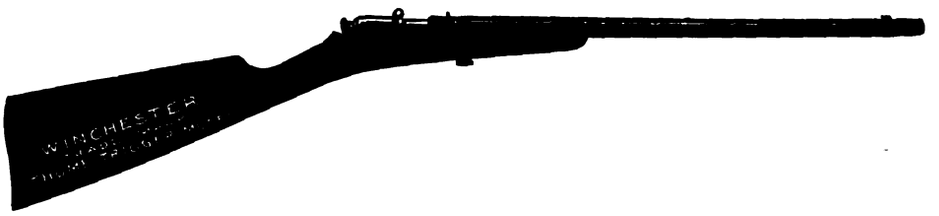
Fire on Sept. 25 at Burlington, Vt., caused $10,000 damage to the business block of Fred H. Wells, in the center of the city, occupied by Haggar Bros., Hardware; F. L. Taft & Co., druggists, and a barber shop. Cartridges exploding blew out the windows of the Hardware store. The concern were well insured.

Gebo, Mont.—On Sept. 16 there was a heavy loss on the store and lumber of the Holland Lumber and Hardware Co., with $15,000 insurance.

Halifax, N. S.—The firm of Black Bros. & Co. were burned out on Sept. 19, about three-fourths covered by insurance.

Janesville, Wis.—W. Purnell's Hardware store was damaged to a considerable extent by fire and water on Sept. 9.

McKeesport, Pa.—Fire broke out in the Weaver Hardware store in Monongahela avenue Sept. 9, and damage to the extent of $6,000 resulted. The most of the damage was done by water. The loss is fully covered by insurance. The interior of the building to the rear is only slightly damaged and can doubtless be repaired at a small expense. The most of the damage is to the stock.



Miami, Fla.—Watson's Hardware store was totally destroyed by fire on Sept. 16. The property loss was more than $30,000. The origin of the fire is unknown.

Montreal, Can.—The buildings of the Canada Hardware Co., the Central Agency, which is the Canadian branch of the London Thread Trust, and Chaput Fils & Co., one of the largest wholesale grocery and liquor houses in Canada, were burned on Sept. 21. The loss is estimated at $750,000, partly covered by insurance.

Nevada, Mo.—Fire damaged the Hardware stock of Emmet Parish on the morning of Sept. 6.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published,

New Incorporations, Etc.

Baltimore, Md.—The Vulcan Manufacturing Company, for conducting the wire, wire novelty and Hardware business, has been incorporated by J. Hurst Purnell, Charles J. Carroll, Lyttleton B. Purnell, David M. Newbold, Jr. and Henry H. Hubner. The capital stock is $5,000.

Burrillville, R. I.—Ernest W. Tinkham, James P. Kearney and Michael J. Powell have incorporated the Alva Cutlery Company. The concern will make, buy, sell and deal in knives and cutlery, and the capital stock is $15,000.

Cincinnati, O.—The Burton Range Company has been incorporated by F. R. Lawson, W. C. Lawson, S. H. Burton and C. W. Smith; capital stock, $50,000.

Gallipolis, Ohio.—The Treasure Stove Co. has been incorporated by James A. Lupton, Thomas A. Thomas, A. L. Bradbury, A. C. Safford, and August F. Engel; capital stock, $25,000.

Middletown, N. Y.—The Chasse Manufacturing Co. has been incorporated to manufacture animal traps; capital $20,000; directors, Henry Schulthels, of Brooklyn; Albert Nugent, of New York City, and Raphael Chasse, of Middletown.

Nashville, Tenn.—The Turner, Day & Woolworth Handle Company, of Jefferson County, Ky., has been granted a license to do business in Tennessee. The company has a capital stock of $667,000. The incorporators are Charles D. Gates, C. F. Turner, B. W. Marr, Henry Glover and John Stites.

New Britain, Conn.—The North & Pheiffer Manufacturing Company has been incorporated with a capital stock of $50,000, to manufacture spring motors, screw corks and any other articles.

Newton, Iowa.—The Economy Manufacturing Co. has been incorporated. The capital is $25,000; formed by F. L. Maytag, W. A. Norton, and G. A. Smith. It will operate a factory to make cream separators and other farm machinery.

Peoria, Ill.—The Novelty Manufacturing Co., capital $25,000, has been incorporated by J. H Kochendorger, L. C. Reed, J. B. Kring, H. O. Orahood and J. W. Powers.

Petoskey, Mich.—M. C. Bracket, of the Bayview Northern Gas Company and M. S. Ward of the Kokomo, Ind., wire mills are promoting an enterprise that will doubtless result in a Petoskey wire and nail mill, capital valued at $100,000.

Springfield, Ohio.—The American Drill Co. has been incorporated, with a capital stock of $50,000. The company will manufacture and sell implement tools and engines, drills being the principal product.

Springfield, O.—The Consolidated Novelty Company has been incorporated by Wm. M. Mumm, H. A. Rhonemus, W. K. Tuttle, H. E. Romer, Howard Barba; capital stock, $10,000.

St. Louis, Mo.—The Brown Woodenware Manufacturing Co. has been incorporated by Samuel J. Brown, Julius O. Vogt, Adolph Krauss and Marcus A. Loevy, to do a general wholesale and retail Hardware and woodenware business; capital stock, full paid, $6,000.

St. Louis, Mo.—The Wernse Stove Co. has been incorporated; capital stock, $100,000; incorporators, Louis Wernse, Bela A. Kobler and Julien Zopff.

Syracuse, N. Y.—The Frazer & Jones Company has been reorganized. George S. Hier, who was one of the principal stockholders, sold his interest in the company to Hendrick S. Holden, Fred. Frazer, C. R. Jones and O. P. Letchworth, of Buffalo. At a recent meeting the following officers were elected: President, R. W. Jones; vice-president, Fred. Frazer; treasurer, Charles R. Jones; secretary, O. P. Letchworth. Those gentlemen, with H. S. Holden, constitute the Board of Trustees. The reorganization of the company has no significance other than it marks the retirement of Mr. Hier. No new buildings will be erected and the capital will not be increased. W. F. Pardee, who has been one of their traveling representatives for twenty years, has been appointed general sales agent.

Taunton, Mass.—The Standard Stove Lining Co. has been incorporated; capital, $14,000.

Toledo, Ohio.—The D. J. Marleas Company has been incorporated with $50,000 capital, by D. J. Marleau, David Marleau, Ada Marleau, Max Keimer and Fred. J. Marleau. They will make farm implements of all kinds.

Toronto, Ont.—The Eureka Refrigerator Co. has been incorporated; incorporators, Wilbert Hooey, W. H. Shapley and H. W. Shapley; capital, $10 000.

Washington, D. C.—The Hydro Oil Burner Co. has been incorporated; capital stock, $200,000; incorporators, George H. Corey, Eugene Schooley, and J. L. Cohencius.

Washington, D. C.—The Thistle Washing Machine Co. has been incorporated; capital stock $30.000; incorporators, E. W. McCormick, B. E. T. Kretschmann and E M. Freeman.

West Point, Miss.—Stock has been subscribed for the largest and most complete stove foundry in the entire South, to be located at West Point. The erection of buildings will be begun at once, and the plant put in operation at the earliest possible date. The company is composed of local and Northern capitalists. The output of the plant will be of the highest possible grade and will employ a small army of skilled laborers.

Changes.

Birmingham, Ala.—The J. C. Perry Co. has increased its capital stock from $1.000 to $2,000.

Columbus, Miss.—The Dodson Plow Co. has removed from Tennessee to this city, and are erecting a new plant here.

Davenport, Iowa.—The Simplex Washing Machine Co. have decided to rebuild the plant which was recently demaged by fire. The contemplated new factory will be 50x140 feet in size, with a boiler room 40x50 feet adjoining it, and will employ fifty men.

Elgin, Ill.—The Fauber Manufacturing Co, whose factory was recently entirely destroyed by fire, are immediately proceeding with arrangements for the manufacture of Fauber Hangers.

Hillsdale, Mich.—The Fleming Screen Works has been purchased and merged into the Hillsdale Screen Works by the latter concern.

Montpelier, Ind.—The Montpelier truck scale factory is to be sold to Toledo capitalists, who promise to double its capacity. The factory is now owned by W. B. Nimmons and L. B. Stevens, of Montpelier, and John W. Sale, of Fort Wayne.

Mt. Pleasant, Pa.—The Mount Pleasant Tool Co. has increased its capital stock from $25,000 to $50,000. Extensive improvements will follow, doubling the present output of its local shovel plant.

New Bremen, Ohio.—The name of the A. H.. May Implement Co. has been changed to the Farmers' Implement Co. Jacob Gritznalof is president, and A. C. Buss secretary.

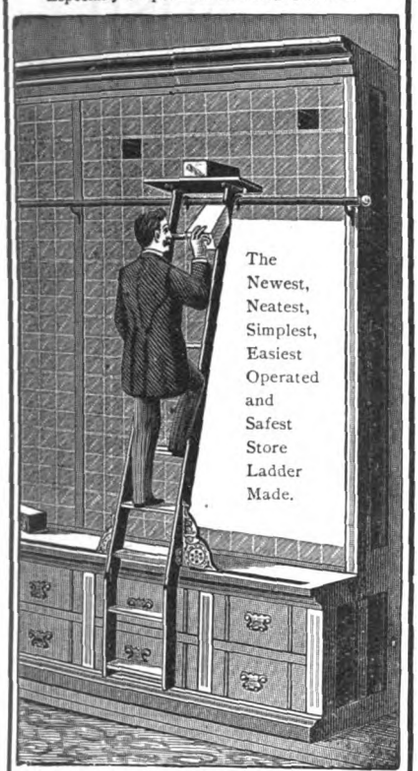
New Britain, Conn.—The New Britain Hardware Co. is to vacate the plant which it has sold to the Landers, Frary & Clark Manufacturing Co., and will move its business to the New Britain Machine Co.'s shop, where it has leased a space. The Landers, Frary & Clark Co. is having the Hardware factory fixed up ready for occupancy.

New Castle, Pa.—The New Castle Forge and Bolt Co., which in the last two years has erected extensive factories for the manufacture of bolts, rivets, nuts, car forgings and chain, is now receiving bids on a complete rolling mill plant, consisting of a 12-inch mill, muck mill, puddling and scrap furnaces.

Reading, Pa.—The Reading Metallic Screw Co. has been dissolved.

Sidney, Ohio.—The Buckeye Churn Co. has increased its capital from $75,000 to $100,000.

Southington, Conn.—The Southington Cutlery Co. have reduced their capital stock from $300,000 to $150,000.



Syracuse, N. Y.—Work has been begun on the erection of a 50 by 110-foot, two-story brick addition to the factory of the Syracuse Stove Works in North Geddes Street. The addition will be finished in about a month. A large increase in the business lately necessitates the enlargement of the plant.

Waterloo, Iowa.—The Cunningham Stove Works will remove from Quincy, Ill., to Waterloo, Iowa. A fine, new, three-story building will be erected at once.

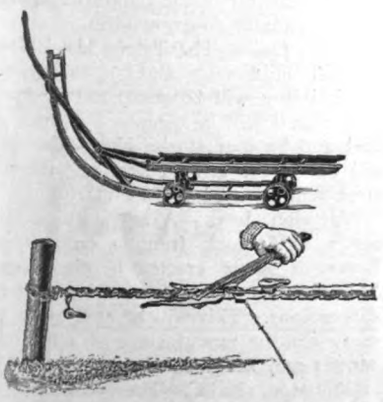
BEAUTY IS ONLY RUST DEEP
IN HINGES

But quality such as we put in the material and construction of our hinges makes them last for years.

For hinges that stand wear, tear and weather we call your special attention to

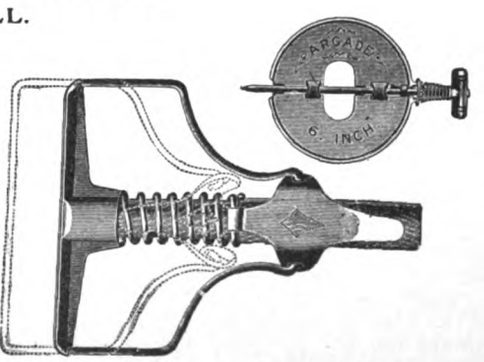
THE ARCADE SPRING HINGES
Numbers 102, 70 and 7

The Arcade No. 102
Non-Hold-Back Screen Door Hinge
Reliable, neat looking, simple, strong and durable. Warranted to give entire satisfaction.



The Arcade No. 7
Designed to give absolutely free action of the spring, holding door open or closed as desired. The spring is constructed of the best oil tempered steel wire.
Fully warranted.

The A. C. No. 70.
A New All Steel Hold Back Screen Door Hinge.
These hinges are made of special rolled sheet steel, No. 14 gauge. They have been thoroughly tested and will handle screen doors better than the cast iron hinge. No danger of breakage. The hinge is so constructed as to prevent a dead center and will hold door firmly closed. Finished in black Japan.



We also manufacture the Baltzly Steel Stove Truck, Elwood Pattern Wire Stretcher, Gem Mop Heads and the Arcade Stove Pipe Damper, and fully Guarantee them in every particular.

You need our Catalog of over 223 different Hardware Specialties.
It's yours for the asking.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Baltimore, Md.— The Johnson-Dukehart Co. has been incorporated for dealing in netting, tackle and other fishing supplies, by William T. Ingham, Joseph D. Chesney, Joseph B. Casey, Dukehart Chesney and John P. Horsey. The capital stock is $25,000.

Brooklyn, N. Y.—The Automobile Supply Manufacturing Co. has been incorporated. Capital, $15,000. Directors, Salvatores Salvine, New York; Errico Pascucci and Louis Rubes, of Brooklyn.

Buffalo, N. Y.—The Neal, Clark, Neal Co. has been incorporated to manufacture Bicycles, etc. Capital stock, $7,500. Incorporators, O. L. Neal, H. B. Clark and B. E. Neal, of New York.

Cleveland, Ohio.—A two-story brick building is being erected by J. A. Sucker at the corner of Wilmarr and Superior Streets, where he will manufacture and sell Bicycles.

Detroit, Mich.—The Ford Motor Co. has established a Canadian factory at Walkerville, Can. Although the Canadian business is a separate company, the officers are the same as the Detroit company.

Detroit, Mich.—The Reid Manufacturing Co. has been reincorporated as The Wolverine Motor Car Co., $100,000 capital.

Hamilton, Ohio.—The Smyers Arms and Sporting Goods Co., is the name of a new firm which has been established in Hamilton. James P. Smyers is manager of the new house, which has been opened up at 37 High Street. A full and up-to-date line of all kinds of sporting goods will be carried and the stock is now in place.

Los Angeles, Cal.—The Chanslor & Lyon Supply Co, 930 S. Main Street, a new concern, is the first and only auto supply concern in Southern California.

Los Angeles, Cal.—The Williams Rubber Co. has been reorganized as the Harrison-Williams Rubber Co., and will occupy the building at 116-118 East Ninth Street.

New York, N. Y.—The E. J. Willis Co. have opened a Garage and retail salesroom at 17 Park Place, running through to 14 Murray Street.

St. Louis, Mo.—A. L. Dyke has sold his interest in the A. L. Dyke Automobile Supply Co., and has started anew in the same line at 311 Pine Street, under the style of Dr. A. L. Dyke.

Changes.

Addison, N. Y.—The Reliance Motor Cycle Co. has moved to Owego, N. Y.

Amesbury, Mass.—Gray & Davis, the lamp manufacturers, are building an addition to their factory, 50x100 feet, three stories high.

Atlantic City, N. J.—Abandoning its original purpose to enlarge its large plant on South Carolina Avenue, South, the Currie Hardware Co. has purchased the former site of the Mountain House on North Carolina Avenue, below Atlantic, and will erect a $50,000 building there to be devoted to the building of gasoline engines and the repairing of power vehicles.

Beloit, Mich.—The Goddard & Allen Co., manufacturers of bicycles, have moved to Rockford, Ill.

Bridgeport, Conn.—The bit and bicycle pedal departments of the Bridgeport Gun Implement Co. have been sold to various Torrington manufacturing concerns, and the transfer of these departments will shortly take place. The pedal department involves a considerable amount of the business of the firm, while the bit department is not so large.

Chicago, Ill.—The Chicago Handle Bar Co. has moved from 315 Fifth Avenue to Shelby, Ohio.

Chicopee Falls, Mass.—The Fisk Rubber Co. will establish a new branch in Chicago, Ill., under the management of Frank C. Riggs. The new branch will handle all business west of Buffalo.

Cleveland, Ohio.—The American Ball-Bearing Co. will erect a $23,000 addition to its factory on Seward Street, near Lake Street.

Cleveland, Ohio.—The Winton Motor Carriage Co. has further expanded by establishing a European branch house at 48 Holburn Viaduct, London, E. C., England, of which William L. Duck is manager. This branch will carry in stock a full line of Winton cars and parts.

Columbus, Ohio.—The Eclipse Machine Co., 955 High Street, has changed its name to the Eclipse Automobile Co.

Fort Wayne, Ind.—The Meyer Automobile Co., formerly the Meyer Cycle Co., has increased its capital stock from $5,000 to $15,000.

Grand Rapids, Mich.—The Matheson Motor Car Co. have moved their headquarters to 37 State Street, Detroit, Mich.

Holyoke, Mass.—Frank F. Matheson, treasurer of the Matheson Motor Car Co., Ltd., and his brother, Charles Matheson, are in Detroit looking after the arrangements for the removal of their works to Detroit, which will be done as soon as the building is erected.

Kenosha, Wis.—Owing to the very large increase in the sales of Solar Motor Lamps, The Badger Brass Manufacturing Co. will erect a new plant, which will be 360 feet long and 90 feet wide, and of the very latest mill construction. The company will be in a position to guarantee prompt deliveries on all contracts and orders for 1905. The new factory will be completed and running within sixty days. In the meantime, the company will continue manufacturing in their old plant.

Kenosha, Wis.—Thos. B. Jeffrey & Co., makers of Rambler automobiles, have opened a branch salesroom at 240 N. Broad Street, Philadelphia. It is under the management of W. F. Smith.

Lansing, Mich.—The Peerless Motor Co. are erecting a new plant on Turner Street.

Long Island City, L. I.—The Vehicle Equipment Co. are erecting a new automobile factory, the old factory being destroyed by fire. The ground purchased for the new factory covers two city blocks, each 500 feet square. The first building to be erected will be 500 feet long by 200 feet wide.

Macon, Ga.—The Century Cycle Co. has been absorbed by the Berkshire Cycle Co.

Muncie, Ind.—The Warner Gear Co. have just completed their new factory, equipped with the latest automatic machinery, electrically driven, tripling their former plant and having a capacity of upwards of 100 differential gears per day.

New York, N. Y.—The Richard Brasier Automobile agency has moved from 140 West Thirty-tighth Street to 141 West Fifty-fifth Street.

New York, N. Y.—William T. Rainey has sold his interest in the American Automobile Storage Co. to his partners, R. M. Owen and Roy A. Rainey.

Philadelphia, Pa.—The B. F. Goodrich Co. have moved their Philadelphia branch from 922 Arch Street to 909 Arch Street.

Sanford, Me.—The Automobile and Power Co. has been dissolved.

Topeka, Kan.—L. W. Wyman has purchased the interest of his partners in the Topeka Automobile and Cycle Co.

MANUFACTURERS' RECORD.

(Continued.)

South Pittsburg, Tenn.—The H. Wetter Manufacturing Co. are erecting a new stove plant on the block south of their main wareroom. It is to be 56x120 feet. The building will cost about $25,000 and the machinery and equipment about $5,000 additional. The company hopes to get this new plant in operation by the first of the year. It will give employment to about 125 skilled workmen. This plant will be devoted to the manufacture of cheap stoves.

Springfield, Ohio.—Charles L. and Louis Bauer, formerly of the International Harvester Co., and William Bauer, of the P. P. Mast Co., have purchased the interest of President R. H. Foos, of The Foos Manufacturing Co. Mr. Foos has decided to retire from business for the present. The company will be reorganized at once, Charles L. Bauer becoming president, and Louis Bauer accepting an important place in the management. William Bauer, while taking an interest in the management of the plant, will not for the present sever his connection with the Mast company. The plant of the Foos Manufacturing Co., which is located at Burt Street and Sheridan Avenue, manufactures an extensive line of corn harvesters and shellers, grinding and crushing machinery and portable forges. W. F. Foos is treasurer of the company, and William Copenhafer superintendent.

Toledo, Ohio.—The Toledo Metal Wheel Co. will build a big addition to its plant. The building will be 50x60 feet in dimensions and it will be composed of brick and steel and be four stories high. The offices will be on the ground floor and the other three will be used for manufacturing.

Waterloo, Iowa.—A new factory, covering a half block fronting on the Cedar River, is being erected by the Cascaden Manufacturing Co., to be 140x140 feet in dimensions. This will be used by the company for the manufacture of a full line of stoves and ranges.

Winston, N. C.—The Winston Handle Co. has decided to build a factory at Fairview.

J. V. WILLIAMS, Manufacturers' Agent, El Paso, Texas, desires to represent manufacturers of mine, smelter and builders' supplies in New Mexico, Arizona and Mexico.

Business Opportunity.

WANTED TO PURCHASE, Bankrupt Stocks or Discarded Patterns, and, in fact, anything in the Hardware, Paint or Stove line. Bael's Hardware Store, Trenton, New Jersey.

WANTED—Exclusive line of goods or specialty—must be strictly high class and fit cutlery specialty. Have every facility to finance and market extensively all over the world, excellent New York office, six domestic travelling men. Address "Z. A." care of HARDWARE.

Dissolution.

DISSOLUTION—William L. Blumberg and William Goldenblum composing the co-partnership of W. L. Blumberg & Co., doing business at 100 Chambers st., New York, announce the dissolution of said co-partnership.

Situation Wanted.

STENOGRAPHER AND TYPEWRITER desires position in New York City; willing to start at reasonable salary with prospects of increase. Reference, Hardware Publishing Co. Address "Miss M," care of HARDWARE.

Wanted.

WANTED—Sheet metal patented articles to manufacture on royalty or buy outright. Address "Sheet Metal," 115 Third St., Middletown, O.

Salesman Wanted.

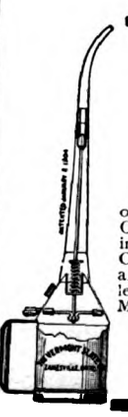
WANTED—Salesmen of experience and acquaintance with trade and territory, to sell our line of whips either exclusively, or in connection with one other good line of goods. Samples comprise a selection of all "live sellers" from the strongest line in America and can be carried in case weighing thirty pounds. The most attractive and best proposition going for energetic salesmen. Liberal commission and exclusive territory. Address Box No. 327, Westfield, Mass.

WANTED—Experienced salesman, for Southern and Eastern States and Canada. Address, for particulars, The Cincinnati Tool Co., Station "H," Cincinnati, Ohio.

WANTED—A young man as assistant stock clerk in a Hardware store. Address "Axiom," care HARDWARE.

Agents Wanted,

THE PUBLISHERS OF HARDWARE want Agents everywhere to solicit subscriptions. We pay liberal commission and in many ways assist our representatives in getting business.



For Sale.

50 new cold weld seamless steel pressure tanks (20 gallons capacity, tested to 200 lbs) each complete with double acting liquid or air pump, valves and pressure gauge; guaranteed to be in perfect condition—never used; cost each $25; will sell the lot $12 each. Address "A. P." HARDWARE.

GOOD AGENTS WANTED TO SELL

THE
VERMONT
SAFETY
OIL CAN.

Absolute regulation of flow of oil to a single drop. No waste of Oil from bearing to bearing, when in use. Made of Tin, Brass and Copper in several sizes, with bent and straight spouts of various lengths. Write for prices to the Metal Department.

THE VERMONT SLATE CO.
Zanesville, Ohio.

WRITE FOR QUOTATIONS

Mention "Hardware."

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

Catalogue and information free.

Address Dept. H,
THE
American Steel Roofing Co.
Middletown, O.

KELLY R. F. D. MAIL BOXES

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

THE FOUNDATION MUST BE GOOD

or the structure soon falls, is a well known fact. Bearing this in mind **we make the tank out of heavy galvanized iron with heavy cas top and bottom ring.** Please examine it closely and see how well the work is done. Put it on the scales. **Compare its weight with other makes. You will find it heavier and better made.** All parts, like he foundation or tank, are the best special skill can produce. Jobbers supply at factory price. Insist upon having the best and see that it bears our name.

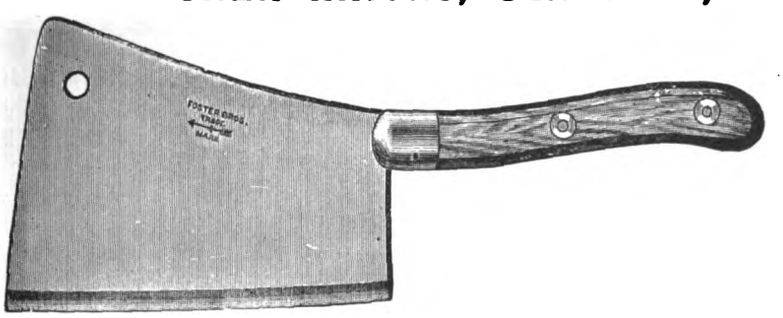
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

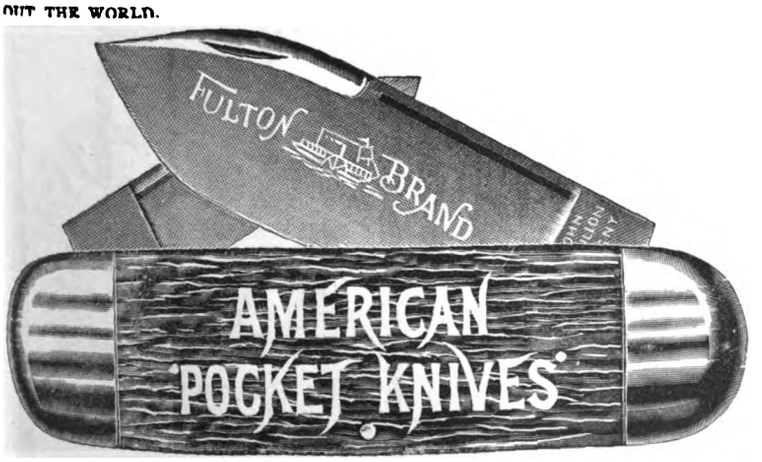


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

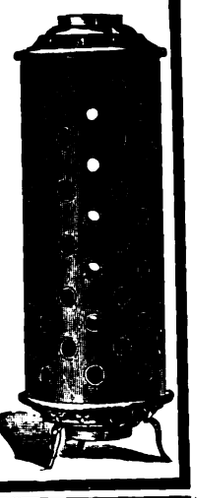
SAVE 1-2 YOUR FUEL

BY USING THE

ROCHESTER RADIATOR



IT WILL DO IT

TAKE a common sense view of heating—if you wish to heat a poker you will hold it over the fire, not at the side. We hold 90 to 120 pokers or tubes over the fire, each having a hollow air space in centre through which a current of air rapidly passes, sending the heat to all parts of the room, getting much greater results than any DRUM or side heater can give.

Inquiries from your town in answer to our advertising in all the leading Magazines and Family Papers are referred to you when you carry our goods in stock. Thus we sell them to you and then sell them for you.

Over 100,000 of them in use.

Write for Descriptive Catalogue and Prices.

The Part that does the Business. **ROCHESTER RADIATOR COMPANY,** 150 Furnace St. Rochester, N. Y.

The New Putnam Horse Nail

ORDERS TALK

Repeated orders which we are constantly receiving for

The New Putnam Horse Nail

are better than a barrel of talk and tell a better story of their excellence.

Perfect? It is impossible to crimp or break them; they will not sliver nor cut off; they will hold in the clinch and make work easier.

We have a Special Offer to Hardware dealers; ask us about it.

Putnam Nail Co.

Neponset, Boston, Mass., U. S. A.

The SMITH R. F. D. MAIL BOXES

APPROVED BY THE POSTMASTER-GENERAL

Superior in workmanship and material, giving complete satisfaction to dealer and customer.

Equipped with Smith's Improved Flag Signal, which is raised by the cover and is lowered on removal of the mail. On either side of the signal is a beautiful flag, in colors. The most perfect signal ever devised.

Also equipped with an Automatic Spring Hasp which holds the cover firm so that no wind storm can blow it open. Handsome in appearance, substantial, and operates perfectly. It is water-tight and weather-proof. Made of extra heavy galvanized sheet steel. Size 7x18 inches.

We also manufacture other style mail boxes.

Write us now for complete information and prices.

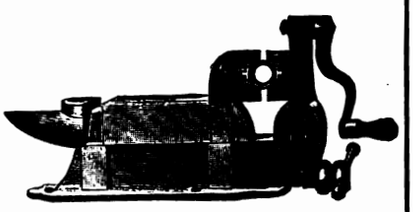
EXAMINE

MF

ROOFING TIN



the way this man is doing; then give it any other test you can think of. Find out for yourself that MF has a thicker coating of pure tin and new lead than any other Terne Plate you ever saw, and that that coating is free from pinholes and, therefore, impervious to the ravages of the most severe and changeable climates

These facts are what have made MF Roofing Tin the favorite of Architects, Builders, Roofers and Owners for over sixty years, and are the reasons why MF has protected many a property for more than half a century.

Write to W. C. Cronemeyer, Advertising Agent, 222 Frick Building, and we will gladly send you a piece for your inspection. Comparison convinces, and MF stands the test.

HARDWARE

In the full page advertisement of Butler Brothers in another part of this paper is an announcement that will be of special interest to those Dealers who have deferred buying their Holiday stocks.

*

The Avery Stamping Co., Cleveland, Ohio, advise us they have discontinued the manufacture of their specialty, the "Sled Skate," having sold all their patents to the Union Hardware Co., Torrington, Conn., it being more in harmony with their line.

*

Arthur De Wolf, who recently gave up his position of superintendent of the Humason & Beckley Manufacturing Company, New Britain, Conn., to accept a place in the machine room of the New Departure Manufacturing Company of Bristol, was on October 27, promoted to the superintendency of that concern.

*

A horse's drawing power depends upon the kind of road on which it travels. It is authoritatively stated that a horse can draw on the worst earth road three times as much as he can carry on his back; on a good macadamized road, nine times as much; on a plank road, well laid and in good order, twenty-five times as much; on a smooth stone pavement, thirty-three times as much, and on steel rails, fifty-four times as much.

THE KEUFFEL & ESSER CO.

The Keuffel & Esser Co., New York, have received from the Louisiana Purchase Exposition the only Grand Prize Group 19, Liberal Arts (Instruments of Precision, Philosophical Apparatus, etc.), and a Gold Medal, Group 115, Mines and Metallurgy (Instruments and Equipment for underground Surveying).

THE WALWORTH MANUFACTURING CO.

It gives us pleasure to announce that the Walworth Manufacturing Co., Boston, Mass., have been awarded a Gold Medal for Valves, Brass and Iron Goods, Pipe Fittings, etc., and Engineers' Goods and Steam Fitters' Tools at the Louisiana Purchase Exposition.

NEW PUTNAM HORSE NAILS.

The New Putnam Horse Nail has achieved such success as to their distribution, and from every section of the country the report has been so satisfactory with the trade they have had no occasion to make any improvements other than those natural ones which come from experience. The company have enlarged their factory and made several decided changes and improvements in the arrangement of their works which will enable them to turn out a large product. In spite of the general condition of business, they have at times been unable to fill orders on some sizes.

U. S. STEEL HAS 150,000 MEN.

The United States Steel Corporation has on its pay roll at this time approximately 150,000 men. Of this army of employes over 100,000 are engaged in the various manufacturing properties of the corporation. Last year the total number of all employes in the service of the corporation was 167,709 compared with 168,127 in 1902. The total amount paid in salaries and wages last year was $120,763,896. This year's total will be much below that without a strike, because of reductions and dropping from the pay roll a large number of high salaried employes who were "taken over" at the time of consolidation. It is estimated that this year's salary and wage roll will not exceed $100,000,000.

"WHO'S WHO, IN NEW YORK CITY AND STATE."

L. S Hamersly Co., 49 Wall Street, New York, is the publisher of an invaluable book denominated "Who's Who in New York City and State," containing authentic biographies of New Yorkers who are leaders and representatives in various departments of worthy human achievement, including sketches of every Army and Navy officer born in or appointed from New York and now serving; of all the Congressmen from the State; all State Senators and Judges and all Ambassadors, Ministers and Consuls appointed from New York. Some idea of the field covered may be had by a glance at the following partial list: There will be lives of leading architects, artists, authors, civil engineers, clergymen, bankers, brokers, lawyers, merchants, manufacturers, physicians, leaders in the world of society and prominent men of affairs. It will contain over 5,000 Biographical Sketches. It will be a volume of over one thousand pages, printed on fine paper, and strongly and handsomely bound in cloth. The second edition, enlarged, will be published in January.

F. E. MYERS & BROTHER.

F. E. Myers & Bro., Ashland, Ohio, has been awarded by the Louisiana Purchase Exposition the Grand Prize, Gold and Silver Medals, for their inimitable display of Pumps and Hay Tools, which was pronounced one of the best in the Agricultural Palace, being in motion and decidedly effectual. These awards verify their claims as being the leading manufacturers of their class of goods in the United States.

HARVESTER TRUST GETS PLANT.

President Osborne for the first time in public has admitted at a general meeting of the employes of D. M. Osborne & Co., Auburn, N. Y., that the plant has passed into the control of the International Harvester Co. It is not believed the transfer will curtail the manufacture of implements there nor reduce the number of employes. No figures were given. The Osborne Company employ 2,900 men.

BRINGING THEIR PLANT STRICTLY UP TO DATE.

The J. Stevens Arms & Tool Co., Chicopee Falls, Mass., have recently installed two new 45 in. McCormick wheels, increasing their power 200 horse, which will relieve them of the necessity of running nights, as they have been doing for the past three years. They have had 30 men working on the excavating and wall of the raceway for the past three months, and the installing of these new wheels at an expense of about $20,000, will bring their plant strictly up to date, as are their goods.

READY-MADE ADS.

The John E. Bassett Company, New Haven, Conn. have been looked upon for a number of years as being very clever advertisers of Hardware. For the past five years they have used space regularly in daily and weekly papers, changing their ads. once or twice a week, during the entire period. They state that all these advertisements were written by a practical Hardwareman and with the express purpose of selling Hardware. In this respect they are different from the usual line of "ready-made" ads. They are certainly original and right to the point. In response to a very apparent demand this firm is now publishing a book which contains fifty-four of their very best advertisements covering the most seasonable things in the Hardware line from January to December. This book they are offering for sale to Dealers and it would seem that it would constitute a valuable addition to any Hardwareman's library.

WELLS & NELLEGAR CO.

The Wells & Nellegar Co., of Chicago, are preparing to enlarge their business. Robert C. Bialy, of Bay City, Mich., is to be associated with them in the active management of the business, and, with their well-known reputation and rapidly increasing trade, it is predicted that this company will soon be one of the large wholesale jobbers of the West.

They have long been a strong factor by their aggressive policy and are directly credited with having "busted" the well-laid plans for a *nail trust* in 1895, and they are now selling a line of Anti-trust steel goods, which under their own brand are meeting with universal favor. The low prices, fine second growth Handles and superior finish of this complete line of *Forks, Hoes* and *Rakes* enables them to sell the very best and closest trade throughout the West, and buyers will do well to secure their quotations before placing their orders elsewhere.

They report a much larger advance booking of business than ever before, not only in steel goods, but also in "Clinton" wire cloth, and netting, anti-trust barb wire and nails, "Clean Cut" lawn mowers, "Easy Monday" clothes wringers, "Cutmore" axes, *"Challenge"* cutlery, scythes, sheep shears, shovels, spades, files, tin plate, hammers and hatchets, and with the new, up-to-date catalogue that they will send out to the trade next season, and increased facilities for the prompt handling of their business and the general prosperity throughout the West, a large trade is already assured this company.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

There has been magnificent weather everywhere with the result of better conditions prevailing, business is coming to hand in larger volume and the demand is rapidly assuming the strength that carries the conviction that this year will bear comparison with previous years of abundance and promise.

No radical change in prices has made it difficult to dispose of the goods; even the few recent advances have not been taken full advantage of by the dealer who desires to place no obstructions in the path of the customer who wants anything at this end of the season.

There is a stiffening of the market on many things which is accounted for by the changes in prices of raw material which has been advancing in price to an extent that makes any concession difficult to obtain from manufacturers of leading goods. Orders are rapidly arriving urging delivery at once, and jobbers who have kept fully abreast of the times with full stocks are reaping the benefit of their wisdom by being able to ship their own orders promptly and thus keep their customers supplied with needed supplies.

Nails have been ordered by the trade largely, and the retail trade, fearing an advance, have stocked up in anticipation. The tonnage has been larger than usual, and advantage has been taken of the condition of the market to purchase up to the requirements. This would indicate the presence of money in sufficient abundance to make it possible to accomplish.

Crops give evidence of a satisfactory state of affairs, no matter whether the subject of cotton, wheat or corn is at issue, the yield of each is abundant and prices high enough to suit the demands of the planter or the farmer.

The demand for Builders' Hardware is now in good condition, so much building has reached a stage where the trim is ready to be put on, so contractors are compelled to close their jobs and have been in the market with unfilled specifications, making that class of goods in especial demand.

R. G. Dun & Co., in their weekly review of trade, express the situation truly when they say "Business improves steadily, and there is no evidence of anxiety regarding the future. Payments are more promptly met tending to stimulate preparations for the coming trade, and the disposition to limit purchases to immediate needs is gradually disappearing. Conservatism during the Summer and Autumn had a beneficial effect, reducing stocks to a low point. As demand broadens, this scarcity of supply produces pressure for quick delivery and prices are strengthened."

While there is still an excellent business being done in such goods as are suitable for the winter season, the holiday lines are largely added to brightening up the assortments and making them attractive.

Already the confidence in the trade for the coming year is auguring well for the future, and the belief is general that stocks will be in such condition when inventory is taken as will promise large purchases for spring trade.

The "Special Brand" Business.

We devote a portion of our space to the expressed views of the trade regarding "Special Brands," as that especial matter will be largely debated during the Convention proceedings, now less than one week off. It will be seen the retail trade are not enthusiastic over having them, fearing as they do that they are not what they seem, but in too many cases a grade lower down the line. It is to be supposed the Jobber will be loath to part with the privilege of special labels, private trade marks and other forms of advertising, and will fight hard for their retention. The manufacturer would feel more sure of the trade of a customer who would order his original brands indicating the quality he is anxious to uphold, and if it were left to the Retailer, there would be no doubt but that he would approve of this disposition of the subject. Both have good arguments to urge on the matter, but the Retailer will not be in the discussion. It is certain the Manufacturer would rejoice if the whole "Special Brand" business was wiped forever out of his calculations, for it has always been a fruitful source of anxiety, doubt and lessened profits.

DEATH OF ROBERT H. SWAYZE.

Robert H. Swayze died suddenly Saturday evening last while reading a newspaper in his home in Bound Brook, N. J. Mr. Swayze was born in Chester, N. J., in 1840. He came to New York early in life, and entered the marine insurance business, becoming well known among persons engaged in that line. For fifteen years he was associated with the Plume and Atwood Manufacturing Company, of Waterbury, Conn, and 29 Murray Street, New York. At the time of his death he was a director in the National Shoe and Leather Bank of this city and the first National Bank of Bound Brook. Mr. Swayze was one of the first governors of the Hardware Club, and on its organization became its first vice-president. A widow and one daughter survive him.

SPECIAL BRANDS

In opening, in the columns of this paper, a discussion on "Special Brands," the publishers of HARDWARE are carrying out their policy to further any movement for the benefit of the trade. The opinion of HARDWARE on the subject of "Special Brands" will no doubt become apparent in what follows, but a free and full discussion is invited. Communications from Retail Dealers, Jobbers and Manufacturers are solicited and they will be published regardless of the side favored. It is our desire to obtain an expression of opinion from every one interested sufficiently to have formed an opinion, either by letter or interview, to the end that the feeling of the trade at large on this subject may be revealed.

Every branch of the Hardware business is interested in that much discussed subject "Special Brands," and throughout the whole country Manufacturer, Jobber and Retailer are doing some pretty heavy thinking. As a general thing manufacturers are found strongly opposed to the "Special Brand" idea and in most cases the retailers are found advancing opinions similar to those of the manufacturers. On the other side of the question can be found all, or at least a large majority, of teh Jobbers. Thus the line of battle, as it may be called, is made up and the outcome will be watched with great interest by every one identified with this trade, and by those in many other lines of business as well.

Recently the writer sent out a number of letters to Retailers, Jobbers and Manufacturers asking for opinions on the subject. A large number of replies have been received, several of which appear farther on in this article. There seems to be a disposition particularly among Manufacturers and Jobbers to refrain from making their opinions public. The value of anonymous opinions on this or any other subject is questionable, and the writer fails to see how a satisfactory settlement of the matter can ever be reached unless those interested come out in the open "flat-footed" for or against the question under discussion.

One manufacturer recently said to the writer: "I have been making goods under Special Brands for several years and I am still making them but I don't hesitate to say that I am most heartily disgusted with the present condition of affairs. Manufacturers talk about the domineering tactics of some labor unions but I want to say most emphatically that the man who has to deal with the walking delegate is in "easy street" as compared with some firms who are turning out the greater part of their output under Special Brands. The head of such a firm is tied hand and foot with his contracts and has about as much to say about running his business as has one of his foremen. Of course this is an extreme case, but there are many such and it points the way Special Brand manufacturers are traveling."

"I can understand how a man just starting in the business of manufacturing Hardware, with small capital, can be induced to make goods marked with another firm's name or trademark, when by doing so he can secure large contracts.

THE NEW MANUFACTURER

no doubt says to himself "this will give me a start and when I get on my feet I will make these goods under my own name." He overlooks entirely the fact that as long as he makes goods under any other brand than his own he is working for the other firm, and building up a reputation for the other firm and not for himself, and that at the end of three or five or ten years his "start" will consist of just what he had when he commenced plus the small profits accumulated, if any. He has established no reputation for his goods; the retail dealers never heard of him; and when he puts his own brand and name on his own product it is as if he has just started in business; meanwhile the firm for whom he was making goods gets some other manufacturer to make these goods under the same brand as before, so that Mr New Manufacturer finds that not only is he not known to the trade, but also that he has raised up a competitor."

"Take the firm that has been in business for several years making goods under its own name and trade mark, and that, by making honest goods and by skilful advertising has made itself known throughout the world of Hardware. The moment such a firm begins to make goods under another firm's brand, it begins to

LOSE ITS IDENTITY

and later on, instead of leaving to posterity a "good name—rather to be chosen than great riches"—it leaves—a pile of "Special Brand" contracts. Take for an illustration another line of goods. How long would it take the soap-using world to forget "Good morning; have you used Pear's soap?" if the manufacturers of that well-advertised article would commence turning out its product under the name of "Plum Soap?" How long would people remember "Spotless town" if Sapolio should be placed on the market as "Jones' Soap Powder," or "Sunny Jim," if the manufacturer of "Force" sold its product to Tom Jones & Co. under the brand of "Tom's Breakfast Food?" Millions of dollars have been spent to make the world know and remember these articles, and if the change I have mentioned were made, the accumulated results of all this advertising would be thrown away, and I am sure that the average business man would say that such action on the part of these manufacturers would not only be suicidal, but as well evidence of insanity; yet there are Hardware manufacturers in this country whose goods are as well known among retail dealers as Pear's Soap is among the people at large, who are gradually getting deeper and deeper into the mire of Special Brands and who will wake up some morning and find themselves forgotten if they do not, by a supreme, united effort, extricate themselves and do business under their own colors"

* * *

A manufacturer of edge tools was in this office a few days ago, and, without hesitation, expressed himself as "dead set" against the Special Brand idea, at the same time admitting that he was making a few goods under other firm's marks. He said: "I have had a number of very

DISAGREEABLE EXPERIENCES

in making goods under Special Brands and hope the time is not far distant when I can get out of that kind of business entirely. Recently I sold three hundred dozen of a certain tool, that I had always made under my own brand, to a western jobbing house on condition that I use the Jobber's label. I had been trying to get that firm's business for a long time and, while I did not fancy sending out these goods under the Jobbers' mark, business was dull at the time and, as it seemed to be the only way I could get that firm's orders, I accepted their proposition. The price was, of course, rock bottom, and I had to spend over $50 getting special labels printed. I shipped the goods and, after a reasonable lapse of time, began to wonder why no more orders came from that firm. Correspondence failed to bring the business, so I went out there to see them. They expressed themselves as being entirely satisfied with the goods and admitted that they were all sold and then coolly told me that another manufacturer was making the goods now, he having submitted a price five per cent under mine. Did I make any profit on that jobber's order? Well, I should say not!

"A certain railroad has been using some of my tools, buying in large quantities for some length of time. I had been selling them direct at regulation quantity price. All at once there was a cessation of orders from that source and, on investigation, I found they were buying from a jobbing house. That fact didn't trouble me until I discovered that the tools they were buying from the jobber were made in MY shop under that jobber's special brands, and further, that they were getting the goods at two and one-half per cent under the price at which I had been selling goods bearing my own brand to the railroad. I had raised up a competitor to my own business."

* * *

A RETAIL DEALER'S EXPERIENCE.

While on a recent vacation trip to the western part of Pennsylvania, the writer called on a Hardware Dealer, an old acquaintance, and the talk drifted into the subject of goods bearing Special Brands. The Dealer, who by the way, is rated as one of the most progressive in his line in that section, expressed himself most emphatically on the subject. He said among other things:

"The Hardware stock of to-day is made up partly of well-known standard articles and partly of goods that few, if any, of our customers ever heard of. Trade marked and other goods

Digitized by Google

bearing the maker's name that have been on the market for some length of time can be sold without any great amount of argument with the customers, but when we attempt to substitute an article bearing an unknown mark, then there is trouble and hard talking ahead. This is especially true in selling tools. If a carpenter comes in here after a plane, he asks for one of the well-known makes, say "Stanley" or a "Union;" I've got the goods; the sale is made in a moment, and Mr. Carpenter goes away satisfied. Now, suppose the manufacturers of these planes should make a contract with the jobbing house from whom I buy goods, to manufacture these planes for them under the name of "Easy Cutter;" I put in a stock along with other goods. A carpenter comes in and asks for a "Union" or "Stanley" plane and I hand out the "Easy Cutter," saying at the same time, "It's the same thing under another name." Now that carpenter may be able to see that it is exactly the same article in every respect, but the absence of the familiar brand at once creates a doubt in his mind as to whether he wants that particular plane or not. A long argument from me may in the end bring about a sale, but the carpenter goes away feeling that he didn't get what he wanted, and furthermore his feeling toward me is not the same; I have

SOLD HIM A SUBSTITUTE

and he is displeased, and, while he may come back for more goods, a too frequent repetition of such substitution will, in the end, drive him to another store. I believe that the secret of success in the mercantile business is to have in stock what my trade demands, and in selling them goods, to endeavor to follow their wishes instead of attempting to turn them another way.

"Then there's another thing. Why is it that my customers often come here and ask for certain goods without knowing whether I have them in stock or not? It's because some one has told them about those goods, or, what is more likely, those goods are being advertised in the magazines or other periodicals? This kind of advertising is a big help to the Retail dealer, and I am always more inclined to buy a stock of an article that is being advertised than when it is not. Many articles in the regulation Hardware stock are being well advertised, especially safety razors, refrigerators, varnishes and paints, and sporting goods, and when I find either through my trade paper or the traveling salesmen that certain goods are being advertised extensively, or when I see that advertising, I am at once inclined to favor that article in making up my orders.

"I can't understand why a concern, after establishing a reputation by good advertising and honest business methods, will throw away all the results of years of hard work by making their goods for some other firm under the other firm's private brand. It would be about as sensible for me to lease this store and stock to my competitor across the street for ten years and come back at that time expecting to take up my trade where I left off. Any one would say that I would find my old customers buying goods of the other fellow and I would have to start all over again. I've been fourteen years building up a good name in this town, and I'm going to hold on to it until I retire from business."

HOW IT AFFECTS RETAIL TRADE.

The following letter comes from J. W. Thurber, president of the H. H. Mayhew Co., Shelburne Falls, Mass.: "We are not greatly troubled in comparison with some manufacturers with requests for special brands; such requests are immediately turned down and we have never had occasion but once to reverse our decision. We are not in favor of special brands; our reason is that the buying public, or consumer, is the one really interested, and to him the name of a tool is indicative of its quality. The name "Mayhew" on a certain tool means something to the user; whereas that identically same tool in finish and quality, bearing the brand of a jobbing house means nothing to him; multiply this jobbing house by fifty or a hundred on the same tool, and the tool has lost its identity; its actual value as a tool is not apparent, for the consumer cannot carry a multitude of special brands in his mind.

A tool marked "L. S. Starrett" is known the world over. Let one hundred jobbers take the same tool and sell it under their own brand, if they can; the consumer will still call for the "Starrett" tool.

The manufacturer has not the same interest in a tool sold under some one else's name; he has a pride in all his product that bears his name. You may say the jobber has just the same pride, but he is at the mercy of the manufacturer; the jobber cannot guarantee the tool except with the consent of the manufacturer. If the jobber wishes to be a manufacturer, let him be so in every sense of the word, but not assume he is a manufacturer and use that as a leverage to sell a tool he does not actually manufacture, but one that bears his brand.

It is very general that the jobber in requesting special brand wants them at a reduced price; in other words, he wants the same tool that you sell at $1.00 under your brand for eighty cents under his brand; the loss is twenty per cent, plus the extra labor and cost of dies, labels, etc.

So altogether we consider the question of special brands as of great importance and we believe in discouraging it all we possibly can and in doing so we intend no injury to the jobber; on the contrary, we think our name is as valuable, if not more so, on a tool than the multiplicity of jobbing houses on the same tool.

You are at liberty to use this letter, or any part of it, for publication, for we should use the same arguments to our best jobbing friends.

* * *

AN EMPHATIC PROTEST

from a manufacturer of shovels and Hardware specialties:

"Referring to your letter of the fifth, asking our views on the matter of "Special Brands," will say that we consider all such requests as an imposition on the manufacturer; that is, at least where he is asked to put special labels on his best grade of goods. For instance, we manufacture a Lawn Rake on which we have spent years building up a trade. Along comes some jobber and insists on having a special label put on those goods so he can advertise them and build up a trade for himself under that brand. Perhaps in a year or two some dispute may arise in regard to the matter of price, and the jobber can go and buy an inferior article of some other manufacturer and put it out under that same brand; while if our own labels had been used, he could not buy other goods and offer them as KOHLER'S Rakes. Manufacturers should all refuse to put on special labels except on second quality goods, not merely from the standpoint mentioned, but because it is always an extra expense.

We had one case of a large buyer cutting us off from their trade not because we refused to put on their special labels, but because we objected to paying for the labels they furnished us to put on. They even wanted to charge us with the express charges on the labels. We declined to pay for the labels and the expressage as a matter of principle, and not on account of the amount involved, and we feel that the buyer in this case was absolutely in the wrong.

We would like to see manufacturers take a decided stand against this practice. Jobbers are always making some kicks about the manufacturers, but you can see that there is something to be said on both sides.

Yours very respectfully,

F. E. KOHLER & Co.

Canton, Ohio., October 8, 1904.

* * *

AN OPPOSITE VIEW

is expressed in the following communication from a prominent Southern jobber:

"In reply to yours of the 6th, will say that we have very definite views on the subject of *Special Brands,* for the reason that we have always found that we could secure a better profit on special brands than on factory brands, and it seems to us that if we jobbers are willing to spend time and money to create a demand for "Special Brands," that we should have the privilege and not be forced by the factories to buy something that we will lose money on, which is nearly always the case with standard factory brands. As long as we are able we shall always resist the effort of the manufacturers to deprive us of the privilege of "Special Brands."

Very truly yours,

KING HARDWARE Co.

Atlanta, Ga., October 8, 1904.

* * *

The manufacturer of an exceptionally well advertised article, who does not wish his name mentioned, writes as follows:

"We think it unjust of any jobber or wholesaler to request a manufacturer who spends thousands of dollars for many years in advertising the good quality of his merchandise and who, to keep up the reputation of their house, always makes it a point to provide absolutely mechanically perfect articles, should give the benefit to the jobbers and wholesalers by making the same articles under a different name. In a short space of time the manufacturer's name would be lost to the public and he would be at the mercy of the wholesaler and jobber. It would only be a question of time when the jobber would take advantage of the manufacturer's position; we do not say all of them, but some may, and under the special brands that they would be selling the article would in competition, perhaps, be able to obtain it somewhat cheaper, placing the article on the market and thereby injuring the sale of same. Speaking for ourselves, will positively state that we would never entertain any proposition to put our product out under any special brands or names. We advertise our brand and name extensively, as we have in the past, and

Digitized by Google

always make it a business to provide the same high quality goods, so as to insure success mutually to ourselves as well as to the users."

* * *

A QUESTION OF QUALITY.

The president of the Connecticut Retail Hardware Dealers' Associtiaon, W. A. Church, writes as follows:

Gentlemen—I am in receipt of your favor of the 12th and note your allusion to the very general discussion of the subject of selling Hardware under "Special Brands."

As you ask for an expression from retailers, I would say that as far as my experience goes I am inclined to lean toward the old-fashioned method of building up business on the merit of the goods. I prefer to make my push on goods of well-known merit and sell them under the manufacturer's name. When I offer a customer a Disston Saw with Disston's name stamped on it, I do not find it necessary to do much talking to convince my customer that he is buying a good article, for as a rule he knows the goods as well as I do myself, and knows on general principles that a saw made by Disston with his name stamped thereon is absolute evidence of the superior quality of the goods. I can see no especial advantage to the retailer in selling under his own name unless he is offering an inferior article and is using same to advertise his business.

If this is the end sought he had better affix his advertisement under the regular brand of the manufacturer on a first-class article, and depend upon the quality of the goods to increase his business.

To my mind this question is not a particularly important one to the retailer. It is entirely overshadowed by the too common practice on the part of the manufacturers selling direct to the consumers. This is the trouble the retail trade is suffering from more than anything else, and it is very much to be regretted that some of our largest manufacturers are not inclined to consider the retailer's interest in the distribution of his goods. This particular subject is interesting the Hardware associations throughout the country and will be thoroughly ventilated at our Spring meeting. The attitude of the Hardware associations throughout the country on this subject is likely to take a very aggressive position within the next year. It is a subject that I am inclined to think will be worth careful consideration by the people who are to assemble at Atlantic City in the near future.

* * *

In reply to yours of the 5th, would say the writer has written to about a dozen Hardware manufacturers on the Special Brand subject, and without exception they agree that when the manufacturer puts out his goods under other than his own brand, he has given away the benefit of any advertising he may have done, and we feel that in doing so he has given away one of his most valuable assets, provided he makes good goods. If he turns out poor goods he is wise in having them go out under another name, and, as many jobbers put goods out under their own name because they can get a lower price than under the manufacturer's name, it is evident the goods are not worth as much, and it should be understood that if goods are of the best quality, the manufacturer wants his own name on them. When the trade understand that to be sure of first quality goods they must get the maker's name with the goods, the question of Special Brands will soon be settled, and no manufacturer can afford to give away a good reputation. CRONK & CARRIER MANUFACTURING CO.

* * *

Your favor of the 11th, in which you ask for an opinion with regard to "Special Brands," is received.

I am a believer in "Special Brands" where the quantity purchased by the retailer justifies it.

In this day of keen competition in Hardware, not only among our fellow-dealers, but that of department stores and catalogue houses, we feel the urgent need of some means of controlling prices on many staple or special articles we sell. Special Brands of our own always place us in a position to get a legitimate profit, and if the quality be what it should be we establish a trade on the particular articles sold, and a good reputation for our store. In many small stores, and with a great many lines in the Hardware trade, I consider Special Brands to be impracticable, but for a multitude of dealers it would mean their financial saivation to push Special Brands of their own in many lines.

THOS. A. NICHOLS.

(Member of Board of Directors of the Iowa State Association.)

* * *

IN FAVOR OF SPECIAL BRANDS

if they are the best, is the opinion of Fred'k Neudorff, secretary-treasurer of the Missouri Retail Stove and Hardware Dealers' Association. He writes:

My judgment of thirty years' experience in the Hardware business is all in favor of exploiting Special Brands. If they are the best, and controlled exclusively, they are both trade-makers and very profitable, the two elements which make success. I am selling some brands exclusively for over twenty years and they are a constant source of satisfaction. I try to be exclusive on all lines sold.

* * *

CUSTOMERS WANT STANDARD GOODS

is the experience of F. B. Standart, of Holland, Mich., member Executive Committee of the Michigan Retail Association. He writes as follows:

I have always thought that while perhaps the profit on the sale made on Standard Manufactured goods might not be quite as large, yet in ten years' time I feel that with good goods sold at right prices and the manufacturer's name established with a customer, that the aggregate profit and the satisfaction of doing business will be greater than it would be with some special brand of goods.

I have found this: You sell an article that the people know is all right, and that has a reputation back of it, if as the manufacturers are liable to make an imperfect article, a little too soft, perhaps, they will say it is all right, because the manufacturer and retailer are willing to make it satisfactory.

While if you sell a special brand, something that they do not know, and which a great many times is sold against the customer's judgment, and the artcile does not prove satisfactory, he condemns you and goes somewhere else to buy a duplicate.

This has been my experience so far, and, of course, one must judge the goods that they buy, by their trade. I do not think it policy to sell any customer an article that you feel at the time of the sale, is not what he wants.

* * *

PROFIT LESS—BUT LESS ARGUMENT NECESSARY.

We are pleased to acknowledge receipt of your communication of October 6th, asking our opinion upon Special Brands. It has been our policy to try and steer clear of "Special Brands" at all times. We would very much prefer to sell an original article with the manufacturer's name and brand at a less margin than to take up time to argue to the people that the "Special Brands" are just as good if not a little better than the manufacturers' brands.

We think that we have made money in so doing, although we admit the profits are less by using the manufacturers' brands.

Not wishing to enter into the discussion any farther than to say we are entirely satisfied with first quality goods in manufacturers' own brands,

Very truly yours,

THE JOHNSON HARDWARE CO.,

(Chas. S. Johnson),

Members of Nat'l & Ohio Hdwe. Asso'ns.

Barberton, Ohio, October 10, 1904.

THE LOUDEST TOOT WINS.

The following is from George J. Bassett, second vice-president of the Connecticut Association:

The question of special brands, already a serious problem for the manufacturer and jobber, is becoming a matter of increasing interest to the retailer. Accustomed as he has been, in the majority of cases, to handle goods of certain makes in each of his various lines, he finds it difficult to drop these and take on goods of other makes which are becoming popular through systematic advertising. And yet the new goods, or old goods, under new brands, are being so extensively advertised in popular magazines and trade journals that he finds one man asking for a "Mago Bono" Razor and another for a "Clean Clipper" Saw, and neither of them willing to try the regular goods he has on his shelves. Of course if he is enterprising he will have a special brand of his own, and by dint of persistent advertising he will try to educate his immediate public to ask for that brand and refuse substitutes. But the public is like a child—always wanting something new—and it likes to read advertisements—bless its heart—and it believes them, too. So it reads about the special brand goods so well advertised in the popular magazines and the dealer must have them or lose trade.

It's the multiplying of these special brands that I view with most alarm—when will it stop? It's hard enough to carry two or three brands of saws and razors and other things that are identical except in name, but when every manufacturer and every jobber is exploiting his goods in print how will the retailer be able to supply the demand from his limited stock?

It will finally end in a triangular fight between maker, jobber and retailer—each man blowing his own horn, with the man who toots the loudest in the lead. And the retailer should get him-

Digitized by Google

self in line by having his own brands whenever feasible and persistently pushing them, not excluding others from his stock, but keeping moderate stocks of such special brands as are uppermost in the public mind from time to time. But all the time while willing to supply the goods asked for he will still be pushing out his own good goods with his own backing and his own brands until these brands of his are so well known in his own locality that he can be quite independent of any others, no matter how well they are paraded before the public.

* * *

SPECIAL BRAND—NO GUARANTEE.

The following brief, but to the point, letter is from the secretary of the Wisconsin Retail Hardware Association:

In reply to yours of the 11th inst., I would say that I can only speak for one, but my idea is that it is an objectionable feature for any man to push "private brands," for the simple reason that it is not a guarantee of quality, as I look at it. I have sometimes pushed my own brand for a season, but it was not a success, upon anything I did not manufacture myself, and upon which I could maintain the quality. C. A. PECK.

* * *

YES—BUT,

This well-known firm will make Special Brand goods under certain conditions. They write:

We have not furnished our wares to customers in special designs, except when they pay for the entire cost of getting out the design and order a large quantity of the goods to be taken at once. Under these conditions we are put to no extra expense which is not borne by our customer, and in that way we are very glad to furnish the special design.

Yours truly,
THE BRONSON-WALTON CO.

Cleveland, Ohio, October 10, 1904.

* * *

We are in receipt of yours of 6th inst., in regard to *"Special Brands."* We do not believe that special brands are a good thing for the merchant. We think that the old standard brand goods are the best and give better satisfaction. It is much easier to sell a Hunts axe, a Jennings auger or a Disston saw than any "special brand" of the same goods, although the latter may be just as good. The consumer has become accustomed to using certain lines of goods, and when he calls and asks for it it is certainly easier to be able to give it to him than to persuade him that another kind is as good or better. With the special brands the country merchant has to do all the missionary work and wholesalers reap the benefits, as there is more money in the special brands for them, and the retailer gets none of it. We are decidedly opposed, as stated above, to the "special brand" business, and we avoid buying them wherever it is possible.

Hoping that this letter covers the ground and is satisfactory to you, we are,

Very truly yours,
THE NICHOLS HARDWARE CO.,
By A. H. Nichols, President.

Chico, Cal., October 18, 1904.

* * *

THE MANUFACTURER A PENANCE.

From the articles that have appeared in the various trade papers during the past year, written by wholesalers and retailers, one but could conclude that the manufacturer was a huge policeman, who held the destiny of the retailers in the palm of his hand and with a club could defend them against all approaching danger, and that it was up to the manufacturer to put the catalogue house out of business.

I sincerely hope the trade papers' discussion of this matter is ended, and that the jobber and progressive retailer will commence an educational campaign among the retailers, who have not waked to the fact that the success of the catalogue house is due almost entirely to methods employed by the indifferent retailer. The manufacturers, as a whole, will lend every assistance consistent with good business, and all any reasonable dealer would ask, but they are powerless if the retailer does not help himself. We live in an age of progression, and the dealer must change and advance as the times change.

Fifty years ago the present method of advertising would have been considered absurd and probably had very little effect, as the time was not then ripe for present methods, but to-day many a Hardware man is doing his advertising as his father did, runs his store in the same back number way, without order or system, sells his goods on long time and long prices, and is it any wonder these few dealers lost the 5% or 10% of Hardware sales to their catalogue competitors? Very little business is lost by the dealer who is a modern Hardware merchant and does business on up-to-date lines.

All lines of trade have their troubles, and when the Hardware dealer is relieved of all competition, such as 5 and 10 cent stores, racket stores, range peddlers, etc., and imagines henceforth his business will be a bed of roses, I fear he will find a few thorns concealed therein.

We all expect these annoyances in business, and the catalogue house proposition is for the retail merchant to battle himself with the assistance and support of the jobbers and manufacturers.

If the jobbers had worked, as some of the best posted know they should have, for the real benefit of the retailers during the past year in urging the indifferent retailers to modernize their methods instead of trying to flatter them in their slothfulness, the dealer would be far better off to-day, but the jobber has evidently been afraid of offending his customer, and blamed the manufacturer when he—the jobber—knew the trouble was with the retailer.

The catalogue house works on present methods of merchandising, has system and brains back of it, and the up-to-date Hardware merchant has no more trouble from it than he will from some other source as long as he is in trade, but it is the *dealer*, not *merchant*, who lets the steel range peddler sell a carload of stoves to his customers at 30% more than he, the dealer, asks for a better stove, that has the most trouble with catalogue house competition and kindred evils and wants them legislated out of business.

I have been intimately associated with the retailer, was at one time a member of a strong State association, have sold the retail trade as salesman and the jobber as a manufacturer, and I find in the State association that generally the dealer, who shouts the loudest about his troubles, is the one who needs most to modernize his own store and prices.

I thoroughly believe in the State and National associations, but if they would do more "Missionary" work among the dealers, who make it possible for the catalogue house to thrive, it would be better for dealer, jobber and manufacturer.

Heretofore the dealer has not had the nerve to say to his brethren, who are not in line with merchandising as it is done to-day, *"You* are responsible for present conditions," the quicker he does so the better for all concerned. But on the lines they have been working the jobber dare not offend and the dealer feared losing a member of the association, not one-tenth has been accomplished that otherwise could. Do less "Resolving" for effect, but work on sane lines and in the right way, and all in the Hardware trade will be happy. C. F. M.

THREE VIEWS OF THE SUBJECT.

By F. F. PURDY.

The subject of special brands is one that is forcing itself on the attention of the trade to an extent that makes it imperative for everybody to seek a basis upon which to deal with it in a way to best subserve his own interests.

It may be interesting to take up this matter from the standpoint of each of the three branches of the trade. Take it first from the viewpoint of the manufacturer.

The manufacturer has his plant to keep actively and profitably employed, which outweighs with him all other considerations, and reinforces in a potent manner the temptation to accept an offer from a jobber to place an order for a large quantity of his standard goods, to be made and sold under another name than that which has for years been one of the important assets of the plant. It takes a strong man to exercise sufficient prescience and real mental energy to marshal the reasons before him for turning down an order for perhaps several thousands of dollars worth of his goods simply because he is asked to sell them to one house under a new brand—and then to do it.

Why should he? The cash is ready after delivery, all risk is eliminated, and things will be kept humming at the factory for days. This may be answered to an extent from the experience of a manufacturer of textiles.

At first the manufacturer sold his product to retailers, but subsequently assumed relations with three large jobbers that resulted in his gradually transferring his entire line to them, discontinuing his advertising, turning his salesmen loose, and simply becoming a hired man for three big customers. This continued for a few years, and the jobbers, of course, sold the goods under their own names. The maker's name was forgotten. He dropped out of sight and became but a dim reminiscence to his old retail customers. All at once there was one of those convulsions in trade that destroyed his business with all three houses almost simultaneously, and it nearly accomplished his ruin. His savings, resources and credit were all but exhausted before he was able to fight his way back to a solid basis on the old lines.

But it might be suggested that a better policy would be to retain an old line of customers, and occasionally take a flyer in the shape of a big order for a special brand, even at a shaving in

Digitized by Google

price. But there are many Hardware manufacturers who have tested the fallacy of this reasoning. Under these circumstances a manufacturer, in a way, becomes his own competitor; he weakens the foundation he has built under his own standard brand. He embarrasses the regular handlers of his product by enabling their cut-rate competitors to offer a substitute of merit that not only hurts the business of his best trades, but his own best business. Furthermore, he is violating the confidence of an army of dealers who are rapidly becoming more strongly organized to combat this condition.

Again, by not pushing his standard brand in every way in his power, by printers' ink and by the skill of the salesman, he is falling short of the best results, and really pulling against the stream—going directly opposite to the experience of the foremost producers, which is to popularize their own brand, be it Hardware, shoes or breakfast food; put on full head of steam and create such a demand from consumer and retailer that nothing but the advertised, well-known brand will do. There is a quicker yielding, less resistance, a greater fruitage, in a campaign of this kind in the Hardware trade than any other we can think of. Tools are all but friends, and artisans have their wants so thoroughly burned into their brains that no substitute will do. The wonder is that Hardware manufacturers have done so little in making new friends for their specialties by talking direct to the people about them. To do this is the trend of modern times. The producers of the cereals put their goods up in packages under a well-known and advertised name, and have learned that there is much more profit in this practice than in selling their goods in bulk.

Then come the jobbers. The preceding remarks are in no wise to be taken as antagonistic to their interests. There is a wide and growing field for their efforts. They have been sufficiently resourceful to look out for their own welfare and to increase their sales, and no doubt they will continue to do so. In certain sections, like the Southwest, with St. Louis as the rallying point, it is not at all strange that certain jobbers find it advantageous to control a brand of their own, in various articles, and have the goods made up in vast quantities at a price that will give them practical control of the market in many portions of their territory. In fact, in nearly all sections, there are numerous instances where jobbers have recourse to special brands with advantage to themselves. And they are not to be blamed for pursuing this policy. They are getting what they pay for and it is up to the manufacturer whether the jobbers get the goods or not. If Special Brands were eliminated, the jobbers would find a way to maintain the extent of their business, there is little doubt, and furthermore, it is not due entirely or even chiefly to them that this matter has come to be looked upon generally as such an evil in the trade. Sentiment against Special Brands is growing, and the interests of the manufacturers and dealers being identical, we look to see their use greatly curtailed in view of the organization which is under way, largely in opposition.

Now we come to the dealer's side. They have constant inquiries for the standard brands that they are prepared to meet from a full stock. Standard brands command a standard price, which they pay and ask for their goods. Suddenly they are confronted with the problem of articles of merit under another name being sold by a neighbor at possibly a reduced price. All these conditions are too familiar for iteration. There are always certain dealers or department stores that are on the hunt for leaders or bargains. The sales of those establishments are much less than the combined sales of the regular stock of the conservative single line dealers, but the competition of the sales of special brands is irritating and unsettling to prices. Consequently the dealers are becoming practically united in their opposition to Special Brands.

The retailers, of course, feel the competition of Special Brands most keenly. It reaches them first. The manufacturers also feel it, but more indirectly, and consequently have not been quite as active, as a whole, in their opposition. But in the entire trade the old law holds good that one branch of an industry cannot thrive long at the expense of the others, and that the healthiest condition in the long run is that in which there is equal participation in the benefits to be derived from the prosecution of business.

THE TRADE MARK.

Next to a Good Name, the Manufacturer's Best Asset.

The substance of the following is taken from a booklet of the George Ethridge Co., and contains most valuable advice for those in the Hardware trade, particularly in view of the present discussion on the subject of "Special Brands."

In this particular period of our industrial growth nearly everything is bought by brand. People call for the most ordinary articles of every-day use, such as soap, canned goods, meats, preserves and salt, razors, cutlery, stoves and guns, by the name of a brand. In fact, it would be difficult to mention any article which is not being more or less cleverly advertised in this way, and it is safe to say that there is no article manufactured which cannot be so advertised. A lamp chimney is certainly about as humble a piece of household furniture as can be imagined, yet to think of lamp chimneys is to think of Macbeth.

Your trade mark represents your excuse for being in business. That is to say, it stands for those characteristics or qualities of your goods which make them saleable. Your trade mark or brand is the identifying stamp by which the public can tell your goods from those of your competitors, and you are not doing your full duty to yourself unless you educate the public up to the point of believing that its best interests will be served by purchasing goods bearing your brand.

A trade mark is of no particular use unless it is advertised, and its value may be raised to almost any degree if the advertising is good enough and persistent enough—providing, of course, the goods are right. Any man who makes a good article is missing a tremendous opportunity if he does not advertise his trade mark, and keep at it continually.

The manufacturer who does not do this is

DEPENDENT UPON THE JOBBER

to a very uncomfortable degree, and, if that gentleman so desires, he can make any particular line of goods take a back seat.

Some manufacturers have met with a large degree of success by eliminating the jobber altogether, and going straight to the consumer with their advertising, and filling the orders of the retailers themselves. In some lines of business this works very well, but, as a general proposition, such a course, having, as it must, the result of making an enemy of the jobber, is bad policy. In business it is best to have no enemies at all—not even among your competitors—and to openly declare war upon so powerful an element as that represented by the jobbers is in most instances something to be avoided. It is much better to let the jobber in for his share, keep his good will, and, if possible, earn his active support. Your brand can be popularized and your trade extended without in any way getting into difficulties with the jobber.

In order to get the most out of a trade mark, it is necessary—

First, to make the public understand and believe that your particular trade mark stands for certain most desirable qualities, and that to secure those qualities it is absolutely necessary to call for your brand of goods, and insist on having them.

Second, to impress the same facts upon the retailer, make him understand and believe, that, in order to give his customers the service which they are entitled, and thus build up his own business, he must carry your goods, and, that you are extensively advertising this fact to the public, thus creating a demand which he could be ready to meet with the goods.

Third, to keep the jobber thoroughly informed as to what is going on from your end of the line with the public and with the retailer, thus convincing him that his own interest lies in actively assisting in pushing your goods.

In order to achieve success the

PUBLIC DEMAND MUST EXIST,

the need for the goods must be present, though perhaps latent. If, however, the goods are what they should be, and meet a public want of sufficient magnitude, and can be manufactured and sold at a reasonable profit, there is absolutely no limit to the success a manufacturer may achieve, provided he is broad minded and energetic enough, not only to stamp

HIS OWN TRADE MARK

upon his goods, but to stamp it indelibly upon the minds of those who might buy his goods.

The trouble with the average manufacturer is either that he is too timid to push his proposition to the limit, or else, that he is satisfied to be a moderate success and to sit back and be comfortable with what he has acquired, or to make his goods under another firm's name and brand regardless of his loss of identity by so doing. If it were not unkind to do so, it would be possible to name a great many manufacturers who have, by advertising their brand, built up a good business, and then leaned back in their chairs and were content with the steadily decreasing volume of trade which the impetus they originally gave their business continued to bring in. Such men stop before they really arrive.

The thing to do is to educate the public to call for goods bearing your brand and then keep on, month after month, year after year, until the end of things. The moment you cease telling people to call for the "Ajax" Brand and insist upon having it some other fellow begins to tell them to call for the "Venus" Brand and insist on having that. If you keep up your end, you have the advantage, because you were there first, but if you don't, the other fellow will speedily gain an advantage by being there last, and you will begin to drop out of sight.

It is all very well to say that the people know all about your

Digitized by Google

goods and your trade mark, and there is no use in spending your good money in telling them what they already know. Not many years ago, St. Jacob's Oil was one of the best known liniments in America and one of the best sellers. It was to be found in every drug store in the country, and was known in an enormous number of homes. When a change in business management occurred, the new managers came to the conclusion that everybody knew all about St Jacob's Oil, that there was no use in keeping its name and virtues before the public, and that the thing for them to do was to sit tight and spend the fortune that had previously been annually used for advertising. The result was that in an absurdly short time St. Jacob's Oil not only disappeared from the newspapers and billboards, but from the drug stores, from the homes and actually from the memody of the people, and one of the most valuable medicinal trade marks in America went up against the wall with a thud.

The character of advertising which may be utilized to exploit and give value to a trade mark depends upon the character of the goods. As a general thing, the place to begin is at both ends and in the middle. The public, through the medium of either magazines or newspapers, or both, must be told to call for the goods bearing your brand, and why it is wise and profitable to do so. The trade mark should be reproduced and laid before the people, not once or twice, but continually and persistently.

Before the advertising to the consumer really begins, the advertising matter should be placed before the retailer in the leading trade journals. The retailer should be told just how this advertising campaign is to be carried on, what publications are to be used, etc. He should be made fully to understand that the public—his public—is to be told to

CALL FOR YOUR BRAND

of goods, and that you are going to keep on telling it. He should be told that this demand which you are going to create is for his benefit as well as yours, and the demand will sooner or later, and probably sooner, be felt by him. It becomes his duty to himself and his public to get the goods in stock and be ready for the demand. It is not sufficient to tell the retailer this story once. You must keep after him and see that he is kept full of your story and your plans. You will not be able to infuse him with all your enthusiasm, but if you keep at him, you will make an impression upon him which will result in placing your goods on his shelves. He should be told to order the goods through his jobber, and the jobber should be kept informed as to what you are doing, both with the retailer and the consumer. The jobber understands thoroughly the power of advertising, and will be found in most cases more than willing to lend his assistance.

A campaign of this character, properly planned and carried out, brings a demand on the retailer by the consumer; brings a demand on the jobber by the retailer, and brings a demand on the manufacturer by the jobber. Then the chain is complete, and the only thing to do is to keep it moving.

In some cases goods have particular merits or patented features which lift them so far above ordinary goods of the same kind that a large and prosperous business may be built without appealing to the consumer at all, but simply by working on the retailer and pointing out to him why your goods should be handled and why they will be more profitable to him than by others.

This matter of advertising your brand of goods and your own trade mark is something of tremendous importance. The possibilities are practically unlimited. Most manufacturers are proud of their trade marks. They like to see them and to have them displayed prominently for the reason that to its owner a trade mark is eloquent of many things. To the general public, however, a trade mark is a mere picture or device. It means absolutely nothing. The way to get the real value out of a trade mark is to tell people what it means. Translate the hidden meaning of your trade mark to the buying public and keep on indefinitely. If you do this and cannot make a fortune within a reasonably short time, there is something radically wrong with your proposition, and you had better tackle something else.

♣

J STEVENS ARMS & TOOL CO., Chicopee Falls, Mass., have sent us one of their recently issued folders exploiting their "Little Krag" rifle Number 65 and their "Ideal" Number 044½, English model, also their double-barrel hammerless shotgun, on all of which they have made some notable improvements. Their line is rifles, pistols and shotguns. They suggest on this folder that you send four cents in stamps, to cover postage for their new 136-page illustrated book, which describes their entire output, all new models, accessories, hints on shooting, proper care of firearms, etc., etc., They are offering a "Rifle Puzzle," which, they state, is "lots of fun, and easy when you know how," which will be forwarded free. Write for particulars.

JOBBERS' AND DEALERS' ABUSE OF CASH DISCOUNTS.

Many retail dealers insist on taking the 2% cash discount at the expiration of 30 and sometimes 60 days, and if the jobbers do not pass this pleasantly, it results in uncomfortable correspondence, in which the dealer threatens to turn his business to some other jobber, and competition among the jobbers is so severe that they often allow the dealer to impose on them and pass the discounts without protest.

On the other hand, a few of the jobbers do the same with the manufacturer, and when the manufacturer returns their check it results in unpleasant correspondence, which is often caustic and sometimes abusive, and the smaller the jobber the more important he tries to make himself appear and the more positive stand he takes in regard to not having received the goods or the invoice was mislaid, etc.

When a jobber buys goods he should understand the terms on which they are bought, and if the terms are 2% 10 days from the date of the invoice let him remit within the 10 days, else not deduct the cash discount, for if he does he places himself, even if the manufacturer does not protest, in an undesirable position as far as pay is concerned, before the manufacturer. He should bear in mind that if he wants to discount his bills at the end of 60 or 90 days or six months, he should so arrange at the time he placed his order, and if a manufacturer is weak enough to allow him to order goods in roundabout ways and allow the discount when goods are received, it is then up to the manufacturer, but unless some distinct understanding is had at the time the order is placed, then the jobbers should pay within the time specified, else not deduct the cash discount, and when the manufacturer returns his check should accept the same pleasantly without a protest. Even when the manufacturer allows, after several letters have passed, the cash discount, it does not place the jobber in as good standing with the manufacturer as before the concession was made, and if the jobbers would bear this in mind they would not as often stand out for this cash discount, when they are not entitled to it. If they, by neglect, oversight or lack of funds, go beyond the specified terms, it is their fault, pure and simple, and they should not expect the manufacturer to suffer loss caused thereby.

C. F. M.

SOUTHERN JOBBERS' HARDWARE ASSOCIATION.

By the two communications which follow, is announced the selection of Virginia Hot Springs for the next convention of the Southern Jobbers' Association and the American Hardware Association, which will take place next Summer.

The committee made a wise decision to select a location that will be received by the whole country with marks of commendation. At the Hot Springs they can make themselves thoroughly at home, and make their manufacturing friends welcome with everything in demonstration of entire satisfaction. The annual meeting this year, which was held at Atlanta, was regarded as being one of the most successful they had ever had; the attendance of the members was unusually good, and the same methods will be pursued this year which may rival it in interest.

ATLANTA, Ga., October 24, 1904.

To the Members of the Southern Hardware Jobbers' Association:

GENTLEMEN—It gives me pleasure to enclose herewith report from the Special Committee appointed at the Atlanta convention in May to select dates and place for our next meeting—which will be the fifteenth annual convention. The committee has selected Virginia Hot Springs for the convention seat, the dates being June 6, 7, 8 and 9, 1905.

From the reports I hear of Virginia Hot Springs, I feel quite sure that our convention next year at this resort will prove not only a very large one, but also a very beneficial one. This will be the first time our association has met at this point, and this of itself should prove all the more attractive to our members and our numerous friends who gather with us during our conventions. We present the report to you this early in order that you may have ample notice so that you may make no arrangement which will conflict with a representative of your house at the convention next year. We are therefore going to depend upon your presence at Virginia Hot Springs next year and hope that you will bring your ladies along. If half of what is said of Virginia Hot Springs is true, you can rest assured of a very pleasand stay, and the presence of the ladies will add greatly to our enjoyment.

Arrangements for the convention will be perfected as rapidly as possible, details of which will be announced from time to time.

Trusting that the report of the committee may meet with your hearty approval, I beg to remain,

Yours very truly,
Southern Hardware Jobbers' Association.
By W. M. CRUMLEY, President.

Digitized by Google

Philadelphia, October 10, 1904.

W. M. CRUMLEY, President, Atlanta, Ga.

Dear Sir—Your committee appointed at the Atlanta convention of the Southern Hardware Jobbers' Association to select dates and place for the fifteenth annual convention of the Southern Hardware Jobbers' Association—in connection with the semi-annual convention of the American Hardware Manufacturers' Association—beg to report as follows:

At several conferences during the Atlanta convention a number of places were suggested for your committee's consideration, but it did not seem that the best interests of both associations would be conserved by deciding upon any of the points proposed, and it was the unanimous opinion of the committee that further time should be taken to consider this question. Therefore nothing definite was done at that time in the way of selecting a convention seat.

Since the Atlanta meeting your committee has been in correspondence with parties in Savannah, Lookout Mountain, Asheville, Old Point Comfort, Wrightsville, N. C., Virginia Hot Springs and Atlantic City. The proposition submitted by Virginia Hot Springs presented greater advantages, at least indications pointed to that place being perhaps the best place that could be selected, and a sub-committee, consisting of C. W. Asbury, F. D. Mitchell and C. B. Carter, were appointed to visit Hot Springs and more fully investigate the advantages of that point for our convention. The sub-committee reported that the New Homestead Hotel at Hot Springs was the only hotel of all the places mentioned, with one exception, that was large enough to accommodate the entire attendance at our joint conventions. Not only was it larger, but it was without question the most beautiful, well furnished and convenient hotel in perhaps the entire South. The cuisine and service were beyond comparison. There are ample convention halls conveniently located which will take care of both associations either in joint or separate sessions. Hot Springs is located in a very beautiful section of the country—even exceeding the picturesque beauty of Asheville, N. C. In fact, the territory in which the hotel is located is as beautiful and well taken care of as Biltmore, which you must know from experience is a beautiful spot. The drives from Hot Springs to various points of interest are both extensive and well kept. Commodious golf links, well arranged lawn tennis courts and other amusement features are provided, and in addition the bath house conveniences and accommodations—as well as the water itself—are equal if not superior to all other resorts —not excepting Hot Springs, Ark. The streams near the hotel abound with fish and the disciples of Isaac Walton may look forward, with pleasant anticipation to most excellent fishing. Virginia Hot Springs is located on a branch of the C. and O. Road and is very accessible from northern, eastern and western points. At the present time the service is not satisfactory from southern points. However, your sub-committee conferred with both the C. and O. and the Southern Railway people in Washington and assurance was given that the railroads would take care of the crowd in an entirely satisfactory manner.

Your committee has very thoroughly and very carefully considered the advantages as to convention purposes of the various points suggested, has compared the inducements of each point with the other and has endeavored to make a selection that would prove not only acceptable but pleasing to all. We therefore most respectfully—but very cordially—report the selection of Virginia Hot Springs for our fifteenth annual convention, which will be held on June 6, 7, 8 and 9, 1905, headquarters at the New Homestead Hotel. Respectfully submitted,

Fayette R. Plumb, C. W. Asbury, Henry B. Lupton, F. A. Heitmann, John Donnan and F .B. Dunlop, Committee.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington. D. C., and St. Paul Building, New York City.

PATENTS EXPIRED OCTOBER 25, 1904.

371,945. SHAVING APPARATUS. R. M. Keating, Springfield, Mass.
371,947. SASH CORD GUIDE. W. T. Kellogg, Lansingburg. N. Y
371,976. EGG BEATER. D. H. Rice, Brookline, Boston.
371,977. STRING HOLDER. Wm. L. Rice, Columbus, Ohio.
371,996. GRADUATED INSPECTION SASH SECTION FOR MEASURING CANS. C. Trubel, Macomb, Ill.
371,999. DOOR CHECK. C. A. Williams, Pittsburgh, Pa.
372,043. CULINARY OR EGG BEATER. C. S. Pusey, Philadelphia, Pa.
372,084. WEATHER STRIP FOR DOORS. J. K. Patterson, Crete, Nebr.
372,115. INCUBATOR. J. L. Campbell, West Elizabeth, Pa.
372,133. LADDER. J. G. Eddy, Fayette, Ohio.
372,217. CLOTHES DRIER. Edward Goss, St. Johnsbury, Vt.

PATENTS ISSUED OCTOBER 25, 1904.

772,912. SCREW HOLDING ATTACHMENT FOR SCREW DRIVERS. H. V. Allen, Denver, Colo.
772,920. WINDOW SASH FASTENER. J. Brewer, Hazleton, and D. Heavener, Nescopeck, Pa.
773,131. SICKLE HOLDER. C. H. Eichmeier and H. Aurand, Pearl City, Ill.
773,176. DEVICE FOR FITTING DOORS. M. W. Washington, Dunkirk, N. Y.
773,229. MONKEY WRENCH. L. H. Schepman, Richmond, Ind.
773,311. LOCKING DEVICE FOR AWNINGS. O. H. Cloyd, Kansas City. Mo.
773,352 TRANSOM LIFTER. H. L. Trimyer, Portsmouth, Va.
773,454. GRASS HOOK AND LAWN TRIMMER. H. B. Barden, Wallingford, Vt.

PATENTS EXPIRED NOV. 1, 1904.

372,321. POCKET KNIFE. G. W. Miller, Meriden, Conn.
372,326 DOOR CHECK. J. R. Palmenberg, New York, N. Y.
372,337. PORTABLE SANITARY DINNER BUCKET. A. Simon, Cincinnati, Ohio.
372,349. SASH FASTENER. E. J. Whitman, Oakland, Cal.
372,424. STEP LADDER. M. C. McCollum, William B. Milnes and A. Hartman, Espy, Pa.
372,533. TUBULAR LANTERN. E. C. Glazier, Rochester, N. Y.
372,553. LANTERN HOLDER AND REFLECTOR. F. Meyrose, F. H. Meyrose and E. Scharfer, St. Louis, Mo
372,565. KNIFE L. Quosbarth, New York, N. Y.
372,639. WICK RAISER. F. Rhind, Meriden, Conn.

PATENTS ISSUED NOV. 1, 1904.

773,579. DOOR FASTENER. L. A. De Mayo, New York, N. Y.
773,581. CARPET SWEEPER. E. C. Murdick, Marion, Ind.
773,582. LADDER OR SIMILAR STRUCTURE. M. Murphy, Auburn, N. Y.
773,689. WEATHER STRIP. W. H. Taylor, Denver, Colo.
773,690. COFFEE POT. E. B Travis and C. I. Palmblad, Paxton, Ill.
773,717. HINGE. D. P. Craver and T. H. Gillette, Belvidere, Ill.
773,757. DOOR HANGER. G. Lane, Poughkeepsie, N. Y.
774,063. SAFETY RAZOR. E. B. Gibford, Adrian, Mich.

KAPOK.

A subscriber having sent us an enquiry with reference to kapok, an article of a very light nature now being largely used for stuffing of mattresses and pillows, and which would seem useful for horse-collar stuffing, we have pleasure in inserting the following article, which appeared in a recent issue of *Chambers' Journal*:

"Every year that busy centre of commerce, Amsterdam, receives nearly 1,000 pounds' weight of a curious and interesting vegetable substance known in Java and in the trade as kapok, which is found very useful for stuffing cheap mattresses and pillows, among other purposes. It is a sort of yellow wadding which nature uses as a covering for the seeds of certain trees in the Malaccas. Its fibres being very non-resisting, it has been found impossible to spin or weave it, but it gives excellent results for bedding, making a mattress delightfully soft if it is exposed to the sun before being used. It is exceedingly light and buoyant, and in this respect greatly surpassing cork, as it will support in the water thirty-five times its own weight. The tree whence it is derived (Eriodendron) grows rapidly, and in the second year is twelve to fifteen feet high, but it does not fruit abundantly until the fourth year. Like cotton, it bestows two gifts on man, the special wadding mentioned, which lines the husk, and the oil extracted from the seeds, which is used especially in the Chinese markets. The threads of the soft fibre taken from the pods are light yellow, rather silky, and only about an inch in length. They are made into thin rings. Kapok, it is said, never decays. Among the ever-increasing uses to which this curious vegetable product is put—causing the culture of the Eriodendron to make great strides in the Dutch Indies, while efforts are being made to cultivate it in similar climates—it has been suggested that excellent life-saving apparatus might be made from it, which should be in the form of mattresses and cushions, easily obtainable in moments of danger. Three hundred grams of kapok (10½ ounces) will support a man of ten stone five pounds (145 pounds) in the water; and experiments by a French society with articles made of this wadding, which had been soaked in water for eighteen hours, gave excellent results. One small mattress supported several men. It is probable that soon all ships' beds will be made of kapok.—*Canadian Harness and Carriage Journal.*

RECENT TRADE PUBLICATIONS.

SARGENT & Co., New Haven, Conn., and 147-151 Leonard Street, New York, have issued another of their attractive pamphlets exploiting their popular "Gem" food chopper. These are made in four sizes—Number 16, the Little Gem, furnished with steel cutters Nos. 1, 2 and 4, also nut butter cutter No. 5; Number 20 or family size, furnished as Number 16 with the addition of No. 3 cutter; Number 22 or medium size, furnished as No. 20, and can be used with the sausage stuffer attachment; Number 24 or large size, furnished with cutters 0, 1, 2, 3 and 4, and can also be used with sausage stuffer attachment. These choppers chop, they don't mash, squeeze or grind. This is the Gem's strong point. To help dealers in the sale of the Gem chopper, Sargent & Co. print attractive books, cloth bound, containing more than two hundred receipts, of which they will furnish a sufficient quantity so that you can give one with each chopper you sell. They will also supply you with a quantity of assorted slips bearing your Imprint suitable for enclosing with your daily mail. With each case of choppers they pack one of their attractive show cards, and will send you more if you can make good use of them. They also have prepared a numbers of ads, for use in your local papers; these are shown in the above mentioned book. They will furnish electrotypes of those you can use, without charge. Send for one of these booklets, which are designated "Descriptive-Suggestive" for dealers only.

F. E. MYERS & BROTHER, Ashland, Ohio, have sent us a copy of their catalogue No. 40, which contains illustrations and complete descriptions of their factory product. Back of this exhibit stands a factory fully equipped with modern machinery, driven by electrical power. In this, their latest catalogue, they give harmonized lists for substantially one discount, so that you can sell understandingly what they illustrate, describe and list, or any of their implements you may not carry in stock. With the exception of a few pages describing tools, hose, etc., they manufacture the entire product as given in their catalogue, and they are also interested in the manufacture of iron, pipe, lumber, etc., to the extent of being headquarters in the manufacture of implements for the securing of water, unloading of hay and grain, and easy doorways. They are the makers of the famous "Myers" double acting force and lift, hand, windmill and power pumps; hydraulic, barrel and bucket spray pumps, atomizers, cylinders, pipe, hose, fixtures, hay tools, etc They state they will be pleased to supply catalogues, special prints, electros, etc., as you may be able to use them advantageously.

THE FORQUIGNON MANUFACTURING CO., 13 East Sixteenth Street, New York City, manufacturers of manicure and pedicure supplies, issue a pamphlet catalogue of 32 pages, containing illustrations of their entire line Their aim is high quality, practical designs and low prices, and they state their products are the best that high grade material, expert mechanics and up-to-date machinery can turn out. With their catalogues they include a six-page folder, illustrating articles such as folding corn knives, tweezers, nail scissors, buffers, polishing paste, powder, etc., also manicuring outfits in several different styles, to all of which tney call especial attention. One of their handsomest manicure sets is a nine-piece set, velvet lined, flexible, morocco covered, size 6½x4. It contains buffer, polpasta, F. B. nail powder, emery boards, nail blower, cuticle knife, manicure file, cuticle scissors and nail scissors. This is furnised in bone, ebony and pearl, making a fine Holiday line. Copy of catalogue and folder will be sent upon request.

THE MORSE TWIST DRILL & MACHINE CO., New Bedford, Mass., are the authors of a high-grade catalogue containing 247 pages, which is intended for trade distribution. Included in the contents are increase and constant angle twist drills, reamers chucks, milling cutters, taps, dies, machinery and machinists' tools. This is the largest and most complete catalogue ever issued by them and will be found an excellent book of reference to the various lines they manufacture. They call especial attention to their Twentieth Century drill, of which both the body and shank are ground on centers after hardening, insuring its running true and accurate to size. The large amount of radical clearance lessens to a great degree the friction of the drill in the hole. Other features illustrated in the catalogue will also be found advantageous. Among the new tools illustrated are shell drills, indexed cases for sets of drills, counterbores with interchangeable blades and guides, adjustable calipers, gauges, standard reference disks, cotter mills, gear cutters, gear testing machine, and bench center and straightening press. Copy of above catalogue will be sent upon application.

WILLIAM T. WOOD & Co., Arlington, Mass., have just forwarded us one of their 1904-1905 catalogues, in which they exploit their ice machinery and ice tools. Regarding their ice tools, they state that "Quality" is their motto, and the price at which they can sell is secondary. They give as their reason for this that icemen need the best that can be made; none others are economical. The cutting season is short, the weather is cold, the men are hurried, and an unnecessary delay on account of imperfect tools is expensive. Numbers of cases can be cited, they state, where users of cheap tools, bought because they were low in price, have lost many times the cost of good ones by delays, breakages and poor service. They state that their prices are as low as first-class articles can be made. The construction of their elevators, conveyors, lowering machines, etc., is calculated to be absolutely safe in the proportion of parts, quality of materials used, and in character of workmanship. Their friction clutch is exceedingly simple, having but three main parts, very strong and particularly adapted for extremely cold weather. Sprocket wheels for heavy work have inserted teeth. For lighter machinery the sprocket wheels are solid and reversible, with chilled teeth. Apron wheels have extra wide tread, and all flanged wheels have flanges of extra depth. Their chain is of stronger pattern than the regular type, punched and trimmed in special dies, and made from special grade of Cambria steel. The pockets and flights are made of best malleable iron. Send for a copy of the above catalogue if you are interested in this class of goods.

. SILVER & Co., Inc., 304-314 Hewes Street, and 432 Broadway, Brooklyn, N. Y, also 18 Warren Street, New York City, are distributing to the trade a handsome new catalogue for the season 1904-1905 exploiting the oil heaters of their manufacture. They state on the first page in their book "If you want an oil heater that will always give satisfaction, buy the 'Brooklyn' Kind. They are made under the names 'Brooklyn,' 'Universal,' 'National,' 'Ever Ready' and 'Imperial,' and are all carefully examined and tested and guaranteed to give perfect satisfaction at all times." Every drum made for their stoves, they state, is of the best obtainable polished steel, carefully treated and handsomely finished. A stove grate is underneath each cover to allow for heating water or for light cooking purposes. Their oil tanks have full capacity and are made as carefully as the finest parlor lamp; will burn ten hours without refilling; carry 9-inch wick, and the latest safety smokeless device. The "Imperial," "Ever Ready," "Brooklyn No. 21" and "Brooklyn No. 35" are made entirely of heavy brass and either finely burnished or nickel plated, as the desire of the buyer may be. The tanks of the Universal and National are made of aluminum steel plate of full capacity, and like all their products, are fully warranted. For further information, send for catalogue.

THE CARLTON MANUFACTURING CO., Rochester, N. Y., have recently placed in the hands of their trade a pamphlet catalogue and price list which is descriptive of the Carlton Fishing Reels, which possess, they claim, an exclusiveness and individuality entirely their own. The material used in their construction is sheet and rod brass, German silver, aluminum, steel and hard rubber. These are all made expressly for them, which, they state, makes it a little more expensive, but helps to make up the Carlton quality. Every part of their steel is interchangeable with a corresponding part of a similar reel. Should any part become lost it would only be necessary to specify which part was desired and an exact facsimile would be sent, which would fit perfectly. In hand-made reels, the entire reel would have to be sent, and as the lost part would have to be made by hand, it would materially increase the cost. Their line consists of all kinds of reels of practicability, from the small, light trout reel to the automatic and salt water reels. No one point, they state, has been sacrificed for another, but every good feature, such as quality, utility, durability and beauty, retained. Send for one of their catalogues, and learn more of these excellent goods

NEW GOODS AND SPECIALTIES.

WHEELER COOLER WITH AERATING COVER.

The Wheeler Gravity Cream Separator Co., Syracuse, N. Y., have greatly improved their Wheeler Cooler, by the addition of a New Aerating Cover and Cooling Attachment combined, of which we present an illustration. Ordinarily the Gravity Separator is operated by diluting the warm milk with an equal quantity of cold water, which makes a rapid separation, three or four hours being all the time necessary to perform it; but with the Cooler Separator the operation is different, the separation is performed by placing the milk in an inner can and cold water in an

WHEELER COOLER WITH AERATING COVER.

outer can, thus surrounding it. The time needed for the separation by this process is much longer than by the dilution, and as only the time between the two milkings can be allowed for the work to be done, has caused the manufacturers to place with this Cooler their Aerating Device. With this they thoroughly remove the animal heat from the milk and aerate it before it is placed in the can and it is done in a few moments' time. This is done by running the milk through the cover in a quantity of fine streams, depositing it on the top of a drum, over which it flows in a thin sheet, thence through the small channels attached to the sides of the drum, which channels being perforated, again divides it into fine streams and for the second time comes into contact with the air. This drum has a four-inch opening on the end, and is filled with cold water or ice, thus making this surface very cold, over which the milk passes. Then it goes into the can and is surrounded by the cold water and remains until the next milking; then the cream has risen and is ready to be drawn off.

A NEW IDEAL BULLET.

The Ideal Mfg. Co., of New Haven, Conn., has just brought out a new bullet for the .38 S. & W. Military and Colt's .38-cal., of which we give an illustration, Fig. 1. It has a cavity in the

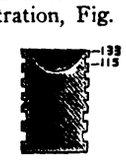

FIG. 1.

front end. The Ideal bullet has a flat base and is made sufficiently large in diameter (.360 inch) to insure a perfect gas tight fit in the barrel without any upsetage. The bullet is grooved the whole length and the base portion that fits in the shell is .360 inch and is seated very snugly in the shell up to the small beveled groove. Fig. 2, where the shell may be crimped if desired, but no crimp is said to be best. The forward portion that

FIG. 2.

projects beyond the muzzle of the shell is .358 inch in diameter, which is the same size as the smaller portion, "a," of the chamber of the cylinder, as shown in illustration, Fig. 3. This illustration

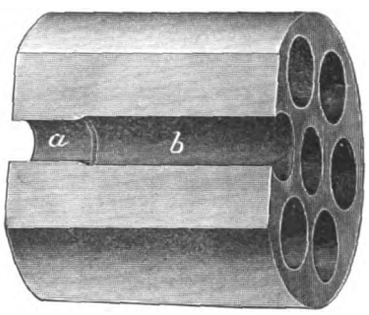

FIG. 3.

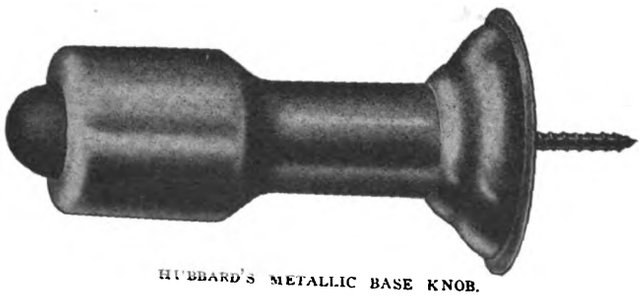
shows cylinder with a portion cut away so as to show the inside formation of the chamber in which the loaded cartridge fits. It is claimed that with the bullet fitting snugly in the shell and the shell left straight at the muzzle, not crimped, the bullet will not be mutilated, scraped or deflected by the inturned edge of the shell when passing out. The bullet and shell then in the best condition, are placed in the chamber, the shell fitting in the portion "*b*" and the forward portion of the bullet (.358 inch) is pressed in the chamber "*a*," shell and bullet must then certainly be in perfect alignment, which tends to secure accuracy. This ammunition has been thoroughly tested with machine test. These bullets cut a clean, full-sized hole in the target, thus obviating disputes in count as to whether the ring on the target is cut or not. It is a very deadly missile, for it also cuts a large hole in an animal and permits a free flow of blood. Moulds and reloading tools are now ready for the market. For further information, apply to the manufacturers.

HUBBARD'S METALLIC DOOR CHECK AND BASE KNOB.

The Ashtabula Mfg. Co., Ashtabula, Ohio, are placing upon the market something new in the Improved Door Check and Base Knob shown in the following illustrations. They are made of

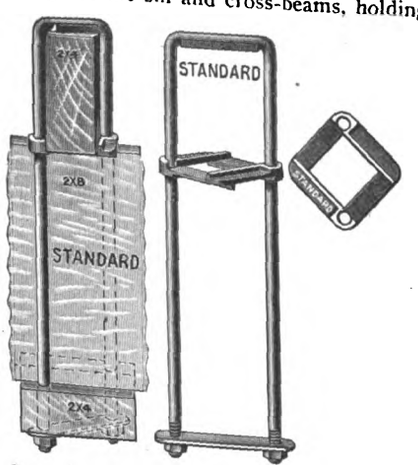


HUBBARD'S METALLIC DOOR CHECK.

Nicobar steel, electro plated, which permits of their being used on wood, marble or tile base or floors. They can also be furnished in real bronze metal or brass. The principal improvement is in furnishing the base knobs with screws 3½ inches long, which extend the entire length of the knob in the wood. Attention is called to the fact that there is no strain on the knob after it is

Digitized by Google

on, as the bump is entirely on the screw lengthwise. Fig. 1 may be used for doors that open only part way or against furniture, and can be handsomely finished to match the other Hardware

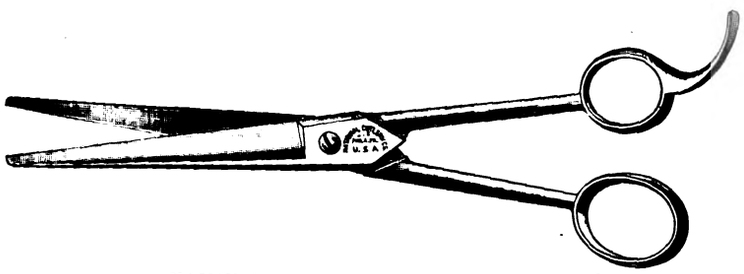


HUBBARD'S METALLIC BASE KNOB.

used in the room. Fig. 2 shows the base knob ready to attach to base board, presenting a very attractive appearance. Packed in boxes containing one-quarter gross, and cases of ten gross each.

MYERS' STANDARD HAY RACK FIXTURES.

F. E. Myers & Brother, Ashland, Ohio, are introducing to the Hardware and Implement trade their standard Hay Rack Fixtures, of which we show illustrations. The main frame is made of 7-16 round steel, held in position at the center by a Malleable Iron Saddle with heavy flanged edges. These flanges engage the upper and lower edge of the sill and cross-beams, holding them se-

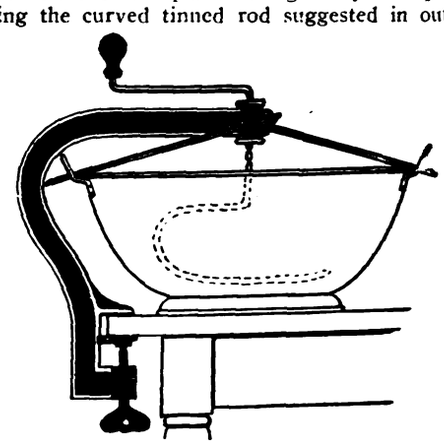


MYERS' STANDARD HAY RACK FIXTURES.

curely in position and preventing their warping, or sliding in any direction. The Malleable Iron Saddle is a special patented device that holds the timbers in position without the objectionable feature of having a rough metal plate placed between the timbers, which not only causes chafing, but in many cases throws the timbers out of line. They are fitted with a flat steel surface that comes in contact with the top edge of the cross-beam, and with a substantial steel plate on the under side of the lower cross piece, which not only acts as a washer, but prevents this cross piece from being split when subjected to a strain. By using these Clamps the parts of the rack are securely held in position without bolts or nails, and a much better rack is insured.

NATIONAL SOLID STEEL BARBER SHEARS No. 69.

The National Cutlery Co., Philadelphia, Pa., are the sole manufacturers of this French pattern of Barber Shears, which are of solid steel, full nickel plated handles and polished blades. It is



NATIONAL SOLID STEEL BARBER SHEARS NO. 69.

claimed that none of the pattern were ever previously made in this country, as they have always been imported from Germany or France. Special steel is used and very careful work is put on them, which makes them, it is claimed, the best Barber Shears offered to the trade. They are tempered by a patented method which gives uniform results, and are fully warranted. They are made in three sizes, 7, 7½ and 8 inches, which gives a cut respectively of 3¼, 3½ and 3¾ inches, packed one-half dozen in a box.

IMPROVED EASY DOUGH MIXER.

The R. W. Jamieson Co., 50 Warren Street, New York, has greatly improved his Easy Dough Mixer, an illustration of which we give herewith. As it is now made it has two straight movable rods of galvanized wire, No. 5 gauge, 11 inches in length, controlled from the center by a thumb nut. The rods keep the pan rigid when passed through handles of bread pan and secured, while the contents of the pan is being easily and quickly mixed by revolving the curved tinned rod suggested in outline in the

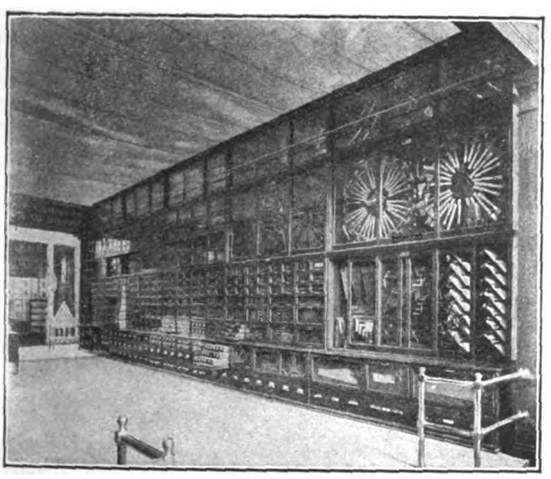
IMPROVED EASY DOUGH MIXER.

cut. The clamping device has been changed so as not to mar the surface of kitchen table. The lower thumb nut is provided with a plate having a ridge at the top, which works up and down in the supporting arm, the ridge on the under portion of the upper clamp being omitted so as to prevent injury to the top of table. By the aid of this mixer, dough or similar mass may be mixed thoroughly and quickly for bread, cake, rolls, etc., with greater uniformity than can be done with the hands and in a way that is sanitary and clean. The capacity of the mixer is from two to eight loaves of bread at a time.

CARPENTERS' SHOULDER TOOL CHEST.

C. E. Jennings & Co., 42 Murray Street, New York, are placing upon the market the Carpenters' Tool Chest No. 30, illustrated herewith, which is a new and popular addition to their special line of empty Tool Chests. It is made of selected hard wood

CARPENTERS' SHOULDER TOOL CHEST.



with dovetailed corners, having two drawers in the bottom, with inside dimensions of 15¾ inches long, 8½ inches wide and 1⅝ inches deep. Each drawer is provided with a flush pull. The receptacle above the drawers is 33 inches long, 9½ inches wide and 5¾ inches deep, and will take in a 28-inch Rip Saw. Each chest has place in lid for Saws. It is provided with a strong spring lock, has two brass clasps to hold lid, heavy lifting handles and a locking device that fastens drawers by closing lid. It is a finely finished, high-grade chest, and one that is claimed to be the best shoulder chest ever put on the market.

WARREN'S MODEL HARDWARE STORE.

The three illustrations which appear in these columns show different views of the Model Hardware Store, which formed one of the most instructive exhibits for Hardwaremen at the Louisiana Purchase Exhibition. The store formed the exhibit of J. D. Warren Mfg. Co., Masonic Temple, Chicago, who intends disposing of it, and it will be sold to the one making the most advantageous offer at the close of the Fair. This store made a great hit at the Fair, where it was viewed by over 300,000 people, and would prove a well advertised and attractive exhibit to whoever would purchase it. It consists of 84 feet of the finest shelving, 42 feet on a side consisting of unit cabinets, which could be placed conveniently in any location. The dealer who obtains it will have the finest Hardware store, and one of the best advertised, in the World. This firm devote themselves entirely to the manufacture of the most convenient shelving and other fixtures that make selling Hardware one of the most interesting of occupations. Every requirement for the proper fitting of a Hardware store they can supply, upon demand. They would be glad to open correspondence with dealers, when they could send the latest illustrations and descriptive matter.

NEW COMPANY TO MANUFACTURE AN IMPORTANT LOUISVILLE INVENTION.

The Myers Adjustable Horse Shoe Company, recently organized and incorporated in Louisville, Ky., placed the first lot of its product on the market recently. As the name indicates, the company is manufacturing an adjustable horse shoe, and it is claimed by the inventor. Mr. J. M. Myers, of the Myers & Sons Saddlery Company, that the shoe will not only e a boon to the horse, on account of ease and comfort, but its use will prove a great saving to the horse owner.

The shoe proper is made of drop forged steel, and is nailed to the hoof, the same as the old-style shoe. The improvement, however, is in the calks, these being removable or renewable when worn out, or when it is desired to rest the horse's foot. Old toe calks can be taken off and new ones put on in less than a minute by anyone. Using this shoe, the old way of rough-shoeing the horse when streets are slippery is done away with entirely. In a moment almost the plain calk can be removed and an ice calk inserted in the shoe, thus saving much time and worry and danger to the horse. The calks are held rigidly in place by a small steel spring, that cannot slip or get out of position. The old-style horse shoe, costing $1.20 a set, wears out in from two to three weeks. The adjustable shoe will last from eight to ten weeks, and new calks can be purchased at forty cents a set of four. All calks are interchangeable.

The company also manufactures a double shoe for use of fine horses. This is made in two pieces, the plate and the frame. The plate is nailed on the hoof and the frame is attached by slipping the heel of the plate in slots on the frame. The great advantage in this shoe lies in the fact that the driver can attach rubber footpads or smooth calks, or ice calks, as required, in a moment. The calks and frames may be removed easily and quickly when the horse is stabled, leaving the animal with the same frog pressure on the foot as nature intended. Wearing only the plate when not at work, the horse's foot is rested, and kept in good, healthy condition. Corns and split-hoof will be avoided entirely.

Mr. Myers, the inventor, has secured patents in the United States, Canada, England and Germany, and has applied for patents in ten other foreign countries.

The company was organized four or five months ago by Attorney W. W. Watts, with a capital of $150,000. Col. Morris B. Belknap is president; John M. Myers, vice-president; S. B. Hart, secretary and treasurer. The directors are Morris B. Belknap, John M. Myers, Samuel B. Hart, W. W. Watts, S. Zorn and Dr. A. M. Cartledge.

For the present the company will have its shoes made on contract, an order for 300,000 having been placed with Pittsburgh and Cleveland factories. In the near future a manufacturing plant will be erected, probably in Louisville.

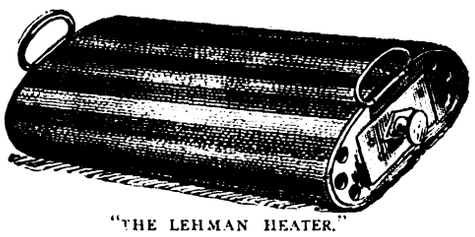
SOME USES OF ASBESTOS.

Asbestos is a mineral that crystallizes in long fibres. The fibres can be separated as easily as those of our softer woods, and are woven into a variety of articles, which are worn for protection against fire.

Among these articles are mittens to guard the hands of firemen, assayers, refiners and others who are exposed to burning. As the material is not affected by heat, the workman thus protected can grasp hot irons, crucibles and the like without discomfort.

Masks for the face are also made of asbestos. It is said that the heat from the hottest fire cannot penetrate through them to the skin. Air for breathing is supplied through a tube from beneath the mask, so that the flame or the burned atmosphere is not inhaled. In this way the discomfort of working directly in front of retorts and furnaces is greatly relieved.

Complete suits of fireproof asbestos cloth are now made for firemen's wear. As the material is indestructible, and a bad conductor of heat as well, the wearer is protected in the midst of flames. Of course, air for breathing must be supplied through tubes in some such way as it is supplied to the diver when he is under water.



For domestic use sad-iron holders are now made of asbestos. With them the grasp of the iron, however hot it may be, never causes pain or burning. There are also made large holders, intended for use by smelters, molders and workers in metal generally.

It remains to be added that asbestos is widely distributed among the older rocks of the United States and Canada. As goods made of it are subject to loss only by wear, the supply of fibre is likely to be equal to all demand for articles of dress.

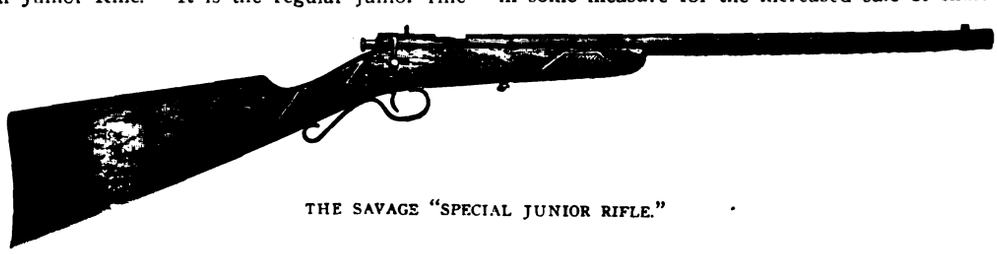
"THE LEHMAN HEATER."

The manufacturers of the "Lehman Heater" claim to be the original and at the same time the largest manufacturers of Carriage aud Automobile Heaters in the world. They state that over 250,000 of their heaters are in actual use and that the heaters have stood a test of hard usage for over eighteen years and have fulfilled every requirement. An illustration is given herewith of their 14-inch heater ready for use. It is compact, handsome in appearance, and solidly put together in a workmanlike

"THE LEHMAN HEATER."



manner. All of these heaters have asbestos linings under the carpet and every part subjected to dampness is made of galvanized iron to prevent rust. It is stated that this heater will give continuous heat for fifteen hours from one brick of "Lehman" coal, and that it does this without producing flame, smoke, odor or gas, and that consequently there is absolutely no danger from fire. These goods are made in several styles and are described in detail in the handsome booklet, sent out for the asking, by the manufacturers, Lehman Brothers, 10 Bond Street, New York City. We also illustrate herewith their exhibit at the Louisiana Purchase Exposition, situated near the center of the Transportation Building.

WORLD'S FAIR EXHIBIT OF THE LEHMAN HEATER.

THE SAVAGE "SPECIAL JUNIOR RIFLE."

We present an illustration of what the Savage Arms Co. term their "Special Junior Rifle." It is the regular junior rifle

THE SAVAGE "SPECIAL JUNIOR RIFLE."

equipped with a semi-fancy American walnut stock, nicely checked by hand and fitted with an Ivory Bead front sight. It is a very handsome gun, indeed, and should be a splendid seller for the holiday trade. The retail price is $6.00.

SLEIGH BELLS.

The sleigh bells used in this country are made here, most of them in Connecticut, says the Carriage Dealers' Journal, and many sleigh bells of American manufacture are exported to Germany and to Russia. Sleigh bells are as commonly used as ever whenever there is snow enough to make good sleighing; they may not be heard so much as formerly in large cities, where the snow is cleared away from many streets and wheels cut up what is left, but elsewhere the sleigh bells jingle in winter just as merrily as ever.

There have been some changes in sleigh-bell customs. Shaft bells and bells fixed on the saddle of the harness have to some extent taken the place of the old-time string of bells on straps, but the strings of bells are still the more commonly used. Probably a third of the bell outfits sold nowadays are of the kind that fasten to shafts or the saddle of the harness, and two-thirds are the strings of bells. The bells exported are about in the same proportions. The bells attached to shafts and harness are open-mouthed and provided with tongues. Some shaft bells are made with all three in a set alike, oftener they are made in three sizes, forming a chime. The three bells carried over the saddle of the harness are set in an ornamental frame, which is supported by the saddle.

The sleigh bells of the old familiar kind, round, with balls inside, are attached to straps as they have always been, to body straps encircling the horse's body, and to neck straps.

Sleigh bells are made of bell metal, and they were never made with such care with a view to their sound-producing qualities, nor were they ever so musical as now. The commoner kind of sleigh bells are produced at a very small cost and whole strings of bells are sold at prices that seem marvellously low. Shaft bells of the commoner kinds are cheaper yet, and that accounts in some measure for the increased sale of shaft bells.

REASSURING.

DAUGHTER—Are all men bad, papa?

FATHER—N-no, my child; you will always be safe with your grandpa and me.—*Town Topics.*

Digitized by Google

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Voter—Correction of Primary Enrollment.

QUESTION: I am a citizen of New York and have lived here for twenty years and always voted the Democratic ticket. In enrolling my name for the primaries, I wrote myself down by mistake as a Republican. What can I do to correct this?

REPLY: We know of no remedy. Where there has been neglect or action by officer or members of a public board prejudicial to the right of any person to participate in a primary or to enroll with any party, the courts have power to investigate the matter and grant such relief as justice may require; but we know of no method by which a voter under such circumstances can get relief from the consequences of his own neglect and thus be transferred from one party to another.

Mortgage Foreclosure—Motive Immaterial.

QUESTION: Many years ago I executed a mortgage on my home and shop. I always paid the interest until within the past year when I have been unable to do so. The person who held the mortgage was willing to give me time to pay the interest. But I have an enemy who is anxious to cause trouble for me and he has bought the mortgage and now threatens to foreclose it, unless I pay the interest. I know that his only object in so doing is to injure me and become the owner of my property for less than its value. Is there any way I can prevent this?

REPLY: Assuming that the mortgage is itself a valid security and has been legally transferred or assigned, we do not see how you can prevent its foreclosure, except by payment. The law does not regard the motives of a complainant. It is sufficient that the mortgage debt is due and has been legally assigned. Its present owner may have bought it from motives of malice towards you and solely with a view to sue upon it, and the former owner may have transferred it from a like motive and without consideration, but this would not constitute any defence to an action for its foreclosure. The law concerns itself with legal rights and not with the motives of persons seeking to enforce them.

Restaurant Keeper—Right to Use Oleomargarine.

QUESTION: Has a restaurant keeper the right to serve to his customers oleomargarine or butterine colored to imitate butter?

REPLY: Most of the States have passed laws forbidding the use of oleomargarine or other similar products made from animal fats or vegetable oils, when those products are so colored as to deceive the public into the belief that they are the product of the dairy. The agricultural law of New York, which is typical of this kind of legislation, makes it penal for the proprietor of a hotel, boarding house, lunch counter or place of public entertainment to serve as food for his guests, patrons or customers, or for cooking purposes, oleomargarine or any similar compound so colored as to resemble dairy butter. The sale of such products as butter is also generally forbidden. Where these statutes are in force your question must be answered in the negative.

Divorce Obtained in Another State—When Invalid?

QUESTION: I was married in 1892 in the State of Connecticut. Afterwards my wife and I lived in New York. In 1808 she went to South Dakota and after living there for six months obtained a divorce and returned to New York. I did not go to South Dakota or defend the divorce suit. Is the divorce good?

REPLY: The validity of a divorce obtained by one of the parties in another State upon constructive service or service by publication, has been the subject of much litigation, and, whether the divorce is valid or not, often depends on very finely drawn distinctions. From your statement of facts, however, it would appear that you were never in the State of South Dakota and did not appear in the proceedings instituted by your wife, and hence were never properly a party thereto at all. In order to sustain the divorce under such circumstances, it must at least appear that your wife had a bona fide legal domicile in South Dakota at the time the divorce was granted. Even under such circumstances in some of our States, notably in New York, the validity of the divorce would be denied; but in any jurisdiction it is absolutely essential to the validity of a divorce obtained in another State that the person obtaining that divorce have a bona fide legal domicile in the State in which it is obtained.

The term domicile in this connection means more than physical presence within the State. It means physical presence coupled with the intention of remaining permanently or indefinitely. If your wife went to South Dakota simply for the purpose of securing a divorce and acquired a domicile there for no other purpose, her residence was a fraud on the jurisdiction of the courts of that State and the divorce is null and void. It has been held in a number of cases that the fact that a person remains only for the statutory period of time and leaves the State as soon as the divorce is obtained, is in itself sufficient to create a presumption against the good faith of that person's residence. These considerations lead us to state that in our opinion the divorce is of questionable validity and to advise neither of the parties to marry again.

TO ENTERTAIN THE LADIES.

Among the entertainment features of the Atlantic City Convention on Thursday evening the ladies will give a progressive card party at the Hotel Rudolph, to be in the hands of a committee under the leadership of Mrs. George W. Trout, of Chicago, in which it is intended to add to the interest by awarding a large number of prizes. It is suggested in this connection that manufacturers who desire to advertise their business by sending some article of their manufacture to be awarded as a prize will kindly send in such article to Mrs. George W. Trout, care of Hotel Rudolph, Atlantic City, N. J. It is advisable that these prizes be on exhibition at least one day before the card contest. It must be understood the ladies do not ask for any contribution from the standpoint of a gift, but they feel that from a business point of view the manufacturers will be pleased to send some thing which they make, as a popular contribution to be disposed of in this manner.

THE AMERICAN HARDWARE MANUFACTURERS' ASSOCIATION.

There has been a feeling among the members of the American Hardware Manufacturers' Association that it was a wise move that brought the members together in an association where measures can be discussed amicably and in good temper that will enable the whole association to act as a unit and accept or deny them. They are now growing largely in membership and influence and in the good they are able to accomplish, it may be truly said they justify their existence and no longer compete with each other to their detriment. They divide the grand body of the association into twenty-three committees, in each of which they can agree and arrange matters that possess special interest to each of these several lines. These divisions, with their chairmen, are as follows:

Bars, Bands, Sheets and Plates—George A. Baird, Republic Iron and Steel Co., Chicago.

Bolts, Nuts, Rivets and Screws—Robert Garland, Garland Nut and Rivet Co., Pittsburgh.

Builders' Hardware—John E. Harbster, Reading Hardware Co., Reading, Pa.

Chains—James T. Davis, Standard Chain Co., Pittsburgh.

Cutlery—W. M. Taussig, Challenge Cutlery Corporation, New York City.

Edge Tools and Hammers—William W. Hays, Iron City Tool Works, Pittsburgh.

Files—Hugh McCaffrey, McCaffrey File Co., Philadelphia.

Firearms—J. Lovell Johnson, Iver Johnson Arms and Cycle Works, Fitchburg, Mass.

General Hardware—C. F. Collier, Cronk & Collier Manufacturing Co., Allegheny, Pa.

Horse Shoes and Horse Shoe Nails—Oliver Williams, Bryden Horse Shoe Co., Catasauqua, Pa.

Locks—E. S. Jackson, Miller Lock Co., Philadelphia.

Machinery—I. H. Page, J. Stevens Arms and Tool Co., Chicopee Falls, Wis.

Malleable Iron Products—Thomas Devlin, Thomas Devlin Manufacturing Co., Philadelphia.

Railway and Track Tools—Edward Ingalls, Atha Tool Co., Newark, N. J.

Saws—N. A. Gladding, E. C. Atkins & Co., Indianapolis, Ind.

Shovels and Farming Tools—George V. Wilson, Hussey-Binns Shovel Co., Pittsburgh.

Specialties—D. H. Goodell, Goodell Co., Antrim, N. H.

Stones—E. B Pike, Pike Manufacturing Co., Pike, Pa. N. H.

Tools—E. G. Buckwell, Cleveland Twist Drill Co., Cleveland, Ohio.

Wire Goods—A. M. Bentley, Owosso Manufacturing Co., Owosso, Mich.

Wire and Nails—Oscar Richey, Kelly Nail and Iron Co., Ironton, Ohio.

Many a rich father has discovered that it is easier to get a daughter off his hands than to keep a son-in-law on his feet.—*Philadelphia Record.*

THE COLORADO TRADE.

Outlook Better Than a Year Ago.

The amount of detail in any Hardware store is very great, but out here where the variety of stock is almost endless, and the stocks are large, it requires an exceptionally keen man to successfully carry on a Hardware business. This may be the reason why there are but few small Hardware stores in this intermountain country.

An Eastern Hardwareman would be surprised at the great variety carried in most of these Hardware stores. In addition to general Hardware, building materials, carpenters' and mechanics' tools, stoves and ranges, blacksmiths' and wagonmakers' supplies will be found; sporting goods, farm and garden tools, house furnishing goods, mining tools and machinery, heavy Hardware, and very often paints and oils, as well as crockery and china. It will be seen that there is some variety to the Hardware stock in the West.

In most parts of Colorado the Hardwareman's business is largely influenced by mining. A large part of his trade is in mining supplies, and the general prosperity of the State depends in no small measure upon the prosperity of the miners and mine operators. Therefore the labor troubles during the past eighteen months have had a bad effect on all business—and the Hardware business most of all.

The outlook now, however, is brighter than at any time since the miners' strike at Cripple Creek eighteen months ago, and business is better this Fall than a year ago.

Up in Leadville, Colo., something like the old-time excitement has come, in the opening of a new mine, showing at least $20,000,000 worth of ore. One Hardwareman said that this would probably make Leadville what it was fifteen years ago, and bring in a good many people.

The Leadville Hardware Co. are now occupying a large double store, and are in a position to take care of all business that comes, as they are carrying a large stock. A very good display of fine tools and cutlery was recently made by the Leadville Hardware Co. in one of their large windows, while stoves were shown in the other windows.

Another of Leadville's progressive Hardware dealers is C. E. Blosfeld, who carries a large stock of stoves and tinware and a good assorted stock of general Hardware. Mr. Blosfeld said that he had no kick coming as to trade conditions, but was looking forward to a larger trade this Winter.

The H. H. Thompkins Co., of Leadville, are doing both a wholesale and retail business, although the latter end of the business is pushed the hardest.

The Colorado Supply Co., which is an allied concern of the Colorado Fuel and Iron Co., operate some twenty stores and supply houses in the mining country of the inter-mountain region. The Hardware business is a large end of their trade. W. H. Billington is vice-president and general manager, with offices at Pueblo, Colo. When asked how business was in the Hardware department, Mr. Billington said: "As our business is almost entirely confined to the mining districts and because of the unrest and labor troubles in these places, we have not had as good a trade as last year. The outlook now, however, is brighter, and if the election goes right, we ought to see a general activity in mining."

The A. W. Morrell Hardware Co. operate stores in Victor, Cripple Creek and in Pueblo, Colo. Mr. Morrell keeps in close contact with the trade and said he could see indications which pointed to better business. The Pueblo store of the Morrell Hardware Co. is a model in many ways. Its large, well-lighted store and goods are attractively and well displayed. Located at 187-189 N. Union Street, right in the heart of the city, the store is in a position to get its share of the retail trade—and because of the up-to-date line of goods carried, the Morrell Hardware Co. are getting a good jobbing business. Mr. Sweet looks after business in and around the city and is a well-posted Hardwareman.

Builders' Hardware is carried by the Cilco Lumber and Supply Co. Much new building is taking place here and in nearby towns and the building material trade is good.

About the store of J. M. Killin Hardware Co. there was an air of prosperity that spoke volumes as to the prosperity of this concern. Mr. Killin is a man of iron nerve and great presence of mind, as was proven last August. He is the only survivor from the frightful railroad wreck when more than 100 people lost their lives. To hear Mr. Killin tell of his experience is most thrilling. He is only living to-day because of his great strength, power of endurance and wonderful presence of mind. Although scarred some and still feeling the effects of the accident, Mr. Killin is now attending to business.

The Holmes Hardware Co. is another of Pueblo's enterprising concerns, and handle a large line of goods, carrying an extensive stock and doing both a retail and jobbing business.

Mr. Barnes, of G. S. Barnes & Son, of Colorado Springs, said that trade was somewhat backward this Fall. In speaking further of trade conditions in the State, Mr. Barnes said: "The strikes and labor troubles in the mining camps just west of here have had a bad effect on trade. We feel it here in Colorado Springs as keenly as do the people in any other part of the State. Barnes & Son store is located at 17 S. Tejon Street, is attractive and well stocked with all classes of Hardware.

A. S. Blake carries on a prosperous Hardware business at 107 N. Tejon Street, Colorado Springs. Attractive windows are used to good advantage in displaying tools and cutlery.

Another of Colorado Springs' attractive Hardware stores is that of John McLean.

Rudolph Heyse makes a specialty of a fine line of improved tools and edge tools and carries as complete a stock as is found in Colorado Springs.

Out at Manitau, Colo., situated only a few miles from Pike's Peak, is located the Long Hardware Co., who carry a fine line of builders' and general Hardware.

The local retail business in Denver is better than for some time past. No small amount of new building is taking place, and there is a brisk demand for all building materials.

The largest Hardware jobbing house in the State is located here in Denver, being the Geo. Tritch Hardware Co. The opinion of trade conditions and of the future by such a thoroughly posted Hardware man as George Tritch is of value to the entire trade. When asked his opinion of the future, Mr. Tritch said: "There has been much discussion recently regarding the Mail Order houses—and of the future of the big Hardware jobbers who are doing a national business. Whether these two classes of concerns will continue to grow and expand is a question that time only will answer; but whether or not there is a future for the big jobber, who does a business over a vast territory, I am very sure the local jobber covering one or two States will always have all the business he can profitably handle." The Geo. Tritch Hardware Co. do a large business in sporting goods, and have a splendidly equipped sporting goods store, which is kept entirely distinct from their regular Hardware business.

A very attractive store has recently been opened by the W. Bergman Hardware Co. Mr. Bergman is a practical, up-to-date Hardwareman, coming here from Buffalo, N. Y. The stock is well arranged and attractively displayed. A special effort has been made to make a showing of House Furnishing Goods and Stoves and Ranges. Mr. Bergman said business was starting in good shape.

One of the most attractive Hardware stores in the State is that of the Geo. Moyer Hardware Co., of Denver. During the past year the store has been remodeled throughout, and by adding new fixtures and enlarging the windows, the appearance is exceedingly pleasing.

Another up-to-date Denver establishment is that of Frank Ellis & Son. Besides carrying everything in Hardware, this concern have their large double store stocked to the roof with sporting goods and kindred lines.

At 516 Sixteenth Street, Denver, is located the Kettering-Benway Hardware Co., of which concern A. D. Benway is president, D. G. Thompson vice-president and C. W. Kettering secretary and treasurer. A good business is reported and Fall trade was opening well.

Altogether the outlook is better now in Colorado than it was a year ago for Winter business, and, with the labor troubles once settled, there is no reason why for years to come trade should not be constantly increasing.

HAMMERNAIL.

DEATH OF WILLIAM C. BEMIS.

William Chaplin Bemis, of the firm of Bemis & Call Co., a well-known local business man, died October 26, at his home, 309 Central Street, Springfield, Mass., from a stroke of apoplexy. Mr. Bemis was a native of Willimansett where he was born November 16, 1832, the son of Stephen C., and Julia Skeele Bemis. With his parents he came to Springfield in 1843, and in 1855, when the Bemis & Call Hardware & Tool Company was organized he was elected treasurer. On the death of W. K. Baker, the president, in 1897, he was chosen to succeed to that office, being both president and treasurer at the time of his death. He was also a trustee of the Hampden Savings Bank. He was a member of Asbury Church. He was married December 25, 1856, to Emily O. Rodgers and besides his widow leaves two sons, Howard R. and Edwin L. Bemis and five grandchildren.

THE ATLANTIC CITY CONVENTIONS.

We have received the following programs of the two conventions:

AMERICAN HARDWARE MANUFACTURERS' ASSOCIATION.

PROGRAM.

7TH CONVENTION.

NOVEMBER 16TH, 17TH, 18TH, 1904.

ST. CHARLES HOTEL, ATLANTIC CITY, N. J.

All members of the American Hardware Manufacturers' Association will be recognized to speak on any question which is under consideration, each speaker to be limited to five minutes, except by pre-arrangement. Under the order of "New Business" members are requested to suggest or present any question for present or future consideration.

WEDNESDAY, NOVEMBER 16TH.

10.00 A. M.

Opening session of the National Hardware Association, to which the members of the American Hardware Manufacturers' Association are especially invited.

EXECUTIVE SESSION.

2.30 P. M.

Formal opening session of the American Hardware Manufacturers' Association. Open to members only. (Members must procure badges for admission to executive sessions.)
Roll Call.
President's Address.
Minutes of Last Meeting.
Report of Secretary-Treasurer.
Report of Executive Committee.
Report of Membership Committee.
Report of Grievance Committee.
Communications.
Unfinished Business.
New Business.
Announcement of Nominating Committee by the President.

9.00 P. M.

RECEPTION.—At the St. Charles Hotel. Complimentary to the National Hardware Association, and the guests of the American Hardware Manufacturers' Association.

THURSDAY, NOVEMBER 17TH.

9.30 A. M.

EXECUTIVE SESSION.

(Strictly Executive, and open only to members of the American Hardware Manufacturers' Association and their direct representatives.)
ADDRESS BY HON. DAVID M. PARRY—
President of the National Association of Manufacturers.
Subject—"The Labor Problem—One of Education."
Consideration of Reports.

2.30 P. M.

EXECUTIVE SESSION.

This session will be strictly Executive, and open only to members of the American Hardware Manufacturers' Association and accredited members of the National Hardware Association (jobbers) who have been invited to be present. Two members of the National Hardware Association have been selected by the president of that body to present the subject of "Jobbers' Special Brands" from the standpoint of the jobber. The entire session will be devoted to a discussion of this subject, in which our members are invited to participate.

8.30 P. M.

Card Party at Hotel Rudolph.

10.00 P. M.

Band Concert, in Hotel Rudolph Grotto.

FRIDAY, NOVEMBER 18TH.

9.30 A. M.

EXECUTIVE SESSION.

Election of Officers.
Miscellaneous Business.

3.00 P. M.

Meeting of the Executive Committee of the American Hardware Manufacturers' Association.

6.45 P. M.

Banquet.

PROGRAM

TENTH ANNUAL CONVENTION

NATIONAL HARDWARE ASSOCIATION OF U. S.

ATLANTIC CITY,

NOVEMBER 16TH, 17TH, 18TH, 1904.

WEDNESDAY, NOVEMBER 16TH.

10.00 A. M.

OPEN SESSION.

(Manufacturers and all interested are invited).
Introductory Remarks, Samuel A. Bigelow, President.
Chorus—"God Bless our Native Land."
PRAYER.—Rev. John R. Davies, D.D., Pastor Bethlehem Presbyterian Church, Philadelphia.
ADDRESS OF WELCOME.—Hon. Franklin P. Stoy, Mayor of Atlantic City.

INTRODUCTIONS.

HON. A. CHAMBERLAIN, Governor of Connecticut.
MR. J. C. BIRGE, President American Hardware Manufacturers Association.
REPRESENTATIVES, Canadian Wholesale Hardware Association.
W. P. BOGARDUS, M. L. COREY.—National Retail Hardware Dealers Association.
PRESIDENT'S ANNUAL ADDRESS.—Samuel A. Bigelow.
SECRETARY-TREASURER'S REPORT.—T. James Fernley.
Collocution—"What are the Proper Avenues fo rthe Distribution of Hardware and Kindred Lines?"
GEORGE E. CORBIN, President, Corbin Cabinet Lock Co.
W. P. BOGARDUS, President, National Retail Hardware Dealers Association.
SAMUEL E. WINSLOW, President, Samuel Winslow Skate Manufacturing Co.

2.30 P. M.

EXECUTIVE SESSION.

Committee Reports and Discussions.

4.30 P. M.

Metal Branch of the Association will hold a meeting. (All Tin Plate and Metal Jobbers are invited).

9.00 P. M.

Members of the National Hardware Association are invited to attend Reception tendered by the American Hardware Manufacturers Association at St. Charles Hotel.

THURSDAY, NOVEMBER 17TH.

10.00 A. M.

EXECUTIVE SESSION.

Report Catalogue House Committee.
Discussion.
(Members of Wholesale and Retail Hardware Joint Committee are Invited).
Miscellaneous Business.

12.00 NOON.

Meeting Heavy Hardware Jobbers.

2.30 P. M.

Members of the National Hardware Association are invited to attend meeting American Hardware Manufacturers Association at St. Charles Hotel.

8.30 P. M.

Card Party, Conducted by the Ladies. (All are Invited).

10.00 P. M.

Band will give concert in Rudolf Grotto.

FRIDAY, NOVEMBER 18TH.

10.00 A. M.

EXECUTIVE SESSION.

Miscellaneous Business.

2.30 P. M.

EXECUTIVE SESSION.

Miscellaneous Business.

4.00 P. M.

OPEN MEETING.

Installation of Officers. (All invited.)

6.45 P. M.

Banquet. (All invited.)
Subscription Price, $5.00 per Cover.

THE DANA MANUFACTURING CO., Cincinnati, Ohio, are distributing through the trade an attractive envelope size pamphlet catalogue of twenty-two pages. It is an unusually fine production, the illustrations being in color. They exploit their Peerless Iceland Freezers, which they claim have the fewest parts and only one motion—all that is necessary for quick freezing of delicious cream in three minutes. The can revolves around the stationary dasher. The quick freezing is accounted for by the peculiar construction of the dasher and the way it handles the cream set in motion by revolving can. The gear frame fits over a square projection on the can top, connecting the gearing with can and dasher in such a way that no salt or oil can get into the can. They also make a Peerless Power Freezer for 25 and 40 quarts, the controlling apparatus of which is of the highest grade. The regulators will control the speed from fifty per cent up to full speed, which gives all the range of speed that is required in operating the feezers. This handy little freezer book will be sent upon application to the Manufacturers.

C. E. JENNINGS & CO., 42 Murray Street, have sent us a copy of their latest "Tool Chest" catalogue, which includes chests from the Boys' "Little Daisy" containing 11 tools to the Planters' Tool Chest No. 100, containing 102 tools. They make a specialty, too, of empty tool chests, included among which are electricians', carpenters', machinists' or jewelers', in several styles, also metal corners for tool chests. Their "Special" machinists' or jewelers' tool chests are made of selected antique quartered oak or black walnut, beautifully finished. Each chest is provided with a Yale pattern lock and two keys, nickel plated draw pulls, and a patent device for automatically locking all the drawers at once. They have nickel plated outside corner irons, and each has a panel lid with a secret compartment for private papers. These, they claim, are the finest machinists' chests on the market. The catalogue above mentioned is elaborately gotten up, being illustrated throughout. One will be sent to interested dealers upon request.

REVIEW OF THE MARKETS.

WIRE NAILS.—The conditions of all Wire products are unusually strong, the demand continuing to be an active one. The Wire Nail market is held to be firm, and, as an advance is thought to be impending, purchases are made speculatively, to which the fact of not being able to buy beyond 30 days' limit, stimulates the buying movement. Carload prices remain the same to either wholesale or retail trade, being as follows: f.o.b. Pittsburgh 60 days or 2 per cent discount for cash in 10 days.

Carload lots	$1.60
Less than carload lots	1.65

New York.—The trade continues good, although the buyers act very conservatively and purchase only in small lots, the aggregate of the sales is satisfactory. Quotations are as follows:

Single carloads	$1.79½
Small lots from store	$1.85 to $1.90

CUT NAILS.—From all the news at hand no change was made at the recent meeting of the Cut Nail Association held October 27th. Demand is moderate and market is a conservative one. Quotations are as follows: $1.60 and $1.65 for carload and less than carload lots respectively f.o.b. Pittsburgh. In the East, Iron Nails are quoted at the same prices as Steel Nails, but in territory west of Pittsburgh, Iron Nails are quoted in carload lots f.o.b. Pittsburgh at $1.65 with an advance of 10 cents in less than carload lots.

New York.—The local demand is moderate in tone, no change of especial note disturbing it. The market is regarded as firm in tone, with quotations as follows: Carloads on dock, $1.74. Less than carloads on dock, $1.79. Small lots from store, $1.85.

BARB WIRE.—Business in good volume is reported for Barb Wire in the West, the remarkably fine weather we have had the past fortnight enabling the farmer to attend to his fence construction. The market is a firm one, the 30 days from date restriction still prevails, with quotations as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.75	$2.05
Retailers, carload lots	1.80	2.10
Retailers, less than carload lots	1.90	2.20

SMOOTH FENCE WIRE.—A steady demand still prevails, orders are good, and the market is firm. The same rule applies as to orders, limiting them as to date of delivery within 30 days. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

Jobbers, carload lots	$1.45
Retailers, carload lots	1.50

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advance.

COPPER MANUFACTURES.—The advance prices now demanded for Ingot Copper makes higher prices obtainable on all manufactures of Copper, although not of great moment. Quotations are firm on a rising market.

HATCHETS.—The reduction in the price of Hatchets recently announced remains in force until November 15th. It has stimulated sales to a limited extent only.

SHEET ZINC.—Under date of October 20 an advance is announced in the price of Sheet Zinc to $6.40 per 100 pounds in 600-pound casks, f.o.b. mill, subject to the usual discounts.

CORDAGE.—The following prices represent the market:

	Cents per lb.
Pure Manila, 7-16-inch and larger	11¼ to 12
No. 2 Manila	10¼ to 11
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	7¼

LINSEED OIL.—Under date of November 1 the following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co:

In lots of less than 5 barrels.....42 cents per gallon.
In lots of 5 barrels or more.....41 cents per gallon.

The "American" brand fo respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity, at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE PITTSBURGH TRADE.

Business continues to move along in fair volume, though there is still room for some improvement. There appears to be very generally a hopeful feeling in regard to the future. The increased activity and higher prices in the iron market will react favorably on the Pittsburgh district and we expect a steady increase in the volume of business during the next few months. Orders at present are for very moderate quantities, but well assorted, and there is apparently no large accumulation of stocks in the hands of the retailers. Good, seasonable weather, of which there has been comparatively little at this writing, will doubtless stimulate trade very greatly. The recent trip of the Merchants and Manufacturers' Association through Southeastern Ohio was a marked success and is already producing good results. Pittsburgh's mammoth manufacturing interests have so long overshadowed her mercantile enterprises that the importance of these is apt to be underestimated. The wholesale merchants of this city have now taken it upon themselves to enlighten the trade in this section in regard to the advantage of buying goods in Pittsburgh and an aggressive campaign is being carried on which will undoubtedly be of immense benefit to the city's mercantile interests.

LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

Prosperity has its drawbacks that at times depression can only cure. The antidote to Sam Parks' kind seem to be hard times or hunger. The passion for something better needs judicious control, lest it does not let well enough alone. There is a limit to all good things, and if labor could force wages above its comparative value, there would surely be a reaction, as consumption declines when prices are too high. Manufacturers who steadily opposed high prices have been justified, as the conditions they predicted came and both labor and capital suffered. If the homœopathic dose we have had is sufficient to cure, we can now go forward to the fulfillment of our position as foremost among the nations which destiny has assigned us, and nothing but own own folly can retard. It was fortunate that the diagnosis of our trouble was not difficult, and our experience is not too dear, if only labor and capital will now co-operate to redeem our fortunes. The outlook is promising. Buyers no longer hesitate in purchasing, but manufacturers hesitate about entering excessive orders. It is no longer a buyer's market. Labor is again in demand, mills are opening. The contest about the open or closed shop is to determine the time they are to remain so. Anxiety to avoid the evil that caused our trouble is the bone of contention. Plans for public improvements and private building are being made, but excessive prices will strangle them, and stop our career again. Let us hope that we have learned a lesson, and that good times have come to stay.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PHILADELPHIA TRADE.

A better feeling seems to be in evidence everywhere, and while we do not believe that Presidential elections are a very positive factor in influencing business, still there is always a feeling of relief when the election is over, and as results will be fully known before this paper goes to press, we hope there will be nothing to stand in the way of a steady and satisfactory business. The month has shown quite an improvement, not only in the general feeling, but also in the iron and steel market, which has stiffened up materially, and seems to be at present in quite a satisfactory condition from a seller's standpoint. Prices on manufactured goods are naturally firmer, as a result, and advances are expected on many lines which lie near the raw material. It is recognized that some of these goods have been abnormally low and manufacturers will doubtless be quick to avail themselves of the situation, and will feel fully justified in announcing advanced figures. From the retail trade we hear encouraging reports and the way in which goods are being bought seems to show very conclusively that jobbers as well as retailers have limited stocks, and will be compelled to buy in order to fill actual wants. For the last year there has been very little to tempt speculation, and buying has been from hand to mouth, with the inevitable consequence of depleting stocks. At such a time as this there is of course danger that a promising future may be killed by over-sanguine ideas, so it is perhaps well to state that there does not appear to be any reason for expecting a boom, but it is felt that a safe and satisfying result should be the rule for the balance of the year.

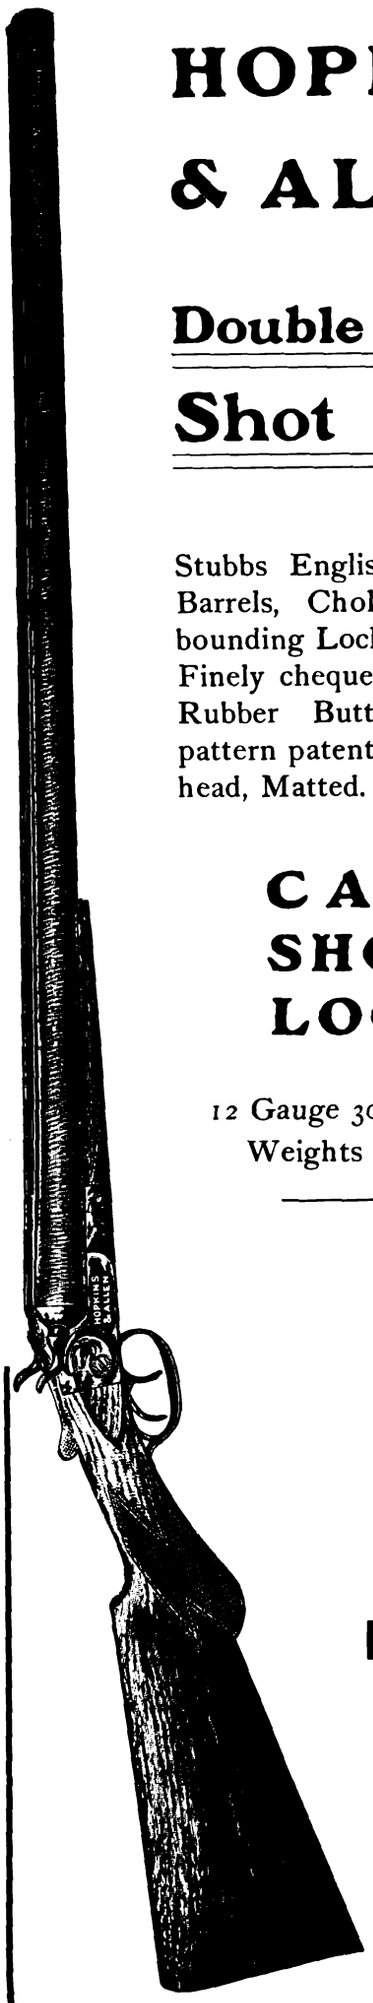
BIDDLE HARDWARE CO.

Digitized by Google

THE COLUMBUS TRADE.

The weather is delightful, and it is too bad everybody cannot be out into the country hunting nuts and accept invitations from farmers to try their cider, pumpkin pies and apples. There is nothing like it, but such is not the lot of busy men. They must keep the pot boiling, and the only way that it can be done is to keep the fire up. Of course, we all know the old furnace will burn out after a while, but that is not as bad as rust. Business is very satisfactory and collections about the same as usual. There are always some that are slow pay, it matters not how trade is. When trade is good, they owe more, but take the same easy time to pay it in. If some of these dealers could only realize that if they made the start, they could discount all their bills and make a nice extra profit, we believe they would do it. Builders' Hardware is in good demand on account of the fine weather. The demand for gas stoves, stove boards, pipe and elbows has been heavy. The outlook for 1905 is encouraging inasmuch as most everybody believes it will be a busy year and that has a great deal to do with it. The Smith Bros. Hardware Co.,
J. H. Smith.

THE DAVENPORT TRADE.



Weather continues pleasant. Corn harvest is progressing satisfactorily, the yield is abundant, the quality much better than usual and price is high. The same report is true of potatoes, and, in fact, Iowa farmers have little to complain of this season. A few more days and the political struggle will be over. Bets of three to one are refused on the general result, but there may be a surprise when the votes are counted. It has snowed the day after election. This is the last month of the great fair, which has, without doubt, accomplished much good, but, of course, it has taken valuable time of its visitors, and has diverted a large amount of money from natural channels of commerce. Hardware prices remain fairly firm, with a prospect of advances in the near future, of some of the heavy and more staple articles.
Sickels, Preston & Nutting Co.

THE CINCINNATI TRADE.

The traveling men entering Cincinnati generally report the Hardware trade as being very quiet on the road. They say that while the present administration is likely to be retained, the fact of there being an election at hand conduces greatly to retard trade and orders on any conditions are hard to obtain. The long drouth has brought about a water famine and the farmers are hauling water from the river for many miles. It is serious with the Cincinnati Southern Railroad in Kentucky, as there is no water at either Kings Mountain, White Oak or Burgin, it being necessary to keep two trains constantly hauling water in tanks to all points between Lexington and Somerset. Wednesday, November 9th, is second Cincinnati Day at the World's Fair, and about 100 representative business men will leave at noon on that day, accompanied by their ladies. This party will be augmented to some extent by Cincinnatians already in St. Louis.

THE SAN FRANCISCO TRADE.

"The fortnight just passed has developed no trade feature," said a busy builders' Hardware dealer, "which means that the splendid business activity of the last eight or more years is keeping up the tenor of its way. We like its habit of these late years. The first twelve months or so of its beginning some of us were skeptical enough to regard it as a passing chance, but now, if the people do right, why shouldn't we count on it as a perpetual success? Two days ago, in conference with one of our foremost contracting and real estate men, he said: 'The universal experience of contracting firms and real estate men in this and in all other cities is that the approach of the Presidential election tends to bring about a falling off in dealings in realty, but in looking back over an experience of more than forty years, during which the nation has ten times chosen a Chief Executive, I find that this is the first year when the exception goes to prove the rule. It may be because the general public has already discounted the people's verdict, which will be recorded November 8, but whatever the reason may be, the fact remains that the approaching election has not affected the building and real estate business in any of its phases. Vacant houses and stores are filling up, the demand for building and business property is unabated, contracts for resident and business structures seem to be unaffected by the approach of the Winter, and there is what may be termed a thoroughly healthy condition, neither a boom nor yet a depression, but the fairest kind of activity. The Pacific Hardware and Steel Company is getting ready for

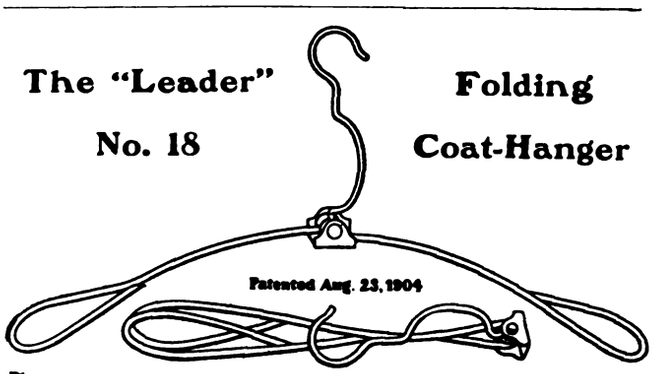
expansion. A placard is now posted on its large building at Fremont and Mission Streets announcing the structure "For Lease." This is preliminary to the company's re-establishing itself in its greater quarters now being rapidly built on the southwest corner of Seventh and Townsend Streets, bounded front and rear by transcontinental transportation lines and railway tracks leading to all Pacific Coast points. According to an Oakland, Cal., publication the Pacific Steel and Wire Company's works of that city will shortly become one of the largest industries on the Pacific Coast. The paper announces that during the recent sojourn in the East of Frank L. Brown, manager of the business, new blood was infused into the company, which promises to result in operations on an enormous scale. Continuing, the publication says: "Both D. O. Mills and H. E. Huntington have become large owners of the stock and Mr. Huntington will be the managing director with headquarters in New York. The vast interests of these two men and the preparations for the manufacture of steel products on the Pacific Coast and locating the plant in Oakland gives promise of an impetus to other manufactories which will have an important bearing on the industries of Oakland in general." While learning to-day at Philpott Company's Sporting Goods Store that thousands of ducks are returning from the interior, where they were driven by the recent storm, to the nearby marshes, their favorite feeding grounds, and that sportsmen are getting limit strings, and that the gun and ammunition trade was never better, Johnson Reynolds entered the store. Mr. Reynolds is the new secretary of the Retail Hardware Dealers' Association of San Francisco. As such official he reported a healthy growing interest in the association work, and that very shortly there will be no more membership recruiting necessary, as about all of the city's retail Hardware dealers are now on the society's roster.

INDUSTRIAL PRESS ASSOCIATION.

SALESMEN AND SALES.

Any business man who stands in terror of his salesmen because they "sell the goods" might do well to wake up to the fact that it is his own fault if salesmen, when they leave him, can carry an appreciable amount of business to a competitor.

A salesman may hold trade by courtesy and favors, says System, but an intelligent sales manager and a wide-awake advertising department can create such a favorable impression for the house that customers in the remotest corners of the earth may soon be made to feel personally acquainted with the concern—can be made to feel that it is the particular business of somebody to sit at a table in the main office and attend to their individual needs. This is accomplished not only by prompt and careful attention to inquiries and orders and, by systematically following them up, but also by frequently sending special literature and an occasional letter or mailing card.



When the individuality of a concern has become impressed upon a customer who receives good treatment, the call of a competitor's salesman will seldom carry away the order, especially if a neat little reminder happened to drop out of the morning's mail. And these same ties of personal touch with the home office are what will hold business when the best of salesmen go over to a competitor.

Business should be built for the future, not for the moment. The success of a house should not rest upon the shoulders of one man, or of any number of men. A proper organization lives and grows beyond the coming and going of men.

The loyal salesman glories in the permanent organization of his house. He is one with the firm—may become a part of it some day; he is working for the firm, not for himself. Both for its effectiveness in establishing intimacy between the house and his customers, and for its immeasurable help in keeping business moving throughout his territory while he travels from point to point, and because, as he goes, he can actually see the good work go on, the traveling salesman appreciates, perhaps more than any one else, the importance of direct methods in advertising and of systematically "keeping at it."

It not only sells goods when he cannot be on the spot, but the little pamphlets and other special missives send the arguments on in advance, and a man will often read when he will not listen. The result is that the salesman has fewer obstacles to overcome, is saved many an argument, makes more sales and makes them easier, all because of the kindly aid of systematic advertising—direct.

JAP-A-LAC

"WEARS LIKE IRON"

THE Hardware dealer, who is willing to take his share of the profits accruing from JAP-A-LAC sales, is sure to become an enthusiast on this new wood finish.

We advertise it in the principal magazines and periodicals, and spend immense sums of money in explaining its merits to the millions of readers.

JAP-A-LAC is the quickest selling commodity of its kind in the market.

JAP-A-LAC does not scratch white or show heel marks.

JAP-A-LAC may be used for all kinds of interior finishing, furniture, iron work, doors, etc.

There is nothing just as good. Why not stock what people call for?

Write for special proposition to dealers and full information.

OLDEST TIN MINES.

An interesting description of the tin mines of Cornwall is given by I. C. Fuller, a mining engineer who is thoroughly familiar with the deposits and is now in this country. These mines are among the oldest in the world. The Phoenicians as early as 500 B. C. had made their way to the southwest part of Britain and discovered tin deposits there. Although the mines have been worked almost continuously since that time there is no immediate sign of their giving out.

"Tin is the rarest of the so-called common metals," declared Mr. Fuller. "The annual output of the world at present is 75,000 tons, of which 5,000 comes from Cornwall. Prior to 1875 the number of tons raised at Cornwall was about twice as large and formed about one-fourth of the world's output, but since that year there has been an enormous expansion in the production as well as in the consumption of tin. Tin is now found on almost every continent. There are large deposits in the Malay peninsula, in a few of the Pacific Islands and in South America.

"More than five-sixths of the output of tin is derived from secondary alluvial deposits, but all from Cornwall is from vein mining. The vein stuff is broken either by hand or in rock breakers and stamped to fine powder in stamp mills. These mills are practically large mechanically worked pestles and mortars, the stamp proper weighing from 500 to 1,000 pounds.

"After the mineral has been crushed small enough to pass through a sieve with perforations one-twentieth of an inch in diameter it is carried from the stamp in suspension in water by means of a series of troughs in which the heavier mineral is collected.

"This mixture then passes through a series of washes which reduces its component parts to tinstone and ascenical pyrites. Refined thus far, it is submitted to a calcining process and rewashed, until finally black tin containing from 60 to 65 per cent. of metal is left. The dressed ore is then smelted.

"The mines are usually very hot owing to the lack of adequate ventilation, and some of them are over 400 fathoms deep and extend one or two miles under the sea. The chief source of danger is the sea water, which sometimes completely submerges the mines, often drowning the workers.

"The miners of Cornwall, when working on wages, make about 18 shillings a week, but the majority work on the contract system, or as you would say, by piece work, and of course their compensation varies. They live very comfortably and seem contented, being as a whole more conservative than the better classes. They do not accept Joseph Chamberlain's fiscal policy as readily as the better educated people, who are almost universally in favor of it. For some reason or other this seems to be a reversal of the ordinary status of society. Those most eager to grasp at innovations are usually the laboring classes."—*Iron and Machinery World.*

*

THE MALCOLM MANUFACTURING CO., Syracuse, N. Y., have issued their 1904 catalogue containing illustrations and descriptions of the Perfected Malcolm high grade rifle telescope for sporting, target and army rifles. Malcolm rifle telescopes and mountings range in price from $10.00 to $32.00. Some of the claims which they make for their telescopes are: Their experience covers a period of forty-five years; they use no cheap material or home ground lenses; their mountings are all made of the finest steel; they use from three to five power for hunting scope, and higher powers for target use; their scopes have the largest field possible; they are suitable for hunting moving game; the field is flat and illumined; the cross hairs are indestructible; their "Rough Rider" and "Bull's Eye" are the lowest price outfits on the market; the quality of "Definition" are alike in all their scopes; they vary in price because of the extra work on tube or use of achromatic lenses; their mounts vary in price because some have wind gauge and elevation attachment. They have reduced the prices, they state, to the lowest possible cost for the production of an honest, serviceable outfit. They make any of their combinations in any of the powers designated in their catalogue, and they guarantee entire satisfaction. Secure a copy of their catalogue if you are interested in telescopes.

BY THE WAY.

NATIONAL

(Roller Bearing) CARPET SWEEPERS

"The Triple Medal Line"

The Grand Prize and Two Gold Medals as above have been awarded by the International Jury of Awards of the Louisiana Purchase Exposition on **National Roller Bearing Carpet Sweepers.** The highest and greatest award ever made on Carpet Sweepers.

This is an incomparable honor for "NATIONALS," a record not even approached, let alone equalled, clearly demonstrating the superiority of modern ideas applied in modern devices, along modern lines and of the quality and finish to stand the most severe tests. And, yet, this but a confirmation of the verdict of the thousands of dealers who have been selling our products, many of them from the very beginning of our business and who have always pronounced "NATIONALS," by far the superior.

THE GRAND PRIZE AND TWO GOLD MEDALS will not add to the cost of "NATIONALS." Our high standard of quality and finish and the general extreme simplicity of our line, which gained for us this unprecedented honor will be maintained in every respect.

MR. BUYER: Thousands upon thousands of women, the users of sweepers, have daily visited our booth and examined our goods. They have had the opportunity as never before of making their own comparison and have gone home with the facts firmly impressed upon their minds, that in NATIONAL Sweepers they can obtain something different, something better, all that is good and useful in carpet sweepers. Don't you want to meet the demand of your trade? It's THE TRIPLE MEDAL LINE. "Do it now."

A WELL DESERVED REWARD.

It affords the publishers of Hardware much pleasure to announce that the International Jury of Awards of the Louisiana Purchase Exposition has awarded the Grand Prize and two Gold Medals on National Roller Bearing Carpet Sweepers, the highest and greatest award ever made on Sweepers. This would seem to establish the fact beyond all argument that Nationals are superior—better made, better finished, more simple in construction and more efficient in operation—than any other Sweeper made, and demonstrates in a most forcible manner that the product of modern ideas applied in modern devices on modern lines is the most desirable.

Before the advent of the National Sweeper Co. in the Sweeper business, Carpet Sweepers were advocated primarily as something nice to have, suitable for a Holiday present and a possible saver of labor. This firm has developed and made known a wider range of usefulness for Sweepers, and have proven them a necessity. It is claimed that their sweepers are made in such a manner as to make them an actual saver of labor, money and health to a much greater extent than is possible with other Sweepers, and that they have done more to promote the Carpet Sweeper business as an industry than any other manufacturer.

It is unnecessary to say that the Award will be equally gratifying to the thousands of dealers who are handling these goods, for, to them, it means more business. The work of this firm at the St. Louis Exposition should prove a great benefit to every dealer who handles the National line.

At their St. Louis World's Fair display, generally conceded the handsomest, most elaborate and instructive display of Sweepers ever made, their demonstrators have shown and explained the superior merits of National Sweepers to thousands of people, every one of whom is a customer of some Hardware dealer. A surprising number had never seen a Sweeper before and even a greater number had but the slightest conception of the many advantages of a Carpet Sweeper. They have had the opportunity, as never before, of making their own comparisons and learned thereby the superior merits of National's.

In a recent circular letter the National Sweeper Co. says:

"To those who are yet to become our customers we would emphasize by repeating that from the very inception of our business we have been the leaders. We produce and offer Sweepers of suprior quality, of more perfect workmanship, of finer finish and of more simple construction; Sweepers that are more efficient in operation and give the minimum of trouble. We have produced patent devices that make Sweepers more desirable, give them a wider field of usefulness; patented features that are absolutely original with us and cannot be obtained elsewhere; in this we have led and continue to lead. Furthermore, in addition to the regular lines, we have designed an introduced a higher grade and more expensive line of Sweepers, making them an article of furniture, ornamental as well as useful, rather than merely a means of sweeping, a household utensil to be kept in the background, enabling the trade to meet a greater range of individual taste; in this we have led and continue to lead. To sum it all up—to make it brief, crisp and snappy—we offer in National Roller Bearing Sweepers—something different, something better—all that is good in Carpet Sweepers."

HACKNEYED TERMS.

London Tid-Bits recently offered a prize for the best contribution on hackneyed terms used in writing and speaking, and here is the winning paper; it purports to be a law against the use of wornout expressions:

Be it enacted by the king's most excellent majesty, by and with the advice and consent of the long-suffering and sorely-afflicted reading public, and by the authority of the same, as follows:

1. Any journalist, litterateur, novelist, penny-a-liner or any other ink slinger, who after the passing of this act, shall write, print or publish, or cause to be written, printed or published any of the following or similar hackneyed or overused phrases—that is to say, in alluding to the awful mystery of death shall refer to "that bourn from whence no traveler returns;" or, in mentioning a deceased person, shall write of him or her as having "shuffled off this mortal coil;" or shall designate the condition of the unmarried as a "state of single blessedness;" or speak of a newly married couple as "the happy pair," or of a wife as "the better half;" or shall deny by implication an indisputable scientific fact by asserting the possibility of a person's being "conspicuous by his absence;" or shall write with profane pen the expressions, "a sight for the gods," or " a sight to make angels weep;" or, in reference to physical attributes or peculiarities, shall use any of the following expressions: "The bated breath," "the human form divine," "eagle glance," "magnetic gaze," "dilated nostrils," "willowy form," "arch smile," "daintily gloved hand," "flowing locks," "golden tresses," "delicately tinted lips," "the inner man," or shall speak of the "popular president." "the courteous general manager," "the genial secretary," "the charming hostess," "a few well chosen words," "the succulent bivalve," 'the psychological moment," "so near, yet so far," "last but not least," "a dull, sickening thud," "his own inimitable style," "old Sol," "the gentle light of the moon," "a cool million," or shall use any similar hackneyed expressions such person shall be guilty of a misdemeanor, and, being thereof convicted by public opinion, shall be compelled to pay away half his salary to the Home for Old Jokes, and the delinquent shall offer an ample apology to the public and agree never again to infringe the provisions of this act.

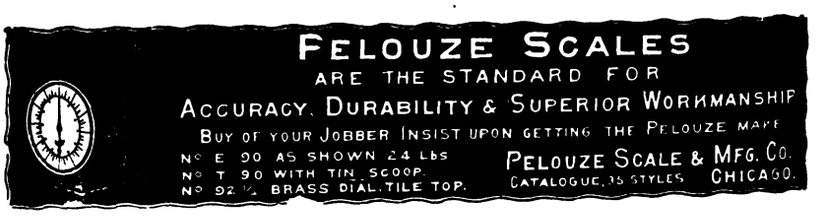
Tough Enough.

He—He's disappointed in love.
She—Got the mitten, I suppose?
He—No; got the girl.

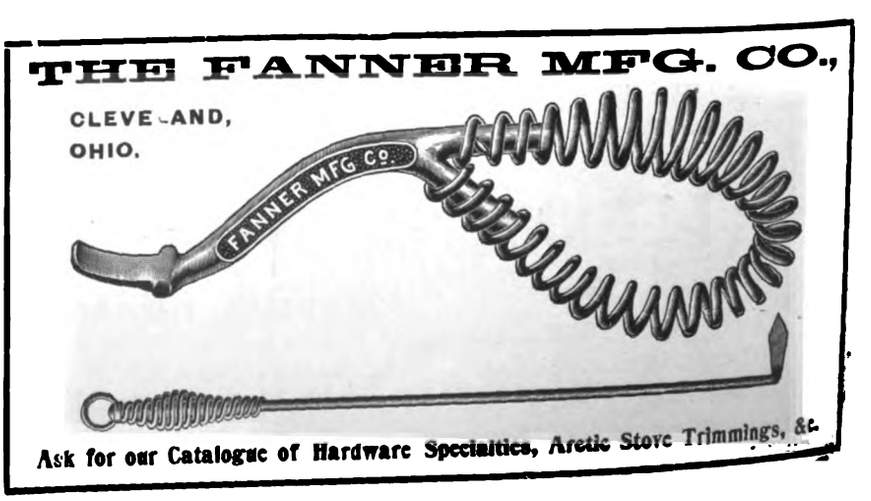
Why Not?

"You hold my future happiness," he told the girl.

"Why don't you hold it yourself?" she asked, coyly.—*Chicago Post.*



TRADE NOTES



South Bend, Ind.—Andrew Zeltner, of the firm of Zeltner Bros., South Chapin Street Hardware dealers, has purchased the H. French Hardware store at 125 North Main Street, recently sold to M. Dinan. He will continue to keep an interest in the Chapin Street store. The new establishment will be greatly improved after the present stock is disposed of.

Tilden, Neb.—W. W. Weaver, of this place, has sold his Hardware store to A. N. Snider.

Windsor, N. Y.—James C. Elliott has purchased the stock of tinware, tools, etc., of the estate of the late H. R. Rider, and will continue the business in the same place. Melvin Warner will have charge of the business.

Watertown, N. Y.—The Harbottle Co., engaged in plumbing, heating, roofing and ventilating, have just established a new department, that of general Hardware. This is strictly a new departure for this concern and the fixtures and stock will be thoroughly new throughout. Shelf and heavy Hardware and everything for the blacksmith, carpenter, cabinetmaker and machinist in the line of tools and supplies will be carried in the stock.

Why it PAYS to buy

HOLIDAY GOODS

of Butler Brothers

Though we shall this year, as usual, sell several times as many Holiday goods as any other jobbing concern in the trade, the biggest half of our business is yet to come.

We dare to carry a complete stock of Holiday Goods long after the "drummer's" season is over, because we sell by catalogue only. Our book calls on a hundred thousand merchants in the time a salesman could call on ten.

When you buy Holiday Goods of us you do not have to load yourself down many months in advance of the selling season. We shape our stock to suit your convenience.

Our annual "Santa Claus" edition is just out. It contains everything we have to offer and names the only prices we have to quote. Everything is illustrated and described so you know what you are to get.

This catalogue takes the holiday markets of the world to your store. Whatever there is to be had that SELLS—new or old—appears therein, and at a right price Whether you want a little fill-in order of $20, or a full-grown $2,000 stock, we have the goods ready for you.

Now that the rush season is about to begin it is worth your while to remember that mail orders are the only kind of orders we know anything about.

Our catalogue is sent free to any merchant on request. Ask for No. CC 518—the Santa Claus edition.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boston, Mass.—The H. H. Green Paint and Hardware Co. has been incorporated. Capital, $20,000. President and Treasurer, William E. Harmon.

Bozeman, Mont.—The Gallatin County Farmers' Alliance, No. 1, of Montana, has been incorporated. The object of the organization is to deal in farm and dairy products, Hardware, building material, etc., with headquarters at Bozeman, and has a capital stock of $10,000. The Board of Trustees is composed of Z. S. Morgan, of Gallop; A. L. Love, Harry L. Smith, E. Hodgman and T. P. Stevenson, of Bozeman.

Brookdale, Que.—C. Bishop, late of the firm of Williams Bros., has formed a partnership with William Butchart to engage in the Hardware business.

Brooklyn, N. Y.—The Harry Kiefer Co. has been incorporated (heating apparatus and Hardware). Capital, $12,000. Directors: Harry Kiefer, C. E. Scriven and C. W. Cougden, Brooklyn.

Gainesville, Fla.—The S. J. Thomas Co. has been incorporated. Capital stock, $50,000, fully paid up. The purpose of the concern will be to do a general mercantile and contracting business in connection with Hardware, seeds and furniture, and supplies and materials of all kinds appertaining thereto. This corporation is due to the consolidation of the Hardware interest of S. J. Thomas and T. F. Thomas, who recently purchased the stock of the T. F. Thomas Hardware and Seed Co., owned and operated by James M. and Lee Graham. The new concern expects to increase its list of traveling salesmen, thus extending its business. The incorporators are: S. J. Thomas, T. F. Thomas and R. E. Hill, Jr.

Galt, Mo.—The Farmers' Hardware Co. has been incorporated. Capital stock, $5,000. Incorporators: William M. Sprout, A. Pettit, W. D. Downing and others.

Horseheads, N. Y.—Roy Bowers will engage in the Hardware business.

Mason City, Iowa.—The Bailey-Downing Hardware Co. has been incorporated. The capital stock is $25,000. L R.. Bailey and others are the incorporators.

New Orleans, La.—The J. Frank Hardware Co. has been incorporated with a capital of $25,000, to do a general Hardware business. W. J. Gaylor is president; J Frank, manager, and L. Farque, secretary and treasurer.

New York, N. Y.—Bellows & Myers Co. has been incorporated; agricultural implements. Capital, $6,000. Incorporators and directors for the first year: Lillian A. Bellows, F. A. Myers, H. E. Herman, Brooklyn.

New York, N. Y.—The Hayden Automatic and Equipment Co. has been incorporated; Hardware goods. Capital, $500. Incorporators and directors for the first year: C. A. Hayden, J. H. Hayden, Elsie V. Hayden, New York.

Redondo, Cal.—John E. Gish, of Pasadena, has opened a new Hardware store.

Rockland, Me.—Norton & Cunningham have opened a new Hardware store in the Odd Fellows' Block.

Trenton, Mo.—The Witten Hardware Co. has been incorporated. Capital stock, $20,000, one-half paid. Incorporators: S. G. Witten, A. E. Fisher and J. B. Wright.

Warrensburg, Ill.—Postmaster Schroeder, of this place, will open up a Hardware and Furniture business.

Whittier, Cal.—The Humphrey-Daggett Hardware Co. has been incorporated. Directors: H. E. Humphrey, of Whittier; C. H. Daggett, H. L. Daggett and Sarah M. Daggett, of Los Angeles, and H. H. Humphrey, of Minneapolis, Minn. Capital stock, $25,000.

Vanlue, Ohio.—Messrs. Johnson and Bowman, of Wharton, have leased the Herman Building, and will open a Hardware and implement store.

Changes.

Allegan, Mich.—Roberts Bros., of Schoolcraft, have purchased the Baxter & Davison Hardware stock.

Americus, Ga.—The Messrs. Sheffield have recently purchased the entire undivided half interest in the Huntington estate in the Sheffield-Huntington Co., a wealthy corporation extensively engaged in the Hardware business.

Anniston, Ala.—A branch house of the City Hardware Co. has been opened in Oxford. E. Stevens, who has been identified with the company for some time, will be in charge there. A full line of Hardware, buggies, wagons, harness, etc., will be carried.

Ashland, Ky.—The Foster Hardware Co. has about completed a large warehouse on Main Street, almost opposite their store.

Ashland, Ky.—The personnel of the Ashland Hardware Co. changed somewhat recently, when D. L. Bash, of this city, bought the interests of H. F. McCown and assumed his place in the firm at once.

Belton, Texas.—Lee Peyton, who has for many years been a prominent Hardware mechant of Belton, leaves to-morrow for Vicksburg, Miss., where he has acquired one-third interest in the Wright Bros. Hardware Co., a concern which does an annual business of $300,000. He will have charge of the retail department. Charles B. Smith takes the place vacated by Mr. Peyton in the Smith-Peyton Hardware firm here.

Birmingham, Ala.—Isaac A. Lewis, of the Lewis Hardware Co., has purchased the stock of goods of Terry Brothers, who have conducted a five and ten-cent store in the Steiner Block for some time. Mr. Lewis is moving the stock to his double stores on Nineteenth Street.

Canandaigua, N. Y.—Alex. Davidson is making extensive improvements at his Hardware store, including an elevator, stove show room on the second floor and increased storage capacity on the third floor.

Cleveland, Ohio.—The Cleveland Hardware Co. are erecting a four-story addition, of heavy steel construction, 175 feet long and 80 feet wide.

Coal City, Ill.—William Mill and Bert Walters have purchased the large stock of furniture and Hardware of George A. Trotter.

Crawfordsville, Ind.—Mr. Nichols has purchased and taken possession of the Charles W. Ross Hardware store.

Decatur, Ill.—J. M. Hughes has sold his agricultural implement business on South Water Street to J. A. Reavis. Mr. Hughes retires on account of poor health.

De Land, Ill.—C. E. Kesler, of this place, and William Kesler, of Litchfield, Ill., have purchased the Hardware stock of Haggard & Armstrong.

Denison, Texas.—The Jackson Howle Hardware Co. has bought the stock of Hardware belonging to Darnell & Hardie.

Denton, Tex.—Work has been commenced this week on enlarging the brick building occupied by the Hardware firm of Taylor & Gentle. The building will be extended 20 feet, which will make it 100 feet in length. The rapid and continual growth of this firm's business demanded additional room. This extension gives them a grand total of 8,000 square feet of floor space.

Lyons, Neb.—W. H. Clements and E. P. Ustick have bought the implement stock of Palmquist, Shellberg & Co.

Marion, Ohio.—George Lawrence, a member of the firm of Lawrence & Geddis, implement dealers, has disposed of his interests to Harry Rice, of Caledonia. Mr. Rice is well acquainted with the implement business. The firm will be known as Geddis & Rice.

Mechanicsburg, Ohio.—E. K. Hulmes & Son have taken possesion of the Hardware store lately purchased.

Nashville, Tenn.—The Dudley Hardware Co. has appointed H. H. Mayberry as their Birmingham agent.

Minier, Ill.—J. M. Heart & Son have sold their Hardware and furniture stock to Ed. Buchreg.

Moscow, Pa.—F. B. Gardner has sold his Hardware store to a Mr. Heible.

Painted Post N. Y.—The partnership lately subsisting between James C. Orr, Walter A. Smith and Edwin F. Smith, under the firm name of Orr & Smith Hardware Co., was dissolved on the 10th day of September, 1904, by mutual consent.

Pine Bluff, Ark.—Work has been started on a new building for the McGaughy Hardware Co. on Main Street, between Third and Fourth Avenues.

Pt. Clinton, Ohio.—Henry Bredbeck has sold his Hardware store to a firm composed of J. E. D. Washburne, Amos Fall, Jr., and Charles Wolf.

Radcliff, Iowa.—The C. H. Widener Hardware business, buildings and real estate were recently traded to William Webber for 760 acres of land, crops and farming implements in Southeastern Kansas.

Raritan, Ill.—Allison & Dawson have purchased the implement business of Huston & Darr, and will conduct it in the future.

Redlion, Pa.—Howard H. Sheeler has moved his Hardware store into his new building, on South Main Street.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published,

New Incorporations, Etc.

Boston, Mass.—The Continental Wood Screw Co. has been incorporated; capital, $150,000; president, Thomas P. Swift; treasurer, Alden B. Webber.

Boston, Mass.—The H. H. Green Paint and Hardware Co. has been incorporated. Capital, $20,000. President and treasurer, William E. Harmon, 941 Washington Street, Boston; clerk, Arthur P. French, 89 State Street, Boston; directors, as above named and Arthur W. Thayer, Brockton.

Brooklyn, N. Y.—The Robert P. Brown Manufacturing Co. has been incorporated; manufacture wire products; capital, $10,000. Incorporators and directors for the first year: William W. Brown, Ridley Park, Pa.; H. E. Bates, New York; F. S. Davison, Brooklyn.

Brooklyn, N. Y.—The Serving Tray Co. has been incorporated (kitchen utensils). Capital, $2,000. Directors: Jordan L. Snedecor, of New York; John Wright, and Ida B. Fowler, of Brooklyn.

Canastota, N. Y.—J. L. Oakes has entered into partnershp with J. W. Bouchard for the purpose of manufacturing a device for stropping razors. The device, which was invented by Mr. Bouchard, will be manufactured in Canastota.

Cedar Rapids, Iowa.—The Denning Wire and Fence Co. has recently been incorporated with a capital stock of $500,000 to take over the plants of J. M. Denning and make further enlargements for the manufacture of his wire fence and other specialties.

Chattanooga, Tenn.—The Tennessee Stove and Manufacturing Co., of Hamilton County, has been incorporated. Following are the officers chosen: President and treasurer, J. L. Caldwell; first vice-president, G. N. Henson; second vice-president, R. B. Davenport; secretary, G. W. Corey; directors: J. L. Caldwell, G. N. Henson, R. B. Davenport, G. W. Corey, R. L. Westcott, J. L. Foust. The capital stock is to be $50,000. It is expected that the plant will be ready for business by January 1.

Chicago, Ill.—The Haynes-Bates Manufacturing Co., Chicago. Capital, $30,000. Manufacturing Hardware specialties. Incorporators: E. L. Haynes, George C. Bates and George E. Caughey.

Cleveland, Ohio.—The Terrokraft Co. has been incorporated. Capital, $50,000. Incorporators: F. C. French, W. F. Karr, A. A. Stearns, Leonard Parks and George M. Powell. They will make builders' Hardware, etc.

Connersville, Ind.—A new concern has been organized for the manufacture of steel tools. The officers of the new company are: Simon Doenges, president; W. L. Cortelyon, secretary and treasurer, and L. M. McMeans, superintendent. The new concern will be known as the Standard Tool Works, and will begin operation at once on South Central Avenue. All kinds of steel tools will be made and also a specialty will be made of general repair work.

Des Moines, Iowa.—A company known as the One Minute Washing Machine Co. is being organized by D. B. Lyons and others, for the manufacture of washing machines after new designs patented by Mr. Lyons.

Duluth, Minn.—The Household Novelty Co. has been incorporated. Capital stock, $50,000, and it will manufacture novelties for household use. Carl E. Lundblad, John J. Wangenstein and John Jenswold Jr., are the incorporators.

Galesburg, Ill.—The Galesburg Coulter-Disc Co. has been incorporated. Capital, $100,000. Manufacture of tools, implements and machinery. Incorporators: S. A. Ingersoll, L. W. Sanborn and C. M. Avery.

Indianapolis, Ind.—The Hoosier Jack and Combination Tool Co. has been incorporated. Capital stock, $10,000. Directors: J. B. Runner, L. J. Dun and O. E. Dunn.

Milwaukee, Wis.—The Steitz Implement Co. has been incorporated. Capital, $50,000. Incorporators: James A. Sheriffs, Leo Torbe and Ashley S. Farnham.

Mt. Gilead, Ohio—The Mobile Garden Improvement Mfg. Co. has been incorporated. Capital stock, $10,000. Incorporators: W. H. M. Carlisle, T. Brown, A. Cohn, J. B. Baumberger and N. Tucker.

New Rochelle, N. Y.—The J. L. Mitchell Paint Co. has been incorporated. Capital, $25,000. Directors: J. E. Mitchell and P. E. North, New Rochelle, and George Hunter, Brooklyn.

New York, N. Y.—The American File Sharpener Co. has been incorporated. Capital, $25,000. Directors: J. S. Murphy, W. J. Moran and P. T. Sherman, of New York City.

New York, N. Y.—The New York Automatic Washing Machine Co., of New York City. Capital, $300,000, and directors, Maross Jenkins, of Oakland, N. J., and Richard Dougherty, and J. J. McDavitt, of New York City.

Prophetstown, Ill.—The Eclipse Lawn Mower Co. has been incorporated. Capital, $10,000. Manufacturing lawn mowers. Incorporators: W. M. Carqueville, C. L. Fernow, R. A. Carqueville.

Rockford, Ill.—The J. L. Clark Manufacturing Co. has been incorporated. Capital, $25,000. Manufacturing Hardware. Incorporators: J. I. Clark, Mary E. Clark and I. H. Clark.

Taunton, Mass.—A new industry has been started in Taunton. Hiram Bliss and J. A. Welch have a new process of plating nails, tacks and small articles, claimed to be far superior and also cheaper than the old process of tinning or galvanizing.

Toronto, Can.—The Imperial Hardware Manufacture Co. has been incorporated; capital, $40,000.

Wallingford, Conn.—The Williams & Goldenblum Co. has been incorporated. It will manufacture saws made from stripped steel and will do business in the United States, Mexico and Canada. The present capital is $2,200.

Washington, D. C.—The National Cutlery and Machinery Co. has been incorporated. Capital, $250,000. Incorporators, Jacob Oefinger, Edgar Chambers, Messrs. Frere, McLaughlin and Ochsenreiter.

West Point, Miss.—The Gem Stove Works has been incorporated, with a capital stock of $10,000.

Winston-Salem, N. C.—The Winston Handle Co. has nearly finished the erection of a large and complete plant for the manufacture of handles, and is about to commence operations in it. The company will solicit both foreign and domestic trade.

Changes.

Canastota, N. Y.—A change has just taken place in the membership of the Patten & Stafford Co., successors to Patten & Stafford, manufacturers of wheel rakes, harrows and other farming implements. E. L. Mason and E. C. Milburn have disposed of their stock in the company and retired from the firm. The stock is now owned equally by William H. Patten and Milton Delano. Mr. Milburn will continue as an employee of the company.

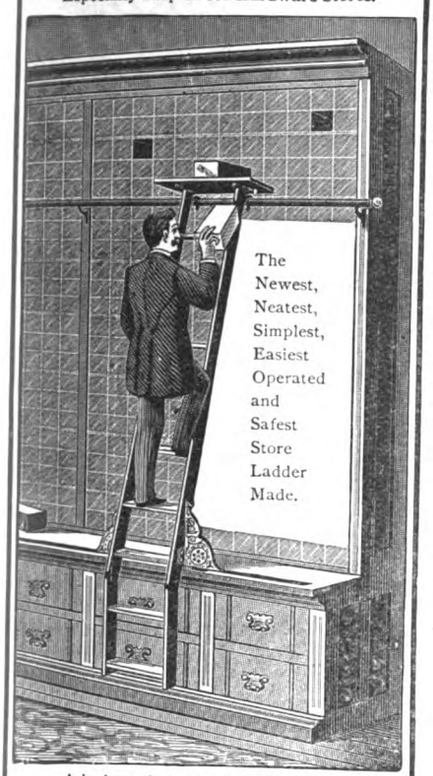
Chicago, Ill.—The Kellogg Harvester Co. has increased its capital stock from $50,000 to $200,000.

Detroit, Mich.—The sale of the Simonetta File Works, High Street, has been indefinitely postponed, and the stockholders are now trying to make a new deal by which additional capital can be secured and operations resumed. They believe there is a good thing in the business if conducted on business methods.

Erie, Pa.—The Odin Stove Co. has commenced work on a new addition to the West Twelfth Street plant. The addition will be of brick and will be 123 feet long and 52 feet deep.

Evansville, Ind.—The Evansville Stove Works have finished moving their machinery, patterns, moulds, etc., to their new building in Outer Fulton Avenue from the buildings at the corner of Franklin Street and Seventh avenue.

Franklinville, N. Y.—W. N. Sill has sold his interest in the plant of the Ontario Knife Co. to J. L. Burritt, of New York. Mr. Burritt and associates will enlarge the plant and employ about fifteen more men than at present.



La Crosse, Wis.—The Summit Stove Co. will establish a branch factory here, which, it is expected, will be in operation by February 1st.

Milwaukee, Wis.—The Playsted Tool and Die Co. has increased its capital stock from $5,000 to $10,000.

THE BICYCLE STEP LADDER CO.,
65 Randolph St., CHICAGO, ILL.

Sargent's Gem Food Chopper

is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Baltimore, Md.—The George C. Sherick Co. has been incorporated to deal in firearms, sportsmen's supplies and cigars and tobacco. Incorporators: Benjamin C. Nicoll, George C. Sherick, Charles C. Carver, John J. Gregg and I. Spence Crevey. Capital stock, $1,000.

Franklin, Pa.—The Franklin Motor Co. have broken ground for a new building to be used as an automobile storage and repair shop. There will be ample room for storage of twenty-five machines. They intend equipping the repair shop with all modern appliances for repair of automobiles and Bicycles.

Nashville, Tenn.—The White Haven Gun Co., of Shelby County, has been incorporated with $6,000 capital stock. The incorporators are: J. B. Hildebrand, J. W. Hale, W. B. Van Hook, J. H. Van Hook, C. B. Hildebrand, J. N. Beasley and E. W. Hale.

New York, N. Y.—The Coasting-Cycle Co. has been incorporated. Capital, $50,000. Directors: E. A. Smith and Frank Zittel, New York; R. C. Wack, Hastings-on-Hudson.

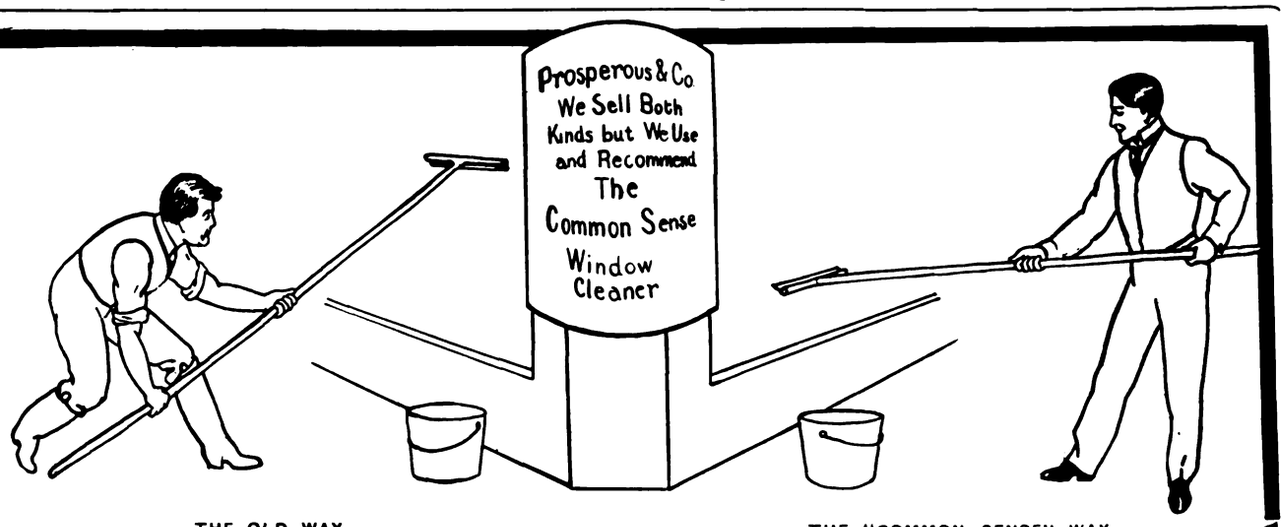
Scio, N. Y.—Gene Smith, whose store was burned, has purchased the store of Coyle Brothers and moved it back from the street and will fit it up for a gas office and bicycle repair shop.

Southampton, N. Y.—Harry Lillywhite has gone to Hot Springs, Va., where he will conduct a sporting goods business during the Fall and early Winter and after the holidays will go to Florida, to conduct his business there during the Southern season. William Lillywhite is still in Southampton and will continue the business here until the opening of the Florida season, when he will go directly to St. Augustine and join his father there.

Changes.

Akron, Ohio.—Joseph & Gumbert have combined their Bicycle business with the Century Cycle Co. The owners of the new business are J. F. Joseph, Philip Wagner and Charles H. Gumbert.

Chicago, Ill.—The Diamond Rubber Co. has opened new branches at Minneapolis and St. Louis. At the latter R. L. McCrea, who has long been identified with the Chicago office of the company, will be in charge at 3966 Olive Street, and at Minneapolis W. E. Roby, who has been looking after trade for the Diamond Co. in that section for some time, will take care of the business, the stores being located at 611 First Avene, South. Complete tire stocks will be carried at both new branches.



Chicago, Ill.—The Pope Mfg. Co. has begun the abandonment of the Crescent factory. As the work on hand is completed the plant will be shut down gradually and dismantled. The work of manufacturing, so far as the Western department is concerned, will be transferred to and concentrated in the Rambler factory, which is owned by the Pope people.

Elkhart, Ind.—The Buescher Toe Clip Co. has succeeded the Buescher Mfg Co.; in addition to toe clips, the L. A. W. combination lock will be manufactured. Changes in the latter now make it applicable to chainless and motor bicycles, as well as the chain driven kind; it remains of vest pocket size.

Plymouth, Wis.—R. H. Weber has purchased the business of A. Sittmaus, at Watertown, Wis., and will make his headquarters there; he will, however, also continue his shop at Plymouth.

Scranton, Pa.—E. C. Bechtold, who has conducted a bicycle store on North Main Street for several years, has disposed of the business to Charles C. Garrison, of Schenectady, N. Y.

Syracuse, N. Y.—We have received word that the firm of Siegel, Cooper & Co., of New York and Chicago, is negotiating with the Syracuse Arms Co. for the purchase of its business.

THE OLD WAY THE "COMMON SENSE" WAY

A Clean Sweep

That is what we made when we introduced the trade to

COMMON SENSE WINDOW CLEANERS

By the adjustable spring and hinge, the rubber adjusts itself to any angle allowing a

Clean sweep from top to bottom of the window

with the old style the pole hit the sidewalk before the window was half cleaned.

No more half cleaned windows—sloppy sidewalks—chapped hands and tired backs.

That spring hinge makes **the rubbers last double time.**

Don't Argue **Don't Wait**

"Odorless" Refrigerators
COLD STORAGE IN PERFECTION.

Low Temperature is Not the Only essential of perfect cold storage—proper ventilation is absolutely necessary to good results. In fact, a higher temperature that has a free circulation of air is better than a lower one that has no air in motion.

The "Odorless" Refrigerators not only produce the coldest storage, with the least ice, but so perfect is the ventilating system that milk, butter, fish and fruit may be kept together without giving the least taint to each other. We recommend them fully. Write for Catalog R.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

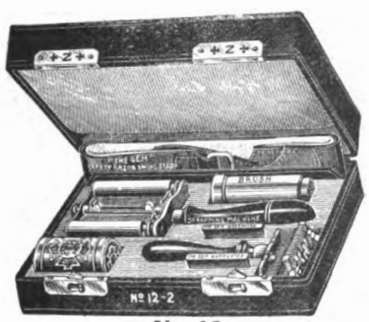
Gems for the Holidays

IF you want to make a good impression upon buyers of Holiday goods, put in a stock of Gem Safety Razors.



THEY always have been quick sellers and besides, there is more money in handling Gems than any other kind.

To See A Gem Safety Razor Is To Want It.

No. 1

Contains Frame and One Blade. Price **$2.50**

No. 12

Complete Set, doe skin lined, complete Razor, extra Blade, Soap, Brush, Stropping Machine and Strop. Price **$9.00**

No. 21

Small, neat and compact. Holds Stropping Machine, Strop, Razor complete. Price **$5.00**

OUR NEW RIGID MODEL

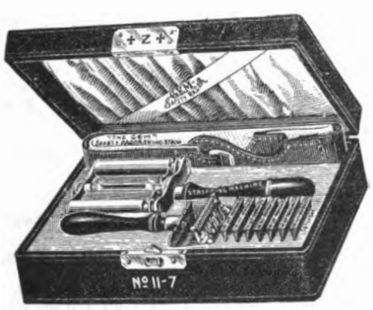
Excels in simplicity, durability and neatness. It is unique, most easily cleaned, too, since we have discarded all parts except the famous automatic self adjusting clips.

No. 2

Contains Frame and two Blades. Price . . . **$3.50**

This set comes also with 3, 4, 5 and 6 Blades. Add $1.00 for every extra Blade.

CAPTURES CUSTOMERS



It has captured millions of them—and they are all satisfied because it gives constant satisfaction.

Show it to a customer—explain its points of excellence—the sale is made through which others will come to you.

No. 9

Certainly the most complete and handsome shaving outfit, doe skin lined. Complete Razor, Mirror, Stropping Machine and Stropping Comb, Cosmetique. Price **$14.00**

No. 11-7

Beautiful satin lined. 7 Blades, Holder, Stropping Machine and Strop. Price **$12.00**

With two Blades only **$6.50**

No. 7

Contains Razor, 7 extra Blades, one for every day of the week. Price . . **$9.00**

GET OUR CATALOG WITH ROCK BOTTOM PRICES.

Difficult to Keep Up.

S great and so constant has been the demand for the

Bradley Shelf Bracket

that we have not at all times been able to supply it. It is

Exceptionally Strong.

It will uphold more stuff than can be piled on it.

It looks lighter than others but is stronger—because of the distribution of its metal.

It is the bracket for everybody. That's why it sells so quickly.

ATLAS MFG. CO.,
New Haven, Conn.

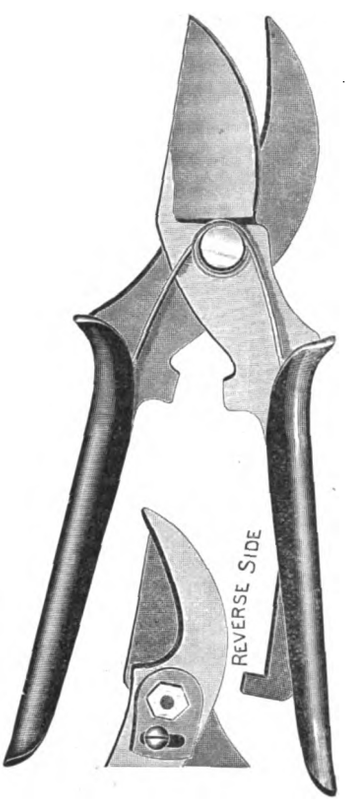
HURWOOD BRAD AWLS

Are of the lasting kind. One piece of best quality crucible steel extending from point to head and a rivet through ferrule, wood and steel, have given our Brad Awls the name and fame of outlasting six of any other kind made.

Built for business they are business builders.

* *

Our catalog tells an interesting tale about Hurwood Tools. You ought to have a copy for reference. Shall we send it?



HURWOOD MFG. CO., Inc.
Bridgeport, Conn.

YES! We make 'em—Cronk's Oregon Pattern Pruning Shears

They enjoy an enduring reputation for efficiency and durability among users everywhere.

Our line is large and it will pay you to investigate.

Hardware Specialties

Our complete line is fully described in our 1904 catalog.

You ought to have a copy—may we send one?

THIS IS A BUSY SEASON For the Dealer Handling the

20th CENTURY CLIPPER

LIST PRICE ONLY $5.00. Costs but little more than a hand Clipper and does 100 times the work.

This machine weighs only 15 lbs. Turns easy and cuts fast.

Packed in a small box, 14x14¼ inches, and sell like hot cakes, as the extremely low price brings it within the reach of every man owning a horse.

How's Your Stock? Now's the time to order

Catalog describing every modern type of Clipper sent on request.

MADE BY **Chicago Flexible Shaft Company**

106 La Salle Avenue, CHICAGO

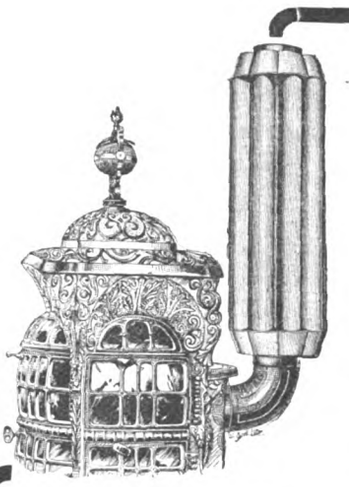
NEW YORK OFFICE, 97 Chambers Street.

We make more than 90 per cent. of all the Clipping Machines sold.

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.



J. W. WHITE,

General Industrial Agent,

Seaboard Air Line Railway,

Portsmouth, Virginia.

We have a good location for your plant.

60% HEAT

Wasted or Saved--

WHICH?

We know of no device which positively saves 60 per cent. of the heat obtained from fuel usually going up the chimney and which effects a corresponding reduction in coal bills, than

THE PERFECTION RADIATOR

Scientifically constructed, it controls and generates from any stove or furnace 60 per cent. of heat usually going to waste without its use.

Fits any stove or furnace—makes both do double duty.

Ask for our "Cold Facts on a Warm Subject"—it tells all about it.

Sell the Blount Door Check

NOW that Winter is here, Hardware Dealers may work up a handsome, money-making trade in selling and applying the BLOUNT DOOR CHECK and SPRING. ¶ The Blount is a liquid Check. It is made in six sizes to fit any door and in various finishes. It is used extensively on interior as well as on exterior doors, and gives complete control of their action, closing doors quickly, surely, yet gently. *Folder for the asking*

The Blackstone Rotary Washer

It's very name is a mark of merit and a guarantee of its superior workmanship and working qualities.

* * *

It is a genuine washday worry killer.

* * *

No woman ever invested in a Blackstone Rotary without immediately finding out that it adds to her purse, subtracts from her worries and compounds her interests in life.

The Blackstone Rotary Washer is a washday favorite.

* * *

For these very reasons it has been, and always will be, a good seller.

* * *

You miss an opportunity by not handling it and displaying it in your store.

* * *

You ought to have our catalogue and prices. It puts other washers in the shade when it comes to giving all-round satisfaction.

The Blackstone Mfg. Co., Jamestown, N. Y.

Every Dealer in Hardware, Stoves, or House Furnishing Goods should have a copy of the Blacklock Catalogue.

This Catalogue illustrates a very attractive line of Andirons, Sad Irons, and Stove and Country Hollow Ware,—and we are anxious to mail you this Catalogue and our prices,—for you will find our line embodies only highest quality,—and our prices are strong magnets.

Our Line of Andirons and Fire Place Equipment is particularly strong, and embraces attractive designs, finished in Wrought Iron Dead Black, or Gold or Aluminum Bronze. Our Andirons make a strong side line for any energetic Hardware man.

But we want to send you our complete catalogue and prices.

Send for them.

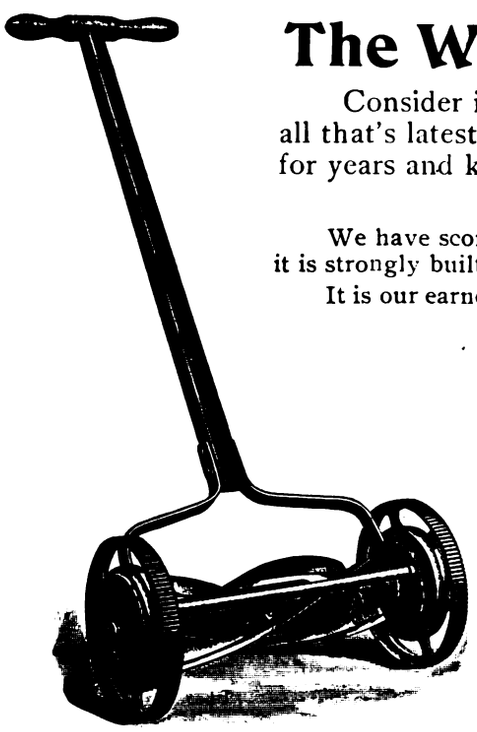
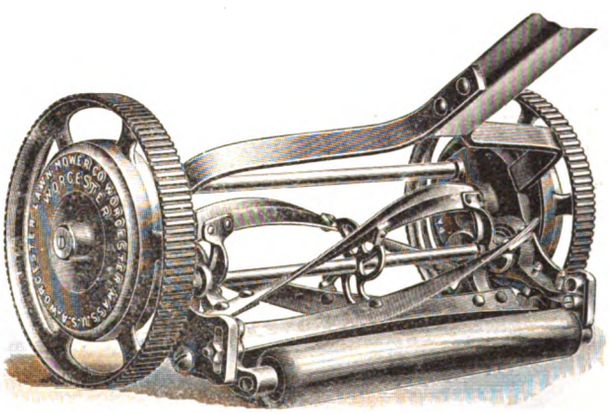
"To Swear By and To Swear At" A Lawn Mower



Are you looking for trouble? Then buy a Lawn Mower of the ordinary type. You'll find trouble in every corner.

Instead of being a money maker for you, on the quiet, it will bring back to you dissatisfied customers who want their money back.

You'll go to bed feeling tired and will get up in the morning with the same feeling. It makes you cross and cranky. You'll kick the dog—swear at the cat—scold your mother-in-law.



The Worcester Lawn Mower

Consider its merits and your troubles will cease. It embodies all that's latest—all that's best. We have been in the business for years and know how to make 'em.

We have scores of customers who swear by the "Worcester" because it is strongly built, easy running, up-to-date.

It is our earnest desire to convince you that it's reputation is well earned.

Our Catalog tells our story in detail. Send for it.

Wholesale Dealers in General Hardware, Sporting Goods, Mine Supplies, &c.

Fully realizing the fact that we could not handle our constantly increasing business with our present facilities, we purchased a block 187½ feet square, with buildings on same that have a floor space of over one hundred and twenty thousand square feet, and ground enough to increase it to meet our future needs. We can safely say that we will have as well an equipped wholesale hardware store as there is in the state. With our increased facilities, we expect to be able to give prompt and satisfactory service to our many friends. We wish to acknowledge our appreciation of the liberal patronage with which we have been favored from dealers throughout Ohio and West Virginia.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

Our New Breast Drills

No. 19 has Ball Bearings and Alligator Jaws The Drive Wheel is 5 inches in diameter. The gearing is changeable from even to speeded three to one. The crank is adjustable, permitting of variation in length of 3½ inches. The stock and chuck are polished. The hub casting is painted black and the gear and breastplate aluminum color.

Price.....per dozen, $21.00

No. 25 is a combination Breast and Chain Drill, and can be used either as a regular Breast Drill, or with the chain feed when desirable.

The frame and gears to this Drill, are exactly like our No. 12. The addition of the chain adds very much to the scope of the Drill, and is a very desirable attachment, especially for plumbers, millwrights and electricians.

Price.....per doz. $45.00

HARDWARE

The Pelouze Scale and Manufacturing Co., Chicago, Ill., have received from the Louisiana Purchase Exposition the highest award for Family and Postal Scales.

At the annual meeting of the Board of Directors of the National Association of Credit Men, held at Chicago, October 24, 1904, a resolution was adopted naming the convention days as June 14th, 15th, and 16th, 1905. The convention will be held at Memphis, Tenn.

The Philadelphia Lawn Mower Co., Philadelphia, has changed its New England agency for the Genuine Philadelphia Lawn Mowers, and Bigelow & Dowse Co., Boston, is now agent. The latter company will carry a complete line and stock of Hand and Horse Mowers, and samples of the 1905 line are now on exhibition in its store.

Geo. H. Harper has resigned his connection with the sales department of Clendennin Bros., Baltimore, Md., and will return to the National Enameling & Stamping Co. November 10. Mr. Harper, who is well and favorably known to the Southern trade, was formerly identified with the National Co.

The Livingston Nail Co., 104 Reade Street, New York, has been in business for forty years, and has paid such close attention in that time to the wants of the trade that they have become the established headquarters for everythnig in the way of Blacksmiths' Supplies. They carry a full stock of the various brands of Horse Nails, Horse Shoes, Hay Budden Anvils, Gautier Toe Calks, Heller Brothers Co.'s rasps, tools and files, together with welding dies, horse shoe pads and "Anchor" Blacksmiths' aprons.

The Ivory Handle Co., Hope, Ark., have issued, under date of September 10th, 1904, a new price list on axe, pick, sledge, tool, maul, hammer and hatchet handles. All of their handles are standard grade as adopted by the Hickory Handle Manufacturers' Association, September 10th, 1904. They make handles to special patterns for which, of course, they charge special prices. The above price list is a very complete and comprehensive one, and will be sent to dealers upon application.

HANDSOME MONTHLY CALENDARS.

A. R. Stansbury, of Norfolk, Va., is sending out a very handsome series of envelope size monthly calendars, the product of the Osborne Co., of New York. In the panel on the front of the calendar is shown reproductions of well-known paintings made by the three color process. On the back of the calendar is given a comprehensive list of the lines of goods handled by Mr. Stansbury.

CARBORUNDUM.

The world's supply of carborundum is dependent upon the operation of three plants only, that of the inventor, Acheson, being the best known and probably the largest. At the Acheson works, at Niagara Falls, there are in use 12 furnaces, each requiring, when in full operation, 1,000 horse-power. The furnaces are about 30 feet in length. They consist of a core of carbon rods, laid zigzag, with cross blocks bridging the angles of the zigzags, round which is packed the charge of coke and sand and the flux of salt, the whole being supported by a brick box. A temperature of about 6,000 degrees F. is maintained for 30 hours, after which the product is allowed to cool, and is then removed.

A FIRE ARMS TOWN.

The city of Norwich, Conn., has become famous for the manufacture of firearms and its citizens are justly proud of their several progressive firms making these goods. The oldest firearms firm in Norwich is the Hopkins & Allen Arms Co., whose model plant, built with an eye to the comfort and health of its employes, furnishes employment to an average of 600 people. The firm was started in 1867 by Messrs. Charles W. Samuel and Henry Hopkins, Col. Charles A. Converse, Horace A. Briggs and Merwin Hurlcurt & Co., of New York, and in the early seventies a factory on the site of the present factory was purchased, where the business has since been conducted. Through the efforts of Arthur H. Brewer, Chas. B. Lee, Chas. P. Coggswell, C. Henry Osgood and Frank T. Brown, a reorganization of the company was effected in 1898 and the business was resumed under the title of the Hopkins & Allen Arms Company, with a capital of $100,000. Then came the fire of February, 1900, which wiped out the entire plant, which was at once rebuilt, and the concern now occupies a fine five-story brick factory, comprising 85,000 square feet of floor space, from which there issues 138 varieties of revolvers, rifles and single and double-barrel shotguns, which find a market all over the United States and Canada, while their export trade includes Australia, South America and Europe. In May, 1901, the Forehand Arms Co., of Worcester, was bought out and the next April, when the new factory was ready, that business was removed to Norwich. The present capital is $300,000, and the directors are A. H. Brewer, Chas. H. Osgood, Chas. B Lee, Horace A. Briggs, Frank T. Brown, W. A. Briscoe, C. H. Preston, Archibald Mitchell and Gardiner Hall, Jr.

Tobin Arms Manufacturing Co., Inc., is one of the newer manufacturing industries of Norwich, Conn., and formed by a group of Norwich business men in August, 1903, who elected F. M. Tobin, president; A. L. Potter, vice-president, and B. H. Palmer, secretary and treasurer. B. A. Herrick, S. B. Palmer, William H. Oat and W. E. Post comprise the other directors. The company was capitalized at $50,000, and new buildings were erected and the old rebuilt on a factory site purchased in the Greeneville section of the city. The first shipment of guns was made in September, 1903. The factory employs about seventy-five hands in turning out a double-barrel, hammerless shotgun of superior quality and workmanship. The gun is made in seven varieties from patents and inventions secured by Mr. Tobin for the company. Its many improvements and simplicity of construction well deserve the name of "Simplex," the trade mark under which the product of this factory goes to the market.

The W. H. Davenport Firearms Co. reflects the inventive genius of William H. Davenport, and the goods manufactured embody the inventions and improvements patented by him in his connection with the manufacture of firearms during the past fifty years. These include among others the present popular system of detachable barrels, the automatic ejector, the strong and durable metal joint, and the folding flush screw key, all of which are found in the Davenport guns. Beginning business in 1891 with a capital of $12,000, they have enlarged their plant from time to time until they now occupy a building four stories and basement, each covering 7,500 square feet of floor space, as well as two pieces of developed property adjoining. The goods now manufactured include single and double-hammer and hammerless shotguns and various styles of small bore sporting rifles. An average of 250 hands are employed. The present capital is $209,000. The officers are: M. M. Whitemore, president; William H. Davenport, vice-president; H. H. Gallup, treasurer; W. C. Davenport, secretary and general manager.

Thirteen years ago a group of representative business men of Norwich organized the Crescent Firearms Co., and engaged in the manufacture of single and double-barrelled shotguns, employing twenty men at first, growing steadily until at present 150 hands are employed. Their product is distributed through the South and West. The capital stock of the company is $74,400, and the officers are H. H. Gallup, president; F. A. Foster, vice-president and treasurer; J. C. Henderson, secretary.

The business of the Thames Arms Co. was founded in 1895 by Frederic W. Cary and James D. Robertson and was incorporated in 1896 under the name of the Thames Chain and Stamping Co., with a capital of $10,000. For five years bicycle chains were manufactured and in 1900 the manufacture of revolvers was taken up and the plant was removed to its present location. The manufacture of chains was discontinued in 1901 and the name of the corporation was changed to the Thames Arms Co., the capital stock being increased to $37,500. The company manufactures "break-down," automatic shell-ejecting revolvers of various calibres and different length of barrels, blue and nickel finish. The output is 3,000 finished pistols a month and eighty hands are employed. The factory buildings are two stories in height and the floor space occupied is 12,000 square feet. Charles F. Thayer is president of The Thames Arms Co. and James D. Robertson is vice-president and superintendent, while the treasurer and manager is Frederic W. Cary.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

Since the election with its emphatic results, the trade has taken a long breath, and looked forward with gratitude to conditions of prosperity that encourage dealers and manufacturers alike to expect a continuance of a state of affairs that made the past so memorable. Factories and Railroads that have laid off their hands by the thousands, are encouraged by the renewed activity, the large crops, the moving masses of freight that mark the signs of returning confidence, t› take them on again and they become at once harbingers of new conditions that bid fair to last for some time.

The crops are all harvested and promise well, and the prices prevailing will enable them to be disposed of at results which add materially to the wealth of the agriculturist, and incidentally be of benefit to the distributer of Hardware.

Higher values in the Iron and Steel markets exercise an influence that is felt in all branches of the trade; providing a firmer market for products, and where goods in prices have been too near cost the market shows an advance and all concessions are withdrawn.

Orders are growing larger and goods are ordered by dealers with more confidence, more items and larger quantities. Merchants are fully imbued with the feeling that the markets are all of them apt to be affected by the upward tendency of prices and that advances from now on may be looked for.

The next four years are considered safe for business, and as many goods, have not already known anything of an advancing range, and there are heavy goods that will naturally feel the force of the impetus given it by such a movement, such goods will be ordered freely. If the sanguine feeling is not overdone, and speculations succeed the dull feeling that made the trade conservative, the tendency will be a good one. The hand-to-mouth business of the last few months prepares a light stock to fill up and the buyer changes his extreme conservative views for stronger ones.

Manufacturers by the purchase of raw material are now strengthening their surplus stocks and covering their anticipated wants for some time to come; they purchase with a margin for safety against a light stock that brings a degree of confidence in its train. The whole market for Hardware is affected by a firmness that has not been for months.

The Conventions.

The two conventions, that of the National Hardware Association and the American Hardware Manufacturers' Association, held at Atlantic City on Wednesday, Thursday and Friday of last week, were the most important in good results in their history. Never before had so large a number, both of Jobbers and Manufacturers, participated in the accomplishment of so much work, with a degree of harmony worthy of its continuance, than at the present time. The discussions that took place, the papers read, and the points made by the interested members, were all worthy of the attention they created and the results arrived at.

It was settled once for all that the mooted question of selling to Catalogue houses at extreme prices shall be made a subject for reform. The retail dealers of the country whose existence and continuance were jeopardized were fortunate in being represented at the Jobbers Convention by Mr. Bogardus and Mr. Corey, who were able to convince their friends, the Jobbers, that they had rights that were being encroached upon and they look to them to have justice done.

The jobbers, who reported through their Joint Committee, appointed for the purpose, impressed upon the manufacturers a course of action that would redound to the credit of all concerned, and bring a state of harmony that would reconcile the conflicting interests.

The manufacturers, in the discussion on the subject of "Special Brands" found they had a more difficult subject to handle, which, from the jobber's standpoint, was a matter of too much importance to be called down. From the interest with which it was regarded by the jobbers it was made evident early in the discussion that the custom could not be arbitrarily discontinued without detriment to the vital interests of those who had for so long a time enjoyed the privilege; some valuable methods were suggested and adopted by which the extent and scope of the matter will be abridged in some degree and the field of effort contracted in extent for the benefit of all concerned, as will appear in future relations between jobber and manufacturer. This annual interchange of views may always be depended upon to adjust any grievance which either branch of the trade is harboring, and which upon conferring together can readily be rectified. The importance to the trade of the present meeting need not be underrated, as the rough ways are made smooth through the friendly interests which underlie the satisfactory settlement of all contentions. The harmony with which every question was treated, the consideration which was given to views reflecting diverse modes of action, the heart-to-heart talks which may be relied upon to bring order out of chaos and prove their aims are identical, prevailed throughout, and made the present conventions memorable in their importance.

INCREASED PROFITS FOR THE HARDWAREMAN—INCREASED BUSINESS—SILVERWARE IN THE HARDWARE STORE.

There is no disputing the fact that during the past ten years, there has been a constant decrease in the margin of profits in the staple goods handled by the average Hardware store. Almost every Hardwareman sees this tendency of decreasing percentage of profits, and many are looking for a means or a method to enlarge the business and counteract the smaller profits.

In some cases this has been successfully accomplished by broadening the business into a local jobbing trade. If the location is in a small city having good shipping facilities and in the midst of a good local territory, the wholesale business can be built up on a profitable basis. The enlarging of the business in this way appears all the more attractive, if the store is located in a part of the city somewhat away from the retail center. But to go after even a small local jobbing business means the expenditure of much money and time, and to successfully carry on such a business means an increased amount of capital.

Now, there are a large number of Hardware dealers situated in smaller towns or in cities, where the branching out into a jobbing trade is neither practical nor desirable. To such merchants there is another way open for enlarging their trade. It is by adding good paying side lines—enlarging their trade by enlarging their line.

Of all side lines, none fits more readily into the regular Hardware stock, than silverware. And let this include not only table ware, but hollow ware, and gradually enlarge into clocks, and cut glass and even watches and sterling silver goods.

Years ago silver forks replaced those of plain steel—the steel forks can yet be found in almost any Hardware store, but is a comparatively slow seller. The trade, therefore, that years ago came to the Hardwareman on these goods, is now going to the jewelry man. Chafing dishes are sometimes used where formally kitchen ware was only used. Again the trade is going with other channels. Sterling silver and cut glass has superceded other kinds of ware which in former years was purchased in the Hardware store, and the up-to-date merchant must keep these goods in stock if he is desirous of holding that trade which was formally his own. Silverware is a splendid Holiday line. It's attractive and brings customers into the store. The line is profitable showing from 40 to 75 per cent. on the investment. Now is the time to purchase this stock, and like all new lines added, it should be started in a convenient way, and the first year at least it would be best to purchase from a jobber—if possible, from a Hardware jobber, who handles silverware as a side line. Such a jobber could assist very materially the retailer in picking out his line. It is the best the first year, not to go very extensively into the novelties, but to hold closely to staple goods—forks, knives, spoons, hollowware, etc.

Silverware should be attractively displayed, and in bright up-to-date cases. Much in this line is bought for Christmas gifts, and to at least appeal to the artistic taste must be kept attractive and neat and be tastefully arranged.

After the purchasing and placing of the stock, the next important thing is the advertising, and the getting the customers into the store. Besides newspaper advertising a good trade winning method is to have an opening day, and send special invitations to as many of the store's customers and to other prospective customers as possible.

Care should be taken to have the prices as low as the same goods are being sold anywhere. It is well to arrange the stock near the front of the store, thus enabling each one entering the store to see and to know that the line has been added to the stock.

It is well to keep a "want list" and make a note of all goods asked for. The list will be found to be a great help in filling in the stock for spring and in making purchases for the next Christmas trade. If at first the trade does not come as rapidly as is desired, do not become discouraged, but remember that each new departure will require some energy to be established, and the second season will show better results. HAMMERNAIL.

SYSTEMATIZING THE BUSINESS.

BY A SPECIAL CORRESPONDENT.

"One thing at a time," is a motto that is being carried out in the windows of Hardware dealers in a way that is bringing business. That is, one predominant feature in each window. The dingy, unchanged windows are rapidly disappearing, and the windows conveying one idea, and conveying it BIG, are becoming more numerous, some of them being accompanied at the same time by ads. in the papers on the same subject.

The writer noticed some unusually good windows in Warren, Pa., the other day, those of the Pickett Hardware Co. One was a sportsmen's window, with guns lying horizontally on a double rack, and stacked at the side in rows along the side wall. Cartridges, cases, and all sorts of sportsmen's paraphernalia were shown. It was a neat and effective window, nothing of a wonder, but full of snap and merit. Another was a lamp window, the bases being a receding row of steps or platforms, on which the lamps and delicately colored globes and all sorts of fittings were displayed.

"They're all right," remarked the manager, "but you ought to have seen our windows a few months ago. There was an ingenious boy of eighteen here with a good deal of taste, and we turned him loose in the windows. He made them talk. He had a showing of machinists' tools, a display especially of Stewart's goods, though all kinds of machinists' tools were shown. A triangular case took the center at a fair height, and the remainder of the display was built up on receding platforms around.

"Another window was filled with blacksmiths' tools, the center piece being a regular full size blacksmith's bellows and forge. Another showing was of mill supplies, including split steel pulleys, and various tools kindred to the idea. A piece of shafting was hung at the top and was connected by belting to the machine or pulley below. Coils of leather and rubber belting were also part of the exhibit. One important display was made of tools used in drilling oil wells the extent of which can hardly be realized by the uninitiated One window was devoted to "heating," comprising heating stoves, gas stoves and ranges, and all the appliances kindred thereto."

The windows of the Supplee store in Philadelphia work in a triple connection. They were divided recently into three equal parts from front to back, and a single idea carried out in each division, one section containing electrical supplies, another cutlery, and a third, sporting goods.

One big window of Weed & Co., Buffalo, contained a fine exhibit of carving sets for Thanksgiving. It was surmounted by a picture of the National Thanksgiving bird—in the pair—with the suggestion, "It's a bird. So is a set of Weed's Carvers." A great variety of carving knives and forks, in cases and out, were shown, making an imposing display that attracted a great deal of attention.

These exhibits all suggest specialization in window display, advertising and stock keeping. In all lines of business, great stress is laid nowadays on proper advertising and window display methods, and rightly so. But even in a comparatively small store it may be practical to so arrange the stock that the idea of separate departments may be carried out, at least in the principal branches. This not only facilitates waiting on customers, but emphasizes the resources of the dealer, and adds to the appearance of the store. One large exclusively Hardware store emphasizes two points by having two separate apartments partitioned off by counters where, in one, the builder of a home or its future mistress can sit down and inspect the various patterns of locks, knobs, hinges and conspicuous builders' Hardware, and make a careful and leisurely selection. The other apartment is given over to tools used in manual training, this branch of business having grown so rapidly during the past few years that not a few dealers are making a special feature of it.

The Hardware business consists of a multitude of details. Its very complexity suggests the simplifying of it along lines that will compel the attention of the public to the several branches—one at a time—and in a way to impress them with the idea that the particular store is headquarters in the line. Each store had one or two special branches, according to location, whether in an agricultural, manufacturing, oil drilling or waterside district, that are especially prominent. In many cases some interior location, say the back of the store, can be assigned to the big line, with a convenient, tasteful and systematic showing of the goods. A large sign, in colors, surmounting this department, one that can be read from the front of the store, would be in order. As opportunity offers, another spot can be cleared and another special line can be brought into prominence in the same way. This plan, we understand, of course, is followed to a moderate extent in many places, but in a way that attracts no notice. The emphasizing of the departments of the business to the extent we have indicated, however, is not only a convenience to customers, but an economizer of time and an aid for the departments brought to the front.

It is time now to think of the Christmas windows, and of the stock that appeals to the children—house skates, small tool chests, sleds, scroll saws and the like, will have the center of the stage. At this season, prices cut ice, and as far as possible, and in the case of a few leaders, anyway, the price tickets should appear. One window might appropriately be devoted to the things essential to Winter sports, like skates, sleds, hockey clubs and the like, and another to the tool chests, scroll saws, photographic outfits and the like that furnish useful occupations for the young. Don't be afraid of catchy signs. The Christmas trade windows should be among the best of the year.

A BARGAIN PANIC.

In a recent issue of HARDWARE we published a letter from our Cincinnati correspondent, in which he took issue with us on the subject of bargain sales, stating at the same time that in Cincinnati the bargain sale was being worked to its full extent in mercantile establishments of all classes. It is possible that what can succeed in Cincinnati would not succeed in other towns, however, his statement concerning the popularity of the bargain sale would seem to be true in view of the following description of a scene that took place in a Cincinnati store recently as described in true yellow journal style in one of the daily papers of that city:

"Nearly a thousand frantic women, struggling like mad for the privilege of purchasing a ten-cent dishpan, was the spectacle which was exhibited on Central West Fifth Street Tuesday morning. The women, in their efforts to get in and out of the store, tore the hats and bonnets from each other's heads. Jackets and coats were torn to ribbons. More than one woman found her skirts pulled loose from her waist, and in one case a skirt was entirely lost. Packages of merchandise and a dozen pocketbooks were lost in the struggle, but, regardless of all this, the throng still crowded into the packed store-room and fought like maniacs for the bargains. It is not likely that such a scene was ever enacted at a 'sale' in Cincinnati. The police were appealed to in an effort to handle the crowds, and three patrolmen were detailed to the spot. The brawny men were swept from their feet by the women, who paid not the least attention to their admonitions to refrain from crowding and to take their turns. The back doors of the store were opened to permit the egress of the crowd which crushed through the front, but this fact becoming known to some of the women on Fifth Street caused a rush to be made for the alley and through the back door, making matters worse and worse.

"Shortly after 9 o'clock a report started that a baby had been crushed to death in the store. The report seemed to spread through the crowd in an instant, and a panic reigned. Half of the women in the place struggled to get in further and get a glimpse of the baby that was said to have been killed. The other half of the crowd attempted to leave the place. The manager of the place, realizing by this time that the lives or limbs of his customers were in danger, stopped the sale. The word was passed that there were no more dish pans, but the crowd outside saw a dozen or more in the front window and refused to believe. They attempted to force their way past the policemen, but were stopped at the door. The crowd in the store passed out slowly by the alley door, hundreds remaining, in the apparent hope that the sale would begin again. At 10.30 the store was still crowded. During the rush Fifth Street was blocked from curb to curb."

It is possible that the proprietor of the above mentioned store derived benefit from this bargain sale, at the same time it is an open question as to whether enough people were not disgusted with the jam, loss of pocketbooks, clothes, etc., to counteract any benefit that may have been gained. Whatever the results, this is certainly an object lesson of the power of advertising, and one that can be given careful consideration by every Hardware Dealer in the country.

SELF-RELIANCE A GOOD TEACHER.

We often find that boys who have educated themselves in the country, almost without schooling or teachers, make the most vigorous thinkers. They may not be quite as polished or cultivated, in some ways, but they have something better than polish, and that is mental vigor, originality of method, and independence. They do not lean upon their schooling, or depend upon their diplomas; necessity has been their teacher, and they have been forced to act for themselves and be practical; they know little of theories, but they know what will work. They have gained power by solving their own problems. Such self-educated, self-made men carry weight in their communities because they are men of power and think vigorously and strongly, they have learned to concentrate the mind.

Self-help is the only help that will make strong, vigorous lives. Self-reliance is a great educator, and early poverty is a good teacher. Necessity has ever been the priceless spur which has called man out of himself and spurred him on to his goal.

Grit is more than a match for almost any handicap. It overcomes obstacles and abolishes difficulties. It is the man who makes an opportunity and does not wait for it—the man who helps himself and does not wait to be helped—that makes the strong thinker and vigorous operator.

It is he who dares to be himself and to work by his own programme, without imitating others, who wins.

HARDWARE AND METAL.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED NOV. 8, 1904.

372,655. DOOR CEHCK. C. M. Cashin, Boston, Mass.
372,677. FISHING HOOK AND LINE. F. Hubbard, Berlin, Conn.
372,686. FISHING HOOK ATTACHMENT. M. Lester, Inavale, Neb.
372,787. SHEET METAL ROOFING PLATE. C. B. Cooper, New York, N. Y.
372,789. SAFETY LOCK FOR GAS BURNERS. F. R. Drinkhouse and E. Ziesche, San Francisco, Cal.
372,869. WICK. J. F. Seery, Brooklyn, N. Y.
372,886. SCISSORS SHARPENER. I. A. Abbot, Denver, Colo.

PATENTS ISSUED NOV. 8, 1904.

774,201. CATCH BASIN FOR SINK OUTLETS. H. Robischon, Utica, N. Y.
774,206. SASH FASTENER. C. G. Seaman, Spokane, Wash.
774,227. WINDOW CLEANER. A. J. Beaver, New Kensington, Pa.
774,257. SAFETY DEVICE FOR RAZORS. A. J. H. Lefebvre, Montreal, Canada.
774,338. DOOR HANGER. T. C. Prouty, Albion, Mich.
774,351. ATTACHMENT FOR SCREEN DOORS. O. J. Coppins, Hobart, Ind.
774,702. WEATHER STRIP. J. E. Scott, Louisville, Ky.

PATENTS EXPIRED NOVEMBER 15, 1904.

373,056. TUBULAR LANTERN. F. Dietz, New York, N. Y.
373,143. FASTENER FOR MEETING RAILS OR SASHES. J. T. Lister, Cleveland, Ohio.
373,169. SIGNAL LAMP. R. J. Armour, New York, N. Y.
373,197. FOUNTAIN SCRUBBING BRUSH. W. N. Rowe, Washington, D. C.
373,265. STAPLE DRIVER. W. W. Bloodworth, Molino, Fla.
373,360. DOOR SPRING. W. Gilfillan, New Haven, Conn.
373,395. SAFETY RAZOR. H. G. Fiske, Springfield, Mass.

PATENTS ISSUED NOVEMBER 15, 1904.

774,739. ANTIDRIP PITCHER. M. S. Cross, Denver, Colo.
774,878. HINGE. W. K. Henry, New Britain, Conn.
774,919. OPERATING MEANS FOR PUMPS. C. F. Mayer, Millersville, Pa.
774,994. DUST PAN. J. W. Snedeker, Adrian, Mich.
775,092. FLOORING CLAMP. A. F. Rosier, West Granby, Conn.
775,102. EGG BEATER. W. J. Dudley, Bangor, Me.
775,134. RAZOR. K. C. Gillette, Brookline, Mass.
775,184. TOWEL RACK. H. P. Kochsmeier, Freeport, Ill.
775,186. WINDOW OR DOOR FASTENER. C. D. Lovelace, Omaha, Neb.
775,202. CAN TOP. C. C. Woods, Easton, Pa.

CHANGE IN BRITISH PATENT LAW.

American investors who intend taking out patents in Great Britain, says United States Consul Mahin, Nottingham, England, will be interested in the following act of Parliament, which takes effect January 1, 1905, and which changes certain provisions of the existing patent law:

Where an application for a patent has been made, and a complete specification has been deposited by the applicant, the examiner shall, in addition to the inquiries which he is directed to make by the patents, designs, and trade marks act of 1883, make investigation for the purpose of ascertaining whether the invention claimed has been wholly or in part claimed or described in any specification (other than a provisional spceification not followed by a complete specification) published before the date of the application and deposited pursuant to any application for a patent made in the United Kingdom within fifty years before the date of the application.

If as the result of this official search it appears that the invention sought to be patented has been wholly or in part claimed or described in any such specification the applicant will be informed, and will have the opportunity of amending his specification so as to confine it to so much of his supposed invention as he may desire to patent in view of the specification to which his attention has been called by the comptroller of patents.

The sections of the patents, designs, and trade marks act which regulate the time for depositing a complete specification shall have effect as if references therein to the period of nine months were references to the period of six months.

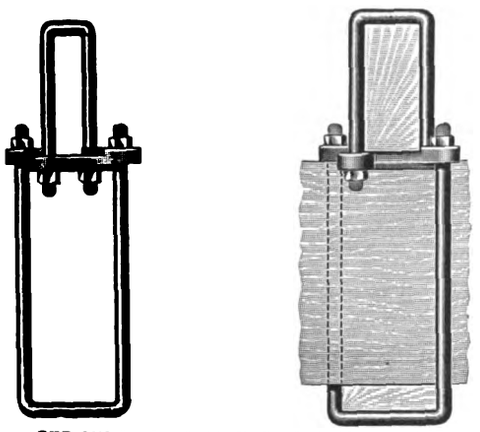
NEW GOODS AND SPECIALTIES.

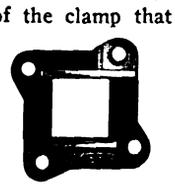
COMMON SENSE WINDOW CLEANER.

The F. H. Smith Mfg. Co., 18 West Randolph Street, Chicago, Ill., are introducing to the Hardware trade the "Common Sense" Adjustable Window Cleaner which we illustrate. A coiled spring



COMMON SENSE WINDOW CLEANER.

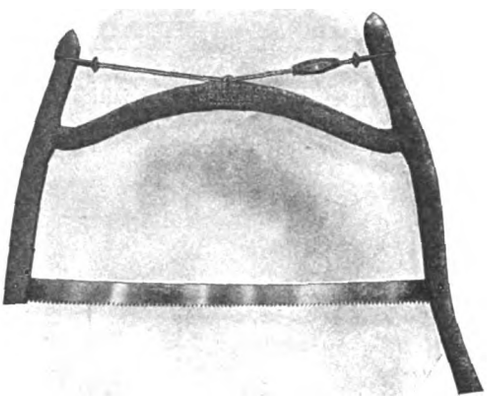
near the end of handle keeps the cleaner in the correct position for the wiping of windows. In the rubber window cleaner having the ordinary stationary handle, the operator is unable to keep the rubber against the full depth of a deep window. The adjustable feature in this device permits of a thoroughly clean wiping of the window glass from top to bottom. When worn out, the rubber can easily and inexpensively be replaced, and the life of the cleaner is prolonged by reason of its yielding pressure.



THE MYERS HAY RACK CLAMP OR BRACKET.

F. E. Myers & Bro., Ashland, Ohio, are placing upon the market through the Hardware and Implement trade the Myers Hay Rack Clamp, or Bracket, of which we present illustrations. They are furnished complete in sets of eight clamps, making a complete outfit, and all the attachments that are necessary to enable a farmer to build his own hay rack without boring a hole in any of the timbers. The clamps are made with a metallic plate placed between the main sill and the cross beam. This plate is fitted

THE MYERS HAY RACK CLAMP OR BRACKET.

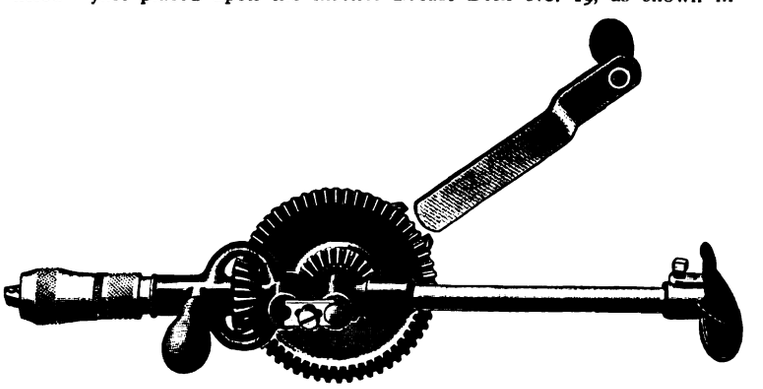


with heavy flanges that support the sill and cross beam on each side, holding them firmly in position. The clamps are made of wrought steel, 7-16 inch in diameter. The manufacturers claim the whole makes the strongest and most complete outfit ever offered for the purpose. Some of the many special advantages that may be mentioned are: the main sills are clamped to the lower cross the independent of the clamp that holds the cross beam

above the sill. The upper cross beam is also attached directly to the intermediate plate. The advantage of this arrangement is that either beam or main sill can be removed or tightened independent of the other. By this arrangement there are no long bolt ends exposed either above or below the beams of the hay rack. They are made in two sizes, No. 1—14 inch and No. 2—16 inch, eight clamps in a set. They are packed one set complete in a wooden box.

A NEW AND IMPROVED BUCK SAW.

The Simonds Manufacturing Company, Fitchburg, Mass., are introducing through the Hardware trade a new and original Buck Saw, of which we present an illustration, and on which they recently obtained a patent. The method of setting the cross

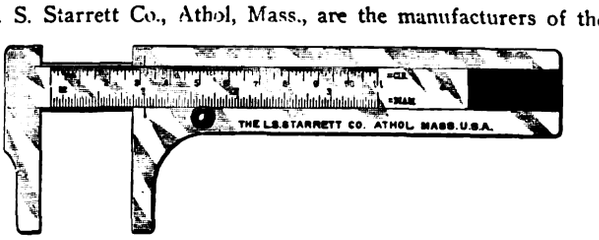


SIMONDS IMPROVED BUCK SAW.

bar in the frame forms one of the novel features of this saw; the bearing being on an arc to insure a perfect bearing surface when the roc is tightened by means of the turn-buckle. It is important to have a rigid saw blade in a perfect Buck Saw, and this method makes it easy of accomplishment. This blade is furnished in 30 and 32 inch lengths.

BREAST DRILL NO. 19.

Millers Falls Company, 28 Warren Street, New York, has just placed upon the market Breast Drill No. 19, as shown in



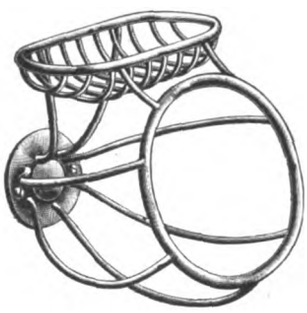
BREAST DRILL GAUGE NO. 19.

the accompanying illustration. The No. 19 has ball bearings and alligator jaws. The drive wheel is five inches in diameter and the gearing is changeable from even to a speed of three to one. The crank is adjustable, there being a possible vibration in crank of 3½ inches. The stock and chuck are polished, the hub casting painted black, and the gear and breast plate are aluminized.

SLIDE RULE CALIPER AND CIRCUMFERENCE GAUGE No. 424.

L. S. Starrett Co., Athol, Mass., are the manufacturers of the

SLIDE RULE CALIPER AND CIRCUMFERENCE GAUGE NO. 424.



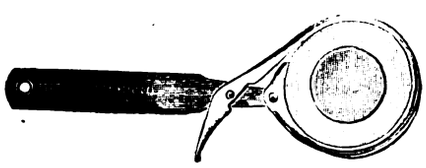
Slide Rule Caliper and Circumference Gauge, shown in the accompanying illustration. This gauge has a double function—be-

Digitized by Google

ing graduated to read the circumference as well as the diameter of the thing measured, the relation of circumference to diameter being shown by the graduations on upper corners of the rule (capacity 3½ inches, about 11 inches circumference). It was originally designed for rope or cordage manufacturers. It makes a first-class slide rule caliper of large scope, opening 3½ inches. The jaws, being 1 5-16 inches deep, will caliper a cylinder up to 2½ inches in diameter. The rule is graduated in 32ds of an inch standard and 16ths of an inch circumference measure. All corners of the tool are rounded smooth to make it fit to carry in the pocket and agreeable to handle. The circumference measure will assist in calculating how many feet a minute the cutting tool in a lathe is doing on any diameter within the scope of the gauge and so help determine whether the tools should have a faster or slower speed.

SPONGE AND SOAP HOLDER.

Searls Manufacturing Company, Newark, N. J., has added to an already diversified line of bathroom specialties the combination sponge and soap holder here illustrated, which is useful and attractive and one which will meet with a ready sale. It



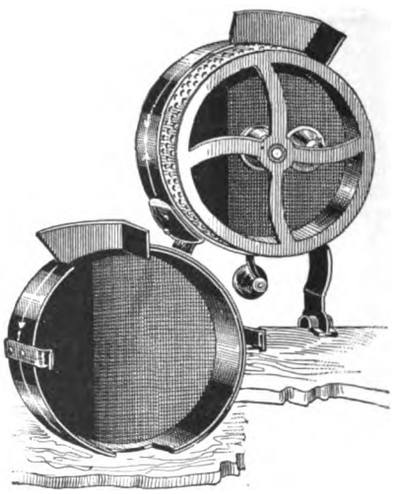
SPONGE AND SOAP HOLDER.

is made of brass wire, polished and nickel plated, and is designed for use against a wall or wainscoting to which it may be fastened. The sponge holder is 6 inches deep and 5½ inches in diameter, the soap holder, placed above it, 5½x3 inches.

BERTHOUD FRUIT JAR WRENCH.

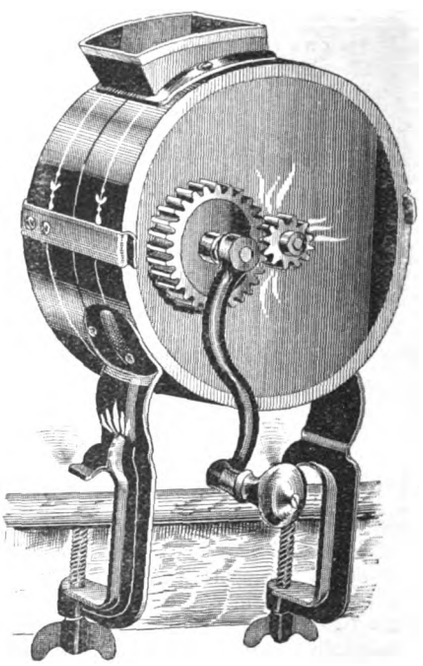
R. J. Berthoud, Swanton, Ohio, is placing upon the market a Fruit Jar Wrench that he has invented, and which we illustrate, that is at once inexpensive, simple and thoroughly practical.

BERTHOUD FRUIT JAR WRENCH.



There are a large number of Fruit Jar Wrenches on the market, good, bad and indifferent; the better wrenches have been more or

less complicated and expensive, but the Berthoud Wrench is instantly adjustable to any standard fruit jar top. It has a grip that becomes tighter with increased pressure, it positively cannot slip, the tightest tops are instantly loosened without effort, and as easily tightened. The wrench is simple in construction, no parts to break or get out of order, and can be confidently recommended to the trade. Wrenches are nicely finished and japanned, packed one dozen in a box.



SCHROETER HORSE RADISH GRATER.

Schroeter Brothers Hardware Co., 811 North Fourth Street, St. Louis, Mo., are offering the trade the Schroeter Horse Radish Grater of which we give two illustrations. It is so constructed that the grating drum can be removed to permit its

TAKEN APART FOR CLEANING.

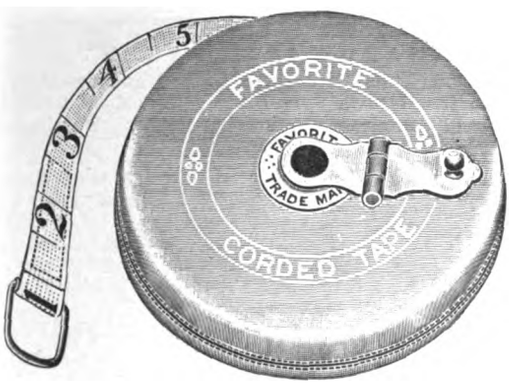
thorough cleaning. All parts are interchangeable and can be replaced if necessary at small cost. The machine can be taken apart and cleaned in one minute. The process of grating is rapid; a stalk of horse radish can be grated in one and one half minutes, in grating it is reduced to a flaky substance which pre-

SCHROETER HORSE RADISH GRATER.

sents a more desirable appearance than when it is stringy or lumpy. The grater will also grate potatoes, cocoanut and other foods. The machine is 12½ inches over all, 8 inches wide and 3 inches deep. The drawer is 6¼ inches in diameter and 3¼ inches wide. The weight is 12¼ pounds, and boxed for shipment 15 pounds. Each machine is packed in a neat wood box for shipment.

A Foxy Roaster.

Mistress—I hope you are not thinking of getting married, Bridget?



Cook—Oh, no mum! Oi prefer to shtay roight here an' hov a home av me own.—*Judge.*

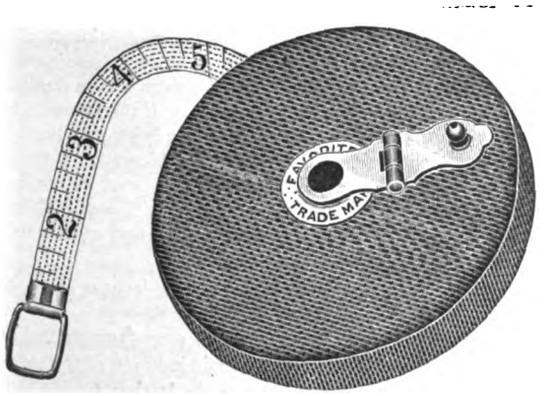
A NEW LINE OF MEASURING TAPES.

Keuffel & Esser Co., New York, one of the American pioneers in manufacturing finer grades of steel and metallic measuring tapes, have just issued a Supplementary List of a new line of low-priced tapes, which particularly interests the Hardware trade.



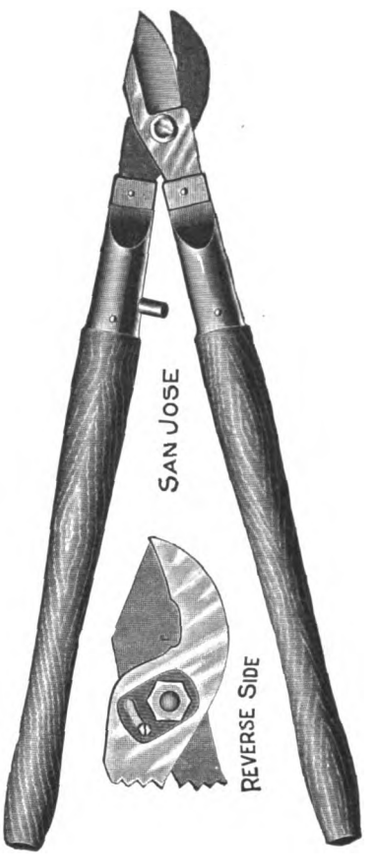
These tapes, the "Favorite," include about 140 numbers, embracing cotton-line tapes in enameled steel case (ass skin,) pressed duck, pressed leather and sewed leather case, and uphold K. & E. Co.'s well known reputation for careful workmanship, even on low-priced goods.

Their complete line now consists of over 500 numbers, covering every possible requirement either in style or price.

The "Favorite" Tapes are well made and of neat appearance. The rim of the enameled steel cases is seamless, an improvement, which adds to the appearance and durability of the case. The pressed duck case is waterproof, strong, durable, light

weight, and avoids the sharp edges of the patent leather case, with which it competes in price. As it is also of very neat appearance, it should be a ready seller.

The new pocket tapes, the "Tip Top Tapes," steel and linen, in lengths from 3 to 8 feet, spring winding, with center push pin, have strong nickel plated brass cases. They are popular priced tapes and will prove good sellers.



Dealers who do not receive a descriptive price list of Favorite and Tip Top Tapes in their mail, can obtain it by addressing

Keuffel & Esser Co., New York, whose advertisement will be found in its usual place in this issue.

A NEW PRUNING SHEAR.

We illustrate herewith the No. 110 Pruning Shear, manufactured by the Cronk & Carrier Manufacturing Co., Elmira, New York. Some of the special features of this shear are its seam-

CRONK'S PRUNING SHEAR, NO. 110.

less steel ferrules, a notch hook to prevent the limb slipping out after blade starts to cut, and a stop to prevent the handles coming too close together. This shear also has a nut-locking device which prevents the shear from coming loose. The manner by which the handles are attached permits of their being easily removed and longer handles put in where occasion requires it. The manufactures of this shear guarantee that it will cut easier than any other shear on the market. Full particulars and discounts can be obtained by writing the manufacturers.

WOOD TURPENTINE.

"Wood turpentine," a somewhat inferior quality of spirits of turpentine, is now being manufactured in the Southern States, says the *Metal Worker*, by a new process from pine knots, roots, etc., which sources of supply have hitherto been allowed to go to waste in abandoned pine lands. The new industry is as yet only in the experimental stage, and is being watched with interest by dealers in naval stores, who hope that an article produced in this way may be made useful in the industrial arts, where cheaper grades are usable and where it is not necessary to use the high standard qualities of spirits of turpentine, which can be obtained only by distilling the pure gum of the pine tree.

WELLS & NELLEGAR CO.

We have received from the above well-known concern the following communication, which explains itself, and which we take pleasure in spreading before our readers, in order to set them right on a matter in which they were unjustly accused:

"WHERE WE STAND."

We Do Not Sell Catalogue Houses.

Our attention has lately been drawn to some correspondence recently published by the National Retail Hardware Dealers' Bulletin of October, where an attempt was made to show that the Hardware house of Wells & Nellegar Co. was not serving the interests of the retail hardware trade of the country and that they were making a practice of selling catalogue houses and other competitors of the retail Hardware trade.

The facts are, that in August of this year we were honored by a visit from a committee composed of some of our distinguished Hardware competitors in the West, who made a request that we announce then and there that we would not sell goods to catalogue houses, and that we should print on our stationery, etc., that we were not selling catalogue houses, etc., etc., etc. We informed the committee that we were not now and never had been in favor of selling any competitor of the retail Hardware merchant, but thought a discussion of the matter through the trade papers and printing a notice on our stationery would advertise the catalogue houses more than anything else and would do more harm than good. Throughout the interview, however, we thought we could detect an implied threat that if we would not accede to the requests made, that we would regret it, and because of the feeling that we were to be driven to do a thing in a certain way, because some of our large competitors thought we should do it in that way, and because they wanted us to do it and not because it was right, we told them we preferred not to discuss the matter with them.

Ever since the occurrence referred to all sorts of unjust rumors have been spread about our company and the members of our company, not only with respect to the business that they say our company is doing with catalogue houses, but traveling salesmen from competitive houses have spread the most unfounded and unqualifiedly false reports, to the effect that Wells & Nellegar Co. could not continue to do business in Chicago, that their competitors had bought them out and that the price was agreed upon and the transfer was to be made at a certain date, giving the date and even the terms, etc., etc., etc.

Other reports were to the effect that Mr. Wells' and Mr. Nellegar's health had failed, that they were invalids, etc., etc.; that their line of steel goods, while cheaper and as good-looking as other goods, could not be sold by the retailer as well because they were not made by the Steel Goods Trust.

Now all the above reports are false. We are in such good health and good spirits that we do not even bear our competitors any ill-will, and we have so good a trade that we can afford to laugh at the efforts that have been made to belittle us in the eyes of our customers. We have never offered a dollar's worth of our stock for sale to a competitor. We have never offered our business for sale, but have associated with us at this time additional stockholders and additional capital and will enlarge our business, issue a new catalogue, send out additional salesmen and trust that our customers will not listen to the unjust insinuation of our competitors who seek to boycott us and ruin our business because we are growing too rapidly.

Now, as to catalogue houses, we are refusing to sell them and will not sell them, and we decline to sell them because it is to the interest of the retail trade and not because of some theory of a competitor. Two weeks ago a mercantile company of Kansas City came to us with an order for a large new stock of shelf Hardware They offered us cash for the goods. We learned that they issued a catalogue and declined the order. The bill promised to amount to ten times what we could sell to the average retailer in a year, but we refused it and would have refused it had it been offered to us in August or September and during those months we refused the business from a large number of other catalogue houses.

We believe that some of the large jobbers who seek prominence at this time in the war they have declared against catalogue houses are the very ones most to blame for the large trade in Hardware the catalogue houses enjoy. One of these same large jobbers informed us that he had sold in one year as much as $100,000 worth of Hardware to one catalogue house in Illinois alone. At that time the catalogue houses were willing to purchase from jobbers, but we are informed that at present the buyers for the catalogue houses are instructed not to purchase from jobbers, but to turn all their Hardware business into the hands of the manufacturers and this explains to our mind the change of heart of certain jobbers who cannot secure enough business now to make it pay and are commencing to cry "stop thief."

If it is wrong for them now, were they doing the right thing then, to foster and build up the Hardware business of catalogue houses for years and years and now try to divert attention from themselves by endeavoring to draw unjust criticism to others?

Our contention is that the practice was wrong then, the damage was done then and the practice ought not to have been followed then or now. Our aim is and has been to seek as an outlet for our goods the legitimate Hardware trade. To give them good goods at low prices, to try and appreciate the large business that has come to us, and all we ask is for a fair show and we will get so much of the trade that it will keep our competitors busy complaining. WELLS & NELLEGAR CO.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

QUESTION: A manufacturer of circular saws manufactured and forwarded at my order one of his saws. After trying the saw for a short time, it was found to be soft and worthless. I returned it and the manufacturer retempered it and again forwarded it to me, when I found that it was still utterly worthless by reason of the softness of its steel. Am I liable to pay for the saw?

REPLY: We think you are not liable for the price of the saw. It is certainly the general rule of law that in the absence of an expressed representation or warranty by the seller, the buyer purchases at his own risk, and there is no implied warranty of the quality or condition of goods supplied under a contract of sale. This rule is expressed in the maxim, "caveat emptor"—"let the buyer beware." There is an exception to this rule, however, in case of the sale of a chattel by the manufacturer. In such case the law implies an agreement or warranty on the part of the manufacturer that the article is of fair quality and has no secret defect arising out of the manner in which it is manufactured. The reason for this rule is that the law presumes that the manufacturer has knowledge of the process of manufacture; and honesty and fair dealing require that he should disclose to the buyer what is presumably within his own knowledge. The rule in such cases is this: A manufacturer who sells goods of his own manufacture impliedly warrants that they are free from any latent defect growing out of the process of manufacture, and is liable for any such defect not disclosed to the purchaser, due to the manner of manufacture, and if he knowingly uses improper materials, he is liable for that as well. We think that your case comes within this rule and you are consequently not bound to pay anything.

Landlord's Liability to Tenant.

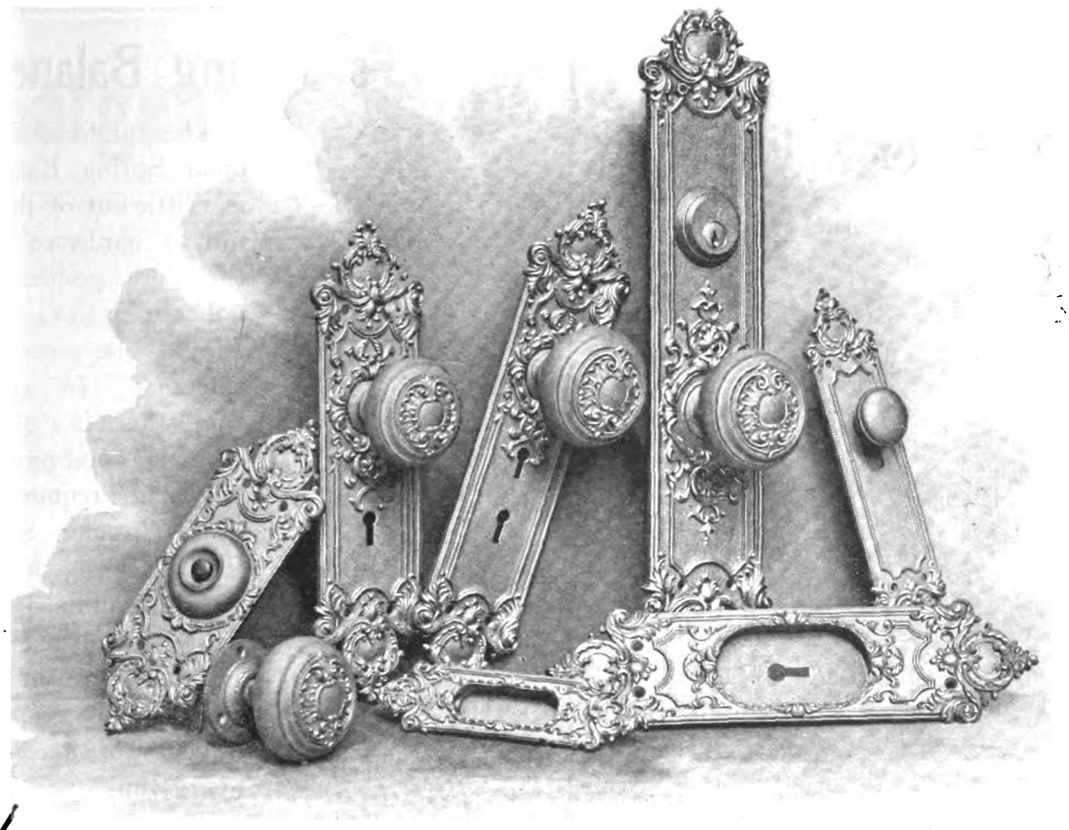
QUESTION: Some time ago I rented a building which I still occupy under my lease. Within the last few months my landlord's neighbor built a large building next to the one which I occupy, and as a result my landlord's building has settled to such an extent that the Building Department in New York City has condemned the building as unsafe and has given my landlord orders to make repairs or tear down the building. The landlord has made certain repairs and has damaged some of my goods. Can I sue the landlord for damages to my business caused by his making these repairs?

REPLY: It has been held that a tenant is not entitled to damages for an entry by the landlord upon the requirements of the Building Department for the purpose of making repairs necessary to place the building in a condition of safety, where due care is taken to avoid interference with the business of the tenant. On the facts as you have stated them we would advise you that you cannot recover damages from the landlord. However, a personal interview with your lawyer might develop a new feature in your case which would allow you to recover. We would, therefore, suggest that you consult a lawyer upon this matter personally, stating all the details in the matter to him.

An "M" Brace.

Kitty—Tom didn't remove his arm from around my waist but once during the whole evening.

Katie—What made him remove it then?



Kitty—He had to go home some time, didn't he?

*

"Won't you be glad, Tommny, when your baby brother is as big as you are now?" asked the caller.

"You bet I will," replied Tommny; "then he'll be licked fur some o' the things that I git licked fur now."—*Philadelphia Press.*

YGRANDE DESIGN (LOUIS XIV). SARGENT'S ARTISTIC HARDWARE.

Educate your customers---those who are erecting homes and other buildings in your neighborhood---to the use of better hardware. A fine house should be fitted with fine hardware; cheap goods are out of place in an elegant dwelling.

It will give you a larger profit and your customers will be better satisfied if they trim their buildings with

Sargent's Artistic Hardware and Easy Spring Locks

than if substitute goods said to be "as good" are used.

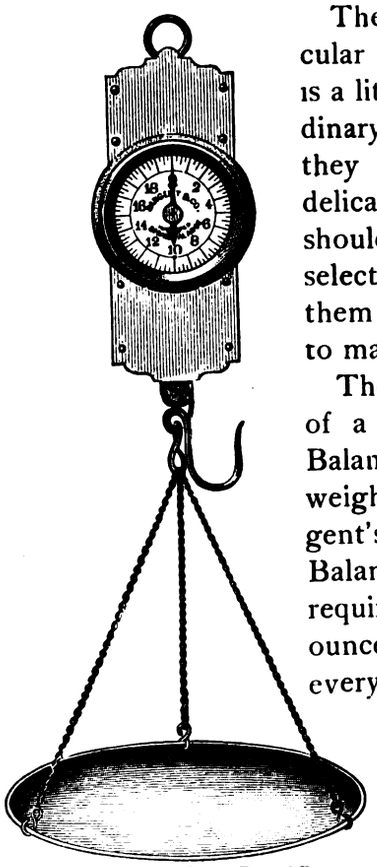
We have a complete line of Locks suitable for all classes of work and a variety of Designs to harmonize with all schools of architecture.

SARGENT & COMPANY, Manufacturers

New Haven, Conn. New York Philadelphia Boston Chicago

Digitized by Google

Everybody is now building, or will be soon,



and there will be much use for builder's hardware. To make sure of your share of the profits sow the seed now by distributing among prospective builders in your neighborhood the attractive, business-bringing printed matter we will furnish to advertise **Sargent's Artistic Hardware and Easy Spring Locks.** Every building fitted with these goods means a satisfied builder—your pleased customer, if you furnish the goods.

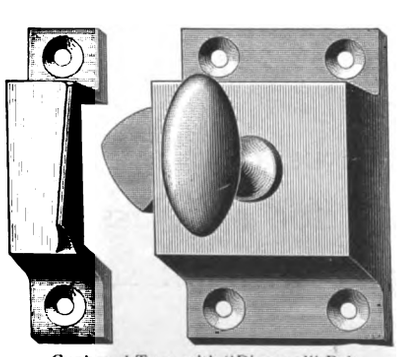
Our Store Door Handle Line

is complete, embracing a great variety of patterns. Both plain and ornamental goods are represented. Bit Key Locks, Flat Key Locks and Cylinder Locks are all used.

Sargent's Spring Balances.

White Enameled Front, Round Pan.

The purchase of Circular Spring Balances is a little out of the ordinary hardware line; they are goods with delicate parts and should be carefully selected. In selling them there is a chance to make good profit.

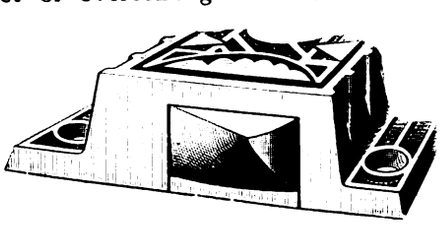


The first requirement of a Circular Spring Balance is that it shall weigh accurately. Sargent's Circular Spring Balances answers this requirement – sixteen ounces to the pound every time.

Again the balance must be strong in its construction so that it will withstand the wear and tear of almost continuous use. Sargent's Balances fill the bill in this respect—they are strong and durable.

Finish goes a long way in these goods and the finish of our balances is first class; they are made in a variety of styles, with brass front and enameled front, round pan and square pan. All are warranted.

We make also Pocket, Round and Straight Balances in various styles, also Scale Beams.

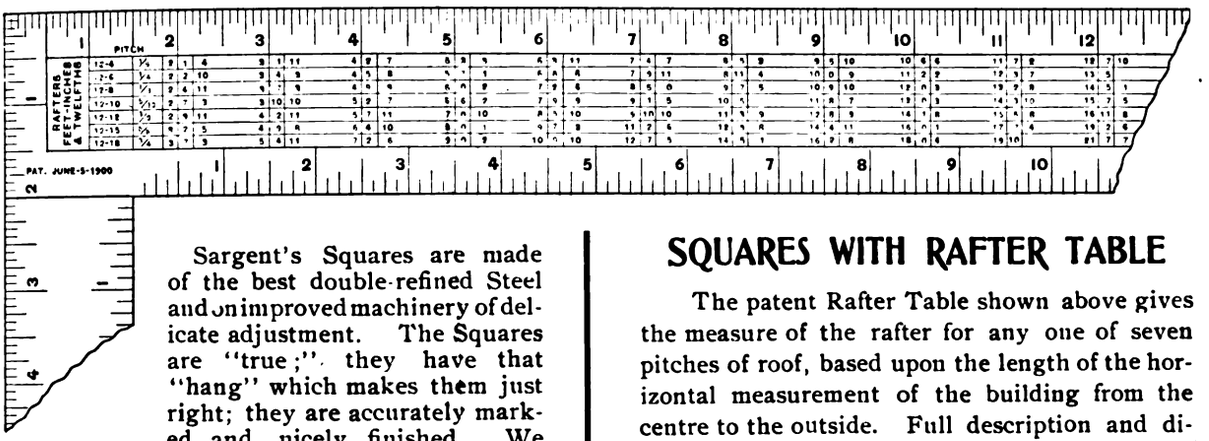


Sargent's "Diamond" No-Friction Latch Bolt

Cupboard Turn with "Diamond" Bolt.

is applied to many of our Cupboard Turns, Cupboard Catches, French Window Catches and Screen Door Catches. The peculiar construction of this Patent Latch Bolt, together with its Strike Plate or Nosing, has the effect of overcoming friction, thus enabling the catch to act quickly and to close with remarkable ease.

These goods should be carried by all first-class hardware dealers; the advantages will be appreciated by those who use them.



Front View of "Diamond" Bolt. Pat. June 21, 1892.

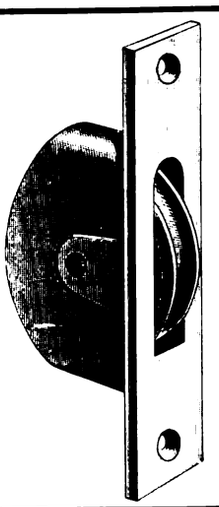
Sargent's Standard Steel Squares

Sargent's Squares are made of the best double-refined Steel and on improved machinery of delicate adjustment. The Squares are "true;" they have that "hang" which makes them just right; they are accurately marked and nicely finished. We make Squares for all purposes and with different markings and labor-saving tables and scales, finished in polished steel, nickel plated and royal copper, also blued steel with white and with yellow enameled figures.

Our Squares are well known and have a good reputation among practical men. You should sell them.

SQUARES WITH RAFTER TABLE

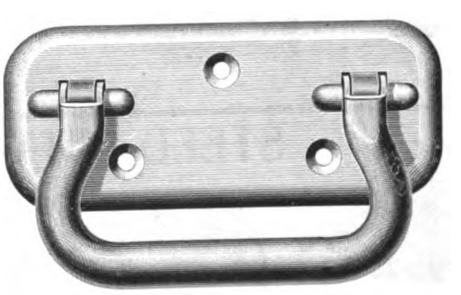
The patent Rafter Table shown above gives the measure of the rafter for any one of seven pitches of roof, based upon the length of the horizontal measurement of the building from the centre to the outside. Full description and directions for using the Rafter Table, as well as the other Tables and Scales with which our Squares are marked, may be found in our Square Booklet, a very useful pamphlet which is packed with each Square and which we also furnish to dealers for distribution to mechanics. Let us send you a copy; it will interest you.



SARGENT'S CYLINDER LOCKS

you can depend upon.

They look well, work well and wear well. No better locks are made and you can stand back of every one with the assurance that it will work perfectly and do good service in actual use and give satisfaction to your customer who uses it. Sargent's Easy Spring makes easy-working locks. "Our Little Red Book" tells about it. Send for a copy.



Noiseless Axle Pulleys

should be used for the best work in finishes to match the other hardware.

Our Axle Pulleys (No. 22 series) are made with Iron, Brass and Bronze Face, both Square and Round Corner. They have Iron and Brass Turned Wheels with grooves for Sash Cord, Ribbon and Chain, and are carefully made throughout. We furnish them in plain face and in all the finishes on Iron and Bronze Metal.

These Steel Chest Handles are new, but people like them and they are profitable goods for dealers.

We make three sizes in all the desirable finishes, and also have them ornamented and with different styles of plate. They are very strong. Send for a sample and prices.

THE ATLANTIC CITY CONVENTION.

Over eight hundred Hardware Manufacturers, Hardware Jobbers, salesmen, guests and ladies met in convention at Atlantic City, N. J., November 16-18. It was the largest meeting ever held in the trade, as had been anticipated, and it is the almost unanimous opinion that it was the most productive of results for the good of the trade in general. All through the past year the various committees have been holding frequent meetings, and their conclusions and reports were brimful of things of vital importance to all branches of the Hardware business. Between sessions discussions were continued in an animated manner and the air was continually full of "Catalogue Houses," "Price Discounts," "Special Brands," etc.

As usual, everybody came for pleasure as well as business, and the several new entertainment features attracted much agreeable comment. The conventioners seem to have had supreme confidence in the weather man, who has nearly always been kind to Hardwaremen, and the storm of the few days previous to the convention did not deter them from making the trip. That their confidence was not betrayed was evidenced by the glorious weather of convention week, which permitted fine enjoyment of the famous board walk and the many other "enjoyment producers" of the City by the Sea.

It having been found that one hotel was not sufficiently large to hold both associations, the jobbers made their headquarters at the Rudolf, while the majority of the members of the Manufacturers' Association held forth at the St. Charles. An unusually large number of ladies were present, and several members of the Canadian Association were most welcome guests.

Early Tuesday evening the hotels were crowded, and everywhere were in evidence signs of a most successful meeting.

Digitized by Google

OPENING SESSION.

Open to Members of Both Associations and Guests.

The convention was called to order at 10 A. M. in the hall of the Hotel Rudolf by President Samuel A. Bigelow, of the National Hardware Association. After singing "America" Mr. Bigelow spoke as follows:

Ladies and gentlemen, delegates and friends, we welcome you to the tenth annual convention of the National Hardware Association of the United States. We welcome the ladies for their cheerful presence and for the healthful and happy influence they bring to our meetings. We welcome the large attendance of members, many of whom have made long pilgrimages to be

T. JAMES FERNLEY,
SECRETARY-TREASURER.

present at our annual reunion, and to show their earnest interest in the work in which we are engaged. We extend a special greeting to our new members and to the old members who have rejoined us during the last year. We welcome the president and the large delegation from the Canadian Wholesale Hardware Association and the reciprocity of good feeling that has always existed between them and the members of the National Hardware Association of the United States.

We welcome the president and delegation from the National Hardware Dealers' Association and the mutual interests that bind us so closely together. We welcome the manufacturers and the opportunity we have to thank them for their growing interest and support of our association work.

We welcome the press, whom we all hold in high esteem for their loyalty to our cause. We are happy at the thought of the pleasures before us at this, our annual reunion. Our Entertainment Committee will see that none shall go away dissatisfied.

Rev John R. Davies, D.D., pastor of Bethlehem Presbyterian Church, Philadelphia, invoked the divine blessing.

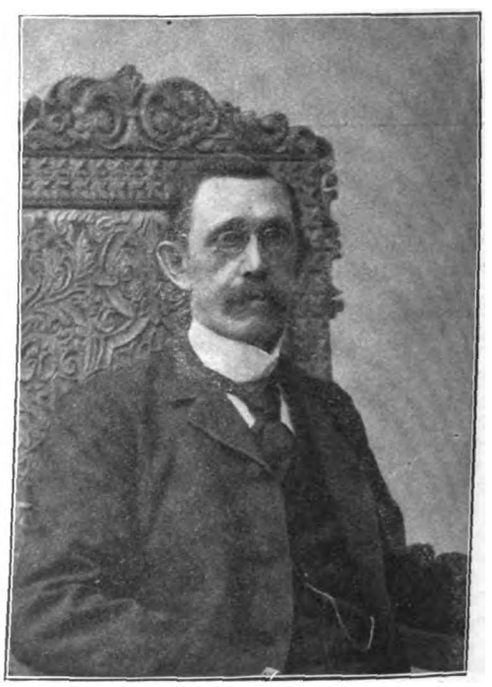
President Bigelow introduced Hon. Franklin P. Stoy, the Mayor of the city, who welcomed the convention in the following words:

Mr. President, ladies and gentlemen, at your last convention in this city I was absent, and, of course, I had to arrange for some one to be present to extend a hearty welcome to you. I want to say to you this morning that I am pleased that the Mayor is here to extend to you a hearty welcome to Atlantic City and to say that this is the greatest gathering that we have had since the eighth day of November (Applause.)

Hon. A. Chamberlain, the Governor of Connecticut, had been expected, but he was unable to be present, and Lieutenant-Governor R. S. Woodruff, of Connecticut, was introduced. He said: Mr. President, ladies and gentlemen, this is really an unexpected favor which I have been asked to perform, but I never shrink or dodge a duty that I can perform to the State of Connecticut. You Hardware men are familiar with what we do in Connecticut, as I believe Connecticut is the home of Hardware; it is and always has been. We are manufacturers of Hardware of nearly all kinds and classes. We are fortunate in our State that we have a varied line of industries. We are not dependent on the cotton mills or iron and steel manufactured, but we manufacture almost everything that is used in the household or on the farm. We are not farmers; we are manufacturers, and as manufacturers we are to-day, I believe, producing as good goods as there is put upon the market anywhere.

President Bigelow: We have with us J. C. Birge, president of the American Hardware Manufacturers' Association, who will please come forward.

Mr. Birge said:



Mr. President and Friends:

I saw my name on this programme, and my first, and I think perhaps my better, thought, was simply to acknowledge the introduction, but I am sure that it is not I, but the president of the Manufacturers' Association that is being introduced, and therefore it would seem almost a demand to give a word and that word perhaps to be in line with some thought which would be endorsed by our manufacturers—your cordial welcome to the ladies who are present—I think are in line with the words of Pascal, who said that "had the nose of Cleopatra been shorter the face of the earth would have been changed." The beautiful presence of that wonderful queen certainly changed the histories of Egypt and of Greece, and it is equally certain, Mr. President, that your recent custom of inviting the ladies to our meetings has entirely changed the character of your conventions . (Applause.) I think, too, that their presence makes it unnecessary for the police of Atlantic City to turn their backs and close their eyes, as suggested by his honorable Mayor. This siren queen of Egypt led all her admirers into trouble, but our wives and daughters who are invited here are of a very much higher type of womanhood. We bring them to keep us out of trouble. I believe they will successfully do it without the aid or the blindness of the police.

I think that we agree on this proposition, Mr. President, and as suggested at the head of your programme—that upon it we heartily shake hands. There are other propositions on which I think we can shake hands. I have just observed the subject for your "electrocution" for this session—I think I should have said "collocution."

THE ELECTROCUTION

I believe was held in New York last week. (Applause.) The subject suggests an incident related a few evenings ago at a little dinner given to Governor-elect Cobb, of Maine, which he

WILLIAM W. SUPPLEE,
MEMBER OF ADVISORY BOARD.

stated was quite familiar to all the people up in that State. He said that there was a clergyman who desired that his son should take a theological course and succeed him in the ministry. The son, however, protested and desired to take a course in veterinary surgery, and prevailed in his desire. Immediately prior to the return of the young man from the veterinary school the admiring parishioners of the clergyman presented the old gentleman with a horse in token of their appreciation of his services. As soon as the young man arrived at his home the father took him out to the stable to show him the horse to obtain from him

Digitized by Google

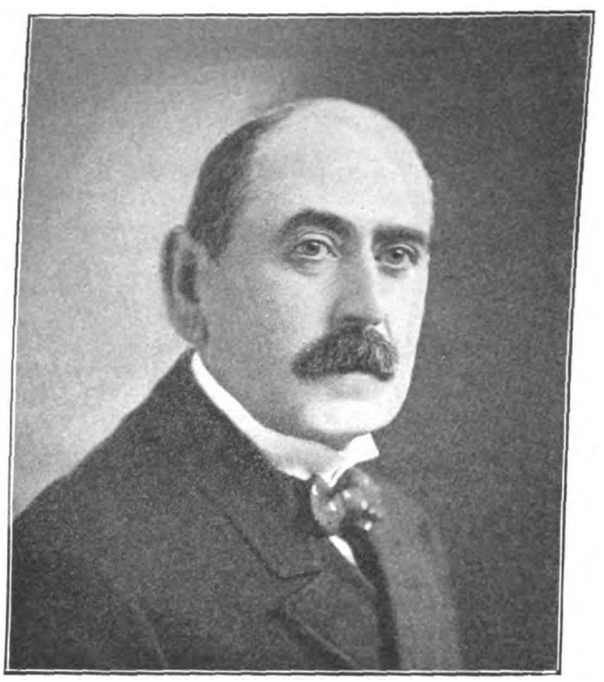
his expert opinion concerning the animal. The young man looked at the horse very carefully and then said: "Father, I think that is a very poor specimen of an old horse." "Well," said the father very humbly, "is not that as good a horse as the one on which our Saviour rode?" The young man looked the horse over with great care and finally looked up in his mouth, and, turning, said: "Father, that is the same horse."

I read this question to which I have referred: "What are the proper avenues for the distribution of Hardware and kindred lines?" It occurs to me that this is the same question which the manufacturers had under discussion one session at Atlanta put in another form—catalogue house competition. Upon that question, Mr. President, I think I can say, although not officially, that the manufacturers will do everything in their power and will work with you as far as possible towards any feasable solution of that question.

One evening last week Dick Shapleigh, Mr. Norvall and others saw cast across the face of the far-away sky the name of a much advertised special brand of whiskey. It was in St. Louis. As an evidence that this apparation was not what physicians, I believe, term a subjective symptom or an illusion, caused by the inordinate use of the article advertised, I will state that I saw it myself; but the picture away up there suggested the far-reaching effect of special brands; that it was not a subject which is confined here below on earth, but that it reached the skies and it suggested that some of you may at some time in the sweet by and by see special brands in the skies. On the train yesterday I read an excerpt from the sermon of a distinguished clergyman, which reads: "A Christian is a man who instinctively takes the point of view of the man with whom he deals."

Mr. President, in these questions which we are likely to have before us for consideration at these meetings and at other meetings, if we can assume that attitude and put ourselves in the place of you with whom we deal we may be able to solve very many of these problems which now seem to us exceedingly difficult. So far as I am concerned without assuming to be a Christian, which I am far from being, I would undertake, in listening to any discussion which may be held on these subjects, to place myself in your attitude. I thank you. (Applause.)

President Bigelow: We have with us a delegation from the Canadian Hardware Association. I will say it has been customary for them to be with us for several years and we have had representatives at their meetings and we have always received



H. H. BISHOP,
MEMBER OF ADVISORY BOARD.

a very kind reception. I will call upon the president, Mr. C. A. Whitman.

Mr. Whitman: Mr. President, ladies and gentlemen, it is not my purpose just now to entertain you or bore you with any lengthy speech, but allow me on behalf of the Canadian Wholesale Hardware Association to tender you our most hearty thanks for your invitation to be present at this, your annual meeting held in this city. At home we have an organization on somewhat similar lines I fancy to this, but of that I cannot speak because our esteemed secretary, Mr. James Hardy, is here, and no doubt he has spoken to you of that in the past, as well as Mr. George Caverhill. But we are not as large as you are. We are not as old, but we have the egotism that we intend to grow I will not take up any more time at present, but thank you again for inviting us here, and we have no doubt we will learn something and we trust that our meeting with you may in a very small way result to our mutual advantage.

President Bigelow: We have other members of the delegation, I think Mr. Hardy could give us a few remarks:

Mr. Hardy addressed the convention as follows:

JOHN BINDLEY,
MEMBER OF ADVISORY BOARD.

Mr. President and Members of the National Hardware Association of the United States and Ladies and Gentlemen:

It is indeed a great pleasure to me to again attend your annual convention and convey my thanks for the generous and hearty consideration I have always received at your hands.

I am pleased to learn that your organization is progressing and whilst I regret that we have lost one of our members, still our association is doing very good work.

We had the pleasure of a visit from your secretary-treasurer, Mr. Fernley, at our annual meeting and banquet in Montreal in September last, but being accompanied by Mrs. Fernley, they were in a hurry to spend their other available day in the old city of Quebec. I think Mr. Fernley had very pleasant memories of a former visit he paid us when our annual meeting that year was at the city of Quebec. We regretted very much that none of the others of your executive and members visited us. We would certainly have been delighted to have seen them and undoubtedly they would have come back with a little better idea of what Canada is at the present day than most of the residents of the United States seem to have.

It may be interesting to you to learn that the population of the United States as given by the first census for the thirteen States, taken in 1790, was 3,929,214, which had increased as per the census of 1900 to 76,303,387. This was roughly an increase of 19½ times. Whilst the population of Canada as estimated in 1790 was 220,000, it has increased as shown by the census of 1901 to 5,371,315, or an increase of over twenty-four times. You will thus see, ladies and gentlemen, that whilst apparently the increase of our population has been slow, it has more than kept up its ratio with the United States on the basis of the start in 1790.

Again, I think it is not generally known, even in Canada, that the Dominion of Canada is the

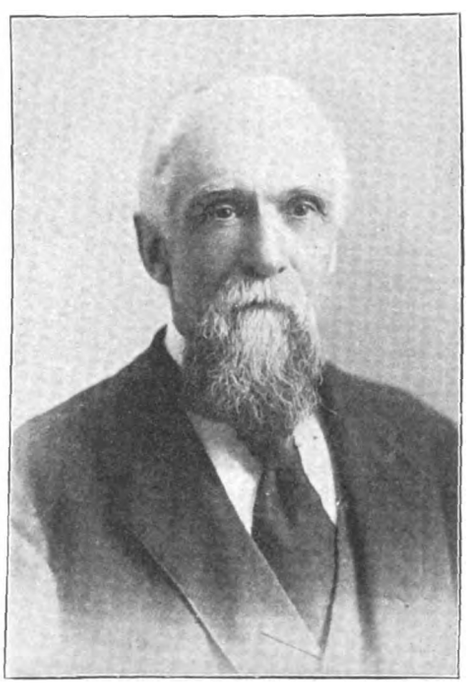
THIRD BEST CUSTOMER

of the United States. In fact, in manufactured goods she stands first, no other country taking as many manufactured goods from the United State as she does. Great Britain stands first, Germany next, and, as I have said, Canada third. France, which stands fourth in order, takes about forty per cent less goods than does the Dominion. The British Empire, which includes, of course, the mother country and the colonies, takes more than half of the total exports of the United States. The value taken in 1903 being about three-quarters of a billion dollars worth.

Digitized by Google

The total foreign trade between Canada and the United States, i. e., exports and imports combined, had approached the quarter billion dollar mark. At present, however, this trade is very one-sided, as we purchase a great deal more from the United States than they purchase from us. For example, in 1893 we imported from the United States nearly $145,000,000 worth of goods, while their purchases from us were less than $72,000,000 worth, or less than one-half of our purchase. During the last ten years our imports from the United States have increased about 100%.

You may be more particularly interested in the trade in Hardware and metals, and as showing this in 1903 we imported from the United States iron and steel manufacturers to the amount of over $27,000,000 worth; of this $21,000,000 worth was dutiable goods and $7,000,000 worth free goods. Taking all metals and minerals and manufactures of, the total purchases of Canada from the United States in these lines was about $34,000,000 worth. Our sales of iron and steel and manufactures of to the United States in 1903 were valued at $5,600,000.



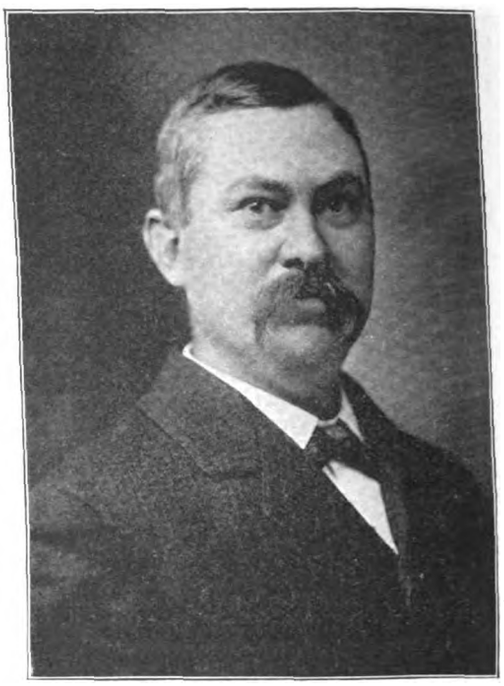
I will not take up any more of your time with dry statistics, but would cordially invite you to pay a visit to us in Canada. It may be you would desire to pass your Summer vacation with us, and if you do this we can promise that you will have a real good time. I think you will agree with me that in our small way we are properly building up our country and doing our share to help you to build up yours.

The tendency of recent legislation seems to be more in favor of protecting the home manufacturer, and we think there is no doubt that to make Canadian business profitable to American manufacturers they will have to start manufacturing in Canada. If any of those present would like any information as to the methods of doing business in Canada by us we shall be glad to discuss this matter with them.

President Bigelow: We would like to hear from Mr. George Caverhill, one other delegate from the Canadian Association:

Mr. Caverhill said:

Mr. Chairman, ladies and gentlemen, we are very much pleased to have the pleasure of being allowed to come here at this meeting. Regarding manufactories, our aspirations are very great in that line, but the help has to come from you—from the manu-



R. A. KIRK,
MEMBER OF ADVISORY BOARD.

facturers of the United States. Our growth has been rather slow in the past years—the last fifteen or twenty—but now it is increasing very fast. We have been in the past looking across the waters to send capital to our country to develop it. We have been rather disappointed and the last four or five years American capital has come and that is what we want. We have lots of room for you; we have the water power, the electricity, and certain consumption. There is a great demand for farm implements. We have a field there for you to come to and you will be heartily welcomed. I don't think that under our laws you will be disappointed at the treatment you will receive. Never to my knowledge has a manufacturer come who has been sorry that he did so. I again thank you for the privilege of addressing you.

President Bigelow: We have with us the president and secretary of the Retail Dealers' Association. Mr. Bogardus, the president, will address you later. I will call upon M. L. Corey, the secretary of the Retail Hardware Dealers' Association.

Mr. Corey: Mr. President, ladies and gentlemen, I assure you that it gives me great pleasure to again appear before an audience constituted as this. One year ago the retailers had the

COL. R. M. DUDLEY,
OF EXECUTIVE COMMITTEE.

privilege of making their first bow to the manufacturers and jobbers in convention assembled. We found upon looking over the ground that there were many questions which affect us, but which were not generally understood. I will not attempt to discuss them to-day. Neither will I go into any of the technicalities that may have attached to them since. I will simply speak to you one moment of our association, such as it is and such as we hope to make it. We are willing to admit that some of the troubles are complex and hard of solution. We believe and hope they will be met in a fair and friendly spirit. We believe our interests really

LIE IN THE SAME CHANNEL

and that the injury and danger is not confined to jobber and retailer alone. To-day the mere fact of being a member of the National Jobbers' Association is a passport to the good will and confidence of a large majority of the retailers. This sentiment we encourage and shall continue to uphold, believing the future will show better conditions for every one interested in the Hardware trade. Less than five years old, originally composed of five State associations, we have grown until to-day we have eighteen States in a solid body and this year in these States we have already added over 1,000 new members. Our membership is harmonious, loyal and intensely interested, and we believe fully appreciate the assistance and co-operation extended by both jobbers and manufacturers. Our work has been mainly one of education, beginning with our own people, we have secured the close co-operation of the jobbers and now we are unitedly striving to obtain the assistance of the manufacturers toward mending some of the evils which confront and endanger our mutual prosperity. I thank you most sincerely for the welcome that you have given me to-day.

CONVENTION OFFICERS.

At the suggestion of President Bigelow, the following officers were elected:

J. H. Van Newkirk, of New York, journal secretary.
Thos. A. Fernley, railroad secretary.
George Fernley, page.

The roll call showed about 135 delegates in attendance at the opening meeting and others expected on coming trains.

President Bigelow read his annual address, which was as follows:

PRESIDENT BIGELOW'S ANNUAL ADDRESS.

It seems hardly possible that one year has passed since we held our ninth annual convention in Atlantic City, and that we find ourselves back again to enjoy its hospitality and to continue the association work which has produced such good results the past year.

Digitized by Google

Here by the ocean and its invigorating air, away from the cities and their alluring attraction, with a meeting place where the members can mingle freely together, lasting friendships have been formed and a greater interest in our meetings has been displayed.

GATHERING IN GREATER NUMBERS THAN EVER BEFORE

for your tenth annual convention, you have come that your officers may render account of their stewardship, and to make plans for future work. Subjects of grave importance will be discussed at your meetings which will require careful, sober and thoughtful consideration. Your decisions should be based on the broadest principles of justice and fairness.

W. S. WRIGHT,
OF EXECUTIVE COMMITTEE.

FLOURISHING CONDITION.

When I accepted the presidency with which you honored me one year ago I promised I would discharge its duties to the best of my ability. Guided by your able and experienced Executive Committee, and with the assistance of your indefatigable secretary and the unanimous support of the members, I have reason to congratulate the association on its present flourishing condition.

Your executive officers have labored diligently on the lines laid down by you at your last meeting. Many results have been accomplished the past year which will be explained to you in the report of your secretary-treasurer and those of your various committees. Their suggestions for future work should receive your careful consideration. These reports will make manifest to you the ever increasing influence of your association and its invaluable aid to its members and to the Hardware trade in general, not excepting the manufacturers.

Policies adopted at the organization of this association in 1894, and continued through successive administration since that time by your able, conscientious and conservative officers, have made the National Hardware Association of the United States the model association of America. May you never deviate from the policy of honesty and fair dealing, rendering justice to all. This policy has been your mainstay in the past. Let us hope it will ever remain so.

INDUSTRIAL EXPANSION.

Last year your worthy president likened the feeling of doubt and uncertainty in the business world to the cry of the prophet of old, "Watchman, what of the night?"

That cry has now been answered, and to-day we are on the threshold of the second great outburst of American industrial expansion.

The political situation created no apprehension in the minds of business men. The people realized there were two good men as candidates, and they had no need to worry about the result.

The South has enjoyed two years of prosperity; has been made rich by ten-cent cotton, and the promised increased production the present year will add still greater riches. The construction of the Panama Canal and other great public improvements will stimulate business in that section. The West has enjoyed bountiful crops, and the high prices will more than compensate for any shortage should it develop in the wheat crop.

Money conditions throughout the country are good. Country banks were never in so good condition. Foreign capital is seeking investment here, and an immense tide of immigration promises a large consumptive demand.

The tonnage of the railroads has not fallen off. Collections are good and confidence takes the place of caution which prevailed only a short time ago.

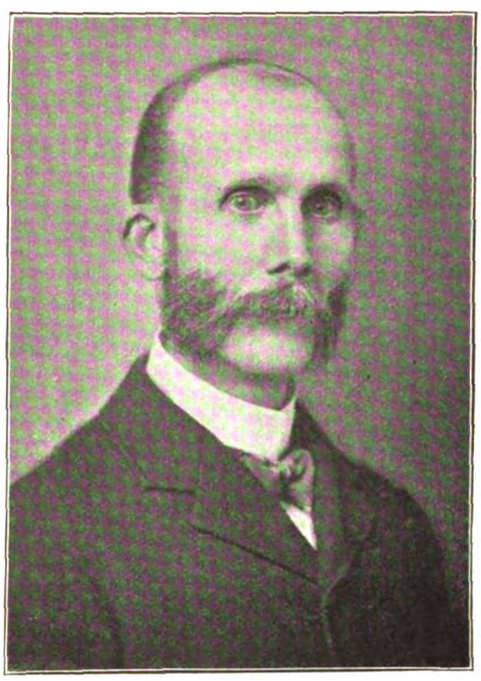
CONSERVATISM.

This association, born in a season of adversity, has continued through a period of the greatest inflation and expansion this country ever knew. It has been safely guided during great depressions in the stock market and harassing troubles, and now on the eve of returning prosperity it stands in its strength and vigor to advocate that conservatism among its members and manufacturers that has influenced a stability in prices, in the face of both inflation and depression, to the profit and well-being of the whole Hardware trade.

IN MEMORIAM.

There are many who have answered to our annual roll call who have passed on before us during the past year.

December 10, 1903, CHARLES H. KELLOGG, of Boetticher, Kellogg & Co., Evansville, Ind. Mr. Kellogg was vice-president of his company, a prominent and respected citizen of Evansville, and had the confidence of all with whom he came in contact.



December 21, 1903, THOMAS C. NESBITT, of Newlin-Knight Hardware Co., Philadelphia, Pa. For many years his wonderful determination and ambition grappled with disease, but patiently and resignedly he met the dread summons with great hope of future happiness.

January 23, 1904, EDGAR UNDERHILL, of Underhill, Clinch & Co., New York City. Removed from us while still in the vigor of manhood and from a large circle of warm-hearted friends who will ever cherish his memory.

February, 1904, JAMES T. CUNNINGHAM, of Cunningham Hardware Co., Mobile, Ala. A genial and companionable man, giving great promise of future usefulness to the business world. What promised to be a brilliant career here was, for some Providential reason, terminated.

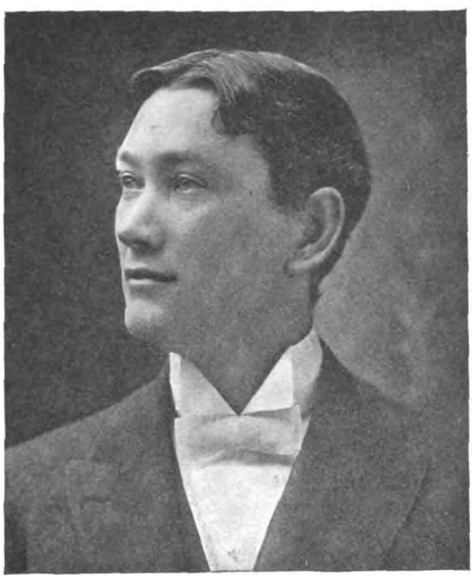
April 10, 1904, RUSSELL SARGENT, of Sargent & Co., New York City. A noble son of honored ancestors, whose pure life had already made its impress on those with whom he came in contact. His memory will ever be cherished.

May 7, 1904, CLARKE MERCHANT, of Merchant & Co., Philadelphia, Pa. A man whose keynote was honor, who entered business life after having been lieutenant-commander in the United States Navy, and who has bequeathed to his business associates an honored name which is known throughout the entire country.

J. D. MOORE, OF EXECUTIVE COMMITTEE.

May 22, 1904, CHARLES W. POTTS, of W. F. Potts & Co., Philadelphia, Pa. A genial and warm-hearted friend and one whose greatest delight was to extend a helping hand to those who were in distress.

June 1, 1904, JAMES R. SMITH, of Weed & Co., Buffalo, N. Y. His business partner of him said: "In his death Buffalo has lost a business man of rare capability, a citizen of spotless integrity and a philanthropist of undoubted generosity."



June 24, 1904, CHARLES SMITH MERSICK, of C. S. Mersick & Co., New Haven, Conn. A man active in public affairs, both commercial and political, who also served his church with fidelity and who did much to uphold the commercial integrity of his country.

Digitized by Google

October 22, 1904, CHAS. F. SCHMIDT, of Charles F. Schmidt Hardware Co., Burlington, Iowa. From the rank of traveling salesmen he established a business and became the head of it, and at the age of seventy-one years passed to his reward.

To the business associates and the bereaved families of these our deceased members we extend our most heartfelt sympathy.

I wish to thank the officers and members for the universal courtesy and support I have received and to assure you that as a member of the Advisory Committee the coming year I shall continue to do my part to support and maintain the principles advocated by the National Hardware Association.

O. B. BARKER,
OF PRESS COMMITTEE.

SECRETARY-TREASURER FERNLEY'S REPORT.

For the tenth time we are confronted with the difficulties connected with the rendering of a report to the members of the National Hardware Association of the work which we have done or attempted to do since our last annual meeting. It is very essential that we at least create the impression that an earnest effort is being made to meet your views as to what should be done, in order that the present incumbent of the position of secretary-treasurer of this association retain his position.

At the last convention of this association the secretary was instructed to execute certain policies, which after free and full discussion had been adopted. These subjects will be duly reported upon from time to time during our executive sessions.

During the year we have visited a very large number of the members of our association, discussing with them matters which were germane to the work. We have covered in this way twenty-seven States, and will not attempt to tell you how many miles we have traveled. We only desire to report we have every time gotten back to the base of operations.

SECTIONAL ASSOCIATIONS.

We have visited, whenever possible, the sectional and State wholesale Hardware associations. We have found these associations in most excellent condition, and we recommend to the jobbers in their respective sections the following: Southern Hardware Jobbers' Association, Pacific Coast Hardware and Metal Association, Texas Hardware Jobbers' Association, New York State Hardware Jobbers' Association, New England Hardware and Iron Association, and the youngest of these sectional associations, the North Pacific Hardware Jobbers' Association.

These organizations are all obtaining results from their efforts which amply repay those who are supporting them.

LOCAL ASSOCIATIONS.

We are again compelled to report there is room for great improvement among the members of our association and others along the line of attempting to obtain direct advantages from a close and frequent contact with immediate competitors. It is our opinion that in every city where there are two or more jobbing houses an association should be sustained and frequent meetings for the interchange of views should be held.

RETAIL ASSOCIATIONS.

We are pleased to report that these organizations are gaining in numbers and influence. Since our last convention we have come in contact with many of the officres of these associations, and we find them to be men of ability and thoroughly earnest in their efforts to benefit the conditions which surround the retail Hardware business.

We sincerely hope that the day is not far distant when every retail Hrdware merchant of the United States will be connected with his State association, and in this way not only protect his own interests, but through the National Retail Hardware Dealers' Association of the United States, benefit the general Hardware interests of the country.

PREMIUM FOR ANTICIPATED PAYMENT.

The attitude of our association on this subject is too well known to need any further explanation. Indeed, at the present time almost every manufacturer of Hardware and kindred lines has conceded that the buyer, who places the seller in posssesion of funds within ten days of the date of shipment of goods, is entitled to this premium. In fact, it has become a trade custom.

We hear very little complaint from manufacturers of violation of the terms; truly, if the premium is accepted the purchasers should live up to the conditions governing the offer.

For several years we have been urging upon the manufacturers of tin plate the importance of adopting the two per cent for cash within ten days. This is the first time we have been able to report success. The thanks of the trade are due to the American Sheet and Tin Plate Co. for having met our views, and I think our membership is prepared to thank in advance the very few concerns who are still holding out for terms other than mentioned, but who in all probability will within the next few weeks yield to our requests.

OUR RELATIONS WITH MANUFACTURERS.

During the past year, we believe, the assistance which our association can render the manufacturers of the country has been recognized to a greater extent than in previous years. The principle that the jobber is the proper distributor of goods and that he is the most economical agent is no longer a subject of debate, so that to-day we find manufacturers coming to our association, and asking what selling policy they can adopt that will be most pleasing to those upon whom they depend for distribution of their product.

In order to be fair to the legitimate retailers of the country as well as the jobbers of the country, manufacturers recognize that it is essential for them to classify by name those who are entitled to rank as jobbers. The value of the experience of our

COL. B. F. ESHLEMAN,
OF MEMBERSHIP COMMITTEE.

association is recognized to such an extent that a very large part of the time of the secretary-treasurer of this association is devoted to making up of these classified lists. Indeed, to such an extent do the manufacturers appreciate the services which can be rendered them that offers of remuneration are frequently made, which, of course, are always declined, as our association is on record as inviting the manufacturers to seek our co-operation.

MEMBERSHIP OF THE ASSOCIATION.

When a report of our Membership Committee is received it will develop that during the year quite a number of legitimate jobbers have united with our association, so that numerically

Digitized by Google

we are stronger than at any time in our history, and would further add that those admitted are such as will add strength to the organization.

FINANCIAL CONDITION.

It is very pleasing to report that we have in our treasury at the present time, after all bills are paid, a balance of almost $5,000, so that we are in a very healthy financial condition.

CATALOGUE HOUSE COMPETITION.

In previous years our report has always alluded to this subject. The matter, however, is now in the hands of a special committee, which committee is part of the Wholesale and Retail Hardware Joint Committee, an organization of retailers and jobbers, which has been vigorously handling the subject during the past six months, and we are certain that the report which our Catalogue House Committee will make will be pleasing to the members of this association. We would only add that the agitation has brought the organized retailers and this association into a close personal contact, so that to-day the jobber and retailer are united, each convinced that the interests of one cannot suffer without the other being affected.

LOYALTY OF MEMBERS.

The members of our association during the past year have evinced interest in the work of the association to a marked degree. Correspondence from our office has been given prompt

COL. JAMES R. NUTTING,
CHAIRMAN OF PRESS COMMITTEE.

attention. We know of no organization, the members of which display a warmer interest in the work. The Executive Committee of the association have freely given of their time in instructing and directing the footsteps of the secretary-treasurer.

The president of the association has kept a firm hand on the organization in general and the secretary-treasurer in particular. We do not want to publicly unfold our sorrows or tell anything of the details of the sadness of our life during the past year caused by his strenuous guiding hand. The high regard in which he is held by the members of the National Hardware Association would probably cause a withholding of sympathy with the sufferer. We can only add that nothwithstanding all, we are still able to tip the scales at the usual weight.

WHAT ARE THE PROPER AVENUES FOR THE DISTRIBUTION OF HARDWARE AND KINDRED LINES?

In introducing the subject, "What Are the Proper Avenues for the Distribution of Hardware and Kindred Lines?" the president first called on Geo. W. Corbin, president of the Corbin Cabinet Lock Co., who addressed the delegates as follows:

By Geo. W. Corbin.

Probably no qustion which has been brought for discussion before the many meetings of this association has been more considered with less possibility of satsifactory settlement to all parties interested than the question, How shall goods be marketed?

Other trade questions have been treated and acted upon in a harmonious spirit after repeated discussions by both jobbers and manufacturers, and practically a uniformity of action has resulted, such action being necessary in order to continue business with a better understanding between manufacturer and distributor.

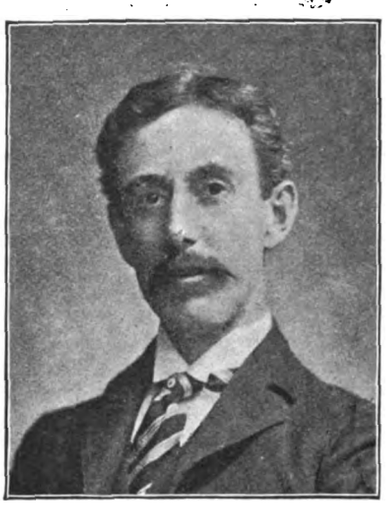
Every question, such as syndicate buying, selling retailers, selling catalogue houses, cash discounts and other less important subjects have been handled in a broad and liberal manner which has been advantageous to all interested. It was

FOR THE PURPOSE OF BETTERING THEIR RESPECTIVE CONDITIONS

that the jobbers saw fit to come together, and in so doing the manufacturers were placed in such a position that nothing but benefit could accrue by their co-operating with that association for the mutual benefit of both jobber and manufacturer.

The manufacturer of to-day sums up the matter by asking questions similar to these:

How Can Goods Get to Consumers' Hands the Cheapest Way?
How Can the Consumer Be Supplied at the Least Expense?
What Is the Most Profitable Way to Place Goods in the Consumers' Hands?



We all recognize

GEORGE B. LOGAN,
OF MEMBERSHIP COMMITTEE.

IT IS THE CONSUMER WHO CREATES THE DEMAND.

It is to supply his wants that goods are made and stock carried by those whose duty it is to supply such demands. From the manufacturers' standpoint, there are those whose entire output, provided it be a limited line of goods, can be marketed through the jobber, but the larger manufacturer whose assortments are unlimited, is compelled by the very nature of his goods to sell to jobber, retailer, consumer or any one for whom the line is attractive or for whom the goods are especially made. No jobber sells or will carry in stock the complete lines of some manufacturers. There are many lines of goods which jobbers will not

JAMES H. RITTER,
OF ENTERTAINMENT COMMITTEE.

handle. It is difficult to interest jobbers in many new lines of goods for which the jobber must create a demand, hence manufacturers are compelled to create the demand through retailer or consumer. There are lines of goods made by Hardware manufacturers and handled by Hardware jobbers which are sold by jobbers interested in lines foreign to Hardware. There are manufacturers who are jobbers and jobbers who are manufacturers. There are jobbers who manufacture and sell to retailers as well as to consumers.

The foregoing illustrates the trade complications in a line that daily grows more extensive. Lines that on account of details and

Digitized by Google

endless variety should entitle the dealers to a greater apparent profit than that of any other business, but it must be admitted from all points of view that

NEARLY EVERY OTHER BUSINESS IS MORE REMUNERATIVE THAN HARDWARE.

More attention has been recently given by manufacturer and jobber to houses whose business is assuming large proportions, who have created a demand for all lines of goods by catering for business direct from consumers with attractive goods as well as attractive prices, the distributors at retail who have assumed a prominent position, in reality that of retail Hardware dealers, who retail by means of catalogues. We also have another class of distributors on practically the same lines, but who solicit and receive business direct from the retail trade and who are comparatively free from the expense of selling their goods and are also mail order catalogue houses.

THERE ARE THE VERY FEW JOBBERS WHO SELL TO RETAIL TRADE EXCLUSIVELY.

Then there are the jobbers who are also retailers and are in a position to sell every class of trade from the manufacturer to the consumer, including what are known as catalogue houses. Then there are the syndicate buyers whose policy has enabled jobbers, retailers, manufacturers and consumer to buy through them at one price for all classes of trade. Associations of retailers with practically the same business ideas as syndicate buyers are com-

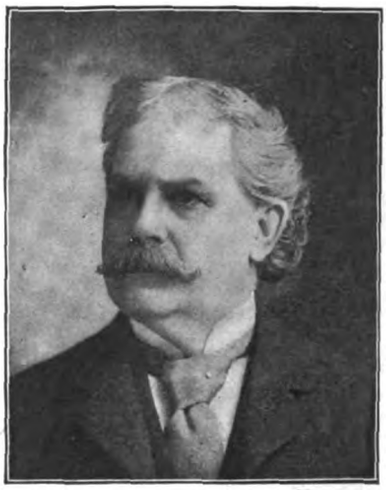
CHARLES H. TURNER,
OF MEMBERSHIP COMMITTEE.

ing into existence, whose combined purchases make it an object for manufacturers to treat them as a jobber, with the result that in every instance where an aggregate of business appears, the question of price is not for the class of trade, but for the volume instead.

It is impossible for manufacturers to agree upon any price system to meet all the complicated systems of trade demoralization. It is possible, however, for manufacturers, jobbers and retailers

TO AGREE UPON UNIFORM POLICIES, WHICH MUST BE ADOPTED

and which would to a great extent overcome the objections raised by the trade on account of goods being distributed through channels not recognized by the various trade associations as legitimate. The prime factor in the distribution of Hardware is the manufacturer. Every manufacturer would gladly welcome a movement whereby the jobber would take his complete line and dispose of his entire output. This, however, is an impossibility.



In the face of these facts we are confronted with the question, What are the proper avenues for the distribution of Hardware and kindred lines? In the distribution of goods the logical and proper avenue would be for the retailer to supply his wants from the jobber, the jobber from the manufacturer and the manufacturer to sell only to the jobber.

THE MANUFACTURER SHOULD SO REGULATE AND ADJUST HIS POLICY

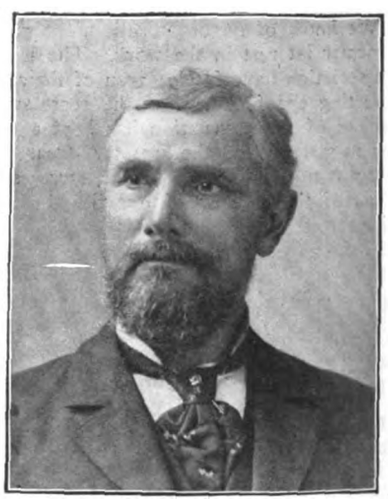
that when conditions arise caused by new methods, irregular methods or a doubtful departure from natural methods of doing business, he can justly and equitably, both to himself and his customer, retain the confidence and respect of those who have contributed towards building up his business, and upon whom his future business and profits depend, and at the same time feel that in marketing Hardware through recognized and proper Hardware channels he is building correctly for his own future.

Mr. Corbin, always popular with the Hardwaremen, was given a hearty and well deserved applause.

President Bigelow then introduced W. P. Bogardus, president of the National Retail Hardware Dealers' Association, who delivered the following interesting address:

E. W MORLEY.

W. P. BOGARDUS.



Mr. Chairman, Ladies and Gentlemen:

In a discussion of the question, "What are the proper avenues for the distribution of Hardware and kindred lines?" the speakers may not be able to present other than their own point of view, yet it is hoped that the discussion, while it may not settle anything, will lead to a crystalization of opinion, that it will help to establish a basis for further discussion and a final satisfactory adjustment of the question.

As a retailer I take part in this collocution with no other motive than to call attention to the fact that

OUR INTERESTS ARE MUTUAL,

and that our success depends on reciprocity in our relations with each other; and further to refer to the necessity of a recognition on the part of the manufacturer of his obligation to those who eventually put his manufactured product in the hands of the

HON. C. B. LOCKWOOD,
OF PRESS COMMITTEE.

turer should distribute his product through the jobber, and he through the retailer, and he to the consumer; that this method is not because it is old, but because the experience of the centuries has proven it to be the most practical and economical method yet devised for the distribution of the manufacturer's goods. If we all held to this method, and practiced it, there would be no occasion for this discussion. But there are those who hold that

THE MANUFACTURER HAS AN INHERENT RIGHT TO SELL TO WHOM HE PLEASES, AND AT PRICES HE PLEASES,

and that his interest in and control over the goods he manufactures ends when they are sold. We cannot go to Maine and shoot

Digitized by Google

all the moose we may find. We cannot go to Michigan and kill deer and carry them out of the State. When we go to Ohio we are limited as to the number of quail we may shoot, and we violate the law when we offer them for sale. Shall we say that we are robbed of our inherent rights by these limitations? No, for all recognize that these laws have been

MADE FOR THE PUBLIC GOOD.

Therefore, we must realize that all the restrictions of our inherent rights are based on and justified by the fact that civilization brings to us obligations and restrictions that the savage or uncivilized have no occasion to observe or even recognize.

And as we needs surrender some of our inherent rights for the public good, we must remember that the surrender involves some modification and restriction of the savage's methods of doing business. Customs are established by experience and we have to learn that in all we do we must recognize the rights of others We go into the market to buy, but we cannot make the price. When we undertake to sell what we have bought we cannot make the price. The needs or necessities of our competitors make the price both in buying and selling, and there is no escape from this law except through monopoly. When we monopolize the manufacturing of an article we make the price. When we have the exclusive sale of an article we make the price in so far as the law of supply and demand will permit. But monopoly as a rule is legally and morally indefensible. It is said that "competition is the life of trade," and so it is when it is healthy, but a competition that looks to the

BREAKING DOWN OF ALL OPPOSITION IS NEITHER HEALTHY OR WISE.

The desire to control the entire business of the country; to reach out in all directions with a greed that hesitates at nothing to accomplish its ends; to try to bribe mail carriers for lists of names in violation of law; to seek to break down all opposition even if it result in the ruin of thousands, is an ambition so tainted with avarice and

COMMERCIAL DISHONOR

that it should meet the public execration of the entire business world. When a manufacturer helps on such an ambition, an ambition that looks to the building up of an overshadowing and underselling competition he does an injustice to the commerce of his country. No country will remain prosperous whose commerce is in the hands of a few, for the few grow richer and the balance poorer each succeeding year. And the vast accumulation of wealth in the hands of a few become an irresistable power for the oppression of the people. The condition that experience has taught us is the ideal one, is not in the concentration of manufacturers in one organization, nor the distribution of their manufactured product through a few mammoth concerns, but through a multitude of small distributors, scattered over the land, who are in close touch with the demands and requirements of the consumer. It sounds very fine to say that there shall be no middle man, and that the manufacturer will go direct to the consumer, and so eliminate the middle man's profit. But

THE SCHEME IS AS VISIONARY AS IT IS IMPRACTICABLE.

There can be no economical, or successful distribution of goods from the manufacturer to the consumer. There are no manufacturers or group of manufacturers who make all the goods demanded by the needs of the consumer, and therefore there must be those whose business it is to assemble the goods of various kinds at economical points, and from thence distribute them to the consumer. To undertake to distribute goods from large centers is impractical because the consumer wants to see the goods and make his selection before buying.

The great trees do not depend entirely on the big roots that brace and support them for their life, but on the network of little fibrous roots that permeate the soil, and draw sustenance from it for the support of the big roots as well as the trees, for when the fibrous roots are cut off the tree dies. So the manufacturer cannot depend on the jobber for his business success unless the jobber has attached to him the thousand and one little distributors who look to him for their supplies. Now if the manufacturer does anything that will cripple the little distributors he so far injures his own business.

"Oh, but," says the manufacturer, "we have found a new way to distribute our product. We sell to those who go

DIRECT TO THE CONSUMER,

and as they buy in large quantities, and are prompt pay, we can afford to give them low prices, for we have fewer customers and less accounts." Very well, if this new way takes all your product there is nothing further to say, but if it does not, and it is generally conceded that not more than ten per centum is distributed in that way, what about the rest? "But," says the manufacturer, "I do not care what becomes of the goods after they leave my warehouse, and I get the pay for them. I have no further responsibility in the matter. I cannot tell my customer what he shall sell his goods for. They are his and he has paid for them."

If that was the only sale the manufacturer was ever to make that kind of talk might do. But he is in the market year after year to sell what he manufactures, and he needs people who will buy steadily of him. Is there no obligation on his part to look after his trade and see that they are treated right? Is there no moral obligation on the part of the manufacturer to those who have helped him to dispose of his product? Can he ignore his responsibility without disastrous results to all concerned? Has he any right to do anything that will hamper or injure those to whom he has sold his manufactured goods and hope to continue to sell? There is a moral obligation on every one of us that we may not ignore with safety to our business lives. The golden rule is as applicable in business to-day as it ever was. Does the interest of the manufacturer in his goods end with their sale? Is he satisfied to see the prices on his goods demoralized? I do not know, but I have heard, that there are certain restrictions

W. P. BOGARDUS.

placed on the jobber by the manufacturers, and that he is forbidden, under penalty of being deprived of further supplies if he varies from the prices given him by the manufacturer. In such a case the interest of the manufacturer does not end with the sale of the goods. Now if it does not end in such a case, is there any case where it should? Why sell to one class without restriction, and to another class with such restrictions that they may not break them under any circumstances? Why put it in the power of ten per centum of your trade to injure and hamper the balance? "But," says the manufacturer, "we make the price according to the amount a man buys." Is that equity? Is it right? If one customer buys twenty per centum of your output, and eight others each buy ten per centum, why should the first one have

A BETTER PRICE

than the others? Why should an advantage be given the first customer that is denied the other eight, especialy when the eight buy eighty per centum of your goods? The unavoidable effect of such a method is to build up the one at the expense of the eight, and to demoralize and ruin your business. There are many things that should enter into the question of price, and quantity is but one of them. Whatever system is settled on, it must be a system that is just to all; that is fair for all; that does not tend to build up great fortunes at the expense of the consumer. Theories are good, but they must bring practical results if they are to be useful to humanity.

We cannot afford to stand for any plan that will not be fair for all, with any hope of ultimate success. It is said by some that "the time will come when the production and distribution of material goods will cease to be regarded as mere dollar getting," and will take its place in a department of scientific intellect, and with the scientific development of manufacturers will come a more perfect mode of distribution." Yet whatever changes the future may bring it must be that the buyer must meet the seller.

Digitized by Google

And the necessity of greater knowledge of business, and business methods, and a more complete information about and knowledge of the goods handled will be required of the coming merchant, and with this knowledge must come the enthusiasm that makes men love their work so that the act of the distribution of goods will become a scientific and intellectual contest.

These are the days of organization, association and regulation. And while some have carried their views to extremes and have caused a reaction in favor of a larger degree of competition, yet we may not surrender the valuable things that come from organization, association and regulation, but we will add these to the balance from the other side and have as a result combination without tyranny, association without competition, and regulation without license or waste.

SAMUEL E. WINSLOW,

President of the Samuel Winslow Skate Manufacturing Co., was then introduced; he spoke as follows: Mr. President, ladies and gentlemen, I suppose it is fair to assume that the delegates have come to this convention from choice; that they have come from some special interest in what is going on. I don't know enough about the general subject to be of any service to the convention, but Mr. Fernley said in extending to me the invitation to address you that it did not matter, that they had just so many places to fill; my business was a small one and I always did it with jobbers and nobody else, and that they had me just where they wanted me; that if I would not come that he would arrange a boycott on my goods, so then here I am.

I suppose what you expected me to say was that in my opinion all Hardware and kindred articles, as they are termed, should be distributed through jobbers, and through jobbers only. He is justified in that because he has heard me say on probably a few occasions when I have been sitting around his office stove for two or three hours in the morning smoking with him and other fellows who dropped in that we had found in our business that the only way in which we could succeed was to work through jobbers Now, it would not be fair in deference to those who have preceded me here to let that statement go at that point. Our business happens to be one which is carried on only in one season of the year and is such that it should be properly classed with those other lines of the same character, which fortunately are not very many in number. You will therefore excuse me if I do not attempt to make any suggestions to persons who manufacture all kinds of commodities with an all-the-year-round market, and you will excuse me, I hope, if I confine my remarks to that one line of which I ought to have some knowledge, if I have any whatever. Now,

IN THE MATTER OF SKATES

the kind that I deal in—(laughter) that it is apparent I should say to most anybody that with the innumerable small towns to cover all over this land that it would be quite out of reason to think that any manufacturer should do his own business without the help of selling agents and so on with any profit to himself—to send salesmen about through the year. The sales have to be made in a very short time from the factory. The goods have to be distributed in a very short time all over the land—such part of the land as we go into. So it would go without any further discussion that in our business the only way for us to get goods on the market is through the help of the jobbing houses; so we stand committed voluntarily for the first time to-day as favoring for our lines the jobbing houses. So much for that aspect of the case. But there is one other which I think in fairness I ought to mention at this time, one or two items. The first one is not only the means of distributing goods, but the method of handling the accounts. The other one is the influence of this particular association in helping the skate manufacturers to follow out what looks to be like a decent policy for handling their merchandise. As to the first: After the manufacturer has put his goods into the hands of the jobber. I think it is perfectly true as the preceding speaker has said that the manufacturers' interest does not cease. From my experience his trouble is just begun. and while I am here and for fear that I may never have a chance again to get you people with a closed door and on neutral ground at least, I want to take the opportunity to relieve my mind of one very bad notion I have had about jobbers for over 20 years. It is very fortunate that the experience and records of this association will bear me out. I think that the jobbers—let us say previous to eight or nine years ago and from that time back for ten years at least, were their own enemies. I think that they not only cracked each others heads. but they put the manufacturers in the way of cracking the heads of one another. They stirred up a

GREAT AMOUNT OF TROUBLE,

which began, I presume with jobbers in their anxiety to get a great amount of business, which of course we all approved of. It went on to the retailers through his honest desire to get the best possible price. It was but a step back to the manufacturers. I have never been able to find out in the altercations with our customers about prices—about favors reported to have been extended—which man was really the liar; and I have never met a man who has told me. but there has many times been evidence of a liar somewhere. We have been accused of selling for one dollar something that cost $1.50 and we have been accused of selling the same thing for 90 cents to the next man; but as we have tried to pin down the lie we have never been able to do it but once in twenty years, and that lie was not a real lie, but it answered all the purposes of a lie. A man representing a jobbing house had sold a bill of goods, let us say at one, two, three or four dollars—an article to a retailer. Along came the representative, a personal friend of the retailer buyer, who said to him "Bill, have you bought your skates yet." He said he had. "What did you pay?" "I paid one, two, three and four dollars." Why, who had the nerve to roast you like that? "What ought I to have bought those for?" "90 cents and on up to the $3.90." He did not say that he would sell them for that, but he told the fellow he ought to have bought them for that. Now, there was an agreement right then and there, and the trouble went on. It rolled up and rolled up and it took weeks to settle that matter. It is so with men, many who go out to sell goods, if they cannot sell themselves the next proposition is to put the man who did sell in bad favor. Now I think that is the policy of a certain class of men whom the jobber should not countenance. Now, I will go back to the point where I started. I think it is not entirely a question of what the manufacturer does in reference to marketing the goods, but it is of equal importance that the jobbers will so regulate themselves if they can that the manufacturers' efforts will be well seconded and his purposes in working through the jobber will be fully supported by the jobber.

Now, as to the attitude of this association through its particular working officer, the secretary. Skate manufacturers, as I think is so commonly known now as not to make it any sacrifice of confidence, have been endeavoring to so sell their goods for the past two years or more as to make it a profitable line for retailers and jobbers and manufacturers. Previous to seven or eight years ago the ice skate had become nothing more nor less than a foot walk; it was kicked around and it ought really to have been thrown out of everybody's shop. There was no profit to anybody in the line. Now, we worked along on our price proposition; we worked along with our method of selling goods; we did everything I believe that the manufacturers of this country could possibly have done, yet we failed to make that profitable—that line to jobbers, and the same way of course to retailers. We did all that we knew how to do. We then got in touch with Mr. Fernley and said to him "we don't know how to control these wild animals of yours; can't you help us a little?" As a result he came in conference for several sessions and finally showed us or worked out with us—assuming part of the credit to ourselves—we worked out a plan which we have adopted. It has been in force for three years. It is not my purpose to tell what that is; it would take long to describe. It is well known by probably a majority of the delegates in this convention, and I can say that through the intercession and the co-operation of this association as represented by Mr. Fernley the skate manufacturers to-day, so far as prices are concerned, as far as a method of selling through jobber and retailer is concerned, we have worked out a plan against which in a canvass for two years of over 500 customers we have had only one complaint and that complaint came from a man who wanted his profits doubled.

So then I stand, not representing officially the manufacturers of skates, I represent only my own views, I wish myself at this time to extend to the secretary here and through him to you our thanks for the encouragement and for the execution of a plan which has made skates a better article of merchandise for jobbing purposes than almost any other line which can be classed as distinctly Hardware. Let us go from this room with the conviction, so far as my testimony is concerned, that the interest of the jobber and the manufacturer is one and the same thing. Mr. Winslow was given a hearty applause.

President Bigelow: The next speaker will give us his ideas on the manufacturer controlling the re-selling price of his products. I will call on Mr. Geo. Reuter, Jr., general manager of the American Wringer Co.

Digitized by Google

GEO. M. REUTER, JR.

I did not know until last evening that my name was on this program for remarks under the subject of "Proper Avenues For the Distribution of Hardware and Kindred Lines."

There are three avenues through which manufacturers distribute their products. One is direct to the consumer, the other is to the retailer, and the third is to the jobber.

I will speak first of the consumer, as that is what might be termed the introductory avenue, and is

WHERE THE FOUNDATION IS LAID FOR THE FUTURE DEMAND

to be supplied through the second and the third avenues; thus the great sewing machine industry was established by the manufacturers selling direct to the consumer, and a demand was created that is reflected now in the sale of sewing machines by both retailers and jobbers.

The wringing machine industry, in its infancy, was of very slow growth until the first avenue was used by manufacturers who sent canvassing agents from house to house to sell housekeepers the new labor saving article, which made such a demand for it that the first avenue of distribution was abandoned several years ago, and retailers and jobbers now find a large sale for clothes wringers.

The second avenue is to the retailer, and through this the consumer is now reached in two ways, first, through sales in the merchant's store by personal contact with the consumer, and, second, through catalogues sent through the mail to reach the consumer. I believe that no manufacturer questions that the first is by far the best for him, yet I am of the opinion that it is just as legitimate to sell at retail by catalogue as it is at wholesale, but in both cases ruinous cut-throat competition should be avoided by a price maintenance system, as

WHEN A MANUFACTURER'S PRODUCT BECOMES UNPROFITABLE

to the merchant, that manufacturer's business is bound to suffer, and therefore it is to the interest of every manufacturer of a standard article to have it sold at such a price as will enable every dealer, be he large or small, to make a fair profit.

We supply wringers to only one of two large Chicago

CATALOGUE HOUSES,

so frequently alluded to, but they are all special or private brands, over which we have no control. If they wished to purchase our factory brands, there could be no reasonable objection to our supplying them, provided they agreed to sell them at prices fixed by us, and which we claim to be able to limit by reason of our owning valuable trade marks on such factory brands.

The two houses in Chicago are not the only ones selling to consumers by catalogue, as a number of the large department stores are selling goods in the same way, but in no case has there been a complaint against them and for the reason that their prices have been fixed by us at a reasonable figure.

There was a time when department stores would sell for $1.98 a wringer that cost them $2.00. We then adopted a maintenance of price system, and the department stores in all the leading cities have for more than two years maintained the prices fixed by us on our factory brands, which prices afford them and all other dealers a fair profit.

I stated in relation to sales by catalogue, that both at retail and at wholesale ruinous cut-throat prices should be avoided; we sell our factory brands to the largest wholesale catalogue house in the country, and for two and a half years past, said wholesale catalogue house has maintained the prices fixed by us, and this brings me to the third avenue of distribution, the jobber, who reaches every town and hamlet and who should receive a fair compensation for his services to the manufacturer, but whose profits are frequently destroyed by

CUT THROAT METHODS

of unprincipled competitors. For a long period the prices of clothes wringers were cut by some jobbers who made a leader of them, so that they were commonly sold at $1.00 per dozen profit, and in some cases at fifty cents per dozen, in other words, at not even five per cent over cost.

After several years of such ruinous competition, the article became so unprofitable to the jobbers that we decided the only way to afford him a profit was to limit the price at which he could sell our goods. This we did on February 1st, 1902. Although alone in this move, we had the co-operation of a majority of the jobbers, and therefore met with great success, and the limited price system proved most satisfactory for two years, and it no doubt would have been equally successful this year, but for the fact that the very high cost of crude rubber necessitated three advances in prices of wringers within a period of four months. Some jobbers having old stocks could not resist the temptation of turning paper profits into cash, and other manufacturers did not limit their jobbers as to prices, therefore there has been more or less irregularity in prices this year, but I still have the greatest faith in a maintenance of price system for the sale of standard goods. It takes from the catalogue house the strongest weapon it now has, and the system benefits all business men, be they retailers, jobbers or manufacturers.

Mr. Reuter's remarks were very well received and on motion a vote of thanks was tendered to the gentlemen who had addressed the convention.

The convention then took a recess until 2.30 p. m.

THE LADIES ENTERTAINED.

Wednesday afternoon a large party of ladies were entertained at Young's Pier, the programme consisting of several selections by Ringgold's Band.

Executive Session, National Hardware Association.

WEDNESDAY AFTERNOON,

NOV. 16TH.

The convention was called to order promptly at 2.30 and the reports of the Transportation and Membership committees were received and ordered placed on file.

Answering an inquiry, the secretary stated that the association membership composed practically all of the jobbing trade in the Hardware line in the United States.

The report of the Committee on Heavy Hardware was received and placed on file, and the report of the Metal Committee was received and referred to the Metal Committee, which was to meet at 4.30 p. m.

Secretary-Treasurer Fernley presented the financial report of the association, showing a balance in the treasury of about $5,000. The report was referred to an Auditing Committee and the association then listened to W. S. Wright, of the Executive Committee, who read that report, which was discussed section by section and acted upon.

The following Committee on Nominations was appointed: Geo. T. McIntosh, Cleveland, Ohio; J. H. Boucher, Rochester, N. Y.; Col. B. F. Eshleman, New Orleans; J. A. Warner, St. Joseph, Mo.; J. S. Breck, Boston, Mass.; H. C. Marshall, Duluth and Portland; Geo. L. Irvin, Baltimore, Md.

On motion the convention adjourned to meet the next morning at 10 o'clock.

THE RECEPTION.

It was indeed a gay and joyous party that assembled at the St. Charles, Wednesday evening, for the reception tendered by the Manufacturers' Association. The hotel had been tastefully decorated for the occasion and this, together with the presence of a large number of beautifully gowned women, made the scene one of great beauty. In the ballroom the following programme was rendered, each number being received with hearty applause:

PROGRAMME.

1. OVERTURE—"The Merry Wives of Windsor"....*Nicolai*
   Ringgold Orchestra of Reading.
2. QUARTETTE—From "Rigoletto"..... *Verdi*
   Mrs. W. S. S. Coleman,
   Mr. John R. Bland,
   Miss Clara M. Yocum,
   Mr. Fred. G. Rees.
   Accompanist, Miss M. Evelyn Essick.
3. VIOLIN SOLO—Ballade and Polonaise.....*Vieuxtemps*
   Gertrude Keppelmann-Landis.
   Accompanist, Mr. Henry A. Gruhler.
4. TENOR SOLO—"On, Away, Awake, Beloved".....*Taylor*
   Frederic Charles Freemantel.
5. MARCH—"Our President" ..... *Aronson*
   Ringgold Orchestra of Reading.

After listening to the programme, the party partook of refreshments in the dining-room. The menu included: Chicken Salad, fried oysters, sandwiches, appolinaris, champagne, ice cream and cake. And it was a late hour when weariness at last got the better of pleasure and the party broke up. The only thing that occurred to mar the pleasure of the occasion was the result of a piece of mismanagement on the part of the hotel people in handling the wraps, by which a large number of people were compelled to stand in line for an hour or more, then to receive their hats and coats, in many cases, in a much damaged condition.

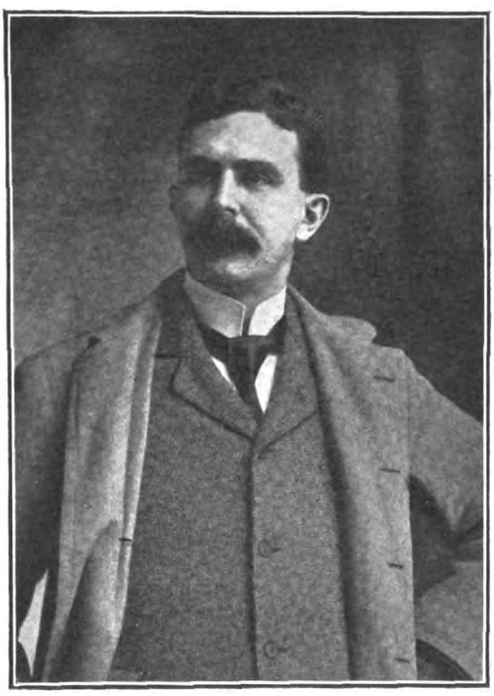
THURSDAY MORNING SESSION.



The morning session of Thursday was devoted to the discussion of the report of the Catalogue House Committee. This was executive in character and therefore open to members only.

PRICE MAINTENANCE.

R. E. Shanahan, of the Bissell Carpet Sweeper Co., Grand Rapids, had been invited to prepare a paper on the subject of "Price Maintenance." This paper he prepared, but was unavoidably absent and it was read by T. W. Williams, vice-president of the Bissell Co.

Mr. President and Gentlemen:

We esteem it a great honor as well as a privilege to be requested to address the convention of the National Hardware Association of the United States, upon the subject of "Price Maintenance," and except for the affinity that exists between all branches of manufacturing business, it would seem almost absurd for a carpet sweeper maker to address a body of either Hardware manufacturers or jobbers and cherish the belief that he could say anything that would be of vital interest to them.

S. NORVELL.

However, there are certain inevitable laws in trade that affect the manufacturer, the jobber, the retailer and the consumer, and upon this hypothesis I shall hope that a definition of price maintenance as established and promulgated by the Bissell Carpet Sweeper Co., whom I have the honor to represent, may have some interest for you, and that you will not feel that the time devoted to the consideration of this subject was misspent.

I hold that price maintenance is fundamentally sound in principle, and eminently just and beneficient in practice. A solid, uniform system of prices promotes character in business, develops the higher ideals in commercial relations, and secures to its devotees the confidence of the public, which is in itself a valuable commercial asset.

When I speak of price maintenance, I mean an honest, equitable system of uniform prices, that is based upon the sound principle that the manufacturer, the jobber and the retailer are justly entitled to a fair margin of profit in the sale of any commodity, and that the quality of an article can only be maintained so long as all parties concerned in its sale co-operate and rigidly maintain uniform prices.

Right here I want to point out a significant virtue of an honest system of price maintenance, namely, that while protecting and conserving the best interests of the manufacturer, the jobber and retailer, it reaches out and fully protects the consumer by insuring to the purchaser a high standard of quality in the article, and a reasonable price. On the contrary, price cutting is a species of commercial debauchery that rests upon the relentless doctrine of the survival of the fittest; upon the narrow, cold-blooded principle that merchandising is a sort of commercial warfare; that "all's fair in war," and the "devil take the hindmost." Price cutting lowers the commercial standing of the manufacturer, jobber or retailer, who practices it, destroys profits, breeds distrust, fosters prevarication, and finally robs the consumer by debasing the quality of the commodities upon which prices are cut, if not actually driving many of them from the market.

To analyze this point: In the beginning I said there were certain inevitable laws of trade that work out with mathematical certainty, and one of these is that the article that is placed on the market without the stipulation that it must be sold at uniform prices, both wholesale and retail, will in a short time be retailed at such low prices as to destroy all profit in its sale, thus killing the demand for it with both jobber and manufacturer, leaving open to the manufacturer as a last hopeless course the lowering of his prices, which means the deterioration of the product; and so it seems to me that it can be logically maintained that price cutting is demoralizing from beginning to end, working detriment, disappointment and loss to all concerned—manufacturers, jobbers, retailers and consumers.

Price maintenance is in harmony with the soundest principles in business to-day, whereas price cutting is so bad, so admittedly vicious, as never to be openly advocated even by its staunchest devotee. The manufacturer, jobber or retailer, conducting his business under an equitable system of uniform prices, commands confidence and respect, whereas the price cutter among any of the three classes mentioned arouses animosity, kills profits, establishes distrust and forfeits confidence. Price maintenance presupposes system, order, co-operation, stable methods of conducting business, and makes for that fine personality in business that we all prize so much in the individual. A short time ago there appeared in one or more leading magazines an exhaustive article on the "Personality of a Business," Marshall Field & Co. being given as an example of a mercantile institution, that by correct methods had built up for themselves a distinct personality, and which never would have been acquired under the demoralizing influences of a price-cutting policy.

It is evident that price cutting is not practiced alone by the dealer, but also by the jobber and the manufacturer; therefore the only way that a sound, comprehensive, satisfactory system of price maintenance can be adopted and carried out is through co-operation. The manufacturer must first establish a schedule of prices to the trade; then in his contracts with the jobbing trade it should be stipulated that the jobber strictly adhere to the manufacturer's schedule of prices in selling the goods to his customers. Then it must be thoroughly understood and agreed between the manufacturer and the dealer that a certain piece of goods must not be sold at less than the price fixed by the manufacturer.

To what extent a system of price maintenance can be carried in other lines I do not feel competent to say, but it does seem that a uniform scale of prices might be established and maintained with profit to all concerned, upon many articles that are to-day sold haphazard with little profit to either manufacturer, jobber or retailer.

As to the benefits resulting from a price maintenance system, I do not claim to speak with authority outside of our line, but I can say in all earnestness that in the case of the Bissell Carpet Sweeper Co. the uniform system of prices, both wholesale and retail, have been one of the strong factors in the upbuilding of our business. I trust it may be fully understood that except as a logical necessity I would not refer to our competitors in dealing with this question, but when you consider that no carpet sweeper manufacturer in this country but ourselves ever attempted a price maintenance system in the sale of his commodity, it is at once essential to an intelligent estimate of the benefits accruing from the adoption of uniform prices in our business, to know that the Bissell sweeper is the only one sold under a fixed system of prices. It now becomes necessary to show wherein price maintenance has benefited our business, and I tell you that you may draw your own conclusions from the statement that we manufacture and sell eighty per cent of the world's output of sweepers. I do not say that price maintenance is solely responsible for the results presented, but I do say that this system has been one of the great factors in the upbuilding of our business.

A system of price maintenance, like a system of advertising, presupposes that the commodity upon which the system is applied has quality. No article can stand an expensive campaign of advertising unless it has merit, and so, too, it would be useless to attempt a system of price maintenance upon a spurious commodity.

It may be interesting for you to present briefly how we conduct price maintenance on our goods. In the first place, we list our goods so that they can be retailed at moderate prices, and still yield the dealer a good profit. This plan naturally increases the sale of the goods by fixing the price low enough so as to bring it within the reach of the masses; then through liberal advertising to swell the demand for our product, we are always able to show the dealer that it is unnecessary to cut the price and sacrifice profits on an article of recognized merit, and upon which

Digitized by Google

the established price is moderate and just, giving the purchaser splendid value for his or her money. It is at once apparent how the trade of the country appreciate the fact that in the sale of Bissell's "Cyco" Bearing sweepers, their profits, through our system of price maintenance, are good and perfectly secure.

With the jobbing trade we have an arrangement whereby in consideration of the prices and terms made the jobber, he agrees in selling Bissell's "Cyco" Bearing sweeper to his trade, that our schedule of prices will be strictly maitained. The jobbers also agree to co-operate with us to the fullest extent in helping to maintain the fixed retail prices of our goods.

And right here I want to say that our price maintenance policy has received the most earnest and loyal support of the jobbing trade of the country. We can say to the lasting credit of the jobbing trade that seldom have we ever found a case where they cut our prices. In all the years we have had fixed prices in force we have had but one case where a jobber persisted in cutting our prices, and even he was ashamed of it, as he would never admit that he cut prices. In this case we were compelled to cut off this concern and refuse to sell them, but it is the one only case in all our business experience. This should be encouraging to any manufacturer who may contemplate establishing a system of fixed prices on his product.

We can say, too, that the great bulk of the retail trade of the country, large and small, are disposed to maintain prices on our goods, and there is only one case that we know of in the United States to-day where a retailer is cutting our prices, and this is done not in defiance of our policy, or because the house disapproves of fixed retail prices, but simply to get even with his competitors for some grievance.

You are doubtless aware that the manufacturer of a patented article has the right to fix the retail prices on his product, and this has been sustained by the courts of both Great Britain and the United States. We had occasion some time ago to proceed against an English merchant for cutting our prices, and the court granted us an injunction and the decision of the English justice was most sweeping in the recognition it gave to the right of the manufacturer of a patented article to fix the retail price on his commodity.

Justice Wills, of the English court, in summing up the case, stated as follows: "The sale of a patented article carries with it the right to use it in any way that the purchaser chooses to use it, unless he knows of restrictions. If he knows of restrictions, and they are brought to his mind at the time of the sale, he is bound by them; he is bound by them on this principle: The patentee has the sole right of using and selling the articles, and he may prevent anybody from dealing with them at all. Inasmuch as he has the right to prevent people from using them or dealing in them at all, he has the right to do the lesser thing, that is to say, to impose his own conditions. It does not matter how unreasonable or how absurd the conditions are; it does not matter what they are if he says at the time the purchaser proposes to buy, 'Mind, I only give you this license on this condition,' and the purchaser is free to take it or leave, as he likes. If he takes it, he must be bound by the condition. It seems to be common sense, and not depend on any patent law, or any other particular law."

We have not had occasion as yet to proceed against a dealer in the United States for cutting our prices, but in view of the many recent decisions in our higher courts, wherein the manufacturer's right to fix the retail prices on his commodity has been sustained, it is evident that if a test case were made our price maintenance system would be upheld.

As a tree is known by its fruit, and as results are the one and final test of a commercial policy or system, I submit as indisputable proof of the merit and value of a well organized system of price maintenance the measure of success that this policy has achieved for the manufacturers who have adopted it.

A meeting of Heavy Hardware Jobbers was held at noon, and in the afternoon a large number of the Hardware Association members attended the session of the Manufacturers, where the subject of Special Brands was discussed.

The morning meeting of Friday was devoted to the winding up of miscellaneous executive matters.

CLOSING SESSION.

FRIDAY, NOVEMBER 16TH.

After considering a few matters of executive nature, the report of the Nominating Committee was read and accepted, the result being the re-election of the previous year's officers, with the exception of W. D. Taylor, of George Worthington Co., Cleveland, Ohio, who was elected a member of Executive Committee to fill the unexpired term of John Freeman.

The place for holding the next meeting was taken up. St. Louis was placed in nomination by Mr. Norvell.

Washington, D. C., was also placed in nomination.

After some discussion Washington was unanimously selected as the next place of meeting to take place commencing the third Wednesday in November, 1905.

The convention then adjourned sine die.

THE EUCHRE.

In the entertainment provided by the National Hardware Association for the conventioners on Wednesday evening, an entirely new feature was introduced. Tables were arranged in the Japanese Room of the Rudolf and at 8.30 over three hundred of the guests and visitors engaged in progressive euchre. The members of the Manufacturers' Association had contributed liberally to the collection of prizes, which for all day Wednesday were on exhibition in the hotel parlors. A committee of ladies, headed by Mrs. Geo. W. Trout, of Chicago, were in charge of the arrangements. The prizes with their contributors were as follows:

Corbin Lock Co.—Two brass candlesticks.

Enterprise Mfg. Co., of Pennsylvania—Set of plated irons in case; one polishing iron, two food choppers and ice shredder.

Geo. H. Bishop Co.—Two hand saws.

American Fork & Hoe Co.—Cut glass vase.

Millers Falls Mfg. Co.—Tool set.

Henry Disston & Sons—Two hand saws.

North Bros. Mfg. Co.—Two Twin Freezers, 2 ice choppers, tool set, two toy freezers.

Atha Tool Co.—Twelve hammers, nickled.

Landers, Frary & Clarke—Carving Set.

Fayette R. Plumb, Inc.—Cleaver, knives and hammers.

Chas. Parker Co.—Ash receivers and match boxes.

Maydole Hammer Co—Two hammers.

S. R. Droescher—Four cases scissors.

W. H. Davenport Fire Arms Co.—Sugar bowl and pitcher.

Kampfe Bros—Case "Star" safety razors.

Winchester Repeating Arms Co.—Rifle.

Chapin—Stevens Co.—Rules

Hopkins & Allen Arms Co.—Gun.

Pike Mfg. Co,—Ten pin trays, twenty silver mounted desk stones.

Miller Bros. Cutlery Co.—Twelve pocketknives.

A. Rogers Conrad—Two pot scrapers.

C. M. Avery & Co.—Food choppers.

American Wringer Co.—Twelve Gem toy wringers and one Royal wringer.

American Sheet & Tin Plate Co.—One bronze statue.

Cleveland Stone Co.—Case.

Goodell-Pratt Co.—Two "Home Companion" tool sets.

Beall Bros.—Three shovels and one toy scoop (consolation prize).

Nat. Specialty Mfg. Co.—Coffee mill.

Supplee Hardware Co.—Lawn mower.

Rome Mfg. Co.—Three tea and coffee pots.

White Mountain Freezer Co.—Freezer outfit.

J. Stevens Arms and Tool Co.—Rifle.

Reading Hardware Co.—Table, mirror, pair bronze busts, candelabra, lamp, clock.

Chadborn & Coldwell—Lawn mower.

Wood Shovel & Tool Co.—Moulders' shovel.

Bronson-Walton Co.—Three "Never Burn" roasters, four drip pans, three coffee mills.

L. & I. J. White Sweeper Co.—Ten carpet sweepers.

Bissell Carpet Sweeper Co.—Ten carpet sweepers.

Excelsior Furnace Co.—One elbow.

Boss Washing Machine Co.—Four washing machines.

The William Schollhorn Co.—Punches.

Henry Disston & Sons, Inc.—Clock.

Lovell Mfg. Co.—For the winning lady, wringers for life, and as a "Booby" prize, mouse-traps for life.

The score cards were furnished by the American Sheet & Tin Plate Co.

WINNERS.

The leading winners were as follows:

First ladies' Mrs. Charles B. King, of Atlanta, Ga.; first gentleman's, J. A. Carter, of Cleveland, Ohio; second ladies' prize, Mrs. C. A. Knapp, of Sioux City, Ohio; Mrs. G. E. Eddy, of Baltimore.

However, there were prizes of sufficient number so that every participant carried away a souvenir of some sort. After the distribution of the prizes the players were served with ice cream and were then entertained in the Grotto by the Ringgolds Band, and several vocal selections.

OPENING SESSION.

WEDNESDAY, 2.30 P. M.

NOVEMBER 16TH.

The opening session of the American Manufacturers' Association was held in the hall of the St. Charles. It was executive in character and was therefore attended by members only. President Birge opened the session with his annual address, delivered in his usual forcible manner, and it is needless to say it was received with much applause. Mr. Birge spoke as follows:

ADDRESS OF PRESIDENT J. C. BIRGE.

Without reciting the many questions which were subjects of consideration at your convention held in June last, it seems proper to refer to one matter, which, since that meeting, has become the theme of wide discussion.

ST. CHARLES HOTEL, ATLANTIC CITY, N. J.

An able and thoughtful communication, published in the *Iron Age* over the signature of a prominent St. Louis merchant on the subject of Catalogue house competition, also personal communications from two other leading jobbers, each bearing chiefly upon the same subject, led to the belief that this topic was likely in time to become of some interest to the trade. Without having received any suggestions from any representative either of the Retailers' or the Jobbers' Associations, your Executive Committee invited Mr. E. C. Simmons and Mr. W. R. Belknap, the gentlemen already referred to, to make the trip to Atlanta to address you. They accepted your invitation and presented the subject of

CATALOGUE HOUSE COMPETITION,

to which you devoted the morning session. In the afternoon, through the courtesy of the Southern Hardware Jobbers, you having adjourned for the purpose, you were permitted to listen to another able and thorough presentation of the same subject by Mr. S. Norvell, who was the guest of the Southern Jobbers' Association. Although at that time neither of these speakers had been identified with either of the Hardware Associations, yet it would be difficult to secure a more able and exhaustive presentation of this new subject, or by merchants who are more representative by reason of their recognized prominence and extensive trade.

The opportunity to listen to these gentlemen seemed to be highly appreciated, and their words met with cordial response in a generally expressed desire, as far as possible, to work along any reasonable lines in harmnoy with the wishes of the merchants, and this largely because of the obvious fact that the manufacturers are as deeply interested in the prosperity of the trade at large, the retailers included, as the jobbers can possibly be in the success of their customers.

The discussion at Atlanta was followed by the organization of a Joint Committee on Catalogue House Competition, embracing representatives from the two Jobbers' Associations and the National Retail Associations. The past Summer has given evidence of increasing interest in the subject. The first official communication from the committee, which has been given to the public, we believe to be a recent report to the jobbers, indicating that with it was enclosed a digest of Catalogue House prices. Although the report does not professedly concern us as manufacturers, nevertheless as it was published in the leading trade journals last month over the signature of the Secretary's Committee, and it being in part an open letter, setting forth with much particularity the attitude and motives of manufacturers in relation to the question, may justify us in bringing the history of the subject up to date. The communication makes no reference to this association or specifically to any of its members, but it is reasonable to suppose that some of our members are in the focus of its searchlight. The following quotations taken from the report doubtless expressed the honest opinion of its writer concerning the psychological condition of the "certain manufacturers:"

"It is quite evident from our experience with certain manufacturers that they are slow in admitting our claims, not because they do not see the justice of our cause, not because they care particularly for the business of the Catalogue Houses, but more because it ruffles their pride to be called to task in the matter:"

Only since our last meeting, so far as we knew, has Catalogue House trade in the Mercantile code been classed as a misdemeanor, even yet the reform has spread chiefly through Hardware lines. It is therefore not strange if, as is implied by the report, some especially captious manufacturer was "Called to task in the matter," having been upbraided for the error of selling Catalogue Houses, that such manufacturer's "Pride might have been ruffled." This result would be quite possible if the censure were

Digitized by Google

administered by some converted jobber, who but yesterday had come to see the error of his ways, and then discontinued the practice. We must remember that the disclosure of this evil has been so sudden that even now some manufacturers, who have walked in darkness, may still have failed to see the light. Reformations rarely come like tidal waves, sweeping everything before them.

Another clause in the report is as follows:

"Why should the Associated Jobbers and Retailers be criticized for having a

JOINT COMMITTEE

to look out for our mutual interests?" This interrogatory is propounded with such apparent seriousness that it leads to the belief that its writer is really in earnest. Having taken up this subject voluntarily at our last meeting, giving to it the first general hearing which the subject ever received, listening seriously and attentively to the extended addresses upon it with hardly a word of dissent, the merchants might safely have regarded the attitude of the manufacturers as being as favorable as could reasonably be expected upon an absolutely new proposition, and especially so when they are advised that a number of our influential members who have for many years dealt very largely with Catalogue Houses, have withdrawn from that trade with a view to co-operate with the merchants.

The plan of forming the Joint Committee, and especially the character of its personel, has been the subject of individual commendation by our Executive Board and members generally, as far as heard from.

If the committee really intends to convey to the trade at large their opinion that you have not moved with due celerity in this matter you may find yourselves in the same frame of mind as was the young man, an heir to his father's estate, and who for many years had been defending his rights against a claimant. One day in a moment of disappointment he exclaimed: "This thing is giving me so much trouble that I am almost sorry that Dad died."

SOURCE OF PROFIT.

The report of the Joint Committee makes mention of the large fortunes which manufacturers have made. To quote literally, they state that through our patent laws "on such articles," you are "Absolutely masters of the situation in regard to profits." That the tariff laws "have practically given you control of the markets of the United States," and that selling arrangements with a large number of manufacturers "have practically eliminated competition." This flattering declaration may come as a revelation to many of you who may not have realized the power supposed to be at your command.

It is hardly possible that these statements are made with the view to boom the stock in manufacturing concerns or to favorably influence your standing with commercial agencies, but it does show that the committee endorses the familiar arguments to the effect that general prosperity exists as it did not exist a few years ago, when for a long period many great factories lay with smokeless chimneys and the fortunes of owners melted away in spite of tariff and patent laws.

TARIFF.

This tariff question in America, like the contents of a delicate stomach on shipboard, is likely to come up at any moment. It may not be clear to you who are now struggling with intense local competition that a tariff which compels you to pay three to four times as much for a day's labor of eight hours that is being paid for ten to twelve hours' service in other countries, thereby enabling the American artisan to spend a much greater amount of money with the merchants than he otherwise could do, is not as great a benefit to such merchants as it is to the manufacturer who pays the increased wages. Eighty per cent of the cost of some Hardware is represented by labor at factory, mine or in transit.

If, as the result of free trade or a failure of the manufacturer to meet foreign competition, European Hardware should supply our markets and the workmen who made those goods should spend their money in Europe, as they certainly would do, would our merchants profit more largely than if American workmen, receiving good wages, should buy all their goods here as they now do?

Would the Catalogue Houses under those conditions experience more difficulty in obtaining supplies than they did when the jobbers sold them freely, or than they now do from American manufacturers, the greater number of whom have manifested considerable bias in favor of our own jobbing trade?

It is safe to assume that the statements in the report concerning your large profis and the alleged cause of those profits, is not so much to disclaim the advantage which the merchants certainly derive from well paid customers, as to convince the very many who will read the report, that you, as manufacturers, are reaping very large profits and are therefore well able to confine your business to such channels as are indicated. Over the

SUBJECT OF PATENTS,

to which they also refer, there seems to be a glamour like that which is characteristic of many far away mining schemes. The writer of the report has possibly been more fortunate in his experience with patents than have some other business men. There are manufacturers who have acted on the general advice of a certain New England father who had sent his son to New Orleans to operate in cotton. Not receiving any reports from the young man for a considerable time, he telegraphed him to learn how the business was progressing. The son wired the reply. "I am about even on cotton, but am nine dollars and a half ahead on draw poker."

Personally, I have no knowledge of the business last referred to, although it is a Hardware term, but there is nothing to prevent any business man from dropping his regular calling to stick to patents, if he believes there is profit in them.

Some inventors and patent right men have secured profits from patents, thousands have lost what they once possessed. No one will begrudge the success of an inventor, be he a day laborer, merchant or farmer, who uses his brains to turn the forces of nature to the benefit of mankind.

It is said that in science "the man who discovered the telescope and first saw heaven was repaid by imprisonment, the

JULIUS C. BIRGE,
PRESIDENT.

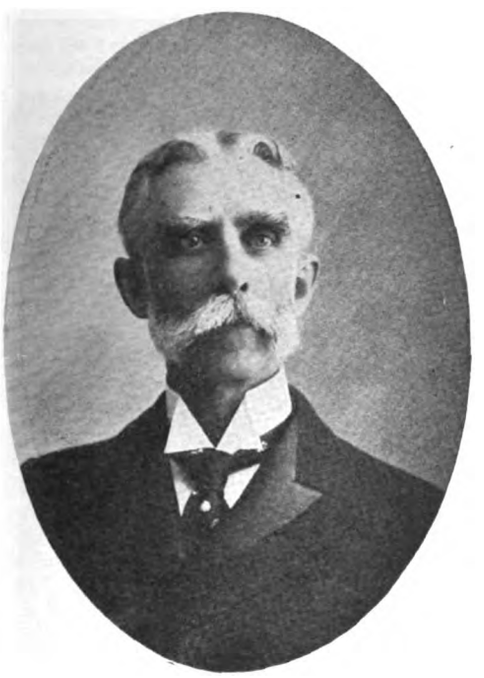
man who invented the microscope and first saw earth died of starvation."

Manufacturers of staple Hardware are seldom beneficiaries in patent articles. American Hardware manufacturers who do control them will use them with little regard, except to stimulate a demand for their goods. They will use the best machinery, whether patented or otherwise, and the best methods within their reach, and if some one's patent is desirable to improve their products they are likely to purchase it.

It is safe to assert that when the difference in the prices paid for labor is considered, American manufacturers make and sell their goods whether patented or otherwise in America as cheaply as similar goods are sold in Europe.

They also have a much higher regard for the so-called regular avenues of trade than do foreign manufacturers, who, as is well known, regularly solicit and sell to small retailers and consumers, and in fact to any trade that will purchase.

TRADE AGREEMENTS.



A word concerning trade agreements which is suggested as a source of manufacturers' profits. It is doubtless true that a policy agreed upon by members of any one manufacturing company or by the trade in general, looking to the removal of unbusinesslike practices, and the reduction of needless expenses, is in

Digitized by Google

many cases of advantage to the merchant, also the manufacturer. The policy of an individual manufacturer or merchant is as likely to be unfavorable to the trade at large as is the agreed policy of an association of manufacturers or of merchants. In the latter case there is usually given due consideration to the relative standing of retailers and jobbers, which should be on an honorable and healthy basis for the benefit of all.

The associations of jobbers and of retailers doubtless have in view through mutual agreements the bettering of their condition by the removal of various evils and as far as possible the regulation of prices and the methods of selling goods through the channels by which they believe the manufacturers' goods should be distributed. This also would seem to be beneficial and profitable to the mercantile trade, otherwise the various trade organizations now so numerous would not be maintained.

In other words, trade agreements, and associations of various kinds, exist in endless variety in every department of activity. They may be of equal benefit to merchants, to workingmen, who use them extensively, or to manufacturers, and so long as they are honorable they will be mutually respected. The Associated Press, one of the closest and most complete organizations of this nature, gives to its membership of the daily newspapers great advantages through co-operation in economically securing and distributing news exclusively for its members. Placed between organized labor on one side and organized customers on the other, with the attrition of bitter competition in the middle, thus between the upper and the nether mill stones the position of the manufacturer may not be as peaceful as this committee's report would indicate.

F. S. KRETSINGER,
VICE-PRESIDENT.

The purpose of this introspection is, if possible, by an examination of ourselves to ascertain if the attitude of this association as a body concerning this catalogue house question has been consistent and friendly or otherwise. If it were not the desire of our members to work if possible, and as far as possible, in harmony with the merchants, you certainly would not be in attendance at a convention where you expect to be with the merchants in joint session.

The high character and unquestioned integrity of the members of the Joint Committee should be an assurance to us that they will not intentionally place the manufacturer in an improper light. As they are strong and vigorous business men, they will press this matter, which has been committed to them, and the hope will be that in view of the many interests involved and the different view points from which some manufacturers are compelled to consider the matter, they will exercise patience with their perseverance.

There appears to be no official action which we are called upon to take in the matter.

TRADE MARKS AND SPECIAL BRANDS.

In the consideration of the subject already referred to, it appears that there are a few of our members who ask the question, that, having discontinued the sale of their goods to catalogue houses, to retailers and consumers, all of whom buy their regular brands, and hereafter if they restrict their trade absolutely to jobbers, who will use exclusively their own private brands, what would be the future of manufacturers' trade marks, their reputation, which has been acquired as the result of years of honest effort and patient skill, and, in fact, all that enters into what is known as the good will of the business?

At our last meeting, finding ourselves facing this problem, by your unanimous vote, you made the subject of jobbers' special brands as one to be considered at this convention. Your Executive Committee has therefore arranged for an executive session to consider this question to be held on Thursday a. m., to which accredited members of the National Hardware Jobbers' Association have been invited. It was thought proper that, as on some other subject we should hear from the jobbers that we might be informed on the matter from their standpoint.

By Special Brands, as considered at your last convention, was meant in general all the many brands and labels which are adopted by merchants and which become their private and exclusive property and which may be placed on goods which they may buy from any factory or from various factories.

Each jobber may control and use a number of these brands. One manufacturer has stated that at the time when he made an investigation there were in his establishment goods bearing 248 varieties of jobbers' brands and that on his shelves were more than 1,400 different kinds of labels, which he is regularly called upon to use.

H. B. LUPTON,
VICE-PRESIDENT.

It therefore appears that the subject is one of commanding interest to nearly all manufacturers. You have the opportunity at this convention to fully discuss this subject with the jobbers. A perfectly frank and plain statement of the situation as you see it, if made in the right spirit, is sure to command the respect of the jobbers and retailers. They have speakers already chosen who are certain to speak with absolute freedom, knowing that you will receive what they may present as you would any business proposition from fair-minded, honorable business men. If they were to speak reservedly and with the fear of opposing your views it would be useless for them to undertake the preparation.

Therefore, if the subject interests you or is likely to interest you in the future, take it up as freely as they will do while it is in reach.

LABOR.

Archbishop Glennon the other day expressed his objections to certain proposed amendments to the constitution of the State of Missouri, which contemplated a fixed annual tax for free school books and the pensioning of policemen. The chief ground for objection was that it was a step toward socialism. This position was bitterly criticized by the socialists. In his sermon of last week the Archbishop is reported to have said that the socialists admitted that the measure was socialistic, but they further declared that they were in favor not only of free text books, but also of free food and free clothes. The main body of workingmen have too much self-respect to assume such an attitude, but the leaders of many unions certainly entertain this position.

Digitized by Google

It therefore seems a travesty on labor to state that the labor question is again before us for consideration, when in fact the real question is concerning the prevention of labor, in other words, idleness, enforced by socialistic and anarchistic leaders, men of the type that stopped the business of a dozen railroads, destroyed hundreds of loaded freight cars and other valuable property in the Chicago strike, the loss of which fell more on widows and orphans than on railway managers; men who blow up mines and depots to kill friend with enemy, men who will prevent industrious, law-abiding workmen from earning a living for their dependent ones, men who argue for free food and free clothes to be earned and paid for by men who do labor, men of the Sam Parks type of leadership, who not only draw salaries from the honest, helpless workmen whom they dupe, but in many cases levy blackmail from employers. At times, by the consent of some one, they control powers for destruction greater than that which rests in the hands of any other existing human agency in time of peace. These persons pose as laboring men, and characterize those who object to their methods or who would employ or patronize other than union establishments as enemies of labor. All this while the real laborer, who every man respects, is prevented from pursuing a chosen calling at will or from developing that skill which with patience and thrift has led thousands of steady men to prosperity. Nearly all of these factory managers and officers, beginning at the bottom of the ladder, have led the strenuous life. Being one of the many who are here and who have labored the long hours of each day, before modern regulations shortened the day's work and introduced numerous holidays, we certainly share with each other in profound respect for the working man. We have been there. None but the dissolute among the poor look upon those in apparently easy circumstances as their natural enemies or desire to pillage their homes or destroy their property. None but the dissolute among the rich speak in the approbrious terms of the vices and follies of the poor.

The advantage and propriety of workingmen's unions had been generally recognized so long as they were led by honorable men, having in view the improvement of their social, financial and moral condition, or any honorable ends. When unionism is led to anarchy and the abandonment of moral obligations, the quicker we study the cause and the remedy, the better. The issue should be met, and met squarely.

Before concluding please permit one concrete illustration of union leadership as many labor unions are at the present time directed, and showing the uncertainty of agreement and arbitration so often recommended.

Several months ago accredited representatives from each of the States and Territories in the great Louisiana Purchase, having convened, decided that the centennial of that purchase should be celebrated by an appropriate exposition. St. Louis being its largest and most accessible city was at a later meeting unanimously selected as the site for the celebration, and its citizens were invited to assume that vast responsibility, which was sure to devolve upon the city where it would be held. The United States Government formally approved the plan and it became a national enterprise.

Previous to the election of directors or the inauguration of any work, it was urged by the business men that the labor features of the undertaking were of vital importance and that an agreement and understanding with the building trade unions at the outset should be reached to prevent strikes and misunderstandings and resultant delays in the work, and which agreement would be better for all parties in interest than arbitrations and delays after differences had arisen The official head of the Building Trades Council was accordingly invited to a subsequent meeting. He was given a full history of the enterprise and the plans, so far as they could be outlined—that as a condition precedent to entering upon them, the citizens and city of St. Louis must provide at least $10,000,000 in cash, the State of Missouri more than $12,000,000, and the government and other States an amount to make a total of $40,000,000. The greater part of this enormous sum was to be expended for labor and the union laborers would be the greatest beneficiaries. He was informed that the directors expected no reward for their arduous labor and responsibility, the stockholders expected little or no dividend. Their own government, State and city would make their appropriations for the benefit of the people. It was not an enterprise for pecuniary profit, but for the education and edification of the masses, old and young, for all the world would be brought together . Every branch of science, art and learning would be represented. The most eminent scholars, artists, musicians and scientists would be brought together, contributing their best thought and productions and from which all might profit.

Having presented substantially this outline, it was said: We desire to know before proceeding with this tremendous undertaking what will be the

ATTITUDE OF THE LABOR UNIONS?

If we thus recognize them will they avoid demands for increased wages on World's Fair work? Will they evince the same civic and patriotic pride as would be shown by those who cast in their thousands of dollars? Will they prevent strikes and enjoy the advantage for work which this great undertaking afforded?

The matter was laid before the branches of the Building Trades Council and reported back in all respects favorable to all the requests made The union official was accordingly elected a World's Fair director, that he might be kept in harmony with advancing events.

Instead of five millions, responsible citizens of St. Louis subscribed and have paid nearly all of five and a quarter millions dollars stock, the city, States and government have paid what was asked from them, foreign nations have done their part. The first preliminary contracts were let and union labor was exclusively used on such work. Scarcely had the workmen's trowels been wet in the first mortar when demands were made for advanced wages. They were followed by strikes in rapid succession until the end, many months being spent by one trade, then another, in idleness. Hardly was one demand met and admitted when within two weeks it might be followed by another in

F. D. MITCHELL,
SECRETARY-TREASURER.

the same craft until step by step they reached in several trades $8.00 for eight hours' work, with a reduced amount allowed to be accomplished, forty per cent below the regular amount and double wages for overtime, the rates being higher than charged outside the grounds.

Non-union men doing little jobs for exhibitors were assaulted. The Fair must be ready. Near the completion about 30,000 men were working on the grounds, receiving in the aggregate $75,000 to $90,000 per day more than agreed. A willingness was shown to wreck the entire enterprise by demands and delays. The association by reason of this infidelity was compelled to ask the U. S. Government for a loan of $4,600,000, not one cent of which would have been asked for or required had the building trades unions lived somewhere within the spirit of their agreement.

It may be useless to ask where were the greater number of such leaders born, where did they receive their training. We have associated with us in our various establishments men in the greater number of whom we have implicit confidence. In many cases this is the result of years of mutual friendly relationship, which make us to feel the deepest interest in their welfare. They are workingmen and are no more to be classed with the labor leaders who are upturning many good enterprises than you manufacturers are to be classed with those who produce nothing, and profit only by the loss of others. The real laborers and manufacturers are producers, therefore your interests should be in common. It will be our privilege at this convention to listen to Hon. D. M. Parry, who will lead us to a better knowledge of these relations.

Our periodical gatherings with all their pleasant features also become the occasions for serious thoughts.

Digitized by Google

At our last annual meeting there were present two familiar faces that we do not see here to-day. Mr. Oliver Williams, of Catasauqua, Pa., who was at the head of a number of important industrial establishments and who was the chairman of one of our committees, has passed to the beyond. Mr. Williams represented the highest type of Christian manhood. He was a benevolent, systematic and successful businses man, an able writer and a felicitous speaker. We will never forget his genial presence, his clear and logical utterances, always given in a happy vein, which betokened his generous impulses and noble spirit. His seventy-two years seemed to cast a sunshine on his silvered brow.

Later and on the 18th of last month at Riverton, N. J., Mr. Tom Almgill, of G. & H. Barnett & Co., also passed away. Mr. Almgill was a prominent figure in our gatherings. He was highly respected and beloved not only by our membership, but by a very wide circle of friends both at home and in ather circles throughout the country. Thus the milestones into headstones change.

The thanks of this body are due to the members of the Executive Committee and to the chairman of other committees for the untiring and intelligent services which they have given to the work of this association. You have among them and in the rank and file of your membership the best material for which to select a capable presiding officer, who, at this convention should be elected to succeed to that position, and to whom you will certainly give the cordial support which you have accorded to the present incumbent.

The regular order of business was taken up, including the secretary's report and the reports of the several standing committees, all of which was executive in character.

THURSDAY MORNING SESSION.

The Thursday morning session of the Manufacturers' Association had been scheduled as strictly executive, but there was such a universal demand for admittance on account of the principal address that the doors were thrown open to all jobbers and guests. President Birge opened the session with a pithy speech, introducing David M. Parry, president of the National Association of Manufacturers, who read the following address:

THE LABOR PROBLEM—ONE OF EDUCATION.

BY THE HON. DAVID M. PARRY, PRESIDENT NATIONAL ASSOCIATION OF MANUFACTURERS AND THE CITIZENS' INDUSTRIAL ASSOCIATION OF AMERICA.

We have fallen on singular times. Axioms are no longer operative. Natural laws, supposed to be unalterable, are bending to the requirements of theories. Twice two is no longer four and things fall up instead of down. Supply and demand is an invention of capitalists for purposes of oppression, and individual liberty is fairly lore designed to lead astray the fancy of the workingman. This Republic of ours is only a fabric of the "money kings" erected for their own selfish ends. Labor is not free, but manacled, urged to its tasks by the lash of heartless masters. God no longer reigns and the government at Washington is run by the plutocrats.

I know all this is true, for I have been reading the speeches of agitators and the expressions of labor newspapers. Another mental excursion of this sort and I shall pursue my daily walk in a spirit of utter pessimism. I shall lose faith in my fellow-man and all his institutions. I shall flout the lessons of civilization and the teachings of the church and lift my hand against my brethren. Take a course in labor literature, run through the files of its newspapers, examine its propaganda and cease to wonder at strikes and deeds of violence.

Nearly all industrial disturbances, such as strikes and lockouts, may be traced, in a final analysis, to

A MISUNDERSTANDING BETWEEN THE EMPLOYER AND EMPLOYE.

Taken individually, men are reasonable beings and disposed at heart to do the fair thing. Man to man, employer and employe could not hold irreconcilable differences. Talking man with man they could quickly come to an understanding and find that their mutual interests are identical.

What, then, is the trouble? I can give it in a word—the teachings of trades-unionism. By its fruits you may know it. Leaving out of the question the right of men to organize, which no one denies, let us see what labor unions have come to stand for.

In their earlier growth in this country labor organizations had the sympathy of the public. Every effort of the workingman to "better his condition," as the phrase went, was encouraged.

ORGANIZED LABOR WAS PETTED AND CODDLED

until it began to believe it was about the only factor in the industrial world worth thinking about. Justifiable pride in the dignity of its calling developed into a bit of bumptiousness. The country assumed that its purposes were sensible and worthy. It believed that the mission of unions would mean greater intelligence and efficiency among its members, and, because of this increased intelligence and efficiency, a higher scale of wages. The natural supposition was that organization meant mutual improvement and greater skill among the members. I shall be charitable and assume that these worthy aims were the motives of the first organizers in this country. But with increased power came abuses. Selfish leadership saw its opportunity. It would not rule by reason—it desired to rule by force. It won victories. It caught the individual employer unprepared. His concessions were answered by demands more and more unreasonable. He was confronted with a situation that threatened disastrous consequences. He saw others ignorant and unscrupulous in complete possession of his business.

These evils grew by what they fed upon. The victories of organized labor attracted to its ranks the idle, the vicious and the incompetent. It ceased to stand for efficiency; it became a sheer aggregation of muscle. Fitness was no longer a requirement for membership, but only the physical power to hurl a brick.

HON. DAVID M. PARRY,
PRESIDENT NATIONAL ASSOCIATION OF MANUFACTURERS.

ORGANIZED LABOR HAD BECOME ORGANIZED VIOLENCE.

Still the public was patient. It had not yet separated in its mind the labor organization from the individual workingman, whom it respected and toward whom it was kindly disposed. But the public patience was to be further tested. Reckless leadership went on with its program. It bullied the conservative membership in its own ranks and inflamed the passions of its ignorant following. It filled the minds of workingmen with hostility toward employers and held up before them visions of a new and ideal social state that was to result from strange and ridiculous economic theories. Finally, and worst of all, it tried to establish in the minds of workmen the dangerous distinction of classes—the capitalist, who oppresses, and the wage earner, who is a slave. For the conservative membership labor leaders had intimidation; for the envious and thriftless they had cupidity; for the vicious, the appeal of hate. For examples of pure, despotic government go to most of our labor unions. There is no tryanny like that of ignorance suddenly elevated to power.

BUT ALL EVILS CARRY THEIR OWN REMEDY.

Reckless leadership had rope and it hanged itself. Coercion went one step too far. The employer, driven to the limit of tolerance, turned. The manufacturers of the country were forced to organize for self-defense—self-defense, pure and simple. And that is the attitude they occupy to-day. Individually, there may be some whose conduct toward those they employ is open to severe criticism, but I do affirm that employers as a class in this country wish to see their employes prosperous and contented, and never for a moment have they entertained the notion of "crushing labor." Crushing labor! The idea is so preposterous that it could have originated only in the minds of those irresponsible agitators and leaders, who live by strife and whose occupation would disappear with the establishment of industrial peace.

But self-defense implies warfare. Industrial peace cannot be

Digitized by Google

established by employer and employe standing on guard one against the other. Influences must be set in motion that will be permanently corrective. Remedies must be applied that will reach the seat of the disease. As I have intimated, misunderstanding of motives and misconception of the eternal laws back of all industrial progress are largely responsible for our present troubles. Our main reliance, therefore, must be education. This is the great work that must be undertaken by the employers of the country. The plan may seem slow, but it will be sure and lasting in its results.

EDUCATION MUST LAY THE BROAD AND DEEP FOUNDATIONS ON WHICH INDUSTRIAL SOCIETY CAN BUILD WITH CONFIDENCE.

There is no better time for beginning this work than the present. The organized opposition of the Manufacturers' Association and of the various bodies of the Citizens' Industrial has served to make organized labor pause and think. Its hitherto unchecked and lawless march has been forced to halt. Discontent is springing up in organized labor's own ranks and the membership is falling away. Sober-minded workmen are beginning to see that force methods cannot avail and that organized labor has been built up on a wrong principle—the principle of hostility instead of mutual helpfulness.

The employers of the country, large and small, must set to work unitedly to correct the peculiar fallacies that organized labor has conceived of economic laws. By their negligence and lack of co-operation employers have been partly responsible for these conditions. From the very inception of organized labor

THEY HAVE PERMITTED AGITATORS TO PREACH THE DOCTRINE OF HATE AND DESTRUCTION

without contradiction. Labor unions have become so many forums in which the gospel of confiscation, law defiance and disrespect for all authority have been preached. Here have the peculiar economic notions of agitators been promulgated: here men have learned to do as little work for their pay as they can. They have been taught that the employer is a slave-driver whose wishes are to be regarded with suspicion if not openly resisted; that there is just so much work to be done in the world and that a too willing industry on the part of any one man may deprive another of the opportunity to labor; that the demand for and the consumption of products remains a fixed quantity requiring the restriction of output in order that the members of organized labor may be kept at work; that the shop must be closed to independent workmen; that

THE LINE OF DISTINCTION BETWEEN THE CAPITALIST AND LABORING MAN IS RIGIDLY FIXED

and the laboring man cannot cross it; that the police and courts of law are but the machinery set in motion by capitalists to keep labor in subjection; that the militia are armed through the "money power" to overawe labor; that labor produces all things and is being robbed of the profit, and, finally, that we must have an entirely new economic system before labor can "break its chains."

Does not all this constitute a ridiculous philosophy? You wonder that sane and sensible men could be induced to accept it? Then remember that organized labor has preached such doctrines year after year, and you, employers and manufacturers, have treated the matter with indifference.

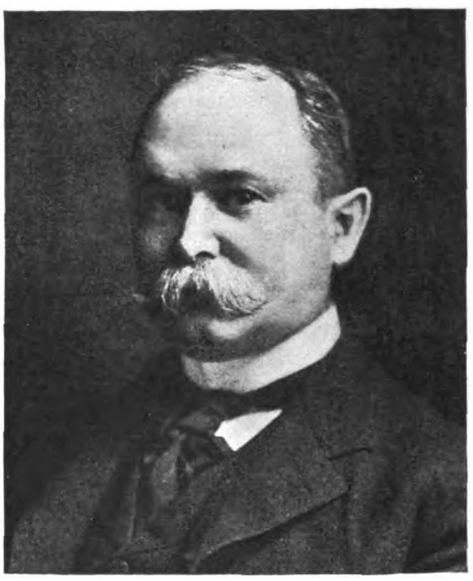
ORGANIZED LAWLESSNESS HAS CONTINUED TO DISSEMINATE ITS FALLACIES

and you did not lift your voice even in protest, until the natural results of such preaching manifested themselves in scenes of violence. The tone of American citizenship has been lowered, the very principles on which this government was founded have been scouted and treason itself has stalked up and down the length and breadth of the land.

The work of education will not be easy nor is it a work that can be undertaken spasmodically. It must be carried on soberly, calmly, but without cessation. You and I may not live to see its final fruits, but that it will grow at last into full fruition is as certain as that truth and right are stronger than error and wrong.

To comprehend more fully the nature of the task before us let us examine some of the results of organized labor's teachings. On the very threshold of our work we are confronted with the spirit of prejudice and hostility. Employers are regarded as enemies. Labor leaders have been shrewd. They saw that no influence could maintain the alignment of their forces like that of hate. It closes the mind to reason. It sees behind every friendly advance some dark or ulterior motive. Attend some labor meeting and prove my words. The employer's name is mentioned with bitterness and to him are imputed the possession of all unworthy motives. "Don't listen to him," is the attitude. To foster the spirit of hostility has been the aim of labor leaders and demagogues that attach themselves to the union to show that labor has been badly abused. Isolated instances of rapacious greed and other evils in our political and social system (for no human institution is perfect) have been made applicable to our whole industrial system. Take up most of the four or five hundred labor papers in this country and you will find paragraph after paragraph of the most hopeless and distressing sort. I quote:

"One of two things must happen in this country. There will be a set of castles and lords on the one hand and hovels and slaves on the other, or else the common people will come together and assert their rights and be free for evermore."



"Wouldn't it seem funny for the President to appoint just one workingman to the cabinet? The workers are treated as so many cattle. They are not supposed to have enough sense to fill any position except dog pelter."

"The scope of the constitution was never intended to oppress the great body of the people and protect and enhance the fortunes of the few."

"When freedom of action is restrained and the laborer becomes a machine governed by a time-piece, it is folly to talk of either labor or the laborer being noble and holy."

WHAT IS THE NATURAL RESULT OF SUCH TEACHINGS?

Take any man, I care not how comfortable may be his condition in life, and pour into his ears day after day stories of ill-treat-

FAYETTE R. PLUMB,
MEMBER OF ADVISORY BOARD.

ment and he will come at last to believe them himself. He will become bitter toward the world and all his fellowmen and finally come to rest in the belief that all mankind is in a conspiracy to work his ruin. If such a fate can befall an individual how much more pernicious is the doctrine of misfortune when taught in an organized body whose inclination in considering grievances is to magnify them.

It is a lamentable fact that this spirit of hostility between the employer and the employe permeates almost every condition of life. You come in contact with it in your homes where those you have employed to help you grudgingly obey your instructions or constantly assert in manner, if not by word, that they are "just as good as you are"—a question that you have not attempted to raise. You meet it in the shop where employes take little interest in their work and drop their tools on the stroke of the hour. I charge present day unionism with the responsibility for these conditions.

ORGANIZED LABOR HAS DRAWN THE CLASS LINE

and erected a barrier against the employe rising to places of responsibilty and trust in the business, in which he is engaged. A spirit of co-operation with the employer, a personal interest in the business on the part of the employe have no room to develop. No incentive spurs on the employe, he continues to work year after year for the wage fixed by the "scale" and then becomes ready in his old age to demonstrate by the illustration of his own life that the workingman as against the capitalist has no chance. Instead of benefiting him the union has dwarfed his powers and left him in his old days "naked to his enemies." To sweep away

Digitized by Google

this spirit of hostility of the employe toward the employer is one of the most difficult things our work of education has to encounter.

The negligence and indifference of employers have been in part responsible for the growth of wild economic ideas. Well established principles of social economy are lightly brushed aside. Artificial methods for raising wages have been substituted.

TO BEAT AN EMPLOYER WITH A CLUB UNTIL HE PURCHASES IMMUNITY

is an economic law so plain that even the dullest mind can understand it. The bigger the club the higher the wages; what could be more simple? The more men organize the less the employer's power of resistance and the greater the gain to unionism. Let every employe come in and share in the blessed results of this latter-day economy. For a certain contribution of muscle you get a certain wage. Superior physical prowess backed by a dirth of conscience and a reckless regard of consequences entitles you to leadership—another benefit of the modern economic law.

One of the most absurd principles of the new political economy is that the employer can raise wages at will. Labor is taught that the employer by some occult process known to the capitalist mind draws to himself all the products of its toil and will give up his ill-gotten gains only as he is compelled to do so by physical force. The fiat method of acquiring wealth can be made so plausible that very intelligent people are often caught by it and in many labor unions it has become a cardinal principle. The desire to get rich quickly has little patience with the rigid fact that there is no royal road to wealth. The result of this teaching is that members of

LABOR ORGANIZATIONS DEPEND LESS AND LESS ON THEIR OWN THRIFT AND INDUSTRY

for acquiring a competence and lean too much on the union. Gradually losing sight of the necessity for individual effort they underestimate the potency of small savings and let fall from their habits of thrift. When they want more money, they will simply go to their employer and demand it.

The truth is, of course, that neither the employer nor employe can affect the rate of wages except in a slight degree and never permanently. Quibble as you will, the law of supply and demand remains. It is irrevocable and inevitable. Brush it aside and it will swing back to remind you of your folly in a way that you will not forget. The welfare of labor cannot be advanced by physical strife. Economic laws are not subject to the swing of the bludgeon. They are beyond the power of men to alter. The production per capita fixes the rate of wages. If the average amount of product per man is high wages will be high. The reverse of this proposition is also true.

GREATER PRODUCTION MEANS GREATER CONSUMPTION

because of the natural fall of prices and the greater employment of labor to supply the increased demand.

Trades-unionism of the present day rests upon the assumption that wages can be raised artificially. That theory is its cornerstone. The membership, if you will, is held together by this "cohesive power of public plunder." To obtain higher wages by force is the very reason of its being. It recognizes the power of numbers and not the power of intelligence and efficiency. But back of this main tenet are other fallacious theories which are necessary deductions from the first and prime false assumption, for when men attempt to set aside plain economic truth to carry out their desires there is no limit to the absurdities they will preach.

Organized labor, for instance, rests under the delusion that

WHEN HIGHER WAGES ARE SECURED THROUGH THREATS OR INTIMIDATION, SOCIETY IS BENEFITED,

because the oppressive employer has been compelled to distribute some of his booty and the buying power of labor has been increased. The preachers of false economy disregard the fact that capital does not pay the increase, but the general public, which is largely constituted of labor itself. Labor but takes the money out of one of its pockets and puts it in another. Higher wages that call for higher prices for products is not a condition that makes for the benefit of either labor or the general welfare.

There are many other theories, which, put in practice, aim at individual liberty, and which, if allowed to go on, will work great harm, if not destruction, to our institutions. Every failure of organized labor to carry out its wishes in the face of economic laws only calls for other absurd methods of procedure to bolster up and sustain a fabric that rests upon false assumptions. We have, therefore, the desperate remedies of restricting output and of limiting the number of apprentices, both aimed to establish a despotism of trades-unionism. Organized labor says that no workman shall carry his industry beyond a certain point—he shall labor only so many hours and he shall do only a certain amount of work. The dullest man's accomplishments become the standard of all.

YOUNG MEN SHALL NOT BE PERMITTED TO LEARN A TRADE

unless they first obtain permission from union labor. Think of it! Their right to live given over to another's caprice! Do you wonder that the juvenile courts are filled and that the problem of the idle young presses with ever increasing force upon the attention of our municipal authorities? How hypocritical, in the face of this policy, becomes the pretense of organized labor that it is engaged in the work of uplifting humanity!

Another policy that is aimed to establish the rule of unionism is that of the closed shop. Its general adoption throughout the country would mean the destruction of individual liberty. No workman could obtain employment until he consented to conditions that, as a free man, he would not be legally required to conform to. Before exercising his possession of liberty, guaranteed him under our free institutions, he must bow to other authority. His liberty is abridged. No labor union has a right to say that a man shall or shall not work, nor does it have the power to say so unless it is stronger than the government which says he can work for whom he will and at whatever price he sees fit. If organized labor says that an employer shall give employment to only union men then the employer can say to union labor that it can work for no one else. Either proposition is intolerable slavery.

The movement of organized labor for the closed shop was a bold one. Many of labor's friends could scarcely credit it until

ROBERT GARLAND,
OF EXECUTIVE COMMITTEE.

all disguise was thrown off. That the policy is aimed at individual liberty is so plain that the public cannot be deceived. A simple statement of its character is sufficient to bring down upon it the condemnation of the entire country.

Having hastily sketched the situation, let us see what is being done to meet it and what is yet to be done. A few years ago the members of the National Association of Manufacturers, which had been working principally along the lines of increasing our export trade, awakened to the fact that something had to be done to meet the aggressions of organized labor or hand over to it the control of their businesses.

INDUSTRIAL FREEDOM WAS IN THE BALANCE.

It was, to my mind, a critical time in the history of the country. Organized labor had thrown off all disguise and revealed its socialistic features. It was regarded as a foregone conclusion that the eight-hour bill would be passed by Congress and other measures tending to usher in a socialistic form of government would be presented. The new movement on the part of the manufacturers met with instant encouragement from all parts of the country, showing how badly the need of it was felt. Within a year after the Indianapolis convention the Manufacturers' Association had increased its membership by over 1,000 and the same rate of growth marked the years that have followed. The protest made by the association against the lawless and socialistic methods of organized labor had an instant nnd salutary effect.

Digitized by Google

Employers all over the country took courage and public sentiment began boldly to express itself against trades-unionism. The press of the country, hitherto supporting the unions or lukewarm in their criticisms of them, began to expose their folly and recklessness. The change in the tone of the press was instantly reflected in the attitude of public men, who, backed by the good citizenship of the country, openly resented the dictation of labor bosses. The forces that were assaulting the very citadels of industrial freedom had received a check.

The subject of a more extended organization was brought to the attention of employers and independent citizenship. It was felt that there were local conditions in the communities throughout the country which only local organizations could meet—organizations composed of employers in all lines of industry instead of an association composed exclusively of manufacturers. The Citizens' Industrial Association was born. The National Association of Manufacturers and the Citizens' Industrial, therefore, stand in a close and friendly relation. Both organizations are working along the same general lines and are one in the purpose of fighting for industrial freedom. In the work of organization before us the bonds between the two organizations should be made as close as possible in order that there shall be no waste of effort.

Since the awakening of employers and good citizenship throughout the country

THE CAUSE OF INDUSTRIAL LIBERTY HAS MADE GREAT PROGRESS.

Strike after strike has failed and the open shop has taken the place of the closed one. Thugs who were accustomed to beating non-union workmen with impunity have been prosecuted and justly dealt with. Many towns have been redeemed from lawless unionism through the Citizens' Industrial Association. Those paternalistic measures, the eight-hour and the anti-injunction bill, have been defeated and the proclamation has gone forth never to be withdrawn that every man under the folds of our flag shall have the right to work when he pleases, for whom he pleases and in accordance with any contract he may choose to make.

Now as to the work that lies before us. The organized employers of the country have accomplished much, but it has been of a defensive character.

A LULL BETWEEN STANDING ARMIES IS NOT PEACE.

The assailants must be disarmed—not by forcible measures, but by peaceful ones. They must be led to understand that those whom they assail are not their enemies, but their friends, and that the blows aimed at our present industrial order are blows aimed at their own liberties.

To this work of education every employer in this country must give his attention. Every good citizen, be he employer or employe, must lend his aid to this cause. The task is one to call forth all our energies.

The National Association of Manufacturers has done much good in influencing public opinion in a general way, and in directly making known to Congress the sentiment of the public at large on certain questions. The Citizens' Industrial can meet the requirements of local conditions and build up through all its branches a healthy sentiment for law and order and industrial peace. So, I appeal to you, members of the American Hardware Manufacturers' Association, to unite in this organized effort. The doctrines of false teachers must be corrected.

Let me present to you a few suggestions in regard to this work of education. In the first place, it has become an essential part of your business. Do not entertain the impression that it is entirely extraneous and to be carried on by others with more leisure and greater aptitude. To not a few of you, perhaps, the question has come home in a way that you cannot disregard. You have seen the freedom of your thought and action menaced—your right to plan unhindered taken away from you. The instability of your workmen and alien interference have become factors that you must reckon with in calculating the profits of your enterprise. The work of education foreign to your business? I reiterate: Education has become a component part of it! From purely selfish motives, if from no other, you must give your support to this cause.

Again, the work of education is a patriotic undertaking. As organized labor sees its force methods defeated through the operation of the natural laws of trade it looks about for new means of accomplishing its wilful purposes. It finds fault with the whole social system and takes to its bosom the wildest polilitical theories. In a word, it would overthrow our present form of government.

THE NATURAL TREND OF TRADES-UNIONISM AT THE PRESENT DAY IS TOWARDS SOCIALISM.

Mr. Debs, the Socialistic candidate for President, went over to socialism after his attempts to run the railroads of the country failed. Mr. Donnelly, of the butchers' union, disappointed in his attempts to control the packing industry, has followed Mr. Debs. Their actions should really occasion no great surprise. They are only carrying out to their logical conclusion the fundamental principles of trades-unionism. The closed shop is a socialistic form of government on a small scale, with the employer as the merely nominal head. And so it comes about that treason is essentially taught in our labor unions. The red flag elicits far more enthusiasm than the Stars and Stripes. Men prominent in the councils of the nation are spoken of with disrespect. Our precautions to preserve peace and order are accepted as obstacles placed in the way of organized labor. On what other theory can be explained the hostility of unionism toward the police and militia? Guardians of the peace are not going to hurt anybody with peaceful intentions. This hostility toward those sworn to execute the laws is a confession of hostility toward the present form of government.

Socialistic papers, some of them with large circulations, are disseminating the doctrine of discontent and calling for united action against our Republican form of government. "As it is now," says one of them, "the working class is taxed $800,000,000 each year to support the government which the rich have instituted to protect their pilfered wealth."

Can you wonder at the effect of these seditious doctrines when the lovers of this Republic are doing little or nothing to counteract their influence? Error will not die of itself. Every voter is a member of the great jury before which causes are tried. We

N. A. GLADDING,
OF EXECUTIVE COMMITTEE.

must present our side of the case and not let judgment be taken by default. In this country, where

EVERY MAN IS AN ESSENTIAL UNIT IN OUR GOVERNMENTAL SYSTEM.

it matters a great deal how he thinks and feels. He can be depended on to do the right thing, the just thing, if he is put in possession of all the facts. To hold ourselves indifferent to the great questions arising in the industrial world is to convict ourselves of criminal negligence, and show ourselves unworthy of all the great blessings this free government has vouchsafed to us. If we love our country we must make some sacrifices in her behalf. We must make more secure the foundations on which our fathers builded.

The good citizens of this country must not be guilty of the folly of relaxing their efforts during quiescent periods. The past year, with the exception of the butchers' strike in Chicago and the Fall River troubles, has been comparatively free of labor disturbances. The present, therefore, is a good time to push the work of education.

MEN WILL NOT LISTEN TO REASON WHEN THEIR MINDS ARE INFLAMED.

The symptoms may not be so feverish, but the disease is in the blood and must be eradicated. The time is ripe for building up the great propaganda work. Let us take a lesson from the socialists themselves. Ben Hanford, their candidate for Vice-President, said during the recent campaign: "The best work and the most important work in the socialist movement is the kind

Digitized by Google

of work that all can do. No matter what the things a comrade may be unable to do, each and every one of us can distribute literature and that is the most important thing in our movement. Let each comrade see that his nearest neighbor has some socialist pamphlet, paper or leaflet. See that all the people in your tenement, all the people in your block, all the people in your city, all the people in your township, have something to read on the subject of socialism. Do not leave this work for some one else to do. Do it now. If you work in a factory see that every person in that factory has a socialist leaflet at least once each week. If you belong to a trade-union, see that every member has some socialist literature. See to it that at every meeting of your union every man is given a socialist paper or leaflet. Put your faith in print. Distribute socialist literature and you will get socialist results. Distribute socialist literature and we shall have socialism in our time."

I say with him, "Put your faith in print!" Distribute literature in the interest of industrial freedom and you will get results for industrial freedom.

A beginning in the work of education that the employers of the country must undertake has been made. Some propaganda work has been done in the way of issuing pamphlets, but the influence of this method of education is limited. The establishment of a periodical which will be self-supporting but not profit-making, becomes necessary. It must be made so cheap in price as to permit of the widest circulation among the employes of the country. There was issued last month from the president's office of the National Association of Manufacturers in Indianapolis, a paper called The Industrial Independent, whose purpose is to disseminate sound economic doctrines, oppose organized lawlessness, socialism and anarchy and advocating the cause of free and independent labor. It is worthy of the support of all employers and independent workmen everywhere. If the periodical receives the encouragement and support that it should, if it can be made profitable from a financial point of view, a great propaganda institution will be developed, whose efforts in spreading the principles of industrial freedom will be vigorous and constant. It is not intended in this paper to assail labor, but only the illegitimate tendencies of trades-unionism. It shall stand as the friend of the workman as a workman, freely giving its support to all sane and legitimate efforts to better his condition. It shall invite in its columns a free discussion of industrial conditions. It invites contributions from employer and employe alike and will welcome suggestions from whatever source that tend to bring about a better understanding between employer and employe.

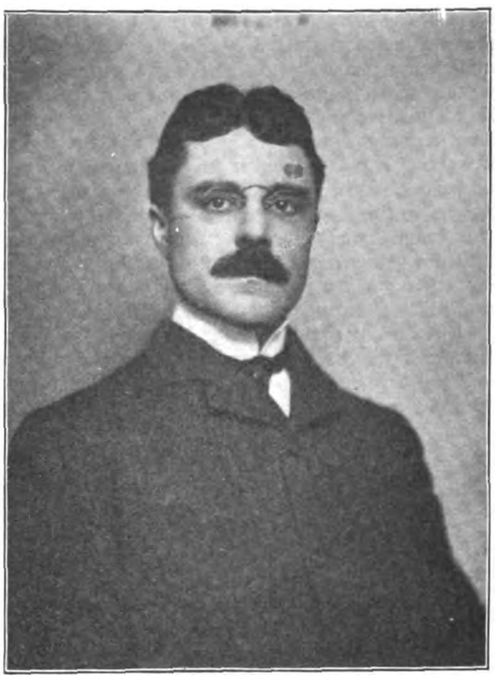
I have endeavored in this brief paper to lay before you in as concise and direct a way as I could the nature of the work that now confronts the good citizenship of the country. It is a work that intimately concerns itself with the personal relationship existing between the employer and employe. Are they working in the spirit of unity as they should, or is the attitude of the employe toward the employer one of hostility and suspicion?

FALSE TEACHINGS HAVE BORNE MUCH BITTER FRUIT.

It is for you and all employers everywhere to say whether the widening chasm between the employer and employe shall not be bridged; whether they shall not be led to see that the interest of one is the concern of all and that in friendly co-operation and not in hostile division lies the highest prosperity for them both.

Mr. Parry was interrupted by frequent outbursts of applause and received a genuine ovation when he closed his address.

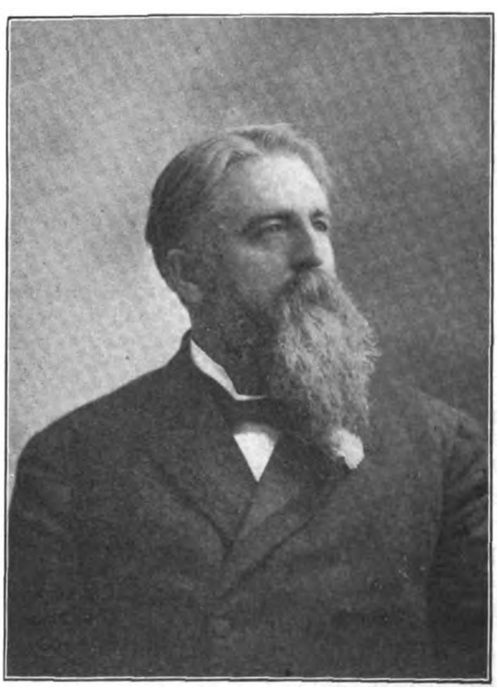
THURSDAY AFTERNOON SESSION.



NOVEMBER 17.

It had been intended that the afternoon session of the Manufacturers' Association on Thursday would be of executive character; however, so many of the jobbers and visitors expressed most earnest desire to hear remarks on the subject of "Special Brands" that the doors of the meeting were thrown open and the addresses permitted to be published. President Birge opened the meeting with a few remarks on the subject and requested

FRANK DICKERSON,



of the American Sheet and Tin Plate Co., to open the discussion.

Mr. Dickerson said in part: The chairman in stating the subject for discussion, I think, gave the impression that it was a new one. I would disagree with what he said. It seems to me that I recall some years ago before the Manufacturers' Association was founded a discussion upon this subject in which, perhaps, I took part. I did in thought if not in speech. I had thought from the lovely way in which our company was received by all jobbers upon this subject that the subject was settled. I considered it dead. I am reminded in that connection of a good lady who fell sick—so sick that she finally passed into a comatose state—even lost all consciousness. Recovering consciousness, however, she was surprised on opening her eyes to see a trained nurse sitting at the foot of the bed reading a novel and smoking a cigarette. She said: "Nurse, what on earth does this mean?" and received the startled and somewhat startling reply, "Oh, I thought you were dead." The subject is not dead, it seems; it has come to life again.

CHARLES W. ASBURY,
CHAIRMAN OF EXECUTIVE COMMITTEE.

Now, a brand stands for something—what? Quality. Of what does quality consist? Two things, material and workmanship. Who controls these elements of quality? You will all agree, I believe, that the manufacturer controls them. The control, therefore, of the brand is in the manufacturer. Theoretically, at least, it originates with him. It is his duty to see that the quality is upheld. The jobber is one who buys in large quantities, puts the goods into his warehouse and sells in smaller quantities. To have success we will all agree he must be honest in all his dealings. He will, therefore, only handle

F. R. PIKE,
OF THE EXECUTIVE COMMITTEE.

HONEST QUALITIES AND HONEST BRANDS.

It is his duty, therefore, to handle the brand which correctly represents the quality of the goods which he sells. There are a third class of people interested, however; they are the final buyers—the customers. He is entitled to receive the same quality that

Digitized by Google

the brand represents—that there be no discrimination in the quality which he receives.

Now, there are two elements that go into making up the value of the brand. One of these is its own intrinsic merit, and the other is the demand for it which has been created perhaps by long use or by judicious advertising, or both. If one man performs both of these operations by manufacturing the goods and creating the demand, is he not entitled to all the profits that come from the use of the brand?

Now these statements which I have endeavored to make seem to me fundamental principles which should govern our consideration of this subject, and it seems to me that we should meet in a spirit of fairness and give and take in its discussion.

Now, bear in mind simply the key—the fundamental principle governing special brands and bear in mind also the question of equity and justice. Will not different conditions bring about different answers to this question? For instance, if a manufacturer has had his brand upon the market for many, many years, that it has attained a value over and above its quality, that brand having attained that quality, is not the manufacturer entitled if he choose to sell his goods under the brand which by his efforts, both of manufacture and of advertising, he has created a demand for? I think that he has. On the other hand, a new manufcturer, for they are all the time starting up, comes into the market without and brand and a jobber comes to him for a special brand, and he

WM. M. PBATT,
OF EXECUTIVE COMMITTEE.

grants it, for he has nothing of his own to prevent, to whom does the brand belong? It seems to me that I have already said that it is a question of joint ownership, for both of them, if the brand has attained a value, have done something to make that value and they should share in its profit.

I will not take up your time. I just wanted to bring before your mind some ideas in relation to it. Then in fairness and justice let us discuss this, and when we come as man to man to buy and sell let us meet in fairness and justice. We differ in our views on the policy of civil government, but we do not differ in upholding the honor of the flag or the integrity of our country. Let us discuss the problem frankly and with equity and I believe that every difficulty will be solved. (Applause.)

Chairman Birge introduced

BRACE HAYDEN.

of San Francisco, who addressed the convention as follows:

Mr. Chairman:

The seven and one-half minutes which you have allowed is so short a time for the discussion of the important subject of private or special brands, which has been a prominent topic in trade journals for some time past, and which you give such prominence in this convention, that I am of necessity forced to skim hastily over its consideration and to condense my ideas regarding it into as brief a space as possible, and not to waste any of the precious time that will go to the root of the matter at once by the statement that many of the leading lines of goods are duplicated with private brands, for the reason that there is not an adequate net profit in selling the manufacturer's brands, neither sufficient profit to the jobber or retailer. What there is for the manufacturer you are better able to judge.

The first question that appeals to me is what was or is the cause for so many private brands, and as I go back many years over the history and experience of the trade to the time when importations were gradually ceasing and our manufacturers were striving to introduce their products, it was quite the custom to make jobbers in various parts of the country agents for their goods. As trade developed and increased through loyalty or preference for domestic products, or convenience in obtaining, or profit in selling, or a more or less combined mixture of all these motives, it became the custom for jobbers to seek such agencies, and many had a long string of them to their credit, all duly exhibited on their letter and billheads and advertising matter, and as trade extended, as it did rapidly, particularly in the West, the number of jobbers increased, competition also increased and naturally profits decreased. Manufacturers soon found out by practical experience that to protect and maintain their prices and thereby the profits of their agents—the jobbers—that it was expedient to give them some goods under some other than the factory names; from this grew the practice of special brands, the use of which is now so general. As I figure it out, this was the genesis of the innovation. It began becaues of necessity. It grew and continues for the same reason, and that the necessity is apparent is demonstrated by the fact that leading lines of factory brands are to-day sold by the jobbers from stock without profit, after deducting business expenses, and many of them at an absolute loss, while the goods of similar character equal in every way in quality and finish under special brands are profitable.

There is but one reason for this, namely, that jobbers control the prices of their special brands, whereas manufacturers, generally speaking, do not or will not theirs, and being stocked by all jobbers, and also frequently used as leaders for the sale of other goods, they are double subject to a conflict that is extremely keen, involving more or less the entire jobbing trade. The cut prices thus established are soon widely known, the goods classed as profitless and their sale not so strenuously urged as are the private brands; in fact, they are left to sell themselves and sold only when called for.

Business having so many outlets and the territory in which a jobber may sell is of such an elastic character, in fact limited only by his ambition and capacity of distribution (not only from stock, but for shipment direct from factory), that a low price made in any district is quickly known and felt by competitive jobbers, and the area of low prices widens and extends until they become practically universal, and so by the very nature of the competition it cannot be stopped or the prices raised. No one jobber is wholly interested in the brand, therefore no one can

BRING ABOUT A REFORM,

and, as it is impossible for jobbers, particularly in widely scattered territories, to agree upon prices, the period of remunerative sales is likely to be a long one. The manufacturer only is interested in the brand, and genrally speaking has been unable or unwilling to control the jobber's selling price, even if it is to his interest to undertake it. As long as his profit is satisfactory and his volume of sales fairly normal, why should he attempt the task of seeing that every jobber gets a profit, or rather forcing them to make one? At least this occurs to me as the manufacturer's argument why he would hesitate upon adopting such a policy for such a purpose. As long as his brand is popular and in demand he is pretty sure of a profit, therefore why worry about the jobber. It is therefore evident that should the jobber confine his sales of first class goods exclusively to manufacturers' brands the competition would become so acute as to render all sales profitless, and the result would eventually be a stoppage of this class of trade, in the loss of which the manufacturer would surely participate. How, then, can it be consistently urged that manufacturers' brands only should be sold?

The retailer welcomes brands upon which the price is maintained, as he can make a profit on these, while on factory brands competition reduces his profit in the same way that it does to the jobber. Thus the incentive for special brands becomes very great. In fact they are a necessity.

THE CATALOGUE HOUSE QUESTION,

particularly with the retailer, is another reason that has stimulated the sale of special brands, for the retailer and jobber, who have been instrumental in making the market for manufacturers' brands, stocking them and urging their sales, so that they are either demanded or called for, find that the retailer is forced to sell at prices which afford no profit, as the cataloguer who buys at jobbers' prices sells direct to the consumer, at prices with which the retailer cannot profitably compete. Therefore there is on the contrary every reason why he should not, and substantial motives in his pushing other brands.

To increase the number of manufacturers and their brands will not lessen the competition, but it will hurt the manufacturer by reducing his profits. If jobbers are to be limited to manufac-

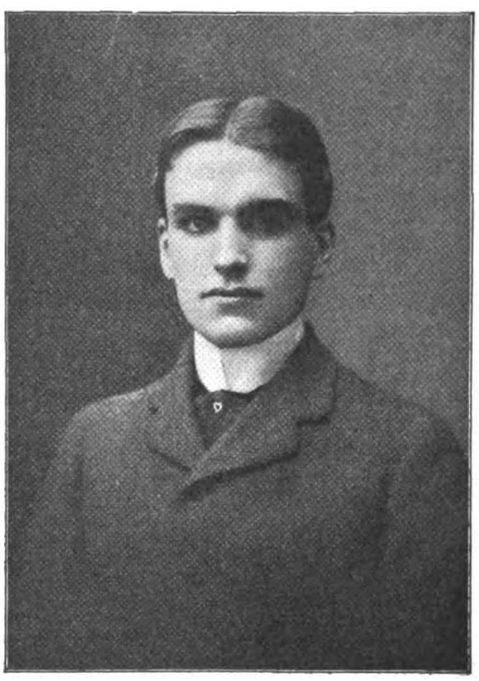
Digitized by Google

turers' brands only, then they had better confine their sales to such as are already established and well known, for to introduce the line of a new manufacturer means a competition with the older ones and necessarily a reduction in the price of both without corresponding benefit to either, and it is certainly as difficult for the jobber to introduce a line under a new manufacturer's brand as it would be under his own, and on which there would be the added advantage of the maintenance of prices without increased competition.

If the manufacturer created the market for the goods it would be a different matter, but where he does not and depends upon the jobber for distribution the jobber is justified in demanding such protection as will secure to him a profit or else in using his facilities, the time and expense of his salesmen, for the benefit of his own brand, and not confine his labor, efforts and capital to the manufacturer's brand on which his returns are inadequate. He is not only justified in doing so, but is working to his own detriment if he does not. He may not employ his energies to sell goods that are unprofitable when he is not forced to. He is not warranted in doing so. He is encroaching upon his capital by such a timid and complaisant policy, and in the end he will be left in the rear ranks, or will have dropped out altogether and the manufacturer's brand will have one less jobbing customer. There is a large trade for well-established manufacturers' brands and always will be, and which jobbers do stock even if obliged to sell at such disadvantage, but if there is to be nothing else to sell, no opportunity for a jobber to exercise his ingenuity, no sphere for his individuality, no outlet for his talent in the sale of his own special brands, but his energies restricted to the dead level of manufacturers' unprofitable brands, then business becomes a drag and annoyance; it has no outlet or place for the ambitious and the dry rot of indifference and negligence will result.

The consolidation of competitive lines by manufacturers has probably contributed somewhat to the use of special brands, for the absorbing process some factories are likely closed and their production assumed by the remaining active factories, when some change is noticed in the finish or quality of the goods turned out, and proving different from those formerly purchased, and being unsatisfactory to the jobber new manufacturers are sought, those who have started business in consequence of consolidation, and the favorable condition created thereby; these factories not having a large trade for their own brands, are not indifferent to good-sized orders under special brands, as they are profitable and advantageous in building up business, and thus both manufacturer and jobber is helped and benefited. It is a mistake to think that special brands are confined to second and third rate qualities. It is not so, for many of the special brands are of the highest quality that can be made. If they were not they would be rejected by the retailer and consumer. Therefore the jobber runs as great a risk as the manufacturer in putting out inferior goods as first quality.

POCKET CUTLERY



is quite generally ordered under special brands and seemingly without objection, when given in sufficient quantities and in ample time. A writer in the *Iron Age* of recent date states that special brands of pocket cutlery are, as the trade very well know, of first quality, and not lower than the manufacturers' own brand, for it would not pay to make them of a different grade. If manufacturers of these goods with all the difficulties they labor under are able and willing to make special brands, recognizing the benefit and advantage it is to a jobber, what serious disadvantage can it be to manufacturers of other goods which are far less complex in the process of production. It is to be assumed that orders for special brands are given in sufficient amount and under conditions of delivery that are satisfactory to a manufacturer as far as profit is concerned.

When it comes to second quality or even lower grade goods and for which in many lines there is a legitimate and large demand and use, there can be no objection to branding at jobber's request, as the brands which manufacturers use do not indicate the maker and therefore they can have no especial pride in their production, the only incentive being that of profit.

It would be a fortunate condition indeed if some regulation of the trade could be brought about by which a moderate net profit could be made on all manufacturers' brands, but there is no evidence that such a situation is near at hand. It certainly cannot happen until manufacturers and jobbers realize very fully that their interests are interdependent; that every manufacturer of a competing line of goods cannot sell every jobber and because he cannot he should not feel at liberty to dispose of his goods without reference to the competition he will create, and the reduction in price he will cause to those who handle other makes.

It cannot be held that manufacturers alone are to blame for the situation, as it is the natural outcome of unrestricted distribution and competition in which manufacturers, jobbers and retailers all take a part, but we must recognize the facts, and by realizing them more clearly some improvement may result that will be beneficial to all. It is not extravagant prices or immoderate profits that cause the trouble, but exactly the reverse. If prices could be maintained that would yield a reasonable net profit, neither the volume of sales would suffer nor would there be complaint at the trivial advance in costs.

It is to the interest of manufacturers, as I have endeavored to show that there must be private brands of first quality goods, for if the jobber is limited and confined to manufactured brands, which return such meagre profit and are frequently sold at a loss, and apathy will succeed activity, to the detriment of all concerned; but this smacks too much of trade restraint or trade suicide to be given serious consideration, for we all must realize that before such an event could really be inaugurated, a struggle would ensue that would shake the Hardware trade into such

EDWIN A. WALTON,
OF FREIGHT COMMITTEE.

confusion that I will surrender the job of prophecy as to what the outcome would be to some abler exponent of our allied interests, but I venture the assertion that the situation would not be a happy one.

GOV. GOODELL,

who was introduced as the next speaker, said that the question of special brands was a question not to be laughed at. He said in his opinion the manufacturers were responsible for the difficulties that had come up in connection with special brands; that the manufacturers were the first to suggest special brands to the jobbers and they had accepted the suggestion of the manufacturers and were now in trouble. He said the manufacturers could not afford to place a special brand on goods for all who asked, as the quantity of goods ordered many times did not justify.

W. M. TAUSSIG,

of Bridgeport, Conn., was next invited to address the convention. He said:

The special brand question is a very vital one to those manufacturers of pocket knives who market their product entirely through the jobbers; those who in whole or in part sell to the retail trade direct are not only not troubled by this feature, but perhaps to some extent benefited by it. To what I have to say now on the subject I wish to be understood as speaking only for those who sell to the jobbers.

In considering this special brand question we have no illusions as to the possibility of eliminating entirely this feature of the business. We know that a number of special brands have been on the market for many years and have established a reputation which entitles them to a permanent position in the trade. The reputation established by these brands has been the work of many years; has been accomplished in most cases by an almost complete identity with one definite source of supply. Moreover,

Digitized by Google

the inception of these brands took place when conditions were vastly different than those existing to-day. We do not wish to be understood as stating that special brands are entirely objectionable when confined to parties who buy in quantities; make a specialty of the cutlery business in a large way and buy under conditions and terms that are acceptable. What we do object to and believe to be detrimental to the interests of both parties is the extent to which special brands are being insisted upon where the actual or possible volume of business does not warrant it.

OF THE TWO OBJECTIONABLE FEATURES

to special brands that stand out most prominently, that of loss of identity to the manufacturer is obvious on all lines of goods. The second, namely, increased cost and difficulty of production, also applies to all lines, but in the case of pocket cutlery is aggravated both by the great variety of patterns necessary in this business and the peculiar methods of manufacturing. In order to produce at the minimum cost pocket-knives, like all other goods, must be made in quantities. The branding, however, must be done in practically the initial stages of manufacture. Nothing can be done towards assembling a pocket-knife until the brand or stamp has been put upon the blade, and furthermore, very little can be done to the blade until it has been stamped. Consequently the manufacturer whose business is largely dependent on special brands in small quantities is greatly hampered in producing to advantage. Quantities that may appear for the average jobber to be fairly large are in these days of production on a large scale comparatively insignificant to the manufacturer. The extra cost of special bronze labels, etching plates, etc., are also items to be considered as the cost of these is naturally more in small quantities.

We recognize the difficulty of making some special brands and refusing or objecting to the making of others. Mr. X. may very properly say, "You make special brand for Messrs. A. & B., why not for me?" The chances are that Messrs A. & B. make a specialty of the cutlery business, ordering large quantities of practically the full line that the manufacturer makes and accept deliveries at the factory's convenience, and thus obviate many of the objections I have enumerated. These difficulties and objections, however, do not interest Mr. X. He does not understand why we should not be glad to supply him special brands in lots of twelve, six, or even one dozen, as long as we make special brands at all.

We also recognize the fact, that like our friends, the jobbers, in their present attitude on the catalogue house question, we are, if not in like measure, still to a great extent, responsible for the very evil we now protest aaginst. Through keen and constantly increasing competition we have in a measure created these evils. In now wishing to check or modify them we are sincere in our belief that what we are advocating will eventually be advantageous to the jobber as well as to us. Jobbers certainly must recognize that just as the agitation of the catalogue house question has permeated to the smallest dealer, so also has this question of special brand. The manufacturers who go direct to the retailer have also made a point of "Factory Brand," and their activity in this direction will certainly not decrease. I may say here that as a class and in proportion to their investment I believe I am correct in stating that these manufacturers have been vastly more prosperous than those who have confined themselves to jobbing channels. They are steadily increasing their field of operations, and our conviction is that the prevalence of special brands to almost the exclusion of factory brands among jobbers, and not the question of price, is what has materially aided them.

Why does the jobber want special brand on cutlery? First, because he wishes to establish a permanent demand for his brand in his territory; but unless this is done on a large and liberal scale, is this possible where almost every other jobber in the same territory is trying to do the same thing? Second, in order that he may freely ask through his salesman prices that he considers legitimate, without fear of being confronted with a lower (even if still profitable) price on the same pattern by his competitors. But does he really accomplish this, and if he does, is it wise?

THE SAME GOODS COST MORE

to market than others, both in time and expense, we all know, and cutlery is certainly one of these items; in addition, on cutlery the jobber is entitled to consider the loss on dead stock, samples, etc.; but is he not tempted to ask too much profit and thereby open the door to the competition, not that of his brother jobber, but of the manufacturer who goes direct to the retailer and the so-called special cutlery houses? Quite aside from the question of price, is he not hampered in such competition by the special brand question? His line is naturally limited by the selection the buyer makes in placing his single order, and this line is influenced by the quantities he is asked to buy to justify in a measure special brand, and such quantities while large from his point of view are still small to the manufacturer. His line of patterns is therefore limited and he cannot increase it from time to time as occasion arises, but he must wait until he makes up his regular order. His stock is easily broken and if a given pattern sells more largely than the buyer expected his stock cannot be replenished for at least three or four months, and he runs a chance of losing sales and also of carrying over surplus stock that comes in too late. If he carried a factory brand his assortment could be larger with practically no greater investment than he has at present.

Of course the solution of "Special Brands" is in the hands of the manufacturers, provided they wish to exercise the power that is in their hands and can agree on a united policy. The difficulties as to this, however, are so great that we are not able to suggest any remedy. If manufacturers of other lines have similar difficulties to contend with and will unite with our section to urge upon jobbers the ultimate detriment which it appears to us this special brand business will lead to we think that something will have been accomplished. To-day the jobber realizes the mistake made in building up the catalogue house business. Will he not realize too late the over-doing of special brand business?

W. T. JOHNSON,

of the American Axe & Tool Co., next addressed the convention as follows:

As has been made plain to you all, the one subject under discussion at this time is, that of "Special Brands," and by reason of the fact that special brands cannot be divorced from factory brands, it would seem wise to consider first what factory brands mean. When I state that the factory brand represents the manufacturers' birth-right, I have briefly but clearly defined its value. In other words the factory brand is the good-will of the manufacturer, representing in some cases a value exceeding that of the plant, because of their having been acquired through the toil and energy of generations.

There are brands in existence to-day that originated with the father and were handed down to the son and grandson that are now in the hands of corporate interests. The quality of these brands, having not only been fully maintained, but by application of modern methods in many cases improved, it is difficult to put a true estimate upon their value, and, gentlemen, it is the shipment into foreign countries of such goods, bearing in stamp and label the name of the maker, representing as they do American ingenuity and quality, that has advanced this glorious country of ours to its enviable position commercially among the nations of the world.

It is a recognized fact that no such inheritance could have been created or such growths made had these goods been furnished under brands that were at the beck and call of this or that party. Hence does it not mean that the policy now pursued, which tends to foster the growth of the special brand to the detriment of the factory brand, will in time mean that the manufacturers' only assets are his stock and machinery, as it were, he having lost his inheritance and exchanged his independence, gained by the efforts of his forefathers, for the bridle of the jobber.

As manufacturers we make the contention that to reap the harvest due to our efforts we must be identified with our product, and while the less cost of producing factory brands brings a permanent return, the same is not always true of the special brand with its greater cost. In fact, it is too frequently the case that the manufacturer gives the best of his factory's experience and skill in supplying a special brand, to find that he has launched a boomerang, when next year for some slight consideration the reputation gained for the brand is turned over to a competitor.

Having thus briefly outlined what the term factory brand implies, it would seem well to give the special brand the same consideration. Fortunately factory brands have always stood for the best product that the manufacturer could turn out, while on the other hand special brands have not only represented first quality, but also second, third and even fourth grade.

Aside from this, recognizing the value to be gained by the permanency of the brand, the manufacturer makes few changes, whereas, the jobber is constantly changing in accordance with the

Digitized by Google

ideas of the sales department, or the whim of the buyer, this meaning a constant change in the finish, labeling, stamping, etc., which adds greatly to the expense and establishes no permanency to the brand.

THE QUALITY OF THE SPECIAL BRAND,

unlike that of the factory brand is in many cases regulated by the prices realized. My experience on the road has forced me to believe that there are manufacturers who make the punishment fit the crime. Hence the tendency under special brands is for a reduction of quality quite the opposite of which prevails under the factory brand.

The growth of the private brand is a long story, and at the start the manufacturer must acknowledge that whatever of disadvantage he finds, he has only himself to blame, and in justice to the jobber we must exclude him from any responsibility in the creation of special brands. Further than that he has perhaps been a precocious pupil in learning to use the weapon, which the weakness of the manufacturer has furnished him in the form of a special brand with which to combat the factory brand. The fact that this subject is brought into consideration at this meeting indicates a weakness somewhere and presumably suggestions for a remedy are in order. Before proceeding, I want to tender my congratulations to the manufacturers present and absent who have always been able to put their own brand on their product. It may appear to them (to quote an axiom) that the "way to resume is to resume," but I for one would count their experience as most valuable in contemplating a remedy for this, what we, for the time being, must consider from the manufacturers' view point, an evil. Irrespective of any other advantage that might have influenced the jobber to adopt his special brands, the trade winning methods of others that made a limited profit only, on factory brands, for the rank and file possibly, forced him to do so. In making this statement I have in mind the oft-repeated action of some of our jobbing friends in offering to the trade by means of circular quotations or supplementary catalogues factory brand products, very much below the market, thereby offering a "bait" to present and prospective customers, losing sight of the incalculable harm they have done to the manufacturer of the particular line.

Therefore, is it not up to the manufacturer to devise a plan whereby the jobbers' selling price of his product can be controlled. If this can be done nine-tenths of the incentive for special brands will have been removed. In my opinion concerted action on the part of the manufacturers, past and present, has been influenced through efforts on their part to protect their birth-right, and as it would seem that the evil cannot be removed in any other way, our jobbing friends should take no exception in this endeavor of ours to not only better our conditions, but incidentally their own.

Is it not a fact that manufacturers' associations that have controlled the jobbers' selling price, have been more staple and satisfactory to all concerned than those in which the selling price was not considered? Does not the tendency of the time seem to indicate a greater willingness on the part of the jobber to co co-operate with associate manufacturers, and do they not realize as time develops that the interest of the manufacturer is identical with their own and that he is not inclined to inaugurate arbitrary principles, but are depending on such only as will create a profitable market for his own brand?

I have recently embraced the opportunity to discuss this question with jobbing friends and have asked them frankly to give me their views as to the remedy. The gist of their replies would seem to indicate that the first step to be taken by the manufacturer is an establishment of uniform selling prices, and that this could best be controlled by absorbing the jobbers' profit in a premium, one of the conditions of the payment of which is the maintenance of an agreed price.

There are among you present here some that may consider this means arbitrary, but, gentlemen, if you will give the matter thoughtful consideration, I believe you will agree with me that it is a better solution of the problem and will accomplish better results than the extreme measures that have been advocated by some manufacturers, namely, charging extra for special brands.

R. A. KIRK,

was called upon and spoke as follows:

In the short time allotted for this discussion it is necessary to proceed at once to the subject, "Special Brands."

I remark that special brands have come into existence largely through the joint action of manufacturers and jobbers, in which the retail trade has also had a part. If, on the one hand, the jobber has earnestly desired to have his own brand, he has always been able to find the manufacturer who would make it—if he had an attractive order to offer, and not infrequently it has not been necessary for the jobber to expend any energy in soliciting a manufacturer to take the order. On the contrary, the manufacturer has been quite ready to offer every argument and inducement at hand to secure the order, and has not hesitated to picture in glowing terms to the possibly reluctant jobber the alleged great advantages he might expect to find in building up his trade in private brands.

It is, therefore, fair to say in the outset, that the manufacturer has had his full share to do in the introduction and continuance of special brands.

SECOND. The demand for special brands by jobbers has come from exactly the same causes as have led the manufacturer to adopt his regular factory brands.

Special brands have not been adopted by the jobber to hoodwink the trade and the consumer. In this discussion I insist that we drop the assumption that the jobber, any more than the manufacturer, has adopted and pushed his special brand in order that he may sell an article of an inferior quality at a disproportionately higher price. Doubtless some jobbers have done this, just as some manufacturers have done the same thing. It all depends on who the jobber is, just as, on the other hand, it always depends on who the manufacturer is. The real jobber is precisely as much interested in building up a high and permanent reputation on his special brand as the manufacturer is on his factory brand, and every argument that can be used in favor of the manufacturer's furnishing

HONEST GOODS

will apply to the jobber with equal force, and the jobber who tries to build his special brands on any other foundation is only digging his own grave, and, unless he changes his policy, he will, sooner or later, fill it.

The jobber, like the manufacturer, may have his special brands for goods of second or third rate quality, but, in each case, in order to permanent success, the goods must be as represented, and the same laws of trade and common honesty and business success apply to both the jobber and the manufacturer.

THIRD. The rapid increase in the demand by jobbers for special brands has come largely from the fact that the manufacturer has been too willing to put his goods, including his regular factory brands, into the hands of the catalogue house. When this was done the jobber and also the retail dealer has seen his margin of profit dwindle steadily away, and the inducement to sell these goods has correspondingly decreased.

In this emergency the jobber has taken the special brand which he controls and on which he can hold a jobber's profit; he says to the retail dealer, "Take my special brand goods; push their sale. I will guarantee you will have no catalogue house, or even department store competition on them."

If the retail merchant has confidence in his jobber, can you conceive of a stronger inducement for the order to go to him, or, on the other hand, for the jobber to see that he furnishes goods up to his representations?

Under these conditions it is no cause for wonder that the sale of the jobbers' special brands increases and that the demand for the factory brands correspondingly decreases.

FOURTH. Another factor in favor of the jobber with his special brands is that when he desires he can give to the retail dealer the exclusive sale of his goods under his brand. Every merchant in a town can handle a saw or a file under the factory brand, and thus, in the competition that follows, the selling price to the consumer may be and generally is steadily reduced, till it frequently reaches a point at which it yields no profit, and sometimes does not even pay the expense of doing business.

The jobber with his "Sunrise Saw" and his "Sunset File" can say to his customer, "Take this saw or this file of mine, build up a trade on it and I will see that you enjoy the market on it which you have created."

FIFTH. Another factor in favor of private brands is that by availing himself of the separate and

DISTINCT ADVANTAGES.

offered by the several manufacturers of any line of goods, the jobber can assemble under his brand the different patterns to make up that line at a reduced cost and also with a marked improvement in his assortment of patterns. For instance, any one conversant with the Cutlery Trade realizes the value of this help, and its influence is extending to other lines as trade conditions steadily grow more complex and interlinked. Some Hardware jobbers are now offering varied attractive assortments of Mechanics' Tools under special brands, these assortments running through a full line, and being offered generally to one house in a town, to which the exclusive sale is given. In this way competition with catalogue houses, department stores, as well as

Digitized by Google

other local competition, is eliminated. We can readily see that in the assembling of these goods under one special brand probably a score of manufacturers have contributed a part, and in this way advantages have been secured that cannot but prove attractive.

SIXTH. The jobber who is able to order in liberal quantities, and to anticipate his requirements ample time in advance of his wants, and who will accept shipments at the convenience of the manufacturer, certainly can offer him a very desirable business. From the nature of the case the benefit of special brands must necessarily come in largest measure to the house that can offer these advantages.

It has been one of the elements of weakness among manufacturers that they have been too willing to accept small orders for special brands of goods. These orders sometimes come from a large house, sometimes from a smaller one, and it has been understood sometimes coming from even a retail house.

It will not do to charge such gross abuses as these to special brands, nor on account of such abuses should they be condemned. These evils are easily subject to proper regulations when manufacturers are willing to undertake it.

SEVENTH. On goods that are not designed as

FIRST QUALITY

we see no reason why the jobber cannot push his special brand with satisfaction to himself, to the manufacturer, and also to the retail dealer.

The jobber can look to his manufacturer for the quality of the goods as represented and in turn the retail dealer can look to the jobber, and our experience and observation go to show that the jobber stands as squarely behind his goods or the different classes going out under his brands as does the manufacturer on his brands.

EIGHTH. Special brands have come to stay, and we believe will grow stronger as the years go by. In our view they are to be a powerful factor in the evolution of trade. We not only believe they cannot now be eliminated, but we also agree with a prominent manufacturer who, in a late article in one of the trade papers, states as a fact that manufacturers do not wish to see special brands eliminated.

We believe it is to the advantage of the manufacturer, and also to the retail trade, as well as for the jobber, for special brands to continue; that there is an important place for them in the conduct of trade, and that the interests of all concerned will be promoted by devoting their energies wholly toward eliminating the abuses that have crept in.

NINTH. It is to be taken into account that the use of special brands does not affect all manufacturers alike. Some manufacturers are doubtless benefited by them, other manufacturers may receive little or no benefit from them.

It is possible that some manufacturers have suffered from their use. We believe that in but few cases this loss resulted necessarily. But even if this were to be the occasional result, it would not be reasonable or satisfactory on this account to condemn the system.

No important changes can come into the distribution of goods or into the conduct of business without working disturbances, and, perhaps, some injury to some one. But we submit that the loss that must necessarily result from this cause to manufacturers, here and there, does not extend to such a degree as to condemn the system.

LASTLY: These abuses that have grown up in the system should be disclosed and cured. None of them is beyond remedy. In the curing of these abuses the manufacturer, the jobber and the retail dealer all have a vital interest, and we believe each will do his part.

We commend this very important work to every manufacturer, and we assure you that in your efforts in this direction you will have the hearty co-operation of every jobber who is a real friend of special brands, and who can expect successfully to use them.

F. E. MUZZY,

of Chicopee Falls, Mass., next addressed the convention on the subject. He spoke as follows:

Mr. Chairman, Jobbers and Hardware Manufacturers:

A friend of mine has a new Tonneau, that he christened Willie, and when he starts on a trip he says either mentally or orally, "Will he go or will he not?" With private brands, it is entirely with the manufacturers, and it is for him to decide, will he brand or will he not?

This subject is so broad, and so many reasons can be brought forward both pro and con, that in the brief time allotted, I cannot do the subject justice, and I trust you will pardon the rapid delivery, in order to cover as much ground as possible, in so short a time.

The manufacturer is almost wholly responsible for present conditions, and I believe I am safe in saying that Axe, Shovel and Pocketknife makers are more to be blamed for existing conditions than any other line of Hardware manufacturers.

Almost the first special brand goods to be sold by the Hardware jobber was an axe, all because Mr. Lippincott himself told a bright young jobber he could not run his store without Lippincott axes. This jobber at once decided to have an axe that no manufacturer could taunt him about buying, and from this axe sprang a full line of branded goods, that command the respect of every honest retailer, jobber and manufacturer.

Can you expect jobbers to push factory brands when a manufacturer will do as axe makers have in the past, represent to the jobber that they will sell the same quality axe under private brands

50C. TO $1.00 LESS

than under factory brands, and guarantee the same?

A reliable buyer for one of the largest jobbers in the country told me some ten years ago that a well-known popular brand of hand saws he was obliged to sell under factory brand at $13.50 per dozen, and it did not bear a profit to cover expenses, and he was buying under his own brand, a more highly finished saw, that he could job at $12.00 per dozen, at a very satisfactory profit. and a salesman representing this saw factory guaranteed the buyer the quality of the saws to be the same, in fact both were the same blanks, and received the same treatment, the only difference being in the higher finish of the jobber's brand|

I could cite hundreds of similar cases, but the two above suffice, and can you blame the jobber for buying private brands?

Again, factory brands are put on the market with an open selling price, or a margin of profit that will not show a percentage equal to the cost of doing business.

All jobbers' salesmen will sell well-known unrestricted factory brands at practically cost to influence the sale of other goods, hence the jobber is forced to have private brands on which he can average up his profits.

Seventy-five per cent are heartily in favor of manufacturers placing restricted selling prices on their goods, if they will only see that prices are absolutely maintained, and bear a proper profit, but in the past price maintenance has been a farce. The manufacturer asks the jobber if he will kindly hold to such and such a price, and the jobber at once kindly cuts the same. The manufacturers allow the jobbers to meet competition, and the headstrong salesman meets it the first order he sells, and every one thereafter.

I know a factory salesman who presented a contract to the jobber to sign in regard to holding prices, and the jobber signed it, and replied to the salesman: "You do not expect me to live up to this; all of my competitors cut, and I will have to." The salesman mildly remonstrated, sent the contract to the factory. The jobber continued to cut prices, as did all his competitors, and the goods were sold at practically cost, and this applies to a majority of restricted goods, hence the jobber looks with suspicion on restricted prices, and unless the manufacturer holds the jobber with an iron rein, and does not hesitate to cut off the jobber who does cut prices, and if need be spend money to keep him out of goods, the jobber will not respect arbitrary prices.

PRICE MAINTENANCE

means a heavy expense and eternal vigilance on the part of the manufacturer, for it seems to be born in some salesmen to cut prices, but I could never understand why the jobber would belittle himself in trying to defend his travelers; but these are the conditions, and must be met. Unless a manufacturer is willing to spend time and money to protect his priecs, and cut off the jobber's supply, when he cuts prices, no matter how large or strong the jobber may be, and protect to the letter those who give him their co-operation, he best not attempt regulating the jobbers' prices, for it means trouble and annoyance, and it is for the manufacturer to decide whether to him it is worth the effort.

Manufacturers should either hold the jobber absolutely to the line, else permit him to sell goods unrestricted, for it is far worse for the manufacturer and the jobber to place arbitrary prices for the jobber to sell his goods at, and not maintain them to the letter, than it is to allow the jobber to sell them unrestricted.

Every manufacturer knows the value of an established reputation of a high grade of goods, and too many American manufacturers are over anxious for business, and in order to run their factory to its full capacity, will make any quality, any brand, not realizing that without an established reputation on their own goods, that it is a matter of price only that brings them business. A little factory can start up anywhere, and with cheap labor, possibly Chinese labor, get business, for he is not building for the future, but rather on the sands, and he never knows when the storms of competition will wash him out of existence.

Digitized by Google

If a manufacturer is making a high, or even a good quality of goods, by all means use factory brands, which in later years will be a valuable asset in business, and after the goods are established, will sell themselves at a price satisfactory to the manufacturer.

I have been told that the retail agency for the Dunlap Hat was worth $1,000.00 in a certain city of 60,000 people, in New England, and was figured as one of their assets, and when they sold out the agency was transferred, the same as though it was one of the fixtures. I was also told that the agency in the city of Chicago was worth $25,000.00; if so, what must be the value of the Dunlap trade mark to the manufacturer? A $5.00 derby hat, branded Dunlap, sells readily without comment; remove the trade mark, or offer it under private brand, and it would require more than the ability of the average salesman to sell this identical hat, even at a twenty per cent lower price. Who ever heard of a Dunlap, Knox or Stetson being sold under private brands?

I never heard of a Hardware jobber demanding or even requesting special brands on Ames Shovels or Wostenholm Knives, two lines that are sold under private brand as extensively as anything sold in the Hardware stores.

I could name a line of hammers sold in seventy-five per cent of the retail Hardware stores of the United States under factory brand, and called for by carpenters, artisans and farmers, and another line more extensive and equally as good, made at a much larger factory, that is comparatively unknown, as far as the maker is concerned, and I never heard of a consumer asking for the second named maker's hammer under the factory brand, and yet he probably turns out two to one as many hammers—that is, nail hammers, as they are commonly termed, as does the first quoted maker, yet one has a valuable asset that no competitor can take away, the other can hold his trade on price alone.

I have often heard that private brands were not sold extensively abroad, and for the reason that the

EUROPEAN JOBBER

has not the control of his salesmen as has the American jobber, and is largely at the traveler's mercy.

In talking with one of the largest and wealthiest Hardware jobbers in Birmingham, I learned that he could not get his salesmen to sell new lines, such as sewing machines, guns, etc., as does nearly every up-to-date jobber in this country, and a Wolverhampton jobber, more aggressive than the others, in order to introduce sewing machines, had an American salesman go over the trip with his travelers and get them started.

I have seen very few private brands in Great Britain or on the Continent, but I did see some American factory representatives trying to enthuse some of the larger dealers on special brands, which was beyond my understanding, when at home they were decrying the evil, yet were trying to popularize it in a country where it was comparatively unknown. I think this proves conclusively that the manufacturer not only caters to private brands at home, but is trying to introduce this custom abroad. The jobber at home has perfect control of his salesmen; they are instructed to sell certain lines of goods, and if the private brands are more profitable, the jobbers' salesmen will always give them preference, for nearly all travelers' salaries are based on the profit they make the house they represent, and the jobber shows to his salesmen that it is more profitable for him to sell one line of goods than another. The salesmen naturally push the profitable line, for it benefits them as well as their employers.

The quality of a private brand is an unknown quantity; some are par excellent, others devoid of all merit. Manufacturers' brands, as a rule, are of a high quality, or at least the best they know how to produce, and if they are building a business for the future, they must depend on factory brands, and of a high grade, as private brands mean temporary trade only. A factory may make a second or third quality under private brands, or possibly a brand known as the factory's second, on which the maker's name does not appear.

If a pocketknife maker would establish a reputation for his goods as did Geo. Wostenholm, make his goods of the very best quality, and place a fixed selling price on the same, that would bear the jobber as satisfactory a profit as he could obtain on a private brand, and create a demand for the goods, either by advertising or solicitation, in due time the pocketknife maker would have an established permanent business that would be the envy of all his competitors, and later his policy would be imitated. This would take time, and too many manufacturers instead of looking into the future, figure on the present, or rather quick returns.

If a cutler of the United States had established a reputation, he could and should on his own brand of pocketknives, he would not fear free trade, as do the private brand makers to-day, for without protection he could hardly exist.

The jobber is not running his business to build up reputation on factory brands, but his prime object is to make money. He may offer hundreds of reasons for pushing private brands, but every one simmered down, shows it is because it pays better to do so, and just as long as present conditions exist, just so long will Mr. Jobber push his own brand, not because he loves the manufacturer less, but the dollars more.

No one is foolish enough to imagine for an instant that any successful jobber would suffer the delays and inconveniences caused by private brands, if it was not profitable to do so. Then is it not up to the manufacturer to so place his line before his customers that it will be more profitable and satisfactory than private brands, and until this is done jobbers and dealers will request private brands, in fact, be forced to buy them.

As the retailer is the jobber's distributor, it is most important that he, the retailer, be protected, and it is for the manufacturer to so do, against catalogue houses advertising factory brands at a price he cannot meet with profit to himself, else he, too, will be forced to push the sale of similar goods that bear him a reasonable profit.

Different manufacturers would be obliged to work on radically different lines, but the result would be the same, and every manufacturer must work out his own salvation.

The consensus of opinion proves that a large majority of the retail dealers prefer factory brands, the jobbers would, if they could make as good a profit thereon. If the manufacturers, who are not ashamed of the quality of goods that they are producing, would bring about this change, as it is in their power to do, they would eventually eliminate private brands and would feel that the millennium had come, and the retailers, jobbers and manufacturers all would wear one of those smiles that won't come off.

W. P. BOGARDUS,

President of the National Retail Hardware Dealers' Association, was invited to take the floor. Mr. Bogardus said:

Mr. Chairman and Gentlemen, this question is not up to us as it is up to you and the manufacturer and jobber. Of course we want something that the people want. We have got to sell the goods that the people call for. If the brands of the manufacturers are well known all over the country the people will call for them. We cannot afford to spend our lives working up special brands simply because they are special brands. If the manufacturer after long years of faithful effort gives us first-class goods and our customers want them those are the goods that we want. We hope that the manufacturer will remember that we cannot sell them unless we can get a profit on them—we have no inducement to sell them; we want to stand behind the goods. We want to say that to our customers. We feel we can say that to our customers on makers' brands. We are not always sure that we can say that on special brands. (Applause.)

H. H. BISHOP,

of Cleveland, spoke on the subject. He said: Some of the ideas advocated by some of the manufacturers who had taken the floor upon this subject are strictly in accord with the views held by the National Hardware Association relative to the profit to be obtained and the method of obtaining it upon manufacturers' or factory brands. It is a pleasure to see that there are manufacturers in this room who realize that their responsibility relative to the marketing of goods does not end when they have made their sale to their jobbing customer—that they have a responsibility of assuring his making a profit. I believe, Mr. Chairman, that their responsibility extends even further than that—that there is a responsibility upon the manufacturer that he shall assure the retailer also a satisfactory profit Whether that is a possibility at the present time is open to very much argument. That it is possible to assure to the jobber a satisfactory margin is within the range of possibility, and the machinery for it is ready for your hands. As I have before stated, the National Hardware Association have pronounced views upon this subject. They stand ready at any moment to communicate these views to any manufacturer who may be interested. It would please them very much, I am sure, if the American Hardware Manufacturers' Association, for whom they have the greatest respect, would see fit to appoint a committee from their body to confer with the executive committee of our association relative to plans that will have this object in view.

The joint session then adjourned.

CLOSING SESSION.

FRIDAY, NOV. 18.

At the closing session of the Manufacturers' Association several matters of executive character were wound up and the following officers elected for the ensuing year:

President—Julius C. Birge, St. Louis Shovel Co., St. Louis, Mo.

Vice-Presidents—Geo. W. Corbin, Corbin Cabinet Lock Co., New Britain, Conn.; Henry B. Lupton, Oliver Iron & Steel Co., Pittsburgh; Charles W. Asbury, Enterprise Manufacturing Co., Philadelphia, Pa.

Executive Committee—Wm. M. Taussig, Challenge Cutlery Corp., Bridgeport, Conn.; Samuel Disston, Henry Disston & Sons, Inc., Philadelphia.; Wm. H. Hays, Iron City Tool Works, Pittsburgh, Pa.; John E. Harbster, Reading Hardware Co., Reading, Pa.

THE BANQUET.

During past years the main entertainment feature of Hardware Conventions has always been the banquet, and it has heretofore been an affair entirely in the hands of the Manufacturers' Association, with the Jobbers as guests. For some time past there had been under consideration the suggestion that the Banquet be handled in a different manner. Therefore, after the Atlanta meeting it was decided that at the Atlantic City Convention the Banquet should be in the hands of the Jobbers' Association, being directly in charge of the secretary-treasurer, T. James Fernley, and that all banqueters should be charged $5.00 per plate. As far as the work of Mr. Fernley and his committee, headed by Mr. Jackson, is concerned, the banquet was a great success. They introduced a few new features, particularly in seating the diners, who, instead of being seated at long tables, all running out at right angles from the Speakers' Table as heretofore, seventy small tables were laid, each with seats for six, with the Speakers' Table across the head of the room. This made it possible to decorate the room much more tastefully, and the effect of these decorations, and this arrangement, together with the unusually large number of handsomely gowned ladies, made the scene of the banquet one of great beauty. Mr. Jackson and his committee deserve great praise for the care and good judgment used in seating those in attendance at the dinner. At the Speakers' Table sat the following.

T. James Fernley, Toastmaster.
W. Starke,
Hon. John C. Koch,
F. S. Kretsinger,
S. Norvell,
R. A. Kirk,
Webster R. Walkley,
A. C. Rulofson,
H. H. Bishop,
Geo. P. Hart,
W. S. Wright,
J. D. Moore,
J. Hardy,
W. P. Bogardus,
Robt. Garland,
A. Eugene Bolles,
Chas. M. Biddle,
Samuel A. Bigelow,
Governor Chamberlain,
Julius C. Birge,
R. R. Williams,
R. L. Austin,
Wm. W. Supplee,
John Bindley,
Fayette R. Plumb,
Brace Hayden,
Charles W. Asbury,
C. A. Whitman,
Frederick Barker,
R. W. Shapleigh,
W. Chamberlain,
Daniel Stern,
M. L. Corey.

At each plate had been placed a handsome leather card case containing a menu card and a card giving the toasts and two blank cards for autographs. The card case was appropriately inscribed with the compliments of the National Hardware Association.

As stated before in this description, the part of the dinner directly in control of Mr. Fernley and the committee was a success, but at this point where it was taken up by the catering department of the Rudolf, a very noticeable change occurred. The service was most lamentably poor, and the food poorly prepared. The blame for this, however, can be placed on no others than on the management of the Rudolf. It was a piece of short-sightedness on their part that is hard to be understood. As a result, by the time the last course was served, a large number of those present, particularly ladies, had become so fatigued that they left the room.

TOASTS.

After the cigars, contributed by the Bronson-Walton Co., had been lighted, several of the small tables were removed so as to make the banqueters more comfortable, and Samuel A. Bigelow, president of the National Hardware Association, called the gathering to order. In a few well chosen words he extended a hearty welcome to the members of both associations; to the representatives of the retail associations; to the members of the Canadian association, and to the ladies. In honor of the Canadians present, Mr. Bigelow was decorated with the Union Jack. After closing his opening remarks, he introduced as toastmaster T. James Fernley, secretary-treasurer of the National Hardware Association. Mr. Fernley read a letter from President Roosevelt expressing sincere regrets because of his inability to be present and sending his best wishes to all those in attendance at the convention. He then proceeded, in a humorous manner, to review his experiences since ten years ago, when, as "a young and unsophisticated boy," he first assumed his duties of office. Mr Fernley was in his usual happy condition and filled the position of toastmaster most acceptably. He expressed himself as being unequal to the task of introducing so prominent a man as he who was to respond to the first toast, and he called on Mr. Bigelow to do the honors. Mr. Bigelow briefly introduced Governor Chamberlain, of Connecticut, as a Hardwareman, a director of the Stanley Works, and in sympathy with the work of the convention. Governor Chamberlain is evidently popular among his people, as he received a genuine ovation as he arose to fill his place on the programme. His subject was "Our Country and Its Commercial Interests," and he seemed to think that it required no discussion whatever. He said our country is all right, sound in every particular, as was well demonstrated a few days ago. We have the best credit of any nation on earth, and our commercial interests are at a high water mark; that settles it, and what's the use of attempting to elaborate on it? He then proceeded to give some very interesting statistics concerning his home State, stating in his remarks that they had in Connecticut 190,000 wage earners and that their manufactured products amounted to four hundred million dollars yearly. He paid an especially high tribute to the Hardwaremen of New Britain, whose products in this line amount to about eighteen million dollars a year. He mentioned a number of very famous inventors who had come from the Nutmeg State, and closed by saying: "I am heartily in sympathy with association work; I believe in combinations, in trusts, if you choose to call them that; they are absolutely necessary; big work cannot be done on individual capital; trusts are necessary, associations are necessary, and these conventions are a strong feature in the growth of our country."

In introducing the next speaker, the toastmaster stated that he was returning one favor with another, as Mr. Supplee had introduced him originally to a Hardware convention several years ago. Mr. Fernley stated that W. W. Supplee, of Philadelphia, had done more for the uplifting of the Hardware trade than any other man in this country. Mr. Supplee opened his response to the toast, "Where Are We Drifting?" with the quotation from Shakespeare, "All the world's a stage and all the men and women merely players; they have their exhibits and their entrances, and each one in his turn plays many a part." He paid a beautiful tribute to the ladies for the important part they are taking in the nation's development; he spoke feelingly of the influence of good mothers, and mentioned as examples the mothers of Lincoln, Adams, Jefferson and Washington. He stated in his address that in life there were two unpardonable things, success and failure. Successful people are never forgiven by those who fail, and those who fail are never forgiven by those who win success. "Act well your part, far-sightedness is all a matter of good planning. I am not a believer in theories, either in business or politics. We are told in history that at one time Washington went on horseback from Washington to New York. That was 100 years or more ago, and by horseback was the best and most expeditious manner of transportation overland. Some time ago I made arrangements with a man in New York and another man in San Francisco to meet them at a hotel at Chicago on a certain day. I took the train to Chicago, arriving there in twenty hours. My train and the other trains as well were all due at 9 o'clock in the morning; we had made our appointment for 9.30. I was on time, so was the man from New York; the man from San Francisco was five minutes late and in offering an apology said that that was due to an accident to his carriage in coming from the depot. This is where we are drifting—in the right direction." Mr. Supplee then gave some very interesting statistics concerning the growth of our railroads, and stated that it was to our manufacturers that we are largely indebted for our present prosperity. He also stated that the internal trade of the United States was at present equal to the entire export and import trade of all the world outside of United States, viz., twenty-two billion dollars.

The toastmaster then read a report of the Committee on Resolutions, which appears in another part of HARDWARE, and read, as well, a list of the givers of souvenirs. He then introduced F. S. Kretsinger, vice-president of the American Hardware Manu-

Digitized by Google

facturers' Association, who responded in his usual graceful manner to the toast, "And the Lion Shall Lie Down With the Lamb." In a manner full of wit he related some of the troubles of salesmen in the office of the buyer of Hardware, and he produced much merriment when he went on to say that the jobber nearly always insisted that he, the jobber, was of sufficient importance to be entitled to extra discounts; that he was eternally kicking on quality and saying that the salesman's competitor's goods are much better, until finally the salesman gets rattled and closes the deal at the lower price, and when he wakes up consoles himself with the fact that he took a good order, anyway. Mr. Kretsinger stated, "Hardware buying is a profession and not infrequently a crime."

In introducing the Honorable Webster R. Walkley, the next speaker, Mr. Fernley gave the banqueters a combination of wit, pathos, historical facts and jolly. He likened Mr. Walkley to several grand old men like Gladstone, Methusaleh, Beelzebub and Noah, and styled him the "patriarch of the Hardware business."

Mr. Walkley read an original poem written for the occasion, which more than sustained his reputation as a poet. From its beginning to its last line it was full of beautiful expressions, sparkles of wit and touching reminiscences. It is to be regretted that it cannot be published in full in this report.

The banqueters were next introduced by the toastmaster to the "young man" of the trade, a title given by Mr. Fernley to S. Norvell, the president of the Norvell-Shapleigh Co., who responded to the toast, "Twenty-five Years." He stated that it is presumed that this subject had been assigned to him because of the fact that it was just about twenty-five years ago that he commenced his training in the Hardware business by "accepting a position" in the cellar of a wholesale Hardware house. Notwithstanding the lateness of the hour, Mr. Norvell held the close attention of his audience while he related to them in a manner full of humor, many of his experiences during the past twenty-five years as shipping clerk, salesman and in the many positions he has occupied, the whole address being interwoven with much good advice and facts concerning the business. He related the story of an experience in which he claims that he was on hand when the first "special brand" was ordered. He stated that he was standing in the store one day, when a back country dealer came in and said to the buyer: "I want you to send me up some more of those Fob Nails." The salesman said: "What kind of nails?" The merchant repeated his request, and the salesman replied: "I really do not understand just what you desire." The merchant stated that Fob nails were the kind he got last and he wanted some more just like them. The salesman looked up the shipping bills and returned, attempting at the same time to conceal a smile, and told Norvell to get the shipment ready of a certain regular line of nails and he says don't forgef to mark them "F. O. B.," and said Mr. Norvell, our back country friend got his nails "Free On Board," and at the same time, to him at least, he got a "special brand." Mr. Norvell closed his interesting address by telling a number of jokes on several of the older men of the association, and the toastmaster then introduced the last speaker of the evening, A. C. Rulofson, of San Francisco, who delivered a splendid address on the subject of "Our Nation's Progress." His address was chiefly devoted to an interesting description of the upbuilding of that part of our country which lies west of the Mississippi. Mr. Rulofson handled his subject especially well, because of the fact that his father and mother were among the brave pioneers to make the journey overland fifty years ago, and who assisted in the building up of that extremely valuable part of our great country, and, although it was nearly 1 o'clock when he sat down, Mr Rulofson held the attention of all present to the end of his interesting address. The banquet broke up by all singing "Old Lang Syne."

SOUVENIRS.

Besides contributing liberally for Euchre Prizes, the manufacturers in attendance distributed many very handsome souvenirs, among which were the following:

AMERICAN AXE & TOOL CO., Glassport, Pa., souvenir hatchet, inscribed with firm name, a figure representing "Progress." and names of the officers of the National Hardware Association.

AMERICAN FORK & HOE CO., Cleveland, Ohio, mottled leather card case and memorandum book.

E C. ATKINS & CO., Indianapolis, Ind., pair link cuff buttons, sterling silver, gold plated, bearing the Atkins trade mark.

BISSELL CARPET SWEEPER CO., Grand Rapids, Mich., pocket bill book, leather.

BRYDEN HORSESHOE CO., Catasauqua, Pa., gold plated charm, and desk pen rack made from a nickled racing shoe.

CANADIAN ASSOCIATION, gold and enamel pin, in form of oak leaf, inscribed "Canada, the pride of the empire."

COLUMBIAN HARDWARE CO., Cleveland, Ohio, clock and calendar in leather easel frame.

DOVER MFG. CO., Canal Dover, Ohio, asbestos sad iron, "Tourist" size.

INTERNATIONAL CUTLERY CO., Fremont, Ohio, pocket scissors and cigar cutter.

IVER JOHNSON'S ARMS & CYCLE WORKS, Fitchburg, Mass., ash tray of bronze and enamel.

LUFKIN RULE CO., Saginaw, Mich., metal desk rule.

MAYER & CO., Philadelphia, pocket manicure file in leather case.

NORTH BROS. MFG. CO., Philadelphia, "Liberty Bell" medal in bronze.

PETERS CARTRIDGE CO., Cincinnati, paper knife, handle made of metal cartridge, case made of paper tube, with No. 12 paper shells at ends.

READING HARDWARE CO., Reading, paper weight, figure of a boy, and art ink stand representing "Autumn Leaves," with ink well in form of a nut.

SIMION L. & GEO. H. ROGERS CO., Hartford, Conn., berry fork of silver plate.

RUSSELL & ERWIN MFG. CO., New Britain, screw driver, gold plated.

THE WM. SCHOLLHORN CO., New Haven, "Bernard" ticket punch.

SIMONDS MFG. CO., Fitchburg, Mass. Hatpin, with miniature saw at end, and charm—a miniature saw—both gold plate.

J. STEVENS ARMS & TOOL CO., Chicopee Falls, Mass. Desk thermometer in oxydized bronze case, dial representing a target, inscribed "In shooting circles no other firearms are so highly regarded as the Stevens."

TROY NICKLE WORKS, Albany, N. Y. Wicker automobile.

UNION METALLIC CARTRIDEG CO., Bridgeport, Conn. Pocket manicure file, made by setting file in the end of cartridge bullet with metal shell as the case. The cartridge is the one recently adopted by the U. S. Government.

J. D. WARREN MFG. CO., Chicago, Ill. Playing cards and card dominoes in leather case.

WYETH HARDWARE & MFG. Co., St. Louis, embossed leather match safe.

YALE & TOWNE MFG. CO., New York, paper weight, representing part of a "Yale" lock, with key inserted.

CONVENTION BRIEFS.

E. C. Atkins & Co., Indianapolis, represented by Messrs. N. A. Gladding, Sanford, Smith and Carey, kept open house in Parlor H of the St. Charles, where they dispensed liquid refreshments to those afflicted with thirst.

W. L. Deming, of the Deming Co., Salem, Ohio, made a brief call, stopping off for a few hours from an Eastern trip.

The Peters Cartridge Co., Cincinnati, exhibited a line of their goods in rooms 263-7, The Rudolf. They were represented at the convention by Messrs. W. E. Keplinger, F. C. Tuttle, Geo. G. King, J. S. French, T. H. Keller and Geo. R. Benjamin.

The Reading Hardware Co., Reading, Pa., represented by Mr. Harbster and a staff of twenty-two, exhibited a beautiful line of lamps, bric-a-brac, etc., on the second floor of the Rudolf.

The North Brothers Manufacturing Co., Philadelphia, exhibited by demonstration the "Twin" freezer in Parlor K of the Rudolf. This freezer, which we illustrate herewith, makes it possible to make two flavors of ice cream in one operation. The freezer being so made that it can be divided in two parts by a vertical partition, which projects above the top of the can and bears against the can lid so that during the freezing nothing can pass from one side of the can to the other. The dasher has a central shaft, which fits in the groove of the partition of can. This dasher carries two sets of scrapers, one set fitting in one side of the can and the other set in opposite sides. Obviously the can cannot be turned as in old-style freezers, because of the partition. It is therefore swung forwards and backwards, and this movement is produced by a rocking motion of the crank. One scraper of the set in each half of can scrapes when can moves in one direction, and the others in opposite direction. The scrapers are so arranged as to be held automatically against side of can, so that the frozen particles on can are scraped off positively and continuously. The rocking movement of crank is regulated in its length by stops on either side, thus controlling the backward and forward mot'on of can so that the scrapers reach from one corner of can partition to that on opposite side. Outside of the special feature of making two flavors at one freezing, there is another important advantage in the American Twin Freezer, which will be greatly appreciated, and that is the more comfortable and much easier crank movement. It is very much less tiresome than turning a crank round and round, as in old-style freezers, in fact, the tiresome feature entirely disappears. This firm was represented by Messrs. North, Albrecht, McMillan, Rugg and Kinsman.

There is one house in Philadelphia that should be mouseless for several years. Thomas James Fernley was awarded the "Booby" Prize at the euchre and it is understood that he has the privilege of bequeathing to the twins, the Lovell Manufacturing Co.'s offer to furnish a life supply of mouse traps. The other Lovell prize, wringers for life, was won by Geo. North, of Cleveland.

The cards for the "Euchre" were furnished by the J. D. Warren Manufacturing Co., Chicago. At the close of the evening's playing the ladies "cut" for the deck on the table at which they were playing.

Messrs. Conrad Dietz and E. L. Enneking, of the Boss Washing Machine Co., Cincinnati, Ohio, exhibited four of their well-known machines in Parlor H, the Rudolf. Especial attention was attracted by their latest improved High Speed "Boss Rotary," with shielded gears and heavy corrugated wood rub block or dasher with telescope, adjustable dasher post, which prevents the post projecting through the dasher.

Geo. H. Harper, well known to all regular attendants at Hardware conventions, was introducing himself again as the sales agent for the Middle West for the National Enameling & Stamping Co. William H. Matthai of this firm, was also present.

The American Wringer Co., New York, was well represented by Messrs. Geo. Reuter, Jr., C. S. Reuter, J. H. Jantz, James Richens and J. D. Aiken.

The Bronson-Walton Co., Cleveland, Ohio, represented by A. E. Bronson and Edwin A. Walton, furnished cigars for the banquet. Remembering the "Never Burn" smoke (?) of last year, many banqueters hesitated long before attempting to light these cigars, but when they finally did apply the fire, they were happily disappointed—it was no joke this time—but the real thing instead.

One of the old stand-bys—the life of many a convention for years past—Oliver Williams, of the Bryden Horseshoe Co., was sadly missed. George E. Holton, manager of this firm, was in attendance.

New Britain was, as usual, very well represented: the following being among those present from that famous city of Hardware: C. H. Parsons, C. M. Jarvis, C. B. Parsons and W. E. Bartholomew, of P. & F. Corbin Co.; Charles Glover, C. A. Earl, Fred. M. Fee and A. W. Bowman, of Corbin Screw Corporation; George W. Corbin, C. H. Baldwin, George L. Corbin, E. C. Griswold and George F. Taylor, of Corbin Cabinet Lock Co.: H. S. Hart and N. P. Cooley, of Hart & Cooley Co.: Alex. M. Stanley and R. N. Peck, of Stanley Rule & Level Co.: George P. Hart, L. H. Pease, D. B. Woodbury, W. E. Stevens, A. C. McKinnie and J H. Robinson, of Stanley Works, and Charles F. Smith, George M. Landers and J. M. Stanley, of Landers, Frary & Clarke.

Other New England States were well to the front with the following:

MASSACHUSETTS—Messrs. Hobart Ames and Myers, of Ames Shovel & Tool Co., Boston; M. H. Tarbox, Boston & Lockport Block Co., Boston: Messrs. Fairbanks and Burton, of Clinton Wire Cloth Co., Clinton: William M. Pratt, Goodell-Pratt Co., Greenfield; F. I. Johnson, J. Lovell Johnson, G. F. Sailsbury, W. A. Shephard, of Iver Johnson's Arms & Cycle Works, Fitchburg; J. A. Thurber, The H. H. Mayhew Co., Shelburne Falls: Daniel Simonds, C. K. Simonds, J. E. Kelly and G. T. Curtis, of Simonds Manufacturing Co., Fitchburg; R. M. Boutwell and S. L. Martin, of Standard Horseshoe Co., Boston: I. H. Page, F. E. Muzzy, A. H. Griffin and C. E. Roberts, of J. Stevens Arms & Tool Co., Chicopee Falls; W. C. Bray, Tubular Rivet & Stud Co., Boston.

CONNECTICUT—W. B. Lasher, Bridgeport Chain Co., Bridgeport: W. M. Taussig, E. T. Smythe, C. K. Kloefkron, of Challenge Cutlery Corp., Bridgeport: F. M. Chapin, H. M. Chapin and F. L. Stevens, The Chapin-Stevens Co., Pine Meadow; W. C. Davenport, The W. H. Davenport Fire Arms Co., Norwich: J. A. Hurley, of Hurwood Mfg. Co., Bridgeport: George E. Eddy, The Lockwood Mfg. Co., South Norwalk: Charles Rockwell, The Miller Brothers Cutlery Co., Meriden; Messrs. Lyon, Pease and L. C. and W. F. Parker, of Charles Parker Co., Meriden: F. J. Scholihorn, of the William Scholihorn Co., New Haven; Frank M. Tobin, The Tobin Arms Co., Norwich; E. E. Perry, and C. B. Lee, The Hopkins & Allen Arms Co., Norwich.

NEW HAMPSHIRE—Gov. D. H. and R. C. Goodell, A. W. Bond, H. A. Hurlin, The Goodell Co., Antrim; E. B. Pike, E. Bertam Pike and E. Warren Smith, of Pike Mfg. Co., Pike; L. F. Thurber, of White Mountain Freezer Co., Nashua.

RHODE ISLAND—Henry A. Taylor, William G. Smythe and E. E. Lothrop, of American Screw Co., Providence; Wallace L. Pond and George K. Collerd, of Nicholison File Co., Providence.

VERMONT—Messrs H. B. and H. S. Barden, of Wallingford Mfg. Co.

NEW YORK CITY was, as usual, well represented by the following, besides those already mentioned: Frank Dickerson, American Sheet & Tin Plate Co.: J. A. Foster and L. A. Tranberg, of John Chattilon Co.; S. R. Droescher; Messrs. H. B. and C. W. Plumb, Carter and Ford, of Eagle Lock Co.: James F. McCabe, of McCabe Hanger Co.: Messrs. Towne, Clarke and Bigelow, Yale & Towne Mfg. Co.: L. H. Vogel, William I. Sherwood, William Vogel & Bros.

PHILADELPHIA'S delegation of manufacturers also included the following: Alfred N. Barnett, of G. & H. Barnett Co.: Messrs. Adamson and Mallon, of Baeder, Adamson Co.: L. B. Morris, Cambria Steel Co.: Messrs. Samuel, H. C. and S. H. Disston and George Koon, of Henry Disston & Sons, Inc.; Messrs. Devlin and Sprague, of Thos. Devlin Mfg. Co.: Charles W. Asbury, Enterprise Mfg. Co., of Pennsylvania: Messrs. Hugh, H. L., E. V. and J. J. McCaffrey, of McCaffrey File Co.; Harry Mayer, of Mayer File Co.: Messrs. Milton and E. S. Jackson and C. E. Chalfont, of Miller Lock Co.: Messrs. Fayette R. Plumb, W. R. Howell and J. J. Teeple, of Fayette R. Plumb, Inc.

The delegation from CLEVELAND included the following: F. S. Kretsinger and J. A. Carter, American Fork & Hoe Co.; H. W. Avery, Avery Stamping Co.; H. W. Caldwell, The Cleveland Stone Co.; E. G. Buckwell, The Cleveland Twist Drill Co.; C. F. Stork, W. B. Wood, W. C. Witcher and L. S. Sherwood, of Columbian Hardware Co.; A. E. Menke, The Ferrosteel Co.: F. W. Davis, The Lake Erie Iron Co.: Messrs. Scranton and Waite, of the National Acme Mfg. Co.

PITTSBURGH sent the following: J. W. Brainerd, Carnegie Steel Co.; Robert Garland and Alfred Sang, Garland Nut & Rivet Co.; George V. Willson, The Hussy Binns Co.; W. H. Hays, Iron City Tool Works, J. P. McKinney and C. M. King, McKinney Mfg. Co.; H. B. Lupton, Oliver Iron & Steel Co.; Messrs. Forman, Johnson, Taylor, Reitz and Porcher, The Pittsburgh Steel Co.; W. R. Dawson, The Standard Chain Co.

Among other members of the Manufacturers' Association who were present were the following:

G. A. Mason, T. H. Taylor, American Steel and Wire Co., Chicago, Ill.: H. A. Wagner, C. P. King, American Iron and Steel Mfg. Co., Lebanon, Pa.; C. W. Hubbard, S. W. Baker, W. T. Johnson, F. E. Corey, F. W. Baker, American Axe and Tool Co.; Glassport, Pa.; Henry G. Atha, Edward Ingalls, Edward F. Ross, The Atha Tool Co., Newark, N. J.

R. E. Shanahan, T. W. Williams, Bissell Carpet Sweeper Co., Grand Rapids, Mich.; S. G. Gilfillan, J. R. Gilfillan, Belfont Iron Works Co., Ironton, Ohio; Jesse E. Hall, Belding-Hall Mfg. Co., Chicago, Ill.; Gustav Bommer Bommer Bros., Brooklyn, N. Y.; George H. Bishop & Co., Lawrenceburg, Ind.; H. B. Black, H. B. Black & Co., Chester, Pa.

G. D Waterman, Henry Cheny Hammer Co., Little Falls, N. Y.

Chas. T. Johnson, R. F. Lund, the Dover Manufacturing Co., Canal Dover, Ohio.

E. T. Fraim, E. T. Fraim, Lancaster, Pa.

James C. Griffin, W. A. Crawford, Wm. Trask, O. B. Surpless, the Griffin Mfg. Co., Erie, Pa

Williston B. Penfield, the Hamilton Rifle Co., Plymouth, Mich; Elias G. Heller, Paul E. Heller, Heller Brothers Co., Newark, N. J.;

F. S. Colvin, the Irwin Auger Bit Co., Wilmington, Ohio.

J. P. Kelly, Kelly Axe Manufacturing Co., Alexandria, Ind.

A. W. Walker, Lovell Manufacturing Co., Eroe, Pa.; Theo. Huss, H. G. Hollis, the Lufkin Rule Co., Saginaw, Mich.; Samuel L. Moyer, the Lunkenheimer Co., Cincinnati, Ohio.

William J. McCurdy, Never Slip Manufacturing Co., New Brunswick, N. J.

Wm. E. Jones, Wm. G. Miller, Ohio Tool Co., Columbus, Ohio; A. M. Kinsley, G. N. Allen, P. B. Noyes, Oneida Community, Ltd., Kenwood, N. Y.

Williamson Wire Novelty Co., Newark, N. J.

W. H. Cole, of Tower & Lyon Co., New York, dropped in long enough to shake hands with a few of his many friends.

Frank M. Tobin brought with him his sample case and received many complimnets on the exceptionally fine line of guns being made by his firm, the Tobin Arms Co., Norwich, Conn.

The re-election of the officers of both associations was universally satisfactory because of their tireless efforts during the past year in promote the good of association work.

Tom Ellis, formerly with the Iver Johnson Arms & Cycle Works, who is taking a well-earned rest for a few months, was on hand shaking hands with his host of friends.

The management of the Rudolf seemed to have had the idea that the convention was being held chiefly for the hotel's benefit. One manufacturer sent several of a well-known household article to be used as euchre prizes. After a long search he found them—all being used in different parts of the hotel.

The Reading Hardware Co. earned the thanks of both associations for their tireless efforts toward making the occasion one of both pleasure and profit.

The good work of the Manufacturers' Association is beginning to show its effect. A number of visiting manufacturers expressed their determination to present applications for membership before the next meeting.

VISITORS.

Among the visitors, not previously mentioned, and who are not members of either associations, were the following:

Charles Allen, Philadelphia, Pa.

A. Eugene Bolles, HARDWARE, New York City, N. Y.; Irby Bennett, Winchester Repeating Arms Co., Memphis, Tenn.; F. R. Blauvelt, R. K. Carter & Co., New York City, N. Y.; W. P. Bogardus, president National Retail Hardware Association, Mt. Vernon, Ohio; E. M. Bush, National Retail Hardware Association, Evansville, Ind.; A. C.

RECENT PUBLICATIONS.

THE ADVANCE MACHINERY CO., Toledo, Ohio, are the distributors of an attractive pamphlet catalogue of the long envelope size, treating on the use and abuse of glue in preparation; illustrating, describing and pricing the Wetmore patent glue heater and copper equipment for the glue room. The book is strictly high grade, being finely printed on excellent paper, and the illustrations are very handsome half-tones. Regarding glue heating, they give the following valuable information: "Glue is cooked or boiled in the process of its manufacture; does not require further treatment along these lines. Glue should be dissolved, not cooked, in Heater. It should acquire and maintain a temperature of 150 degrees Farenheit. When steam is the heating agent, it should be turned entirely off when glue is properly dissolved; sufficient steam invariably escapes from valve to maintain glue at proper temperature. Other heating agents should be regulated accordingly. Glue should be soaked in cold water before going into Heater. Soaking in warm water is injurious to glue. Heater remains warm after the day's use; steam Heaters are always warmed by escaping steam. Soak glue in separate vessel. Flake glue soak from twelve to fourteen hours; ground glue three to four hours. Good glue absorbs one and one-half to two and one-half times its weight, not bulk." Much more information can be obtained from their catalogue, which will be sent upon request.

THE ERIE SPECIALTY CO., Erie, Pa., are the authors of a very handsome booklet, finely printed on heavy coated paper, and throughout is illustrated with excellent half-tones. The book is devoted entirely to exploiting Walker's corkscrews and is entitled "Sir Corkscrew's Soliloquy," which is written in clever verse. Indeed, so highly does Sir Corkscrew estimate his namesake that his musings commence thus:

"When I recall the how-de-do the first steam engine caused.
And how, when flashed the telegraph, the great world almost paused,
And the row anent the telephone and eke the phonograph,
And other small inventions, why, I really have to laugh."

Continuing in verse, he tells the why and wherefore of his enthusiasm over the "brain of Walker and his deft, ingenious hand." The following pages describe and illustrate in good, sound prose, their latest designs of Walker's Corkscrews and bottle openers, with fancy cocobola handles, etc., which they have designed to be easy for the hand as well as ornamental and attractive in appearance. They make over seventy different sizes and styles. This little work should be in the hands of every one interested in corkscrews. They also issue a full illustrated catalogue, which will be mailed on application.

REVIEW OF THE MARKETS.

WIRE NAILS.—On Wednesday, the 16th inst., the long expected advance took place by which the American Steel & Wire Co. advanced the price of all Steel products $2 per ton, advancing the price of Wire Nails 10 cents per 100 pounds. Carload prices remain the same to either wholesale or retail trade, being as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. for cash in 10 days:

Carload lots	$1.70
Less than Carload lots	1.75

New York. The advance has made little difference in sales, which is an improved condition, and is becoming more so every day. Quotations at the advance is as follows:

Single carloads on dock	$1.84
Small lots from stores	1.95

CUT NAILS.—At the last meeting of the Cut Nail Association it was understood that upon an advance taking place in the prices of Wire Nails, it would necessitate the same change in the price of Cut Nails and cause them to be quoted the same. When the advance took place in Wire Nails the Secretary of the Association notified the dealers to quote Cut Nails at the same prices. Consequently the quotations are as follows: $1.70 and $1.75 for carload and less than carload respectively f.o.b. Pittsburgh.

New York. Local demand is a very satisfactory one, with the market firm and with quotations as follows: Carloads on dock, $1.84. Less than carloads on dock, $1.89. Small lots from store. $1.95.

BARB WIRE.—The advance on the 16th inst. affecting all Wire products advanced the price of Barb Wire to the following schedule. Demand has been very good, and the market firm, with quotations as follows, f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.85	$2.15
Retailers, carload lots	1.90	2.20
Retailers, less than carload lots	2.00	2.30

SMOOTH WIRE.—The change in prices affected all Wire products alike, making new quotations as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

Jobbers, carload lots	$1.55
Retailers, carload lots	1.60

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advance.

BOLTS AND NUTS.—A meeting of the Nut and Bolt Association, composed of all the leading manufacturers in the trade, was held last week to consider the question of advancing prices, as quotations of raw material were advancing, and all other iron products were higher than formerly. While the feeling held good for raising the current quotations, they could not agree upon the extent of the advance, so the question was postponed until December 21st, as the manufacturers will make their own prices in the meantime, an advance of five to ten per cent will probably be the prevailing rate.

SHEET ZINC.—Quotations have advanced twice on recent dates by leading makers. On November 12th the base price was advanced 10 cents, and on the 16th inst. a further advance of 20 cents was made, which brings the base price up to $6.70 per 100 pounds for Sheet Zinc in 600 pound cask lots f.o.b. cars at mill. There is an increasing demand for the Metal in the market, and the growing scarcity of Spelter accounts in some measure for the continued changes.

CORDAGE.—The following prices represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	11¼ to 12
No. 2 Manilla	10¼ to 11
Pure Sisal, 7-16 and larger	9¼
No. 2 Sisal, 7-16 and larger	7¼

LINSEED OIL.—Under date of November 15 the following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....42 cents per gallon.
In lots of 5 barrels or more.....41 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity, at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....55 cents per gallon.

THE PHILADELPHIA TRADE.

The writer has just returned from the annual meeting of the National Hardware Association, Atlantic City, and was much gratified at the hopeful spirit shown by both jobbers and manufacturers. Almost all regard 1904 as having exceeded their expectations in the volume of trade, and consider themselves justified in looking forward to an even better trade in the year 1905. The advance in nails and wire of ten cents per keg, which was announced during the session, naturally stimulated this feeling, and the outlook is regarded as very promising. Philadelphia jobbers share in this feeling, and report a good volume of Fall business, with cutlery and fancy goods well in demand, and prices showing a decidedly upward tendency. The market for raw material is stiffening constantly, and with the higher prices in labor which are now the rule, it seems impossible for manufacturers to come out whole on some goods which are near the raw products. Collections are also improving, as farmers have realized on their produce, while labor is probably more generally employed than was the case early in the Fall. Trade is now looking forward to the Holiday season; a good demand is expected for Holiday goods, and stocks in these lines are being replenished freely by most dealers.

BIDDLE HARDWARE CO.

THE PITTSBURGH TRADE.

Trade conditions in Pittsburgh continue to improve and there is a general conviction that we are on the eve of another term of business expansion. The low prices reached in pig iron and its products during the past summer, marked the turning point and at present there is a strong market with advanced prices for pig iron, tubing, billets and a prospect for advance in wire and nails and structural materials. Our merchant trade is dependent upon the manufacturing interests almost wholly and this change of sentiment is therefore very welcome among all classes. Coal and coke being necessary in the production of steel, these interests are also quite busy, and, as they employ a large number of men, this is one of the best departments for the storekeeper At present writing the convention in Atlantic City is in session, and no doubt your issue of November 25th will contain an account of their proceedings. Live questions arise every year regarding the best methods of merchandising, and their discussion in these meetings spreads rapidly the ideas of the trade regarding them, so that they may be generally adopted. If the stand taken by regular dealers, that through the jobber and retailer is the best and most economic way of distribution from maker to consumer, the very best methods of merchandising must be used to withstand other plans of selling. Discussion in convention by manufacturer, jobber and retailer will bring out these methods and permit each of the three interested parties to bring his work into harmony with the others.

LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

It snowed soon after Election, and some people think it snowed on Election Day; but the storm was of short duration and we are having our Indian Summer, and on football days you imagine the city is full of genuine Indians or D—— "Phools," judging by the "Wa-Hoos" and "Ya-Yas," etc. But we must not kick, because we were young ourselves a good many years ago.

The open season for quail and rabbits is on now, and so far we think more men and boys have been shot than quail. Naturally one would think almost anybody could tell the difference between a man and quail. We know some men are birds and they flop around a good deal, but they are not much on the fly. The little animal with long ears and a bunch of cotton on his hind end is plentiful and affords nice sport. The writer hasn't enjoyed the sport this Fall for two reasons—no time and no dog.

Trade is first class on most all Fall lines. The recent advance on nails will no doubt put more confidence in the general mar-

JAP-A-LAC

"WEARS LIKE IRON"

THE Hardware dealer, who is willing to take his share of the profits accruing from JAP-A-LAC sales, is sure to become an enthusiast on this new wood finish.

We advertise it in the principal magazines and periodicals, and spend immense sums of money in explaining its merits to the millions of readers.

JAP-A-LAC is the quickest selling commodity of its kind in the market.

JAP-A-LAC does not scratch white or show heel marks.

JAP-A-LAC may be used for all kinds of interior finishing, furniture, iron work, doors, etc.

There is nothing just as good. Why not stock what people call for?

Write for special proposition to dealers and full information.

THE GLIDDEN VARNISH CO.
MAKERS OF HIGH GRADE VARNISHES
No 44 WILLIAMSON BLDG. CLEVELAND, O.

ket. There is nothing like an advance on pig iron, billets, etc., to stir things up. Iron is king every place but in Kentucky. You know you can't get juice out of iron. We think the year's business will be satisfactory and everything indicates a good business for 1905. We trust we may not be disappointed.

THE SMITH BROS. HARDWARE CO.,
J. H. Smith.

THE DAVENPORT TRADE.

Nails, barb wire, etc., advanced on the 16th. This was not a surprise to the trade; it had been anticipated for several weeks. As the prices are still low—too low, it is possible there will be another advance soon.

There has been a marked improvement in trade, and the sales for November are larger than a year ago. Collections satisfactory. SICKELS, PRESTON & NUTTING CO.

THE CINCINNATI TRADE.

The change from apathy to hustle during Election week was unprecedented in Cincinnati. Money could be had for the asking, and every hotel was unable to accommodate the visitors. The retail Hardware trade was better than in five years past, and in fact, every retail house did a phenomenal business. The only reason assigned was the buoyant feeling of relief that it was all over. The Cincinnati manager of the Warehousing & Surety Co. loaned over the 'phone on Election Day sixty thousand dollars South, which never was known to have been done before and which is owing to the very much changed relations of North and South. Providence certainly helped matters along, relieving the long dry spell with a substantial rain, providing water for the barren districts adjacent Cincinnati, and farmers took advantage of it to come to Cincinnati for a rest. The Hardware Jobbers express the view that 1905 will be a banner year. Stock taking will soon begin and what orders are coming for nails, wire or other steel goods except for specified quantities and immediate delivery, in anticipation of the increase in price on this line, notification of which is expected daily at this writing, November 17th. The effect of this will be to clean up 1904 without any orders on the books to fill at 1905 prices. Good crops are being sold for good prices in this section, and the cotton, sugar and rice men in the South are holding crops for higher prices. Cotton will go between 10 and 11 cents, probably 10½. C. Hedeman, manager of the Honolulu Iron Works Co., placed an order for sugar machinery in Hamilton, Ohio, while here. He said that the sugar production this season in the Hawaiian Islands would reach 450.000 tons, which will bring one cent a pound more than it has for years.

THE SAN FRANCISCO TRADE.

The composite voice of the three Pacific Coast States is a unified proclamation that the presidential election has come and gone, and trade is running along as briskly as before, under a full head of steam, with no signs of slackening anywhere; that here in San Francisco is visible a marked increase in activity on the Stock and Bond Exchange, with prices for sugar and other stocks advancing, and a however remark that stocks are not the only line showing increased activity, but that many of the staples of the coast exhibit an expanded movement, notably in the processional activity being iron and steel, Hardware, lumber and other building material, coal, oil, glass, paints, etc.; that our local conditions show no relapse whatever; that the Pacific coast has not only sent in excellent reports throughout the last seven years, but continues to send them in, with no indications of a break; that our coast products, with the exception of raisins and prunes, are moving out of producers' hands as fast as they are harvested, and are bringing first-class prices; that all banks, city and country, report money plentiful at normal rates of interest; that the magnitude of building operations, particularly in this coast metropolis, is attracting general attention, and, in fact, that this is a remarkable era of business activity in the Golden State, and apparently that the end is not yet.

A prominent machinery firm in this city is shipping, through local agents of the Japanese Government, a large number of lathes for boring big guns and manufacturing shells. Close guard is being kept of every channel through which information might leak, but enough is known to warrant the assertion that the Pacific Coast is being scoured and all lathes of certain sizes on the market snatched up regardless of price. Shipments have already been made and it is believed that further consignments are at the present time on the water front awaiting suitable opportunity for getting them started on their journey to the Orient. They are all being shipped through a local house that is assembling orders distributed among different firms and are so invoiced that nothing of a suspicious nature is apparent on the

NICHOLSON FILE COMPANY
GENERAL OFFICES: PROVIDENCE, R. I., U. S. A.

MANUFACTURERS OF
FILES AND RASPS
NICHOLSON, KEARNEY & FOOT, ARCADE, AMERICAN, GREAT WESTERN, McCLELLAN, EAGLE, J. B. SMITH, "X. F.", GOLD MEDAL.

steamer's manifest. The president of the local firm that is shipping the lathes smilingly denied to the interviewer that they were connected in any way with contraband traffic, but admitted that lathes seemed to be a popular article on the market at present, and that heavy consignments were handed over, at the dock, to another local firm that looked after their shipment. The ship's manifest was given as the only source from which their destination could be obtained, and a hint at the identity of the ship was refused.

Steps have been taken for the establishment of a $10,000,000 iron plant in San Diego, Cal. The enterprise has the reputed backing of the promoters of the San Diego and Eastern Railway Company, and will handle the ore from the mines in Lower California. Agents of the new corporation have been at work for some time and have secured options on lands in National City and Oldtown, within the few miles lying between San Diego and the Mexican line, and the new iron works will be located in one of these places.

A plant for the manufacture of explosive powder of all kinds will soon be built upon the shores of Puget Sound, near Seattle, by the California Powder Works, associated with the Du Pont powder interests. It will cost $250,000 and its primary output will be thirty tons a day. This will be increased with the demands of trade, as the plant will have a capacity much larger than the quantity stated. At the outset it will employ about eighty-five men.

The Manufacturers' and Producers' Association of San Francisco has received from Washington a number of blue print drawings, together with specifications for a supply of certain steel castings and links to be used at Panama. Bids for furnishing these articles are requested by the Government from San Francisco and Pacific Coast dealers.

The United States, in relation and for the San Francisco wholesale Hardware house of W. W. Montague & Co., has sued Rudolph Axman and the American Surety Company of New York for $5,476.96, in the United States Circuit Court. The complaint states that on September 14, 1899, Axman contracted to remove Arch Rock, Shag Rock No. 1-2, in San Francisco bay, and gave bonds through the surety company for $100,000. Montague & Co. allege that the sum sued for is still due for iron pipe casings furnished, with 7 per cent. interest from October 24, 1902.

INDUSTRIAL PRESS ASSOCIATION.

MECHANICAL DEVICES THAT SEEM TO HAVE BRAINS.

A writer in a recent issue of the Washington *Star* relates some interesting observations regarding the progress made by American ingenuity.

"From the corn-miller's little bell that sets up a fussy tinkling the moment the hopper runs empty, up to the calculating machines that are now to be found in banks and insurance offices, clearing-houses and observatories, there are so many mechanical substitutes for brain-workers that it is difficult at times to realize that it is, after all, only mechanism and not intelligence that is being evolved," said an employee at the patent office to the writer. "Some of the touches of what, for convenience, we may call mechanical intelligence to be met with in various odd corners of the industrial and commercial world are really quite amusing, and they have their prototype in that little bell of the old windmill.

"There is, for instance, to be seen in any screw factory, a different application of that device. The machinery takes hold of a rod of metal, pulls it rapidly along, gives the end of it the general shape of a screw, cuts the thread round it and the slot in the head, and then ships off a perfect screw. If you watch the thing actually making the screws the idea strikes you that it is really a piece of mechanism; but when the machine comes to the end of its material and gives a sharp, impatient ring of the bell for the attendant to bring more, you cannot help laughing and you would scarcely be surprised if, when the man came with another rod, the busy screwmaker gave him a sharp reprimand for inattention and dilatoriness. In these days of phonographs, of course, it would be quite practical to make it do so.

"The machine by which railroad tickets are printed gives another amusing little show of intelligence or what looks to be very like it. Railway tickets are not, as might be supposed, printed in large sheets and afterward cut up. The cardboard is cut into tickets first and they are printed one by one afterward. The little blank cards are put in a pile in a kind of perpendicular spout, and the machine slips a bit of metal underneath the bottom of the spout and pushes out the lowest ticket in the pile to be printed and consecutively numbered. It is of no use to print a bad ticket. The machine finds out an imperfect blank in an instant, and flatly refuses to have anything to do with it.

"These are simple instances of a good imitation of watchfulness and discrimination; indeed, the latter looks almost like conscientious care. They afford a droll suggestion of the trained intelligence of the learned pig or the performing dog; and we find many various degrees of the same. At the United States mint they have weighing machines for coins to which it is difficult to deny a very acute intelligence. The mint apparatus is the more remarkable of the two.

"The new coins at the mint, however, are sometimes a trifle over weight, while sometimes, of course, they are under, so it is necessary to sort them out in three categories—light, heavy and good. This delicate business is done with unerring precision by a long row of wonderfully clever machines. Into these machines single piles of shining new coins are put, and quite automatically the mechanism takes each coin, puts it into the scale and in a fraction over two seconds—at the rate of twenty-five a minute—weighs it. If the coin is light the machine shoots it into its proper receptacle; if heavy, into another, and if it is of correct weight, or with a margin as they call it, it is pushed into a third receptacle."

RECENT PUBLICATIONS.

The Whitman & Barnes Mfg. Co., Chicago, Ill., are the authors of an attractive catalogue showing by description and illustrations the merits of their Diamond Haying Tools and Supplies. The book is in large pamphlet form and contains twenty-five pages, each containing several illustrations. The book also gives instructions to set up and operate Diamond Independent Engines and Single Track Automatic Sling and Fork Carriers, which instructions are embraced in the following: "Before placing the cars on the track make sure that the locking parts work freely and quickly; use plenty of oil to loosen the joints and wheel bearings. Try the rope by working the locking device, that is, in and out of the stop; for best results 7/8 inch rope, as this size is plenty large enough to lift any load and will guarantee positive working of the car. These cars can be tripped automatically by setting the starter up or down on the rope; the starter is adjusted by opening and closing the cam; this is done by the man on the load and will start the car out of the stop exactly where he wants it. These cars, when sent out, are set up for triple hoists, but can be made double hoists by changing the ropes." Send for one of the above catalogues for other useful information on this subject.

The Wapak Hollow Ware Co., Wapakoneta, Ohio, are distributing the third edition of their catalogue in which they exploit the goods of their manufacture which include sugar kettles, ventilation grates, lawn furniture etc., and they request that all previous issues be destroyed. To supply a growing demand for pots and kettles in their "A" grade of Hollow Ware they have extended it to include pots, bowls, kettles and dutch ovens, and they assure the trade that this deep ware will equal in finish and anti rust qualities of the flat ware heretofore furnished. They state "No iron casting is ever absolutely perfect in smoothness of finish, each piece as it comes from the sand being more or less rough in varying degrees." In order to make grades "A" and "B" of Wapak Hollow Ware of extra high quality, they have instituted a system of inspection, and class their hollow ware under three grades, viz: "A," "B," and "C." Grades "A" and "B" are made up of the most perfect pieces obtainable, free from sand-pits, uneven edges or rough places. "A" is polished both inside and out, and lacquered to prevent rusting. "B" is polished on the inside only and not lacquered. Grade "C" is of like finish and equal in polish to grade "B" but may contain some slight defect which prevents its being used for either "A" or "B" grade. Their catalogue is a high grade one, being finely printed on excellent paper and will be sent for the asking.

Northrop, Coburn & Dodge Co.,

Manufacturers,

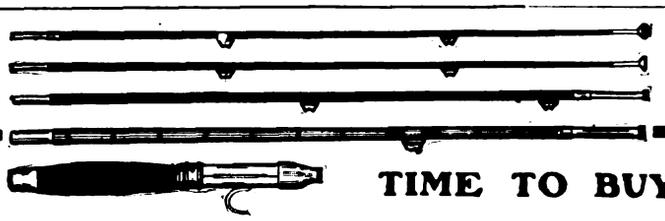
40 Cherry St., New York.

TRADE NOTES.

Pittsburg, Pa.—The Graham Nut Company have finished the construction of their Neville Island plant, begun a year ago. They will employ 100 men. The old plant in Rebecca Street, Allegheny, will be abandoned. The new works, a brick and steel building, 240 feet long and 90 feet wide, has a switch connection with the Pittsburg & Lake Erie Railroad.

Windsor, Mich.—A foundry will be built in addition to the new factory of the Walker Steel Range Co., which plant is being forced to completion at Caron avenue and Wyandotte street.

Wabash, Ind.—The Wabash Manufacturing Company, successor to the Howard Elastic Wheel Company, makers of steel sleds and children's wagons, is erecting a new plant which will be ready for occupancy in the autumn.



Zanesville, Ohio.—Willis F. Lumb, the Hardware man of Linden Avenue, has taken his son, Chester, into the business as a partner, and the firm will be known as Willis F. Lumb & Son. Chester Lumb has been employed by his father in the store for the past eight years.

Fires.

Akron, Ohio.—On August 17th the Hardware store of Pettitt Bros. & McDowell was entirely destroyed, with a small amount of insurance. The origin of the fire is not known, and is believed to have been spontaneous combustion.

Bay City, Mich.—Fire broke out on August 17th in the basement of R. C. Baily's Hardware store, and in half an hour the first floor of the building was gutted and the contents destroyed. The stock on the second floor was badly damaged by water. It is thought the fire originated in some tar paper. Mr. Baily said the loss would reach about $2,500 on building and $20,000 on stock. This is covered by insurance of $40,000 on building and contents.

Grand Rapids, Wis.—The loss caused by the fire on September 9th in the warerooms of the Purnell Hardware Company is about $4,000, covered by insurance.

COLD PUNCHED NUTS,

THE TRUEST AND BEST LOOKING MADE.

If you want to increase your business in a profitable line of goods : call for

"GARLAND NUTS" THEY ARE TRADE TICKLERS.

(Also Rivets and Galvanized Pump Chain).

THE ROTARY SEWING MACHINE.

It is claimed that eighty per cent. of the sales of Rotary Sewing Machines are made in large cities, where expert instructors follow every sale day after day for purposes of giving instructions, and that the Rotary has never been a successful or popular country machine, because of the fact that the country dealer could not cover his large territory and give the necessary time and effort for all of these instructions. In many cases the dealer himself cannot spare the time for the study of the rotary machine that is necessary to make him a successful salesman.

In offering the new "Eldredge Rotary" to the public and the trade the Manufacturers state that they present a machine that can be sold just exactly the same as a vibrating shuttle machine; that it is so simple and positive that no expert knowledge is required, either by the dealer or by the user; that it is the only machine of its character that a manufacturer would be safe in shipping direct from the factory to an inexperienced user, feeling that the operation of the machine was so simple that no instructions other than the ordinary printed ones would be required, and that the machine would prove itself the most satisfactory one ever sold.

B. Eldredge, President of the National Sewing Machine Co., Belvidere, Ill., has been engaged in the manufacture of sewing machines for nearly forty years. That he has been successful in producing machines of a high standard of merit is evidenced by the satisfactory service being given to people in all parts of the world by the hundreds of thousands of Eldredge machines that have been sold. Speaking of Rotary Machines in general, Mr. Eldredge recently said: "As different machines of this class have been introduced from time to time, I have studied them all carefully, and while I have felt that the Rotary principle was correct, I have seen in studying the results of the years of labor and effort on the part of others, that the ideal rotary machine was still to come. Several times have I taken up this style of machine, but always with the same result; nothing new and nothing better than the very unsatisfactory results obtainable by others Several years ago, I resolved to make another effort, and since that time have had a corps of experts working continually on the problem. Some times results were encouraging and sometimes it seemed as if to gain the end I was after was utterly beyond mechanical possibility. Especially was this so two years ago, and at that time I about made up my mind to abandon once for all my effort in this line. About that time in experimenting I struck a line of thought along new channels that seemed likely to bear fruit in success. The further this line of experiment was carried, the more it became evident that it eventually would result in my desired ideal of a machine. The first model of this Rotary Machine was completed a little more than a year ago. All through its development and since its completion, I have gone over this machine forwards and backwards, figuring and refiguring, testing and studying each and every detail. I have put it to the hardest tests that I could conceive of on all kinds of goods under all conditions; threaded and unthreaded; presser foot off and presser foot on; have run it backward and forward; have used improper needles, and in fact tested it in every way of which I have knowledge, in an effort to find a weak spot, or one which was sensitive and likely to prove troublesome. This I have done not once, but daily for months at a time, and as a result I now say to you without fear of contradiction, and with a knowledge that the ground I take is one of remarkable conceit, that the new Eldredge Rotary Sewing Machine is without exception the most marked departure from, and decided improvement upon, the regular rotary sewing machine idea that has ever been offered to the public."

FLINT-LOCKS FOR AFRICA.

Any one who supposes that flint-lock muskets are a relic of the forgotten past should read Consul McNally's report from Liege, Belgium. Mr. McNally says that Liege still manufactures large quantities of muzzle-loading guns for South America and flint-locks for Africa.

The reason of the flint-lock is partly that it is cheap, but mainly that the so-called civilized nations object to supplying natives in any part of the world with "arms of precision." They can have guns good enough to knock over game with at short range, but nothing that might prove awkward to soldiers of European armies coming to "chastise" them. To sell flint-locks is open trade; to sell better goods is forbidden. Hence the smuggling of really good rifles to out-of-the-way places is one of the most lucrative and most risky of enterprises. Such arms are smuggled to our own "ladrones" in the Philippines. They are spirited into Sumatra, where the Dutch carry on their thirty years' war with the Achinese, into Formosa to worry the Japs, into Somaliland, German East Africa, the Soudan. The Russians were accused of helping the Abyssinians to acquire arms of precision; the French of helping out the Mahdists that defied Egypt.

Boston, Mass.—The Hardware Purchasing Co. has been incorporated. Capital, $30,000. President, Joseph P. Allcott; treasurer; George F. Ramponi.

Buffalo, N. Y.—The Bergman Hardware Tool Co. has been incorporataed. The company is capitalized at $2,000. The directors are Solomon Bergman, Lina Bergman and Aaron Fybush.

Danielson, Conn.—L. A. Nado has leased and will move into quarters in Phoenix Block. The room is being fitted up for his occupancy. He will have one of the best equipped Hardware stores in the State.

Delphi Falls, N. Y.—Arthur H. Sweetland has rented the Hill block and will open a Hardware store January 1st.

Emmett, Idaho.—John Bane will open a Hardware store the first of the year. Mr. Bane is a former member of the firm of Bane & Kesgard.

Grand Rapids, Mich.—The A. F. Burch Co. has been organized with a capital stock of $10.000, and will carry on a business of jobbing, upholstering supplies and furniture Hardware. They will be located at Nos. 44 and 46 Division Street. The officers are A. F. Burch, president; Archer B. Foryth, vice-president, and John Korstange, secretary-treasurer. These officers, with Joseph Warner and W. Kerchhoff, form the Board of Directors.

Luxemburg, Wis.—The Luxemburg Implement Co. has been incorporated. Capital stock, $5,000. Incorporators: A. J. Peterson, August Spitzer and Peter Boucher.

Raleigh, N. C.—The Carolina Hardware Co. has been incorporated for the purpose of buying out the business of R. E. Prince, at 225 Wilmington Street, and conducting it on a much larger scale. The authorized capital is $75.000. The incorporators are: W. C. Tucker, C. E. Watson, G. S. Tucker, Dr. McKee Tucker and V. D. Tucker.

Roff, I. T.—The Campbell-Hutcheson Co. has been incorporated. Hardware and implements. Capital, $10.000. Ray W. Campbell, Walter L. Hutcheson and F. Earl Yates, incorporators.

Rossville, Ill.—A. Hoover has opened a new Hardware store.

Savre, Pa.—The George L. Roberts Hardware Co. has been incorporated. Capital stock, $30.000.

South Boston, Va.—The Old Dominion Hardware Co. has been incorporated. Incorporators are: R. T. Amspaugh, president, South Boston, Va.; T. S. Wright, secretary, South Boston, Va. Capital stock, $5,000.

Sylvester, Ga.—J. G. Padrick has opened up the new stock of the Sylvester Hardware Co., a branch business of the Golden Hardware Co., of Tifton.

Towanda, Pa.—The Dye & Bresel Hardware Co has been incorporated. Capital stock, $25,000.

Yazoo City, Miss.—The Yazoo Hardware Co. has been incorporated with a capital stock of $50,000.

Changes.

Attica, N. Y.—Samuel Blatchford has purchased the Hardware store of James W. Dunbar.

Baltimore, Md.—The George C. Sherick Company has been incorporated for dealing in sporting goods, etc., by Benjamin C. Nicoll, George C. Sherick, Charles C. Carver, John J. Gregg and T. Spence Crenev, with a capital stock of $1,000.

Camden, N. J.—The Consolidated Sporting Goods Company has been incorporated. Capital stock $100,000; objects, to manufacture and sell athletic goods. Incorporators: Joseph F. Cotter, W. F. Eidell and Frank R. Hansell.

Cario, Ills.—J. N. Clouse the west side Hardware and furniture dealer has sold his establishment to George Roberts, jr., and Wm. Morinn of Herrin.

Deland, Ill.—Kesler Bros. are now installed in their new business, having purchased the Hardware stock of Haggard and Armstrong.

Eureka, Ill.—W. H. Paris has sold his implement and Hardware business to James Barr, of Missouri, and will give immediate possession.

Fort Worth, Texas.—Messrs. Denny and Perkins bought J. M. Gibson's stock of Hardware.

Gainesville, Texas.—The creditors of Cleaves & Son, the largest Hardware and implement house in Gainesville, which was closed recently, held a meeting on November 3rd to decide what disposition they would make of the stock. It is understood that it will be sold at private sale and the store to be opened again under the management of Sherman Cleaves.

Grand Blanc, Mich.—McNeil & Son are about to move their hardware stock to Flint because they have had no proper building in which to do business in since their building burned.

Hartford, Conn.—The Way Hardware Co. is to have its corporate existence dissolved. Application was made by Henry S. Goslee, representing Isaac Bragaw, Daniel A. Markham and George E. Hollister, as trustees for the directors, for an order limiting the time for the presentation of claims. Judge Thayer limited the time to March 1. The company has not been engaged in active business for some weeks.

Houghton, Mich.—W. R. Daskam, the Hardware dealer, who for the past five years has been engaged in business in Houghton, has finally completed his arrangements to leave Hougton for a new field. Mr. Daskam will be located hereafter in Park Falls, Wis. He leaves Houghton only because he desires to get into a new field and the town he has selected is a growing mill and manufacturing burg.

Houston, Texas.—L. T. Fuller and Henry Cook have purchased the stock of the Dunlay Hardware Co. at 410-412 Travis Street, and they will immediately add a new stock and will conduct one of the finest general Hardware and building supply houses in the South. Mr. Fuller has been in the Hardware business for the past twenty-eight years, and comes to Houston from Calvert. He will have general supervision of the Travis Street store. Mr. Cook is likewise an old time Hardware man, having been in the business for the past twenty years. He has been the representative of Stauffer, Eshelman & Co. of New Orleans in this territory, and has a wide acquaintance throughout the State among Hardware dealers. He will be in charge of the sales department and will also visit his old customers, for the Houston house expects to do a wholesale as well as a retail business.

Little Rock, Ark.—The W. W. Dickinson Hardware Co. of 418 East Markham Street, has changed its name to the Rose-Lyon Hardware Co. The business will soon be moved into the new four-story Skillern building on Scott between Markham and Second Streets. C. C. Rose is president, and C. E. Shoemaker secretary. The change was authorized at a meeting of stockholders held on October 31.

London. Ont.—The Hardware stock of John Bowman & Co., London, was sold recently for 70 cents on the dollar to William Bowman.

Louisville, Ky.—Frederick Bauer, the Hardware man, who for thirty-three years was located at 1104 West Market Strcet, has moved into handsome new quarters at 1600 West Market Street.

Louisville, Ky.—The Belknap Hardware and Manufacturing Co. has decided to erect on the lot in Second Street, below Main, which it recently purchased of the Goddard estate, a handsome fireproof office and warehouse building. The new structure will be six stories high, of brick and stone, and contain a dining-room for the employes. Construction will begin in the Spring.

Newburyport, Mass.—William Holker has moved his large Hardware stock from 15-17 Water Street to Nos. 6-10 Market Square. The new store has a much better location and is much better adapted for the business.

Owasso, Mich.—The new implement firm of Westfall & Fish dissolved partnership on November 3rd, George W. Fish retiring.

Port Clinton, Ohio.—The deal has been consummated and the Hardware business of Henry Bredbeck has passed to the new owners. The new firm is composed of J. N. Washburn, C. H. Wolfe and Amos Fall, Jr.

Somerville, Mass.—L. Thurlow Torrey, of Braintree, has entered co-partnership with Elmer S. Stack, under name of Stack & Torrey, to continue the Hardware and plumbing business of Kellsey & Stack, at 63 Dover Street.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published,

New Incorporations, Etc.

Augusta, Me.—The Electric Chain Co. has been organized for the purpose of manufacturing, buying, selling and dealing in electrical and other machine chains, etc., and for other purposes, with $25,000 capital stock. The officers are: President, I. L. Fairbanks; treasurer, I. L. Fairbanks, of Augusta.

Bessemer, Ala.—Ground has been broken for the erection of a stove foundry, which will stand at the corner of Fourteenth Street and Hill Avenue. J. R. Day, the proprietor, will manufacture the famous grate stove, which he invented and patented. The capacity at first will be 100 stoves daily, which will be increased as the business grows.

Binghamton, N. Y.—Charles A. Wilkinson, James Melhuish, George E. Green, C. E. Reynolds and F. L. Dennis are the incorporators of a new Binghamton manufacturing company, which will begin business with a capital of $60,000. The company will manufacture a boiler compound, a belt dressing and solder for band saws.

Bristol, Ind.—The Garman Manufacturing Co. has been organized to make lawn swings, ladders, hay racks and fruit crates. J. H. Garman and others will finance it.

Buffalo, N. Y.—The John C. Jewett Manufacturing Co. has been incorporated. The company is capitalized at $100,000, and will begin business with that amount paid in. They will make and sell refrigerators and other articles. The directors are Edgar B. Jewett, former Mayor of Buffalo; Frederick A. Jewett, John E. Jewett, Albert D. Jamieson and Charles A. White.

Buffalo, N. Y.—The Vento Manufacturing Co. has been incorporated. Objects, to deal in Hardware. Capital, $25,000. Incorporators: E. B. Smith, J. A. Grass, Anna Gorzig, Buffalo.

Canonsburg, Pa.—The Budke Stamping Co. has been organized, and will manufacture a full line of stove pipe; also pieced and corrugated elbows made of acme blue and other grades of sheets; drip pans, metal lathing, powder kegs and plate iron washers.

Chattanooga, Tenn.—The Bridgeport Stove Co. has been incorporated. The concern is capitalized at $5,000.

Chicago, Ill.—The American Animal Trap Co. has been incorporated. Capital, $10,000. Manufacturing mechanical devices. Incorporators: M. M. Hawks, Harry C. Kinn, Charles R. Napier.

Chicago, Ill.—The International Tool Co. has been incorporated. Capital, $20,000. Manufacturing tools and machinery. Incorporators: William F. Behrens, Adolph Peck and Frank J. R. Mitchell.

Chicago, Ill.—The J. L. Schureman Co. has been incorporated. Capital, $50,000. Manufacturing tools. Incorporators: J. L. Schureman, Jr., S. M. McFedries, C. F. Samms.

Cincinnati, Ohio.—The Crentz Plating Co., has been incorporated, capital $20,000. by Otto Crentz, Gustave Crentz, Theodore Crentz and Julia Crentz. They will plate and make metal goods.

Cleveland, Ohio.—The Ferrokraft Co. has been organized to do expert metal work in Hardware. The authorized capital stock is $50,000. Officers are: William M. Powell, president and treasurer; Frederick C. French, vice-president; Myles E. Ewing, secretary; Peter Grabler, superintendent. Mr. Powell, the president, was formerly secretary and treasurer of the Columbian Hardware Co., of Cleveland.

Columbus, Ohio.—The Elk Heater Manufacturing Co. has been incorporated with $10,000 capital stock by John J. Lentz, C. M. Addison, Lincoln Fritter, William B. Cassidy and Tod B. Galloway.

Corsicana, Mo.—The Navarre County Implement Co. has been incorporated. Capital stock, $15,000. Incorporated by W. C. Kinsolving, Ben Rosenburg and J. T. Jackson, all of Corsicana.

Detroit, Mich.—The Straits-City Manufacturing Co. has been incorporated to manufacture and sell egg separators, Hardware and plumbing specialties. The capital stock is $12,000. The incorporators are: Harry B. Rohde, Chas. A. Gleason and Samuel E. Thomas.

Elkhorn, Wis.—The Elkhorn Implement Co. has been incorporated. Capital stock, $25,000. Incorporators: James B. Stokes, Mrs. James B. Stokes, Wilson E. L. Gill and H. E. Wylie.

Frankford, Pa.—The Miller Lock Co. has been incorporated. Capital stock, $60,000.

Haverhill, Mass.—The Roberts Tool Co. has been incorporated to manufacture a new clutch monkey wrench, upon which the company has a patent. Other tools will also be manufactured.

Janesville, Wis.—The Bassett & Echlin Co. has been incorporated. Wholesale dealers and manufacturers of Hardware and saddlery. Capital stock, $50,000. Incorporators: Celadon Bassett, Joseph C. Echlin, Frank B. Echlin, Joseph W. Echlin and Samuel B. Echlin.

Luxemburg, Wis.—The Luxemburg Implement Co. has been incorporated; capital, $5,000. Incorporators: A. J. Peterson, August Spitzer and Peter Boucher.

Minneapolis, Minn.—The Bing Burner Co. has been incorporated. The company is capitalized at $50,000 and will manufacture lamp burners. The incorporators are: Edward W. Bingenheimer, Catherine Bingenheimer, Arthur E. Holbrook and William F. Truer, all of Minneapolis.

Minneapolis, Minn.—The Safety Nut Lock Co. has been incorporated. Capital stock, $100,000. Incorporators: J. A. Schlehr, Frazee, Minn.; William Eichers, Frazee; De Witt Nelson, Minneapolis, and others.

New Haven, Conn.—The Russell Collapsing Cap Co., capitalized at $25,000, has been organized. Its purpose is to manufacture and deal in metal goods. The incorporators are Herbert H. Russell, Guy W. Baldwin and John W. Hine.

New York, N. Y.—The Goldberg Brothers Co. has been incorporated. Housefurnishing specialties. Capital, $20,100. Directors: H. B. Goldberg and Leroy Goldberg, New York, and F. J. Sternberger, Wilmington, N. C.

New York, N. Y.—The H. & A. Lock Co. has been incorporated. Objects, Hardware. Capital, $10,000. Incorporators and directors for the first year: P. F. Hogan, J. H. Blackford, Jr., and Jacob Fuchs, New York City.

Petersboro, Ontario.—The Petersboro Shovel and Tool Co. has been incorporated. Capital stock, $50,000.

South Framingham, Mass.—The American Roller Bearing Co. has been incorporated. Capital, $325,000. President, William B. Lambert; treasurer, Frederick B. Hill.

St. Joseph, Mo.—The Waverly Wooden Works Co. has been incorporated. Capital stock, $25,000, one-half paid in. Incorporators: Charles Pausche, W. H. Faust, Charles Faust, W. P. Flint and F. J. Moss. They will manufacture the Waverly washing machine at 1222-1224 South Fourth Street. They expect to commence operations about January 1st, 1905.

St. Louis, Mo.—Jesse W. Pierce has organized the Pierce Hardware Specialty Co., with a capital stock of $100,000. This company has been organized to manufacture and control the Pierce specialties. Mr. Pierce is the inventor of many specialties in the Hardware line and his company will do a general manufacturing and wholesale business in these articles.

St. Louis, Mo.—The Johnson-Robinson Machinery Co. has been incorporated by David L. Johnson, Hubbardston, Mass.; Wilbur Johnson and Henry K. Robinson, L. M. Robinson, St. Louis, to do a general wholesale, retail and manufacturing business in machinery, tools and implements. Capital stock, full paid, $15,000.

Sargent's Gem Food Chopper

s sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Oneida, N. Y.—John H. Van Horn, of Syracuse, has invented an automatic fishing reel and patents on the same are now pending. Arrangements have been made for the manufacture of the reel in this city, and a company, composed of Burt and John Van Horn and Jay Farrier, will place the article on the market under the firm name of Van Horn, Farrier & Van Horn.

St. Louis, Mo.—The Original Automobile Co. has been incorporated with a capital stock of $10,000. Incorporators: A. L. Dyke, Carrie Dyke and Charles Peters.

West Palm Beach, Fla.—B. M. Potter has begun the erection of a new storeroom at the corner of Narcissus and Myrtle Streets, into which he will move his bicycle store and machine shop. The new building will be fireproof, with a handsome modern front.

Wichita, Kan.—Schollenberger Brothers, Bicycle and Automobile dealers, 230 No. Main Street, have sold an interest in their business to E. E. Campbell, Jr., of New York. Besides carrying a full line of Bicycles and sundries, they will put in a complete line of Sporting Goods. The style of the firm will be changed to Schollenberger & Co., and the business continued at the same place.

Changes.

Bridgeport, Conn.—In order to facilitate the construction of their high grade cars, the Locomobile Co. of America have recently installed a considerable quantity of special machinery. Important changes have been made in the drop forging department, new and improved tools having been added in order to take care of the increasing output. A number of new gear cutting machines have been added, doubling capacity of work in this department. A quantity of automatic screw machines have been added, together with special machinery for boring cylinders and grinding valve seats.

Des Moines, Iowa.—Nathan Schee has completed the foundation for his new wagon box factory on South Ninth Street. Mr Schee has also purchased the Hickman Scale Company, which recently went into the hands of a receiver, and will manufacture the scales there also. In addition he will make lawn swings, shoveling boards and the like. All the buildings will be two stories high except the foundry. The first building is 64x112 feet in dimensions.

Rye, N. Y.—William N. Edwards, who purchased the bicycle repair business of his brother, Benj. Edwards, is open at the same stand. W. Huyler, formerly employed by the makers of the Columbia bicycle, will manage the repairing part of the business, consisting of bicycle and automobile repairing. Mr. Edwards has a new stock of sporting goods, tobacco, etc.

Ilion, N. Y.—The Atlas Gun Co., which has for several years been located in North Ilion, has moved to this town. They occupy the Foley Block on West Main Street. The change is made necessary by the constantly increasing business of the company. G. W. Warren who has been manager for a number of years, will be assisted by P. F. Emory.

Fires.

Jonesboro, Ark.—On October 20th the bicycle shop and fish market of L. A. Cole & Co., located in Huntington Avenue, was destroyed by fire. The damage amounts to about $1,000.

Memphis, Tenn.—Fire in the store at 134 Grand Avenue on October 14, occupied by the Huseby Co., dealers in phonographs, Bicycle and automobile supplies, resulted in a loss of $500.

Setauket, L. I.—Two large brick buildings and a small one of the same construction, comprising the works of the Anchor Rubber Tire Co., at Setauket, were destroyed by fire on October 18. The loss is estimated at $200,000, most of which was upon machinery and finished and unfinished stock. The cause of the fire is not known.

Embarrassments.

Baltimore, Md.—B. Howard Richards has been appointed receiver for the Baltimore Arms Co., which is engaged in the manufacture of guns and similar arms. Its capital stock consists of 13,460 shares, of the par value of $10 each, all of which is outstanding. The total indebtedness of the company is placed at $80,000, and the assets, the petition says, are not sufficient to cover this amount.

Miscellaneous.

The Pope Mfg. Co. has added a motor bicycle tandem attachment to its productions. It is designed for application to the Columbia. Cleveland and Tribune motor bicycles. It is made of steel tubing and steel drop forgings, and, of course, comprises the usual and necessary seat post handle bar and saddle.

MANUFACTURERS' RECORD.

(Continued.)

Minneapolis, Minn.—The Consolidated Wire Fence Co., of Hutchinson, has moved to Minneapolis. "Discriminating freight rates" is given as the reason for the change.

Monessen, Pa.—The Page Woven Wire Fence Co. is arranging for an increased capacity in its weaving department, necessitated by increased orders.

Newark, Ohio.—The Wehrle Stove Co., which already has the largest stove factory in the world, has just commenced another big addition to its mammoth plant in West Newark. This means an expenditure of perhaps $100,000 and a large increase in the present force of workmen, now numbering nearly 400 men.

Oshkosh, Wis.—The Oshkosh Logging Tool Co. has finished the second new brick building and a couple of machines have been installed. These, however, will not be used this Winter. The foundation for a third brick building is to be laid this Fall and the building finished in the Spring. All three buildings will then be occupied.

South Pittsburg, Tenn.—The H. Wetter Manufacturing Co. is building an addition to their already large plant. The new building will be 300 feet long and 100 feet wide, will be equipped with a cupola and all necessary machinery for the making of stoves, fittings and hollowware. The new shop will employ 150 men.

Spring City, Pa.—The Buckwater Stove Co. will erect a six-story brick warehouse in the rear of their office, 60 by 100 feet. The same is to be completed by the end of 1904.

Tarpon Springs, Fla.—It is stated on good authority that Harrison Bros., of St. Petersburg, Hardware and furniture dealers, will establish a branch house here, under the management of Paul Cheyney.

Warren, Ohio.—The Penn Shovel Co. has appointed Isaac Krewson general superintendent of their factory.

Washington, Pa.—A new industry has decided to locate in Washington. The manufacture of wire window screens will be the business of the new industry and a stock company is being organized with a capital of $50,000. The firm carrying on the business has been located at Decatur, Ind., but the plant there has been dismantled and its machinery is now in this place. Among those interested in the new enterprise is T. C. Ruble, of Marion, Ind., who will remove to this place and be actively associated with the management.

Changes.

Bridgeport, Conn.—The Bridgeport Malleable Iron Co., of this city, has increased its capital stock from $200,000 to $4,000,000.

Elwood, Ind.—The Elwood Lawn Mower Co. will establish a branch plant in Chattanooga, Tenn., in a very short time.

Franklinville, N. Y.—The Ontario Knife factory property has been sold to J. L. and W. L. Burritt, Will Sill selling his entire interest for $3,200. The new proprietors are to enlarge the plant and put on more help. They also own a controlling interest in the Allegany knife factory.

Louisville, Ky.—The plant of the Louisville Shovel Co., at Brook and Lee Streets, has been purchased by J. Lithgow Smith, of the Columbia Finance and Trust Co., and after a thorough reorganization the factory will resume operations. Mr. Smith makes this purchase as a private investment. The plant has a capacity of one hundred dozen shovels daily.

Oshkosh, Wis.—A large four-story addition, to cost in the neighborhood of $8,000, is soon to be built by the Oshkosh Logging Tool Co. The structure will be of brick and the dimensions will be 146x92 feet. It will contain the offices and warehouses, also a spacious display room.

THE HAMILTON RIFLE No. 23

Price $3.00

Ready for

QUICK SELLER FOR DEALERS Delivery Jan. 1, 1905.

Full length, 35 in. Length of barrel and action, 23¼ in. Chambered for .22 Calibre S. and L. R. F. Cartridges. Takedown Model, with genuine Walnut stock. **Model No. 23,** is of the **Bolt Action** type, deservedly popular for combining simplicity of action with strength and safety. The barrel, with action, is 21¼ inches in length, being finely tapered and beautifully finished in blue-black gun finish. The quality of rifling is unsurpassed, assuring absolute accuracy and strength of shooting. The action is automatic, both in putting cartridge into the chamber and ejecting the exploded shell. New locking device makes entire action of Rifle absolutely safe under all conditions. Breech-block and working parts thoroughly protected from dirt, rain and snow. Barrel and action easily and quickly cleaned.

HAMILTON RIFLE No. 19

PRICE $2.00

Combines simplicity, beauty of finish, strength and excellent shooting power. Simple loading process; improved extractor, rapid and perfect in action; convenient "take down" features; calibre .22.

Model No. 15 is made like No. 19 except that barrel is 4 inches shorter. Price, $1.50.

BURGLAR PROOF

SAFETY Window Lock and Ventilator

Permits the sash to be raised from the bottom or lowered from the top for desired ventilation without sacrificing security from entrance by burglars.

It is impossible to reach over the partially opened window with the hand, a pronged stick or anything else to unlatch the bolt, making the window just as burglar-proof open as when shut.

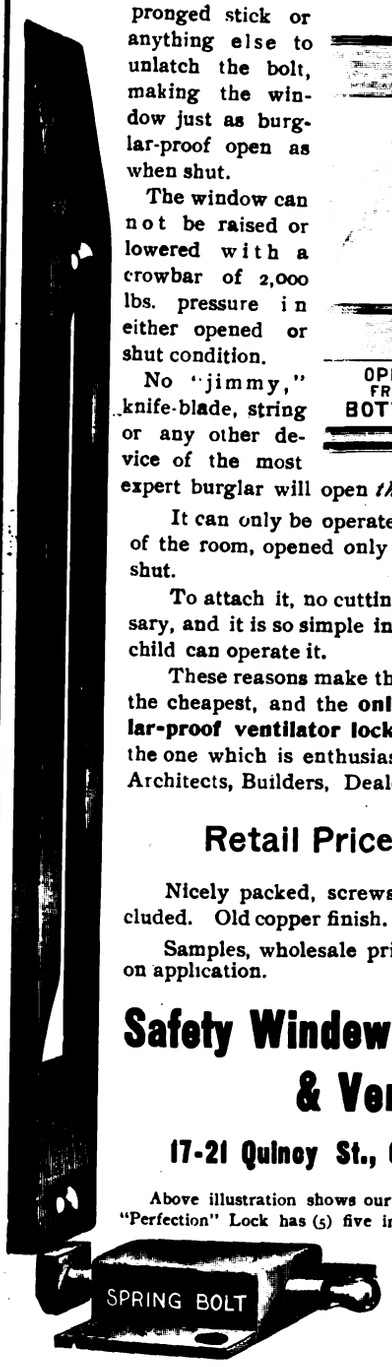
The window can not be raised or lowered with a crowbar of 2,000 lbs. pressure in either opened or shut condition.

No "jimmy," knife-blade, string or any other device of the most expert burglar will open *this* lock.

It can only be operated from the INSIDE of the room, opened only when the window is shut.

To attach it, no cutting of sashes is necessary, and it is so simple in construction that a child can operate it.

These reasons make the "Safety" the best, the cheapest, and the **only absolutely burglar-proof ventilator lock** in the market, and the one which is enthusiastically endorsed by Architects, Builders, Dealers and Consumers.



Retail Price, 25c.

Nicely packed, screws and directions included. Old copper finish.

Samples, wholesale prices and terms sent on application.

Safety Window Lock & Ventilator Co.

17-21 Quincy St., Chicago, Ill.

Above illustration shows our "Simplex" Lock. Our "Perfection" Lock has (5) five intermediate stops inside of slide and an extension which draws the sashes together when locked, making the old style center sash-lock superfluous.

PATENT PENDING.

Padlocks

On Easel Card Boards

one dozen on each card, will practically sell themselves.

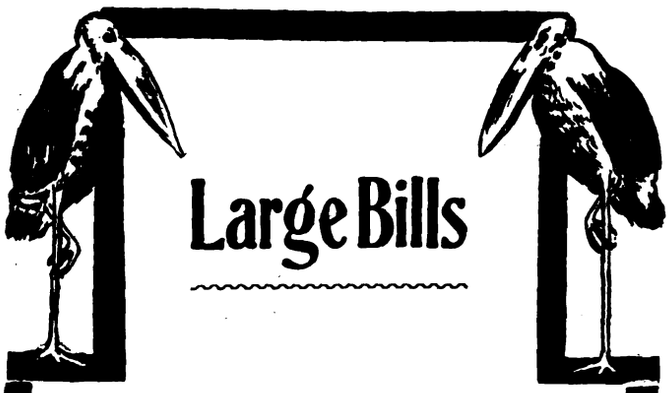
How? Goods well displayed please the eye—then comes the desire to buy; the sale is made.

Again: they take up no shelf-room, the cards are easily replenished, and it costs no more than the old method.

441 KINDS

of padlocks and night latches—all live and active sellers.

Every Lock Is Guaranteed



Get a copy of our catalogue—it's the key to the situation, profitable padlock selling.

KEYSTONE LOCK WORKS

E. T. FRAIM,

Lancaster, Pa., U. S. A.

Digitized by Google

Large Bills

For ammunition of every kind for Rifles, Pistols or Shotguns can be considerably reduced by sportsmen everywhere by doing the re-loading themselves with

"IDEAL" TOOLS

for all standard sizes, and special tools for special sizes of shells. We guarantee them to make perfect ammunition.

HOW?

Our Ideal Handbook No 16 tells all about it. Send three stamps for postage. MENTION HARDWARE.

IDEAL MFG. CO.,
13th Street,
NEW HAVEN, CONN.

"WESTCOTT"
ADJUSTABLE "S" WRENCH.

It's the original Westcott—for convenience and general usefulness unsurpassed.

It is strong and durable because we've put into it first class material only.

The same is true of our

"WESTCOTT"
ADJUSTABLE "S" PIPE WRENCH.

It's the Steam and Gas Fitter's favorite—the handiest for all un-get-at-able places.

Our catalog is replete with information about all our tools: Rachets, Centre Punches, Nail Sets, Etc. Let's send you a copy.

Mention HARDWARE when writing us.

KEYSTONE MFG. CO.,
41-51 Chandler St., Buffalo, N. Y.
New York Agent, A. Z. BOYD, 56 Reade St.

LANTERNS?

Do You Know

That **we** are not in the "Lantern Combine"—

That **Our Prices** are **lowest** and we sell direct—

That **Our Lanterns** are **Strongest**—

That **We** use No Stamped Tubes in construction and our Lanterns can't wear out.

Our Safety Lanterns have the Unqualified Endorsement of the leading Fire Insurance Companies.

LOCK MAKERS' FURNITURE & HOUSE TRIMMINGS.

SPECIAL GOODS MADE TO ORDER.

THIS CARD CHANGES EACH ISSUE.

WRITE FOR QUOTATIONS

Mention "Hardware."

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

Catalogue and information free.

Address Dept. H,

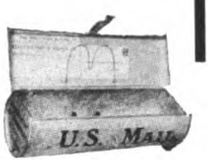
THE

American Steel Roofing Co.

Middletown, O.

KELLY R. F. D. MAIL BOXES

More than meet the requirements demanded by the Post Master General. Each box is extra large, doubly strong and equipped with receptacle for outgoing mail. THEY COST NO MORE THAN THE ORDINARY KIND.



WE SUPPLY THE MASTER KEY LOCKS

KELLY FOUNDRY & MACHINE CO.

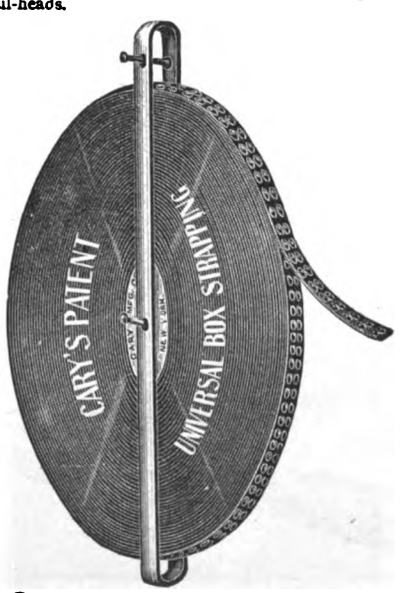
GOSHEN, IND., U. S. A.

Manufacturers of Galvanized Steel Tanks, R. F. D. Stoves, Low Wagon Wheels, Etc.

CATALOGS AND PRICES FREE ON REQUEST.

Federal Bench Shear

Strong, compact and well made. Cuts sheets or bars to 3-16 in. thickness. Stands 8 in. high. Weighs 30 lbs. Send for circular.



CHANDLER & FARQUHAR CO.,

131 Congress St.,

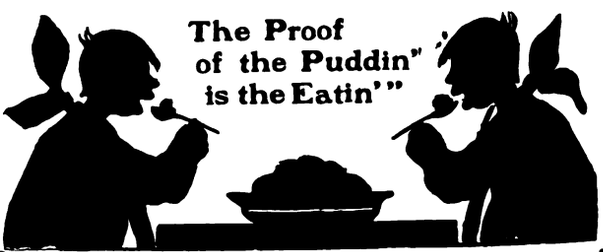
BOSTON, U. S. A.

CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.

Put up in coils 300 feet each.

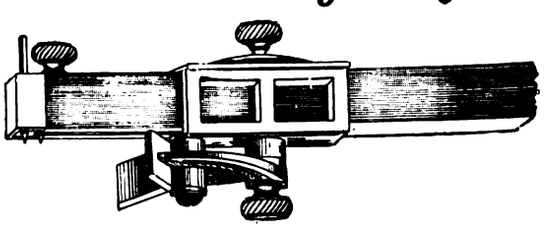
Patent Metal Reel Frame with each coil.



Straps made in four widths: ½, ⅝, ¾ and 1 inch.

Patented in all countries.

CARY MFG. CO.,



19 & 21 Roosevelt Street, New York.

Cable Address: CARLEIO

It's the same exactly with

Winslow's Adjustable Face Marking Gauge

Try it once on any irregular surface: Loosen its thumb screws—adjust its face—the work is done.

Most any mechanic or wood worker will see the point—its advantage over others. It saves both time and money.

You could sell lots of them (at a good profit) if you displayed them.

Lets' have your trial order.

MOSSBERG WRENCH CO.,

Central Falls, R. I.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Artistic Metal Ceilings

We are prepared to furnish appropriate designs of Metal Ceilings for every conceivable purpose.

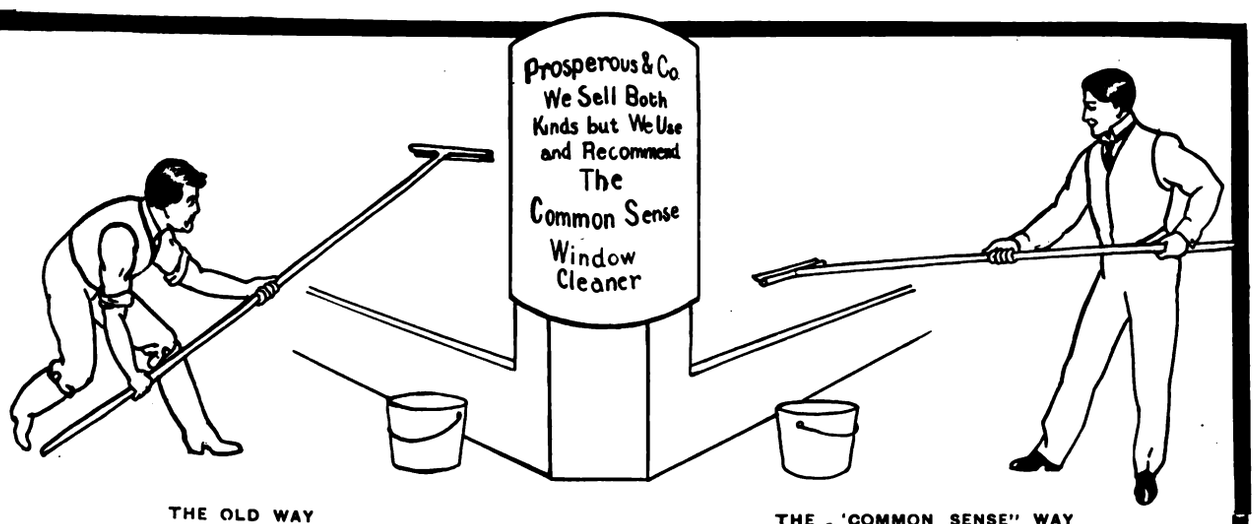
A look at our latest catalogue will show what Artistic and Impressive Effects can be obtained.

Quality is our guiding star. It has given our Metal Ceilings an enduring reputation.

Send at once for our catalogue and be convinced

Luxuriant Bath Rooms

At one-third the price usually paid for ceramic tile—and fully as sightly, substantial and sanitary—are obtained by the use of



Enametile

Like ceramic tile, it's made of metal enamel but better because lighter and cheaper. The most perfect ceilings made. Plates bedded in cement; no lap joints; no nails. Endless variety of patterns, colorings and sizes.

Write for Art Portfolio—it tells all about it.

NEW YORK METAL CEILING COMPANY,
537-39-41 W. 24th St., New York, N. Y., U. S. A.

THE OLD WAY

THE "COMMON SENSE" WAY

A Clean Sweep

That is what we made when we introduced the trade to

COMMON SENSE WINDOW CLEANERS

By the adjustable spring and hinge, the rubber adjusts itself to any angle allowing a

Clean sweep from top to bottom of the window

with the old style the pole hit the sidewalk before the window was half cleaned.

No more half cleaned windows—sloppy sidewalks—chapped hands and tired backs.

That spring hinge makes **the rubbers last double time.**

Don't Argue **Don't Wait**

WRITE TODAY.

F. H. SMITH MFG. CO.

AND ALL JOBBERS.

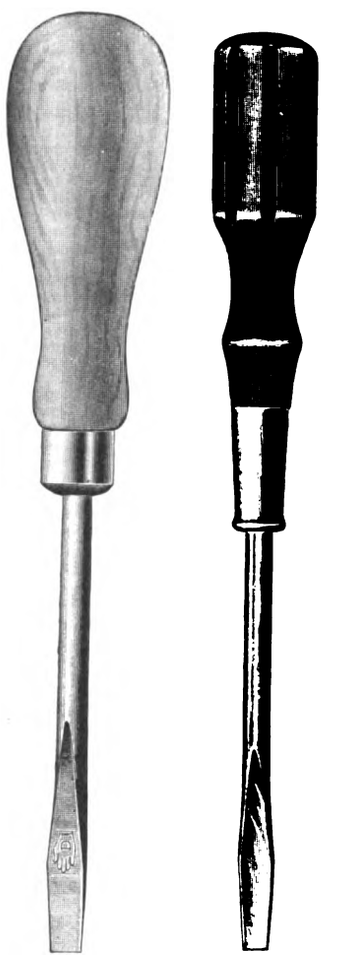
Ducharmes Tools are Known by The Ducharmes Trade Mark.

Electrician Screw Driver Perfectly Insulated. Insulated Driver for Electricians.

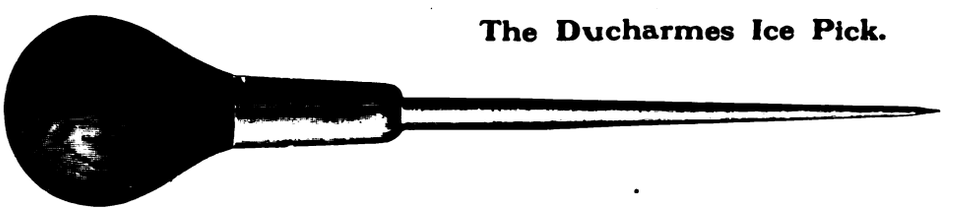
WE make a specialty of Hand Forged, Hardened and Tempered Screw Drivers, using positively none but the highest grade stock in both steel and handles.



We guarantee each driver to the trade, and will replace free of charge any that break, bend or are not perfect in all respects.

Each driver is tested to break a screwhead in its size.

Our Latest Catalog ought to be in your hands. Our liberal trade discount sheet goes with it.



We know it will interest you.

MENTION HARDWARE.

Hand D No. 5. Screw Driver O. K. No. 9 Screw Driver.

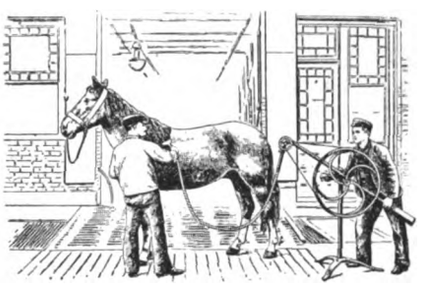
Address, ...

.....

(Cut this out, attach to your letterhead and mail to **THE HORTON MFG. CO., Bristol, Conn.**)



"Horse Sense" Demands

that "the best is none too good" when it comes to the buying and selling of a Horse Clipping Machine. **The Best**—on the market for thirty years—in use by all professional horse clippers in the U. S. and abroad—a hand power machine which really runs itself, is our Model BB Hand Power Machine.

It has been called

The King of Clippers

* * *

Our Guarantee

We warrant every machine we manufacture for *Five Years* from the date of its purchase.

This guarantee does not include the Cutters which are tempered very hard to ensure best cutting.

* * *

Captures Customers

It's a little higher in price than the rest of our line (fully described in our catalogue) but it lasts a life-time—so satisfactory in every respect. You ought to handle it.

Write us. Mention Hardware.

The Perfection Radiator.

We know of no device which positively

SAVES 60 PER CENT. HEAT

obtained from fuel usually going up the chimney and which effects a corresponding reduction in coal bills, than

The PERFECTION RADIATOR

Scientifically constructed, it controls and generates from any stove or furnace 60 per cent. of heat usually going to waste without its use.

Fits Any Stove or Furnace

—makes both do double duty.

Ask for our "Cold Facts on a Warm Subject"—it tells all about it.

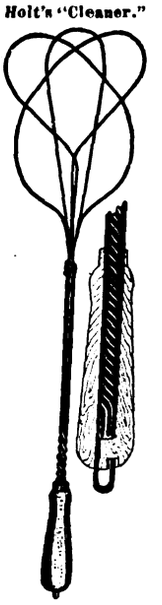
HOLT'S

Holt's Improved

Egg Beater.

"CLEANER" RUG AND CARPET BEATER

For thorough workmanship, good material, durability and elasticity—the qualities of a perfect beater—it is excelled by none other.
Made from the best furniture spring steel wire, tinned, hardwood handles brass ferrule. Four sizes—10, 15, 20, 25 cts. each.



HOLT'S IMPROVED DOVER EGG BEATER

Beats eggs in 20 seconds—in one-fourth the time as the best hand whips.
Our Beaters are one-third larger than the 10 cent Dovers. The Dashers are thicker, wider and flared.
The Flare Does It.

Let us send you our Price-List Circular—yes.

The Best Partner a Storekeeper Can Have is a NATIONAL CASH REGISTER

THIS illustration shows the modern Multiple-Drawer Cash Register. It is equipped with as many cash-drawers up to nine as there are clerks in the store. The machine is arranged so that each clerk operates his own cash-drawer. Each drawer has a different-toned bell, which protects the clerk against anyone else using it.

The machine makes a printed record of each sale, showing who made it and what it was.

A Multiple-Drawer National Cash Register means less work, less worry, less bother, and more money to the storekeeper.

It protects his profits, guards his cash, measures his sales, gives a check on the ability of each clerk, and stops losses through carelessness, dishonesty or inefficiency.

It assists the clerks, encourages them, makes better business men of them, for it enforces habits of carefulness and industry.

It pays for itself in a year and then earns money for you.

National Cash Register Co., Dayton, O.

HURWOOD TOOLS.

Dealers and users of small tools everywhere recognize Hurwood Tools as leaders, in particular

HURWOOD Screw Drivers.

They have made a hit with Hardwaremen who have sold them to their customers—their customers, in turn, found them as represented: "A tough proposition" for the roughest usage—it's all in the quality of steel used and in the making.

Our Extension Screw Driver

does double duty; it's two screw drivers in one.

It is really the best for piano and organ manufacturers and electricians.

They are unapproachable in quality and durability.

Better get a copy of our catalogue. It will open your eyes to other profitable sellers.

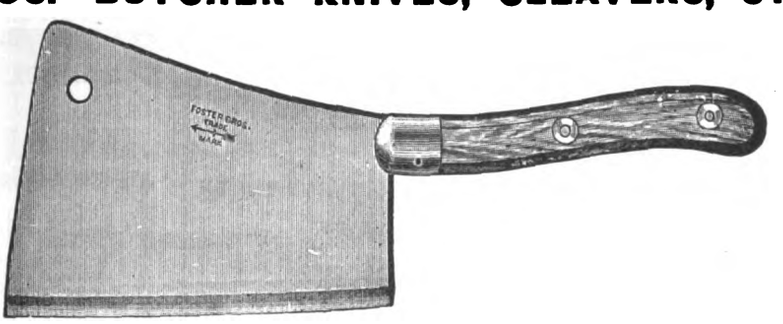
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

"You've got 'em all skinned, Mr. Phillips. That's the Best Screen I've seen."—(Buyers Comment)

Phillips' New Air Line

WINDOW SCREEN

The greatest advance in Window Screen construction since the advent of the famous "Flyer" ten years ago.

The Wire Cloth is *inserted* in the wood work. There are no slots, grooves, saw cuts or adjusting devices in the faces of the frames—just the plain beaded surfaces.

It is certainly the *Best Looking Screen* yet. The adjustment is sure and easy and is obtained by means of sliding Wooden Caps partly concealed in the top and bottom rails.

Frames are of selected Beechwood, smoothly machined and oiled.

If your jobber cannot supply you, write us. Send for a sample. We will furnish the Screen without charge if you will pay the express charges.

The A. J. Phillips Company, Fenton, Mich.

Manufacturers of **Reliable Screen Doors, &c.** Twenty-Three Years Experience.

The Blackstone Rotary Washer

It's very name is a mark of merit and a guarantee of its superior workmanship and working qualities.

* * *

It is a genuine washday worry killer.

* * *

No woman ever invested in a Blackstone Rotary without immediately finding out that it adds to her purse, subtracts from her worries and compounds her interests in life.

The Blackstone Rotary Washer is a washday favorite.

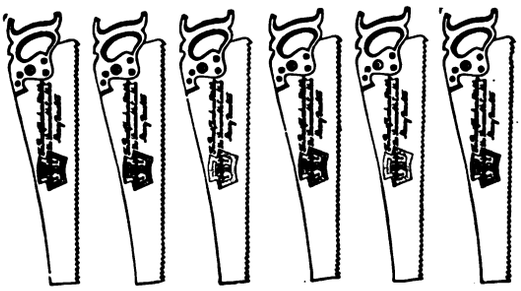
* * *

For these very reasons it has been, and always will be, a good seller.

* * *

You miss an opportunity by not handling it and displaying it in your store.

* * *



You ought to have our catalogue and prices. It puts other washers in the shade when it comes to giving all-round satisfaction.

The Blackstone Mfg. Co., Jamestown, N. Y.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

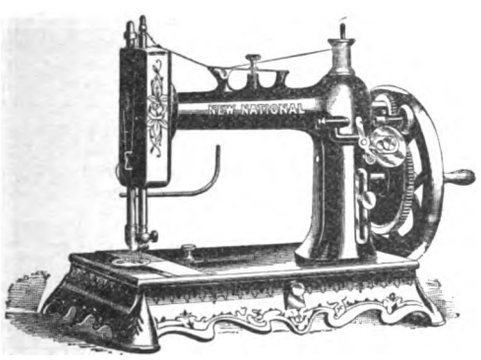
Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

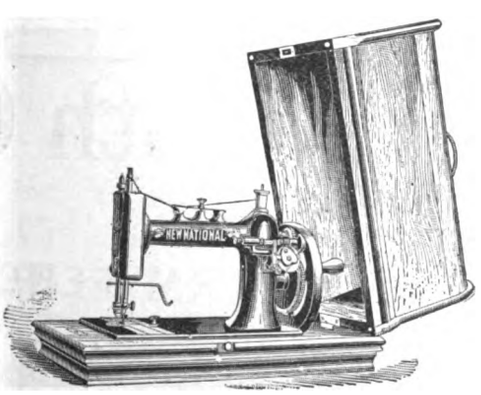
¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.



¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*



¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

HARDWARE

The National Sweeper Co., Marion, Ind., will make a very elaborate display of their line at the Grand Rapids Furniture Exhibition during January, on the ground floor of the new building opposite the Morton House. Their line will, also, be displayed at the Furniture Exhibition Building at Chicago, 1411 Michigan Avenue, on the first floor. We are informed that handsome booths along entirely new lines are being built for these Exhibitions, and special arrangements will be made for the entertaining of buyers. The National Sweeper Co. are making very elaborate plans for their business for the year 1905, and at their Exhibitions will show three new models of sweepers, entirely different from anything yet ever put on the market, which are being built in commemoration of the Grand Prize and two Gold Medals, taken at the St. Louis World's Fair.

*

William H. Cole, for many years identified with the firm of Tower & Lyon and later with the Tower & Lyon Co., has resigned as treasurer of the corporation, his interest being taken by one of the members of the Board of Directors.

*

It gives us pleasure to announce that the Vermont Slate Co., Zanesville, Ohio, have been awarded at the St. Louis Exposition highest honors and gold medal because of the excellency in quality and manufacture of their superior "S-G" Roofing Slate.

*

O. L. Remington, who is connected with William McLean & Co., Melbourne, Australia, has just completed quite an extended tour over the States and expects to be in New York about December 21st for a few days, after which he will return to Australia. Mr. Remington writes that he will make his headquarters at the Astor House while in New York, and will be glad to receive propositions from American manufacturers who desire to be represented in Australasia.

*

By some typographical error, the L. & I. J. White Co., of Buffalo, were mentioned in our convention report as giving to the euchre that was held at Atlantic City "ten Carpet Sweepers." This company's contribution to the list of prizes was a beautiful set of chisels in a seal covered case. This prize was won by R. F. Lund, of Canal Dover, Ohio.

*

A. R. Stansbury, Norfolk, Va., desires catalogues and particulars from manufacturers of Tug and Steamboat supplies.

*

The R. D. Cone Co., Wholesale Hardware, Winona ,Minn., has consolidated its business with the Hackett, Walther, Gates Hardware Co., of St. Paul, and the stock is being transferred from Winona to St. Paul.

*

The Sprague Umbrella Co., Norwalk, Ohio, have just completed a large addition to their factory. The new portion of the establishment will be devoted especially to the manufacture of Automobile canopies, Cape Tops, etc.

*

By some oversight, we neglected to include in our report of the Atlantic City Convention, the Cronk & Carrier Manufacturing Co.'s souvenir. They gave out an article which will be of great convenience to the office man, a combined Check Perforator and Letter Opener, nickle plated.

*

Mayer & Co., Philadelphia, Pa., manufacturers of Gold Medal files, have recently made several additions to their plant. A large storehouse has been built to better accommodate the storage of finished goods, and a number of other changes in the plant have been made. These improvements will greatly increase their production of files. Inquiries are said by Mayer & Co. to have materially increased, and there has been quite a gain in the volume of business transacted.

*

The Hamden Manufacturing Co., successor to W. A. Ives & Co., Hamden, Conn., states that not in years has its books been so full of orders as at present, its output having been sold up to March 1 next. The company has just installed an electric plant for lighting the factory, which has never before been lighted at night. Extra help is being engaged to increase the output, and the working day has been lengthened.

The Empire Manufacturing Co., Hartford, Conn., has been incorporated under Connecticut laws to manufacture toys and game boards. The company will take about 4,000 square feet of floor space for its factory. The officers are: F. S. Chester, president, and L. S. Lewis, treasurer.

BOMMER SPRING HINGES.

It gives us great pleasure to announce that Bommer Spring Hinges were awarded the Gold Medal at the St. Louis Exposition for excellence of quality. The many points of superiority passed upon to gain this mark of esteem, commend them all the more to the architects of the country, who have so thoroughly appreciated their well deserved excellence.

CATALOGUES WANTED.

Thomas Ellis, who is well known throughout the whole country as having been for the past twenty-five years or more traveling salesman for Herman Boker & Co., and later for the Iver Johnson's Arms and Cycle Works, writes us that he expects very shortly to open a wholesale and retail Hardware store at Columbia, S. C., and that he will be pleased to receive catalogues from the manufacturers of Hardware and kindred articles.

EUCHRE PRIZES.

In the list of prizes for the euchre at Atlantic City, the Euchre Committee failed to include the handsome Nickel Plated set of Asbestos Sad Irons, in a hard wood case, given by the Dover Manufacturing Co., of Canal Dover, Ohio. This set was selected as the second prize.

PACIFIC COAST RETAIL HARDWARE ASSOCIATION.

The Pacific Coast Retail Hardware Association will hold their seventh annual meeting at Stockton, California, January 20, 1905. The officers of the association are: President, John C. White, Marysville, Cal.; vice-president, A. L. Nichols, Chico, Cal.; treasurer, Em. Warll, Chico, Cal.; secretary, James O. Gates, Marysville, Cal.

THE ARCHITECTS' DIRECTORY AND SPECIFICATION INDEX.

The Architects' Directory and Specification Index has just appeared for 1904-05. This is the sixth edition of this valuable directory and it is very handsomely brought out. A change, we note, in the cover which adds much to the appearance is printing the type matter in white ink which on the red cloth cover is very effective. Several new features have also been added, and much care has been taken to give the membership of societies in the list of architects. This list covers all the States, Territories and possessions of the United States as well as Canada. Two new lists are also added—that of Landscape Architects and that of Naval Architects, thus covering the whole Architectural field. The feature of giving the names of the members under each firm will be found very convenient. The list of architectural societies with their officers, the schedule of charges adopted by the American Institute of Architects and the specification index make the directory of great convenience as a reference. The work is printed on good paper in clear type so that it will be found very convenient for looking up names or addressing circulars. It is published at $2.00, by Wm. T. Comstock, 23 Warren Street, New York.

PROPOSALS WANTED.

The Isthmian Canal Commission, from their office in Washington, D. C., have asked for bids for supplying the commission with the following goods, under the head of Hardware:

Garbage Cans, Shovels, Picks, Wooden Wheelbarrows, Forks, Garden Rakes, Garden Hose, Padlocks, Hasps and Staples, Carpenter's Tool Chest, Flat Files, Clothes Lines, Manilla Rope, Agate or Galvanized Ware, Tubular Lanterns, Rip Saws and Cross Cut Saws, Lath Hatchets, Watering Pots, Large Screwdrivers, Claw Hammers, Heavy Twine, Shears for Cutting Wire Screens, 18-mesh Copper Bronze Wire Screen, Wood Scrapers, Marking Pots and Brushes, Strap Hinges, Scythes, Handles for Scythes, Stones for Sharpening Scythes.

Complete specifications will be sent on application.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

Now that the trade believes that prosperity will continue along each and every line that in any way affects the Hardware business, they are only too glad to think they decided to "stand pat" and make the expression of their feelings too definite to foster any doubt. Not only will prosperity prevail in every branch, but purchases can be contracted for the future with safety in every department, with the assurance that the boys will hold their jobs, but also that they will have money to spare for Christmas, even if they have to take some of the cash they have been able to put aside for that especial purpose.

Dealers have now every confidence in the future; are ordering for the Spring trade the goods that will make their distribution sure, and a successful business a certainty. Now, while the Manufacturers are conferring together as to how far they will advance, while current quotations are in abeyance, is taken as a good time to devote to the ascertaining of probable wants and the placing of a well assorted order that will make them feel safe of the future.

The November trade has been of the required fullness, exceeding in volume the amount anticipated. This adds to the feeling which prevailed a month ago and renders it a moral certainty that if we put forth our best effort, business will return the best of results and make the daily advance in prices of goods near the cost, give a feeling of confidence which, like the "smile" referred to at the present time, "will not come off."

The slight advance in prices of Wire products was only taken to feel the market and strengthen it a little, enabling the farsighted buyers to stock up as the orders were stimulated, when it could be followed up by another advance, bringing prices on such goods back to the old standard before they declined.

The indications are that the next sixty days will see the market settled for Spring trade in a manner perfectly reassuring as to prices and products; it wouldn't pay to shove up quotations so far that it would put a stop to orders; but a moderate advance all along the line the trade is fully prepared for, and surely expect, and it couldn't happen at any better period than the present.

As our Chicago correspondent expresses it: "Our salesmen were never more enthusiastic, and we have never had so many future orders at this season of the year, since we have been in business. The last advances in Pig Iron, Steel Billets, Nails, Wire, Sheet Steel, Galvanized Iron and other goods, have had a tendency to make both Jobbers and Retailers as well, very anxious to have all the orders possible taken at present, at the low prices, which are still prevailing on most articles in the Hardware line."

The improved conditions of business in the Hardware trade of the country is felt in the demands for goods for Export which continue to go abroad in good quantities, and show up with confidence in the future Government Reports. A more commanding position as to supplies is destined to be our privilege in the future, and will be proved by statistical information that may be relied upon. Never were we more able to solicit this addition to our ordinary traffic, for with facilities largely extended, and greater ones in prospect, we control the field of effort with every intention of retaining it.

SIMMONS HARDWARE CO. SEEK OTHER WORLDS TO CONQUER.

The Simmons Hardware Co., of St. Louis, understand that successful endeavor is always to be had by an aggressive movement that will "Carry the War into Africa;" and, with the desire to concentrate their interests in the Eastern territory and form new connections that would be advantageous to them, with this point in view they have moved their Philadelphia office and salesrooms to 298 Broadway, New York City, where they intend carrying a stock largely consisting of "trade mark" lines, and on those goods, having no opposition, they will be heard from before long with New York as a base of supplies and a good field to cultivate with their usual methods and indefatigable persistence. Some of our local jobbers will do well to watch the succeeding movements. Whether the numberless rumors are true about their intention to build a large warehouse in Jersey City, buy two or three buildings in the vicinity of Warren Street for a Hardware establishment worthy of the name, are founded upon the fact that they intend tying up to the progressive house of Neal & Brinker, 18 Warren Street, for the future prosecution of this field for Jobbing of Hardware. With the growth of New York consequent upon the building up of the outlying portion and a population of four millions in prospective, is found a temptation that could not be resisted. The movement with Neal & Brinker has not yet entirely developed, so that the nature of their representation or as to its share of the work is as yet unknown.

New York will be found a distributing centre worthy of attention; subject to the lowest freight rates, and to a house with the capital of the Simmons, the well-planned manner in which their Jobbing trade has invariably been conducted will prove to be a magnet to build up an entirely new division of the business, in which they would find little or no opposition. Then again, in St. Louis a period of comparative dullness after the World's Fair year, will follow, and they, having made their presence felt in every hamlet of a large territory, may wisely, under the circumstances, extend their lines toward the East, and give the Jobbing trade a decided shake-up.

Digitized by Google

MAIL ORDER BUSINESS

The average Hardwareman, jobber, manufacturer or retailer, who attended the convention at Atlantic City found little time to discuss politics—even had he desired to enter into such a discussion. All were there this time for business, with a capital B, and the subjects that occupied the major part of the time of nearly all were "Catalogue Houses" and "Special Brands," and probably because of the hard work of the joint committee, its recommendations, and the retaliation on the part of one mail order house because of the action of a certain manufacturer in withdrawing his goods from being sold by catalogue, the subject of "Catalogue House Business" should be placed well in the lead. Come suddenly on a group of men almost anywhere in either hotel and it was a safe bet that you would hear "unjust competition," "ought to be put out of business," "make them maintain the price," etc., etc.

One manufacturer said to the writer: "This Catalogue House question calls to mind the great ado that arose in the trade when a few years ago the department store came to the front. All over the country arose a wail of despair from pessimistic dealers who foresaw the 'ruin of the Hardware business.' The department store idea is still in vogue—bigger than ever, and the Hardware business is far from ruined. In my opinion it will be the same with the Catalogue Houses. They will continue to grow and prosper as the country develops and the Hardwareman will do likewise. Action will be taken by associations and individuals that will result in controlling the mail order business to some extent, but this talk about putting those big establishments out of business is all tommyrot. It is now generally accepted by all level-headed business men that the large corporations of the country can and should be controlled, but that any attempt at crushing them would be not only unlawful, but unamerican as well. That's about the way I look at the Catalogue House business.

THERE ARE TWO WAYS

in my opinion by which some sort of control can be exercised over this unjust competition. Let the manufacturer and jobber say to the Catalogue House, 'If you sell our goods you must maintain the price.' And let the retailer look out for his own trade and by using modern business methods get such a hold on it that the mail order trade in his vicinity will be kept down to a minimum."

George V. Hobart, "the funny man," says: "Be a patience. All dings come to dem vot vait, but vile you vas vaiting, took off your coat und go to vork and you vill forget vot you vas vaiting for." That's about the situation with the retail dealer. Be patient, but don't depend on the other fellow, the manufacturer or jobber, to do all the work. Let each retailer look after his own particular territory and when he strikes a line of work that wins, help out his fellow-dealers in other sections by making public his successful system. I know some dealers will say when they read this: "What! give away our business secrets!" It isn't necessary to "give away any secrets," but the giving out of a general plan, if it is a successful one, will accomplish enough good for the Hardware business to counteract any evil effect it may have by giving ammunition to a competitor. In other words, if these troublesome questions are ever settled it will be done by the Hardwaremen working both as individuals and in association. Max O'Rell's definition of luck just about fits this case. He says: "Luck means rising at 6 o'clock in the morning, living on a dollar a day if you earn two; luck means appointments you have never failed to keep, and trains you have never failed to catch. Luck means trusting in God and your own resources."

The Hardware dealer should not be frightened by the enormous amounts of money spent by Catalogue Houses for circulars, catalogues and general advertising. Don't say, "How can I expect to compete in advertising with such an immense appropriation," but keep in mind the fact that only a small fraction—exceedingly small—of the Catalogue House advertising appropriation is expended in the territory of any one particular Hardwareman, and instead of competing with the entire appropriation, each Hardwareman has only to seek to offset that part of the work and expense done in his own particular section, and further, that the Hardwareman has one distinct advantage, that of being on the ground, and of knowing his trade and their wants.

A FRANK STATEMENT.

We print herewith copies of two letters recently sent out by the Boss Washing Machine Co., of Cincinnati, Ohio, one of the largest manufacturers of washing machines in this country, in which, without any "beating around the bush," they express their sentiments regarding the Catalogue House and Special Brand questions:

DEAR SIR:—We are in receipt of your letter of the 26th inst., asking an expression from us regarding our attitude toward the catalogue house question. We have recently had similar requests from our friends and have therefore framed a letter which covers our views on the subject about as completely and appropriately as can be and we therefore herewith hand you a copy of that letter.

To that part of your letter which states that manufacturers should sell at the same price to the catalogue house as they would sell to a large dealer, would say, as you no doubt have experienced that a large corporation is under heavier expenses than a smaller one, naturally a catalogue house who does larger business and is therefore in a position to buy goods in larger quantities must have a greater leverage to do business on.

We further wish to say that the life of a catalogue house would be very limited if it could not offer some kind of inducement to the individual purchaser regardless of the individual's location. If the catalogue house was forced to pay the same price as the large dealer, they would be excluded from shipping their goods to any part of the country and compete with the retail trade regardless of location. If the catalogue house was held down to pay the same price that the large dealer has to pay for his goods, there would never have been a catalogue house, and we would have nothing but retail stores in the country to-day.

Competition in every branch of business in this country is getting so strong that there merely remains a battle for supremacy, and the only way such a point can be arrived at is for the jobbers of this country to select certain lines of goods and insist upon the manufacturer confining the sale of their manufacture to the jobbers only, and with the jobbers' co-operation in pushing all such manufacturers' goods and encouraging such manufacturers by pushing their goods under factory brands, and success in this kind of co-operation would have to result, but as it is to-day,

THE SPECIAL BRAND FEATURE

has permitted the market to be split into a great many channels of distribution, manufacturers not stopping with the jobbers of Hardware, groceries, catalogue houses of department stores, and this is what has resulted in the demoralization of prices, under which conditions, the jobbers are the ones who suffer the most severely, and unless the jobbers will co-operate with the manufacturers with whom they expect to do business, and take such action in a very short time, the catalogue house is going to get complete control of the market—particularly the large catalogue houses who have now grown to such enormity as to command recognition everywhere in the United States, and they will continue to grow unless the jobbers wake up and see that they get their share of the business.

Yours truly,

BOSS WASHING MACHINE CO.

GENTLEMEN—We have at hand your letter of the 7th inst., asking us to share with you our views regarding the catalogue house question, and, to begin with, will say, this is a question that confronts the jobber in a more serious way than the manufacturer, from the fact that through these various channels of distribution the manufacturer can always find a market for his goods. The point, however, to be fully considered by the manufacturer is through what channel his business interests will be protected for the greater length of time, or, in other words, what source of distribution will offer the

BEST PROTECTION TO THE MANUFACTURER.

We find that in our line of manufacture as well as a great many other specialties that there are a great many manufacturers who are avoiding both the jobber and catalogue house in the distribution of their goods and are selling them direct to the dealer. Why? Because of the fact that they have learned through the policy of distribution of both the jobber and catalogue house that a fair margin of profit cannot be maitained for any length of time by endeavoring to establish a market for their goods through either of these channels, and their business is now prospering from the fact that they have gone on the market and offered their goods on the agency plan, or, in other words, sell only one dealer in a town.

Now there are enough manufacturers in every branch of business to seek a market for their goods through the same channel

Digitized by Google

and through this it would only take a short time for each dealer to have an agency for a certain manufacturer's goods and under the manufacturers' brands.

The remaining manufacturers are seeking to market their goods through either the jobber or the catalogue house, and the most desirable one of these two to select, in our estimation, is the catalogue house, owing to the fact that through so many of the manufacturers already selling on the agency plan and having the field thoroughly covered, where is there any chance for the manufacturer to find a market for his goods through the jobber?

There, of course, will be some little trade left, but the cream of the market has been taken up on the agency plan, naturally, the catalogue house would be the next most desirable source of distribution, owing to the fact that they go direct to the individual buyer, or, in other words, consumer, and, as they as a rule are extensive advertisers, a manufacturer's brands will receive wide distribution, and more so than could be expected through the jobber.

Now, the principal point for the manufacturer to insist upon in view of these three distinct channels of distribution, is for him to adopt either one or the other and then insist upon his goods being

MARKETED UNDER FACTORY BRANDS

so as to establish a trade and reputation for his goods whereby he can hope to maintain for some length of time both trade and profits on his line of manufacture. The writer has had considerable experience in the last ten years in calling upon the Hardware jobbers and we must say that with but few exceptions, all the jobbers have been and are desirous of handling goods under their own special brands, and their wishes in this respect have been granted by nearly all the manufacturers, with the result that to-day there are but very few articles of manufacture upon which the manufacturer can claim having established a trade for himself.

This, however, is not the worst reaction these special brands have had against the manufacturer, the most disastrous being that the jobbers have taken advantage of these special brands with the point in view of buying similar goods from the different manufacturers under the same brands with the view of creating competition among the manufacturers for the purpose of continually working down the price so that some manufacturers have been forced to abandon the jobbers entirely, and are now seeking a market either from the trade direct or through the catalogue house and department stores, which are the next two sources of distribution for them to fall back on.

If jobbers will eliminate their special brand feature and from now on work in better harmony with manufacturers and be an assistance to the manufacturers in introducing factory brands and establish trade on such brands (in which case the manufacturer can hope to maintain a better margin of profit on his goods) we are satisfied it will result in a more prosperous and paying business for both jobber and manufacturer, and the jobbers, particularly, from the fact that they are the source of distribution that can be the most easily ignored of the three.

Furthermore, it will lessen the tendency of having manufacturers go direct to the trade and sell their goods on the agency plan, from the fact that all manufacturers enter into the field with the view of getting their goods established broadcast, and the most desirable and quickest source to be had for distribution of this kind is the jobber.

The catalogue house will in our estimation continue to prosper and grow, from the fact already stated that the entire product of the manufacturers in this country cannot be distributed through the jobber alone, leaving some source of supply in every branch from where the catalogue house can get his supplies.

These being facts, the manufacturer's point in view will be to select his source of distribution from either one branch or the other, and he is bound to select the branch by which his interests will be maintained.

WE OURSELVES HAVE NEVER SOLD CATALOGUE HOUSES NOR DEPARTMENT STORES, but we must add that the patronage we are receiving from the jobbers is not at all satisfactory, from the fact that there are too many special brands to contend with which cause a continuous friction in price, therefore the margin of profit in our business to-day is not what a prosperous business should have and unless the tide of existing conditions are changed in a short time, we will have to find ways and means by which we can maintain ourselves in a better standing in the manufacture of our specialties.

Yours truly,

BOSS WASHING MACHINE CO.

A FARMER'S OPINION.

In an article reprinted in the *Implement Trade Journal*, Guy Blanchard gives the retail dealer a gentle roast, and while, of course, it will not apply to all Hardware Dealers, it contains much good advice. Mr. Blanchard met in Chicago a prosperous farmer, who had made a number of purchases from Catalogue Houses and asked him "What is a merchant to do when such good, prosperous men as you send to Chicago for their goods? How is he going to keep that trade at home?"

"Well," said the farmer, "some of them don't try to keep the trade at home. I've no doubt if I were to go in and tell Hargrave what I wanted, that he could get it for me, and more than likely make a little profit out of it. But when I want anything, you see I have the catalogue handy and can sit down and take my time looking it over till I find just what I want. Hargrave expects a fellow to come to his store. You know how he—you know he advertises about three times a year. I don't know how that little paper at home keeps up. It looks as if the merchants were willing to take just the trade that comes and let the rest go. Now the rural mail runs past my house and I get circulars every day, but mighty seldom do I get anything from the home stores. If I go in there asking for something they don't keep, they think I'm a crank. I haven't anything against the stores at home—they've always treated me right. I don't always save money on what I buy in Chicago, but when I want a thing I want it, and it's handier for me to mail my order to Chicago than to always go to town to see if Hargrave has what I want."

Mr. Blanchard goes on to say, addressing his remarks to his readers:

Do you think the mail order house is to blame because it goes after the business? Do you think the merchant of this farmer's town blameless? It seems to me that it's almost criminal for a merchant to allow so much business slip by him without an effort to get it.

It will not answer the argument to say that the farmer likes the "notoriety" of getting goods by express or freight. Some of them do, I admit. But the farmer I was talking to would unload a carload of merchandise and never call any attention to it.

It might be a good plan to quit blaming the mail order house, to quit blaming the "gullible, misguided" farmer who patronizes them and to hit yourself a good crack on the head and say "I'm the guilty man. I've let this business escape me, using no effort to stop it except a few blasts of hot air. Now it's up to me to recapture the works."

You may have the stock, the prices, the conveniences. But when your farmer customer trades up his bill you say, "And will that be all?" with an air of dismissal. It is probable that you need more salesmanship, more live, aggressive advertising, more spunk, more go-after-it-ness.

Don't think because you lie supine and holler that the mail order house will quit going after your trade. Never!

You must have nerve. Brace up! Hunt up the mail order buyers. Lose some money, if necessary, to get their trade back. Get them out of the mail order habit. Quit selling goods with mail order schemes attached to them. Hustle like old Harry—even then there's some trade you can't regain, but you'll have the satisfaction of knowing that while you're hustling you are certainly increasing the business which you've allowed to slip by.

THE SALVATION (?) OF THE RETAILER.

As long as the world stands there will always be found in it people who take extreme views on every subject on which they have any opinion whatever. A writer in a recent issue of *Printers' Ink*, commenting on the subject of Catalogue Houses, takes an exceedingly extreme view on the subject; indeed, it would almost seem that he attempts to argue that the Catalogue House of the present day, instead of being simply an unjust competitor, is really the salvation of the retailer. He says:

"HISTORY REPEATS

itself. Not long ago it was the grocers and druggists versus the department store. It promised to be a battle royal, but, while it ended in the success of the department store, the grocers and the druggists are still doing a profitable business at the old stand. And this same happy adjustment of conditions and proportioning of trade will doubtless be the outcome of the present antagonism against the catalogue houses. Unquestionably there are more of them yet to come, and those that already exist will grow in strength and scope; yet in the end the retailers of the identical articles which the mail order houses handle as their "leaders" will be better off than they were before this seeming catalogue calamity came upon them."

After arguing that the Catalogue Houses have "educated the buyers and inspired within them a desire for home comforts as well as luxuries concerning which they might otherwise have lived a lifetime in ignorance and with no sense of loss or inconvenience," he goes on to say:

"The Catalogue Houses have done great educational work, and it seems to me that their coming into the field is really the knocking of Fortune and Opportunity on the closed door of the retailer and manufacturer."

All this may be true, but it will be a mighty hard matter to convince the retail Hardwareman of its truth as long as prices of Hardware are quoted in the big catalogues at cut throat prices.

"Printers' Ink's contributor, continuing in his article, quotes a recent editorial from HARDWARE in which mention was made of the large crops and good prices and the consequent prosperity of the rural population, and says:

"These conditions and indications bespeak wealth in the rural districts, and it is naturally assumed that the catalogue houses will profit enormously, through their excellent system of advertising, by the lavish expenditures which will be the logical outcome of this accumulation of wealth. On the same editorial page (of HARDWARE) appears an able comment on the report of the Joint Committee, which report apparently blames the manufacturer for the inroads which the catalogue houses are making into the business of the retailer, and does not receive the full approval of the editor of HARDWARE. In his closing paragraph the editor of HARDWARE says: "When the country retailer cleans up his store, arranges his goods tastefully and makes his place of business one in which both women and men will feel comfortable; dresses his windows and spends a little money on paint and printer's ink; keeps his stock and his knowledge of it up to date; then, and not till then, will he have such a control over the trade in his neighborhood that the catalogues and mail order house will no longer occupy the place of the family Bible on the farmer's table." If you will notice, he suggests that the retailer spend a little money on printer's ink. In other words, advertise. Let him do some educating himself, and, by all means, take advantage of the educational work already done by the catalogue houses. The Joint Committee censures the manufacturer who sells to the catalogue people, and seems to think that the success of the latter is due to the "crime" of the manufacturer in supplying them with goods. As a matter of fact, their success is due entirely to advertising, and if the manufacturers did not supply them with goods desired they would produce it themselves, at a still lower cost, thereby making possible even more serious cutting of prices Besides, the independent manufacturers, who are not in the association, must be met on their own ground. If the members of the association refuse to sell to the catalogue houses such action would only reduce their profits and add to those of the independent producers. Anything of this kind is out of the question." In its report the Joint Committee says: "More than ninety-five per cent of the Hardware, Cutlery and Sporting Goods sold in the United States is distributed through jobbers and retail dealers." If the retailers distribute ninety-five per cent of the goods in the above named classes, it would seem rather unreasonable for them to protest against the catalogue houses capturing the other five per cent, inasmuch as the latter concerns have surely created enougn new business to more than make up in the share that naturally falls to the retailer, for the loss of this original and trifling five per cent." Yet there is a "catalogue house question" on the surface, and it must be answered. Answered it will be, by the sound and practical way—by advertising. The Catalogue houses will not be driven out of business. Mail order selling is in its infancy. It is a profitable field for the big merchandising house as well as for the manufacturer. A great many will soon take advantage of it. Let us not forget, however, that the growth of our country is about twenty-five per cent every ten years, and the needs of the rural buyers increase in even greater proportion. All of which makes it quite apparent that the future field for the catalogue house is rich in possibilities more than it ever has been. Still the retailer won't be driven out of business, either."

ILLEGALITY OF THE BOYCOTT.

A recent telegram to the New York Sun says:—The strongest decision against a union boycott yet made here has been delivered by Judge Hebbard in the Superior Court in the case of Godberg, Bowen & Co., grocers, against the Stablemen's Union. Pickets from the union carried placards and transparencies, labelled "Unfair firm; don't patronize." in front of the grocery because the firm refused to discharge non-union men employed in their stables.

The Judge reviews the law in the case and declares that any organization of workingmen that attempts to hamper trade or to coerce fellow workingmen to become its members or to quit work is illegal. The gist of his decision is in these words:

"To proclaim a business, or the proprietors thereof, unfair in this manner is as infamous as to proclaim before a private dwelling that the inmates thereof are prostitutes. The acts complained of are breaches of peace, and it is safe to say that if met by personal violence on the part of the boycotted, did he so elect, instead of appealing to law, he would be justified by a jury. It is the opinion of the Court that no one may promenade before a place of business of any other person bearing signs, placards or printed notices of any kind reflecting on the honesty or integrity or fairness of the business itself or the proprietors thereof."

This decision is more noteworthy as coming during the sessions of the American Federation of Labor.

SPECIAL BRANDS

If the recent meeting of jobbers and manufacturers accomplished nothing else in the matter of Special Brands, it brought out a long list of good suggestions and furnished food for thought and discussion that should, if followed up, ultimately produce a satisfactory adjustment. At no previous meeting have the members of the two associations shown such willingness to get together, or to come out in the open and state their positions and to offer remedies.

The manufacturers adhered stoutly to their claim that in making goods under special brands their identity was lost and the profits decreased by the extra expense of providing the large number of dies or labels needed. The jobbers held just as closely to their claim of the need on their part of some means of controlling their trade. In these arguments against and for, few if any new claims were advanced. One manufacturer stated "The factories making cutlery are, in some cases, coming to be little more than job machine shops." A jobber claimed that special brands were absolutely necessary to the jobber because his profits on factory brand goods were too small. This naturally brought out the query—If manufacturers sell special brand goods with all the extra expense connected with them at a lower price than they get for goods bearing their factory brands, what about the quality of the special brand goods? In talking with manufacturers, the writer found none who would admit that the goods they made under private brands possessed the same quality as those bearing the maker's name and trademark.

ONE OF THE MAIN OBJECTIONS

offered by manufacturers was that in making goods bearing other than their own mark their business became unstable, because there was nothing to prevent its being taken away from them by the jobbers for whom they were making special brand goods and the said jobbers contracting with another factory for the same goods. One manufacturer suggested that this might be prevented by a joint ownership of the brands between manufacturer and jobber. While this plan has its objectionable features it was recognized as a good suggestion and will, no doubt, receive further consideration.

Many arguments were advanced by the jobbers tending to prove that it was to the retailer's advantage to handle goods bearing the jobber's private brand, as it lessened competition and gave the retailer a better control of his trade. Being desirous to get from the retail dealers themselves the facts in this connection the writer sent out several letters to leading retailers, and it would seem that the responses which follow, hardly uphold the jobbers in this claim. The Secretary-Treasurer of the Colorado Association,

F. C MOYS,

comes out emphatically against any goods bearing other than the manufacturers' own trademark. He writes:—

"In my opinion it is a great mistake for any retailer to handle goods under private brands—either his own or a jobber's. Private brands at best are deceptive. I don't believe any manufacturer will put up his best goods under any one's name but his own.

"The jobber's object in using private brands is, of course, to create a demand for an article which can be obtained only through his house. Any retailer who handles a jobber's private brand goods puts himself absolutely in the hands of said jobber. He has no chance whatever to obtain a competitive price. And he will usually pay as much for the private brand goods (which are undoubtedly seconds or thirds) as he would have to for first quality goods with the name of the manufacturer on them.

"The only possible advantage to the retailer is this—the jobber will usually gladly give the exclusive sale in small towns to any retailer who will tie up with him. This gives this retailer a talking point on brand and quality (?) when a customer compares prices with those of a competitor—whether local or a catalogue house.

"There are, however, plenty of goods which may be obtained on exclusive sale basis from manufacturers who do not sell catalogue houses and who put their own name on the goods as a guarantee of quality.

"A manufacturer cares a lot more for his own reputation than he does for that of a jobber and will be more careful about the quality of goods going out under his own name than those under a private brand.

"My advice to retailers is to push such goods with manufacturer's name on them as are not sold by catalogue houses, and, if your competitor is selling the same goods, get together and agree on a price which will be fair and right—always being careful to not make the prices so high as to make it an object to the consumer to send somewhere else for his wants."

J. H. SMITH,

member of the Executive Committee of the Minnesota Association, in the following letter is equally emphatic in his opinion that it is more profitable for the dealer to handle factory brand goods, especially tools and similar articles. Mr. Smith writes:—

In regard to "Special Brands," I have read the articles in the November 10th number of HARDWARE and think they cover the subject from every point of view.

I have been in the retail business twenty-five years, and have picked up some experience during the time, among other things, I have learned better than to try to keep all the "Special Brands" of goods that are called for, or all of those sold under the manufacturer's own brand, even.

I prefer to sell goods with the manufacturer's brand, for I think they should have the benefit of the reputation they are building up; but there are some, that will make an article of better quality and finish, to order, than they would otherwise, and I have been selling for years a number of excellent articles made under a "Special Brand" with very satisfactory results.

There are manufacturers of tools of one particular kind, such as hammers, for instance, that have built up a reputation for quality, and have maintained it. There is a demand for their goods that cannot be filled by any "Special Brand" goods.

A mechanic generally knows what make of tool he wants, and if we haven't got it he will look elsewhere. He is very seldom looking for a "Special Brand" Tool. Other people are not so particular, and are more likely to accept a substitute.

The following is from

JOHN FREEMAN,

Pontias, Mich., a former retail dealer, now a manufacturer who is therefore able to view the matter from both ends:—

Having disposed of my interest early this year in the wholesale Hardware business, and having recently engaged in a line of manufacturing, if I should offer an expression now on the subject of "Special Brands," it would be from the standpoint of the manufacturer, and I question very much whether it is always the wisest or best policy to discuss in trade papers openly on matters of this kind. However, I have no hesitancy in giving my expression and do it openly over my own signature, as I never paid much attention or gave any particular thought to the many articles that are written on this and similar subjects by anonymous persons.

Regarding the matter of "Special Brands," there are arguments to be offered both from the manufacturers' and jobbers' standpoint; and I think in some cases on certain lines of goods, a private brand is all right; but the matter of branding most every line of goods made by the manufacturer and distributing under "Special Brand," I think is a mistake. As noted, there are, of course, exceptions in some few cases where Special Brands may be all right, and my idea has always been that where a jobber preferred to take up a special brand on a line of goods, that he should then decide to have said line of goods, not only as good as the manufacturers, but a little better, and he should pay more for them to have them better; in other words, he is using a special brand to build up a reputation on, on which he gets protection from the very fact that it is under "Special Brand," and, in order to do so and build up a large trade on said lines, then he should see to it that the goods are fully equal or a little better than the manufacturers, as he has paid a higher price to have them better.

Working on this basis, he can build up a better business from the simple fact that he is getting a better profit on those brands; consequently, he should see that his customers then would get value received. But, on the whole, my decision would be against Special Brands, and where a manufacturer who has spent his lifetime in experimenting and given to the trade a high class of goods, it would seem to me that the manufacturer is the one who should get credit for those goods, and I am inclined to think that, were I the manufacturer of a high-grade and a well-established line, I would prefer to send out my goods under my own branding; for, as I said before, there are good arguments on both sides and in this age of competition from all quarters, both manufacturers and jobbers have got to do the best they can to meet such competition; and, were I a purchaser and consumer of goods, my impression is that I would prefer to buy a line of goods that would bear the factory brand than to have them come to me under any private brand, as then I would have some knowledge of the goods I was getting.

F. W. INGALLS,

member of the Executive Committee of the Ohio Association believes in private brands, provided that the manufacturer's name also appears on the goods, amounting to practically the same thing as a factory brand and a proposition to which, it is likely, few manufacturers would object. Mr. Ingalls writes:—

It has been our experience in regard to special brands of goods, that the manufacturer's name in connection with our own is the most satisfactory brand we can have. This, of course, must be followed up by dealers in small towns having exclusive sale as far as possible. This as a rule cuts out the jobber, but it would be on a class of goods which are usually sold direct from the manufacturer to the dealer.

We believe that the manufacturer and jobber should combine, and in towns of 1,000 to 3,000, place their goods in the hands of one dealer. This, of course, cannot be done on some staple goods, but should be followed out as far as possible in every instance.

On goods that are sold by all jobbers to every Hardware dealer promiscuously, the profits to both jobber and dealer are very small, and no Hardware store can be run successfully if all goods were sold on this basis. The success of the average retail Hardware dealer depends entirely on his efforts to push the sale of exclusive lines of goods which he has. These must always be the very highest grade to be had and his name should be so closely coupled with that of the manufacturer on these goods that a prospective customer does not think of trying to buy them of any other dealer.

We believe that the catalogue house and the department store question can be solved only in one way, and that is that the manufactured goods go to the consumer through the right channels.

L. G. MATTISON,

a Director of the New York State Association has a brand of his own, but believes thoroughly in the factory brand idea and in the carrying, by the retail dealer, of goods bearing the maker's name. He writes:—

I can see how the question of Special Brands is an important one between the Manufacturer and Jobber, and is commencing to cut some figure with the Retailer. We are selling a line of Razors, Shears and Scissors branded "Mattison," and, while trade in these goods is good, I think the same cutlery branded "Wiss" or "Clauss" would smell just as sweet or sweeter to our neighbors. There is a good deal of the "Prophet not without honor save in his own country" business in dealing with your own town's people. A well-known name or trade mark on goods made away off somehere carries more weight with the average customer. A catchy trade mark helps wonderfully.

The word "Jap-a-Lac" carries with it a little of the mysterious and an Oriental flavor which makes a winner of it, when advertised as it is. The same article advertised as Varnish Stain I don't think would have one half the sale.

I am for the manufacturer holding to his original brands so long as the quality of his goods is kept high.

"Holly" Knives have been sold out of our store for nearly fifty-three years, and we would be glad to make it a hundred if possible, providing the quality of the goods is kept up.

This discussion, I believe, will result in a great deal of good, and I hope that the integrity of the Manufacturers' Brands of goods of high quality will be kept inviolate.

In the following communication

HAMP WILLIAMS,

President of the Arkansas Association, gives his own very interesting experience, a nine years' trial should be ample to prove the right or wrong of an idea, and it must be admitted, at least in this case, that the contentions of manufacturers against the use of private brands have been proven true. Mr. Williams writes:—

At your request I give you my views on "Special Brands;" I give mine from actual experience. I have been pushing a special brand of cutlery for about nine years, and in that time I have sold several pocketknives of that brand. I have had a great deal to say to my trade about the excellency of that cutlery, but am sorry to say that but very few of my customers have verified my statements; so, after I have sold this brand for nine years, I have changed my line, and my sales go right on, and not one in fifty asks me for the brand that I have been pushing so hard. On the other hand, when a customer wants a high-grade knife, he will ask for a Rodgers or Wostenholm.

If you sell a Disston's saw, and remove the brand and call it by some other name, you will have to do a great deal of extra talk to make the sale, and furthermore, the chances are that your customer will be dissatisfied with it; he will try to not like it. He will not take the same care of it as he would a brand of his choice. He admits the reputation of the Disston's saw, and doubts the reputation of your special brand.

As for my part, I prefer the "Factory Brands;" they are more easily sold, yet some traveling salesmen say, that it's the hard things you want to take pride in doing; the easy things can be done by any one. I figure like the Irish barber, when he said "he would rather shave ten Irishmen as one Dutchman." His reason was—"that he got one dollar and fifty cents for shaving ten Irishmen, and only fifteen cents for the one Dutchman."

✤

"These liliputian temptations—they remind us that the threads which kept Gulliver down were very small threads, but there were so many of them!"

"It is a sorrowful day when the eyes of youth can gaze openly into the eyes of defeat!"

"Upward through illusion and onward through error—that is life!"

"He fretted at idleness, oppressed by the gayeties of life when they chanced to fall before the hour of the dinner gong and the Tuxedo coat!"

RETAIL ADVERTISING

It is the belief of the publishers of this paper, as already stated in editorials, that the greatest amount of effective work in curtailing the sale of Hardware through catalogue houses, can be done by the retail dealers themselves. Practically the whole success of the catalogue house business in this country is due to clever advertising. Of course it is a fact that they sell some goods, or perhaps a large part of their output at a slightly reduced price, but on the whole they are working on almost exactly the same lines as used by the department stores, that is, to use a large amount of printer's ink and to advertise "leaders" at a reduced price. It would seem, therefore, that the same process which has been used to build up the immense business of these concerns can be utilized as one of the best weapons of the Hardware dealer. Practically every Hardwareman has plenty of opportunities for using printers' ink in local papers, as there are few if any villages large enough to support a Hardware store that does not have at least one weekly, and the use of space regularly by the Hardwareman in these publications will be productive, provided the space is well filled. The average Hardwareman would say that a farmer was suffering from temporary aberration if he rented a piece of ground, plowed it and sowed it broadcast with a mixture of potatoes, corn, wheat and turnips. His harvest, if there was any harvest, would be of little value. Still, there are Hardwaremen who will pay a good price for space in their local paper, then fill it with a disconnected jumble of unrelated articles, their firm name, and they say that they are advertising. Of course it takes a little time to write advertisements, it also takes time to keep the windows clean, and to keep the store in order; to keep the books, and to make collections; to wait on customers, and advertising is just as essential to the success of the merchant as any one of these matters.

We publish herewith illustrations of six Hardware ads. clipped from newspapers. The Rohrbacher & Allen ad. is good, but there is enough material in it for two good advertisements. In this space this firm talks of two widely different articles. The cut is a good illustration for the subject of colors, but has no bearing whatever on the subject of Gas Heaters.

The Roberts Hardware Co.'s ad. shows care on the part of the compositor as well as the man who wrote the advertisement.

The Hills & Wood advertisement is clipped from a live country weekly which circulates largely among well to do farmers. It is well set up, but the arguments would seem to be a little too general. The dealer should not lose sight of the fact that in writing an advertisement he is talking not to one person, but to several hundred and that unless he says something, his advertisement will have no effect. Simple generalization does not bring business.

The ad. of the F. W. Heitmann Co. would have been more effective if proper judgment had been used by the printer. This ad. is not set up in accordance with the old adage "he who runs may read." If in setting up the type of this ad. the compositor had used both upper and lower case type, the reading of it would have been much easier.

The ad. of J. J. Foley comes under the same heading, that is, of being a little too general in character, but in this case the printer has proven himself capable of getting up an ad. that is attractive.

The ad. of the John E. Bassett & Co. is on the argumentive style and surely should have produced results. In this ad. they make a plain statement, or rather several statements, concerning one article; they talk straight from the shoulder, telling the story as briefly as possible, but at the same time is in an effective manner.

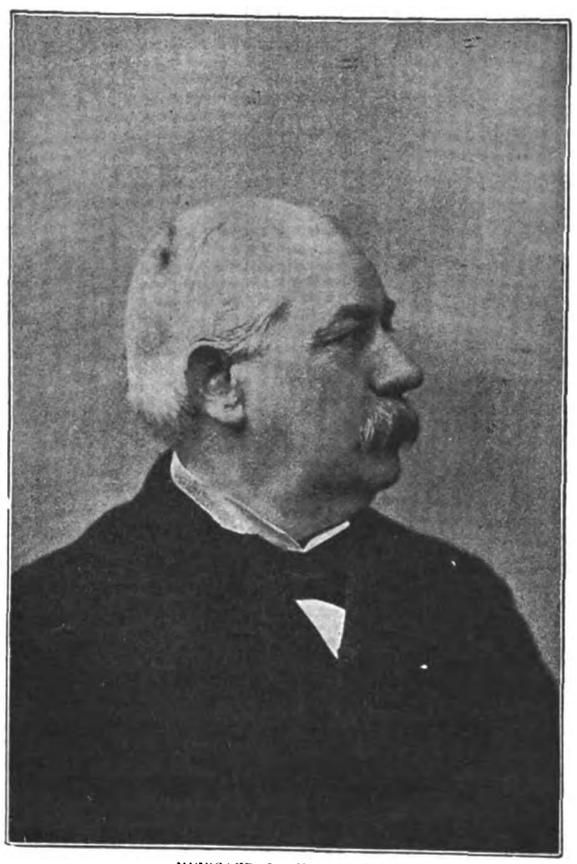
CONVENTION ECHOES.



We have been requested by a number of those present at the banquet given at the convention by the National Hardware Association, for the poem delivered by the Hon. Webster R. Walkley. We are unable to print it in full, but we will give enough of it to convey some idea of its merit. It was well worthy of the reception the reading of it obtained from the members present.

POEM.

By WEBSTER R. WALKLEY.

Listen to the murmurings of the sea—the restless sea:
In tones more eloquent than ours it speaks to you and me—
Sometimes in voice of thunder it falls clanging on our ears,
Again in softest whispers it calms our wildest fears.
Within its glassy depths it holds the mystery of death,
Above its rolling waves is borne the tropic's sweetest breath.
From pole to pole, from zone to zone, it reaches round the earth
And washes shores of every clime where Liberty had birth.
It touches India's coral strands, and Greenland's icy shore,
It drinks the rivers of the land, and still it cries for more.

O sea! mirror of God's omnipotence,
Reflecting His greatness and His power,
Thou teachest man his rule ends at thy shore;
He may touch the heart of mountains, and learn
That fires are glowing 'neath the world we tread.
He may draw the lightning from the Heavens,
And curb, direct and use this subtle force;
Yet cannot control a single ripple
That dances on thy bosom, nor a wave
That rolls above proud Nations' sunken fleets.

WEBSTER R. WALKLEY.

To the ladies whose presence doth grace this occasion
We bring kindly greetings, and need no persuasion
To say that their beauty and smiles, their sweet accents of speech
Make the hour as enchanting as the strolls on the beach.

To women, our mothers and daughters, our sweethearts and wives
We give the best of ourselves—for no business thrives
Unless an Angel of Love shares its joys and successes
And makes home all the brighter when trouble depresses.

Father, mother, husband, wife,
Sweetest words in all our tongue.
Music in the heart keeps swelling,
Though by human lips unsung.
Angel voices join the chorus,
Heavenly choirs take up the song,
Earth is heaven while love endureth,
Truth will ever conquer wrong.

* * *

And thus to you I make my bow;
You say 'tis but an old man's greeting;
Yet I bring a lover's heart
And perchance from out this meeting
I may catch the fire of youth.
So let younger men now count the cost,
For I have known some older men
To win what younger men have lost.

* * *

Competition is not young, and the older men know it;
Our books of past years, and our balance sheets show it;
It is as old as the oldest, if it comes in new dress
It has the same spirit, the same hopes of success.

'Tis of too large a growth to be strangled, you know
You can't stamp it under your feet as weeds in a row;
'Tis a giant in height, and a giant in size,
We must meet it with wisdom—we will if we're wise.

You've had some discussions, the results I've not heard;
I can only hope by your actions, your votes and your word
You have vanished some clouds which seemed to appear
In the sky arched above us, and that now it is clear.

To these younger men who have their fortunes to make,
We come with glad tidings, though their lives are at stake,
And the Temple they seek is far away on the height;
Conquering forces they know, are the Truth and the Right.

The ladder that reaches way up to success,
Must stand on a rock which no force can depress;
With your feet on the rounds, be quite sure of your hold,
Let not false faith or false courage make you seemingly bold.

'Tis the iron of the mines which gives us our trade,
'Tis iron in the blood from which heroes are made;
'Tis iron from the furnace which adds to our wealth;
'Tis iron in the blood which gives our Nation its health.

* * *

The real man is invisible, unseen,
A soul within reveals his worth and power.
It lightens up his face with smiles of truth
And looks beyond to an immortal life.
He is taller than his height. His right arm
Doth not measure strength. His real nobler self
Reaches, expands toward the Infinite.
He is broader than his shoulder or his breast
Weightier far than avoirdupois of scales.
Truth in the soul seeks light. As seeds do burst
And spring from Mother Earth to bud and flower;
So the spirit of a man doth make great,
Such are the pivots on which epochs turn.
Such men make the history of the world,
Sometimes at stake in martyr fires they burn,
Yet new eras dawn.

* * *

Angelo, out of marble wrought
With chisel, and with brain and thought
The statue of a Moses.
If out of earthly clay,
A man in life's brief day
Can carve a form so true,
What can our Creator do
Who made both man and clay,
The sun to rule the day,
The moon to govern night,
And set ablaze with light
The golden stars in Heaven.

* * *

* * *They call us old, and old we are;
We have made the ocean voyage—we are sailing o'er the bar—
Just around the curving hill, where the water lies so smoothly, so glassy and so still.
Is the Harbor of our refuge, the port to which our life ship's bound;
May the precious freight it carries be in perfect order found.

* * *

* * * Weavers at the Loom of Life,
Let broken threads ne'er pass thy watchful eye;
See the shuttle backward, forward flying,
Living best is best prepared for dying.

In referring to the ex-presidents, Mr. Walkley had something to say of each of them. We give what he says of Mr. Bigelow and Mr. Supplee:

Bigelow, courtly and cultured, from Boston, you know,
Friend of firm prices, and fair profits, as his business will show.

Supplee, your friend and my friend, of many long years,
With hope to lead and faith to guide, he walks through the Valley of Shadows and Tears.
He knows what I know, he feels what I feel—the loss of an only son—
They were boys together. We have tried to say, "Thy will, Oh, God, be done."

What a host of these men, I might call them by name,
Toiling in life's vineyard, yet living with a higher aim.
Leaving sunshine in their pathway—scattering blessings as they go,
Making many lives the brighter, while they journey here below.

RECENT TRADE PUBLICATIONS.

THE GOODELL CO., Antrim, N. H., are sending to their patrons a copy of their catalogue "C," included in the contents of which are table cutlery, carvers, butcher and miscellaneous knives, etc. The index of this catalogue has been made exceedingly plain and comprehensive, and the numbers of all goods have been placed on the margin of the page so that in running quickly through the book they are very readily seen. A great convenience to the dealer will be found in the fact that they have left a space for cost prices to be inserted in the dealer's private code. Bond paper has been used in the compiling of the book, which has been found to be the best for use in writing and erasures. The book is well printed and the clearness and general excellence of the cuts are very noticeable. The binding is flexible, but of extremely tough stock. The Goodell Co. state they will take pleasure in supplying Hardware and cutlery dealers with a copy of the above excellent work.

SIDNEY SHEPARD & Co., Buffalo, N. Y., have issued a neat envelope size pamphlet catalogue of thirty-nine pages illustrating and describing their Enameled Ware, which is made in two qualities, the Aetna and the Buffalo. The Aetna is a carefully assorted, high-grade, two-coat ware; the blue body coat, almost completely covered by the white mottling, giving a light grayish color. It is attractive in appearance, and tough and durable in wear. Their Buffalo Enameled ware is highest quality, four-coat ware, white inside, rich blue outside, mottled with pure white and a dash of green. They state their Enameled Wares are made by the Old German Process, of the finest materials. They also publish another pamphlet catalogue very much larger than the above, exploiting "Notable Kitchen Specialties" of their manufacture. This is a high-grade book and contains excellent half-tone illustrations of the articles exploited. Included in this book are the Improved Perfection loose bottom cake tins, which justify their name, enabling the housewife to remove her cake in perfect condition from the tin every time; the Savory Seamless Roaster, the great selling feature of which is the seamless bottom; self-sealing pie tins; shaker sifters; clean cut cake tins; Gilmore grater; Buffalo steam egg poachers and cereal cookers; double quick boiler, combination dippers, etc., etc. These books should be in the hands of all interested dealers, and will be sent upon request.

THE PORTER SCREEN MANUFACTURING CO., Burlington, Vt., have just issued their 1905 catalogue, which is very finely gotten up, being well printed on heavy coated paper, illustrated throughout in excellent half-tones. The book exploits their screens in a most attractive manner. All their doors are made of selected kiln dried pine. In hard woods the famous Vermont Birch and Maple are used exclusively. Only recognized brands of standard painted cloth cover Porter Screens. On their doors Numbers 842, 312 and 12, they use the rustless galvanized wire cloth. Each of their high-grade doors is sanded and smoothed after assembling; the inside edges of the panels are chamfered, and the edges of the wire cloth are covered with raised moulding mitred at the corners. Their large list of free delivery points is of special value to the buyer of less than carload lots and will be sent upon request. They make a specialty of Landscape work. They state: "The idea of painting scenes in color, true to nature, we believe, is original with us. The effects produced are beautiful, bringing out the details in each subject so perfectly one can see little difference between those painted on wire cloth and the same scenes done on canvas." Their landscape work should not be overlooked by the retailer seeking a trade winner having a good margin of profit. Some of the landscaped screens they carry in stock. Now is the time to secure one of their catalogues.

THE GLEN MANUFACTURING CO., Ellwood City, Pa., are distributing Supplement 2, exploiting their fences for lawns, schools, churches, cemeteries, public buildings, farms, etc., also folding mats, tree guards, hitching posts, etc. The supplement is a large pamphlet of eight pages 14½ by 10½ inches, finely printed and illustrated, accompanied by list prices. The "Glen" steel picket fences have been made for fourteen years and are extensively used throughout the world for protection and adornment. They are made in four heights and two sizes of rod—capable of seven different constructions, and of being erected on uneven as well as level surfaces—on stone walls or wood bases as well as in the ground, on wood posts and rail, or complete with their steel posts and rail. They cordially invite correspondence that they may submit definite quotations on the material required for any proposed fence. Send for above catalogue.

THE N. & G. TAYLOR CO., Philadelphia, Pa., have just issued "Ye Eleventh Arrow of Ye Second Quiver" as attractive and newsy as ever. Rufus the Roofer gives his son a quiet talk to the effect that "What is worth doing, is worth doing well," or in other words, in roofing a building, use the Taylor Old Style, and it won't be necessary to be continually apologizing for leaks, etc. Another interesting story is one entitled "The Adventures of the Rusty Roof," by Sheerluck Holmes. A clever verse is written to the metre of "In the Good Old Summer Time," presented with a few bars of music, which tells the sad tale of cheap roofing. The book closes with several very good testimonials, maxims, etc., and ends with the following suggestive simile: "Bees have been putting up their honey in six-sided cells for six thousand years because no better way has been found."

THE AMERICAN MANUFACTURING & NOVELTY CO., Inc., Erie, Pa., are the authors of a pamphlet illustrating and describing products of their factory, which are all included under the head of "Good Wood Goods." This comprises goods such as ladders, settees, lawn swings, household wooden ware, etc. Their line comprises many articles not mentioned in the above catalogue. They state that estimates on any articles in the Specialty Line will be cheerfully furnished. The material from which their goods are manufactured is carefully selected, and the work in every case is performed by competent workmen. The volume of business during the past year has been such, they state, that they have been compelled to greatly enlarge their plant, and install additional machinery, to be able to take care of their trade promptly. Their catalogue will be sent upon request to those interested in this line.

THE ATLANTIC STAMPING CO., Rochester, N. Y., have recently issued a very handsome catalogue, which they designate "Catalogue A," exploiting Atlantic high grade tin, copper and galvanized ware, manufactured by them. This includes such goods as tin dippers, bread pans, tin pails, wash boilers, dish pans, cuspidors, wash tubs, oil cans, refrigerator drip pans, galvanized measures, etc., etc. Each article manufactured by them is thoroughly tested and inspected, and, they state, their friends may be assured their goods are as nearly perfect as careful attention to details renders it possible to construct. They call special attention to the re-enforcement they use on their pails. The re-enforcement passes from the inside of the pail over the rim and under the ear, thus covering the side seam, re-enforcing the pail both inside and outside, and rendering it impossible for the ear to pull out. To apply to this catalogue they have issued their Number A. 1 Discount Sheet, which prices are current at time of publication, and subject to change without notice. They make no freight allowance on shipments of less than 100 pounds. The above literature will be sent upon request.

THE FRICK CO., Waynesboro, Pa., are the authors of a very handsome and attractive catalogue. They are manufacturers of Ice and Refrigerating Machinery, and in this catalogue, "Twentieth Anniversary Greeting," they illustrate in a measure, the methods of handling their work. They have used heavy coated paper in their catalogue and the printing and illustrations are exceptionally fine. Their system and machinery, they state, are their own inventions and protected by valuable patents. They guarantee absolute indemnity from loss by reason of litigation growing out of alleged infringements. They keep abreast of the times, and claim they are thereby enabled to manufacture the most up-to-date apparatus on the market through the constant making of new improvements and the taking out of patents or the acquiring of others by purchase. They state they build only the highest grade of machinery and of the most modern and efficient type—strong, durable, convenient, economical, symmetrical—and as everything is built on the interchangeable system, and every detail carried in stock, they solicit critical examination and exhaustive tests by competent persons. Send for their catalogue for all information on this subject.

EASTERN HARDWAREMEN EXPANDING.

PROGRESSIVE PORTLAND CONCERN.

No Hardware store in New England and but few in the entire country have as large window displays as does the Edwards & Walker Co., of Portland, Me. The store occupies nearly a half block and has a frontage of 125 feet. This entire front is fitted with plate glass as is the side of their store which extends about 120 feet—making in all nearly 250 feet of windows.

During the past year the Edwards & Walker Co. have branched into other lines and have taken on two more stores, so that they now occupy nearly half a block. The store is well arranged—the street floor being devoted largely to retail, while the wholesale stocks are carried in the floors above. The main floor is finished in natural wood, with show cases, and shelving to match The ceiling is also hard wood, oiled and varnished—the entire combination being exceedingly pleasing. Among new lines recently added and found very satisfactory is sporting goods. The success of the Edwards & Walker Co. with this line plainly proves that sporting goods is a line for the Hardware store—and the Hardware stores are fast becoming the sporting goods stores here in New England as they have already in the west.

It may seem rather odd that down here in Maine, where the towns and cities are growing slowly, where the country is well developed and where the new building is going on very slowly, that two of the large Hardware concerns would be growing rapidly. In Bangor, Me. the old established Hardware house of Rice & Miller have recently doubled their store. This has been done by taking the store adjoining and cutting an arch through, and making a large double store. The business of this progressive firm has been growing rapidly—until the old store was positively outgrown. Both a wholesale and retail business is carried on, and now the two departments of the business will be kept separate—which will very materially aid in prompt shipments.

Rice & Miller's new store will be devoted entirely to the retail end, while the wholesale will be carried on from the old store—where orders will be laid out, the shipping will be done, etc. Wholesale stocks are carried in the floors above, as well as in a large warehouse, adjoining the railroad, and another warehouse directly in the rear of the new store. The new store of Rice & Miller is a model; being fitted with up-to-date plate glass show cases, hard wood shelving, and having large windows in the rear is especially light and attractive. The entire stock was moved and placed on the shelves in so quick a time that the regular business of the concern was not interferred with. The arrangement of stock is perfect, and this part of the new store was left largely to the employees—to whom much credit is due, especially Rice & Miller's head clerk, Robt. Burr. With their enlarged store Rice & Miller will now be in a still better position to handle their wholesale trade—and the good wishes of the firm's many friends in the trade go with them in their large store.

HAMMERNAIL.

A GOLDEN WEDDING.

On November 15, the president of the Glidden Varnish Co., of Cleveland, celebrated his golden wedding anniversary; and two days later, November 17, the event was still further commemorated by a banquet and theatre party given by Mr. Glidden to the employes of the company. Speaking of this event a Cleveland paper says:

"Good fellowship and good feeling between employer and employee was beautifully manifested on Thursday night at the Colonial Hotel, when Francis Harrington Glidden tendered his employees a banquet in honor of his fiftieth wedding anniversary, which took place on Tuesday. The feeling the employees have for their employer was shown in a neat presentation speech made by an employee in presenting Mr. Glidden with a large loving cup and a gold headed cane. The loyalty the employees have shown (some of whom are well along in years) to Mr. Glidden shows with what esteem this man has been held. About one hundred and fifty employees and their wives were present at the banquet, after which the party attended a performance at Keith's. Under the plate of each one present was a dainty card with a cut of an old daguerreotype, underneath which was the fitting phrase, 'When we were twenty-one.' A remembrance which speaks volumes for the employer to his employees."

*

A good man gone wrong attracts more attention than a bad man gone good.

For every dress that is a "poem" there comes soon or late the rag time.

In his heart every man holds the impromptu speech he will make when the unexpected testimonial is handed to him.

Some of us make such an effort not to do anything bad that we do fail to do anything good.

The witty man is the one who laughs at your jokes.

The to-morrow you are afraid of will soon be the yesterday you long for.—*Chicago Tribune.*

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C, and St. Paul Building, New York City.

PATENTS EXPIRED NOVEMBER 22, 1904.

373,433. DINNER PAIL. W. Bord, Green Island, and G. H. Ennis, Troy, N. Y.
373,464. COMBINED STEP LADDER AND IRONING BOARD. I. B. Mahan, Dunkirk, Ohio.
373,495. SASH CORD FASTENER. J. Rodgers, Pittsburg, Pa.
373,501. LAWN MOWER. F. Trump and W. A. Scott, Springfield, Ohio.
373,527. MANUFACTURE OF KNIFE BLADES AND BOLSTERS. G. Havell, Newark, N. J.
373,543. DOOR CHECK. S. Wallace, Washington, D. C.
373,560. KNIFE HANDLE. F. J. Kaldenberg, Tarrytown, N. Y.
373,561. FISHING ROD JOINT. T. Kirker, Belfast, Ireland.
373,774. DOOR CHECK. G. A. Howard, W. H. Hull and C. S. Black, Buchanan, Mich.
373,620. HINGE. W. H. Taylor, Stamford, Conn.

PATENTS ISSUED NOVEMBER 22, 1904.

775,378. PLANE. J. Muehl, Cleveland, Ohio.
775,379. SAFETY RAZOR. A. Muller, Merscheid, Germany.
775,398. WRENCH. F. Hachmann, St. Paul, Minn.
775,427. SCREW HOLDER AND DRIVER. C. Lusted, Sr., Lafayette, La.
775,463. MOP OR WIPER. H. O. Thomas, Harrisburg, Neb.
775,524. WINDOW SASH LOCK. J. Deggin, Cleveland, Ohio.
775,547. AUTOMATIC WINDOW CLOSER. H. C. Smith, New York.
775,561. CLOTHES PIN. A. C. French, Daingerfield, Tex.
775,593. SASH FASTENER AND LIFT. W. W. Bauman, Morton, Ohio.
775,663. SPRING CLAMP OR HOLDER FOR HOLDING THE LIDS OR COVERS OF PUDDING BOILERS, &C. D. MacFarlane, Scotstounhill, Glasgow, Scotland.
775,727. FISH HOOK. W. E. Koch, Whitehall, N. Y.
775,856. TACK PULLER. J. M. Ranck, Allegheny, Pa.

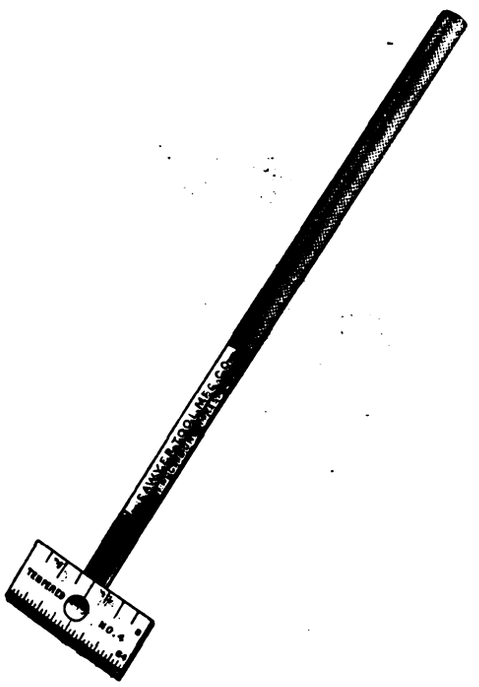
PATENTS EXPIRED NOVEMBER 29, 1904.

373,824. SASH HOLDER. C. P. Gay, Providence, R. I.
373,837. HINGE. J. Long, Asbury Park, N. J.
373,872. CORK SCREW. E. D. Williams, Boston, Mass.
373,919. AUTOMATIC CHEMICAL FIRE EXTINGUISHER. E. W. Beach, Buffalo, N. Y.
373,929. GAGE FOR SQUARES. T. J. Gillette, Syracuse, N. Y.
373,935. LAMP WICK. F. M. Lytle, Boston, Mass.
373,950. STOVE PIPE JOINT. C. H. Sweet, Lamar, Mo.
373,958. LAMP FOR DECORATING AND ILLUMINATING PURPOSES. J. H. Barth, Terre Haute, Ind.
373,970. WINDOW GUARD. G. Di Gaetano, New York, N. Y.
373,984. DOOR CHECK. J. W. Johnson and H. C. Brown, Jersey City, N. J.
373,985. SASH FASTENER. W. C. Johnson, Newark, N. J.
373,991. FISHING HOOK. C. D. Lockhead, Middletown, N. Y.
374,014. COAT AND HAT HOOK. F. Taylor, Lowell, Mass.
374,015. COAT AND HAT HOOK. F. Taylor, Lowell, Mass.
374,043. TARGET TRAP. F. C. Damm, Cleveland, Ohio.
374,063. TOOL HANDLE. W. H. Hammond, New Bedford, Mass.

PATENTS ISSUED NOVEMBER 29, 1904.

776,043. DUST GUARD FOR WINDOW SHADES OR BLINDS. J. C. Bahme, Allegheny, Pa.
776,046. SAFETY GAS BURNER. A. C. Carey, Boston, Mass.
776,088. WHEELBARROW TRAY. C. B. Rockwood, Saginaw, Mich.
776,109. GEARING FOR WASHING MACHINES. H. Cammack and W. J. Schoonover, Des Moines, Iowa.
776,152. CORK EXTRACTOR. L. Strohacker and E. Strohacker, Chicago, Ill.
776,153. DETACHABLE SPRING HINGE. J. D. Swacick, New Brighton, Pa.
776,162. JAR CLOSURE AND FASTENER. E. Abramson, San Francisco, Cal.
776,178. ARRESTING DEVICE FOR DOORS, GATES, &C. E. A. Guedeney, and E. E. Harles, Paris, France.
776,213. RAZOR STROP. G. C. Blasdell, Towanda, Pa.
776,245. DOOR SECURER. J. J. Huyler, Newark, N. J.
776,448. LUBRICATOR FOR HANDSAWS. E. Young, Jeffersonville, Ohio.

*



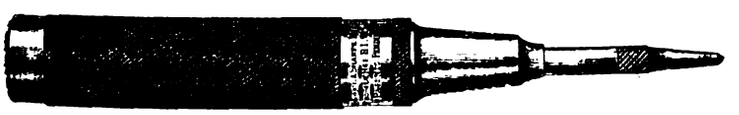
By some unexplainable carelessness in our Proof Reading Department, the advertisement of the New York Metal Ceiling Co. appeared in our Convention Number containing several errors. A corrected advertisement will be found on another page of this issue of HARDWARE.

Digitized by Google

NEW GOODS AND SPECIALTIES.

ONE-INCH RULE, WITH HOLDER No. 2.

The Sawyer Tool Manufacturing Co., Fitchburg, Mass., are offering to the trade the one-inch rule illustrated herewith, having for its principal use, measuring in places where a longer rule

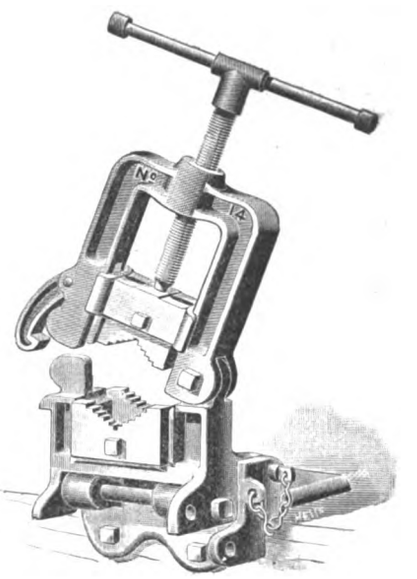


ONE-INCH RULE, WITH HOLDER NO. 2.

cannot be used, as in holes and cavities. The Rule may be swung at any angle with the holder, and will retain its position. It measures five inches over all. The rules are furnished in Nos. 1, 2, 4, 7, 8, 15 and 16 graduations.

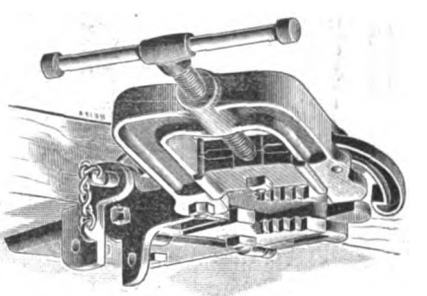
AUTOMATIC CENTER PUNCH.

The Brown & Sharpe Manufacturing Co., Providence, R. I., are placing on the market the Automatic Center Punch, illustrated. In designing this tool every care has been taken to combine lightness and simplicity with durability. The various parts are proportioned to withstand the most severe usage to which a tool of this character should be subjected. It combines features that make it much more convenient and accurate for laying out work to be machined or drilled than the ordinary center punch and hammer. All parts are of steel, proportioned and adjusted to avoid liability of getting out of order. The parts most subject to wear are carefully hardened. The tool is self-contained, the striking mechanism being enclosed in the knurled handle, which is of such a size and form as to be conveniently held in the hand. It is about 5¼ inches long and 5/8-inch diameter. When following a line or establishing a point by the intersection of



AUTOMATIC CENTER PUNCH.

lines, one hand can be free to guide the point or hold the magnifying glass end and, after the point is located, it is not apt to slip and lose the setting, as just a downward pressure of the handle releases the striking block and makes the impression. Another advantage to which the makers direct attention and which mechanics appreciate, is that the punch marks are all of uniform depth, therefore more easily and accurately followed than when of varying depths.



HENDERER'S DOUBLE HINGE VISE.

E. Henderer & Co., Wilmington, Delaware, are the manufacturers of the Double Hinge Pipe Vise, patented September 27th, 1904, now being placed upon the market. This vise was designed

HENDERER'S DOUBLE HINGE VISE.

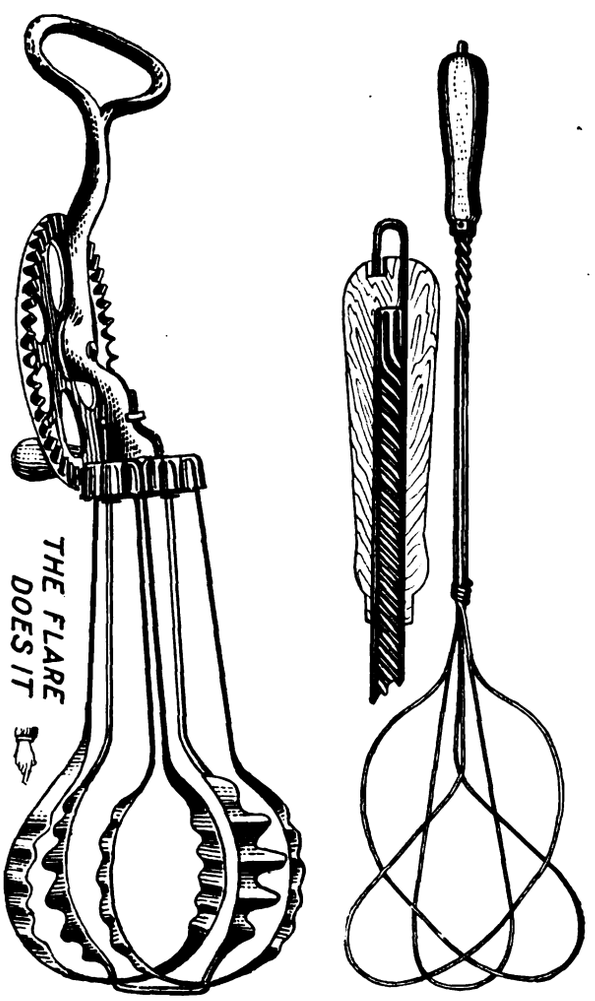
by the inventor to replace the old style Angle Plate Vise. It can be used either vertically or horizontally, and is held in position by use of a taper pin, see illustration, thus avoiding the previous

necessity of removing from bench to secure either position. Though at present they are made only in the one size, it is the intention of the manufacturer to add thereto a smaller size within a short time.

BISSELL'S "CYCO" BEARING "ELITE" SWEEPER.

The Bissell Carpet Sweeper Co., Grand Rapids, Mich., with Eastern office at 25 Warren Street, New York, are offering the trade a new construction in Carpet Sweepers, Bissell's "Cyco" Bearing "Elite," illustrated. The case of the "Elite" is entirely

BISSELL'S "CYCO" BEARING "ELITE" SWEEPER.



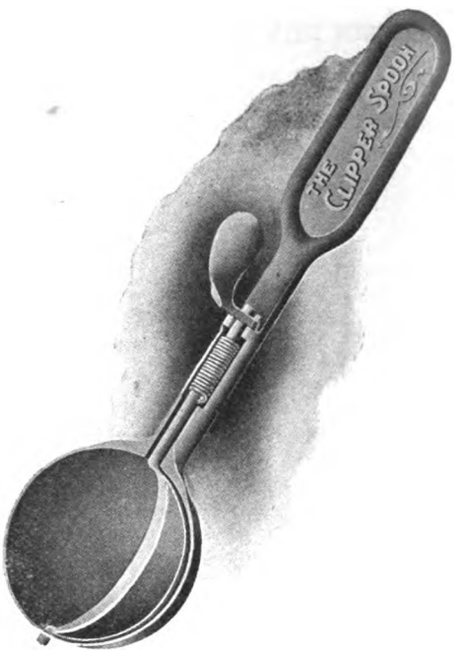
new in its shape, being oval, thus giving an opportunity to secure an artistic effect by using one continuous piece of veneer, and at the same time giving the Sweeper unusual solidity. The woods

Digitized by Google

used in making the case of this Sweeper are of the choicest, it being made in Hungarian ash, antique finish, curly birch, Brazilian rosewood and curly maple. The bail and metal ends are also specially designed to harmonize with the artistic lines of the case, all the trimmings being full nickel. This machine embodies all the latest valuable patented improvements, such as "Cyco" bearings, dust-proof axle tubes, anti-raveler, reversible bail springs, metal handle fastener, etc. The price at which it is offered is very reasonable, considering its quality, and a large sale is anticipated. It is included in the concern's Christmas offer of "Cyco" Bearing Sweepers.

HOLT-LYON SPECIALTIES.

The Holt-Lyon Co., Tarrytown-on-the-Hudson, N. Y., are the manufacturers of the Holt's Improved Dover Egg Beater, which is one of the latest improvements on the "Dover" as originally constructed. The Beaters are larger by a third than some of the competing egg beaters now on the market. The dashers

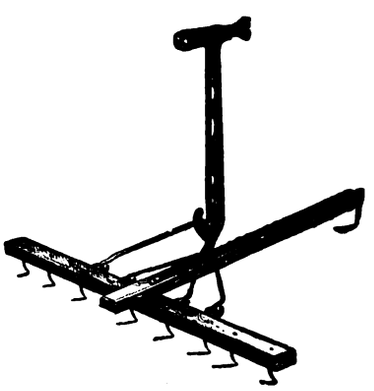


HOLT-LYON SPECIALTIES.

are made thicker, wider and more flaring in the design, and this is claimed as being an important improvement. They also make a Rug and Carpet Beater, which is claimed to be unexcelled in all the prominent characteristics that make a carpet beater invaluable; good material, durability and elasticity combined constitute it a good seller. It is made from the best furniture spring steel wire, tinned and provided with a hard wood handle with brass ferrule. It is made in four sizes, all to be retailed at a moderate price.

THE CLIPPER SANITARY ICE CREAM SPOON.

Giles & Neilson, Troy, N. Y., are the makers of the Clipper ice Cream Spoon, which presents a number of novel features, designed for its evident utility, and is shown in the accompanying illustration. It is intended to supply the demand from Druggists for the purpose of selling ice cream soda, for which the spoon is admirably fitted, and a patent has been granted covering all its claims. As shown in the illustration it is provided with cleaners, which, by a pressure of the thumb lever, revolve in the bowls, cutting the cream clear of the bowl when emptying it. The arrangement of the working parts is such that they can be taken apart by removing the thumb piece. As not a bol screw, gear or spiral is used in its construction, this makes it easily cleaned, and the spoon is kept clean in s sweetness. The cup and cleaner are made of white met corrosive, and the handle is of solid bronze and heavily



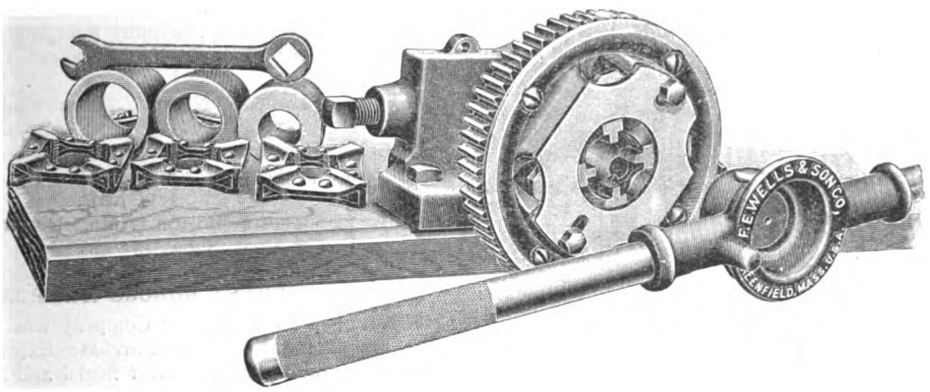
THE CLIPPER SANITARY ICE CREAM SPOON.

plated. Every spoon is warranted by the manufactur further particulars, address the manufacturers as above.

THE EXCELSIOR CARPET STRETCHER.

It will be interesting to those in the trade to learn that W. Montross, of Galien, Michigan, has withdrawn fro logue Houses his "Excelsior" Carpet Stretcher, which trate herewith, and because of this action he certainly the support of all Hardwaremen. The "Excelsior" str

THE EXCELSIOR CARPET STRETCHER.

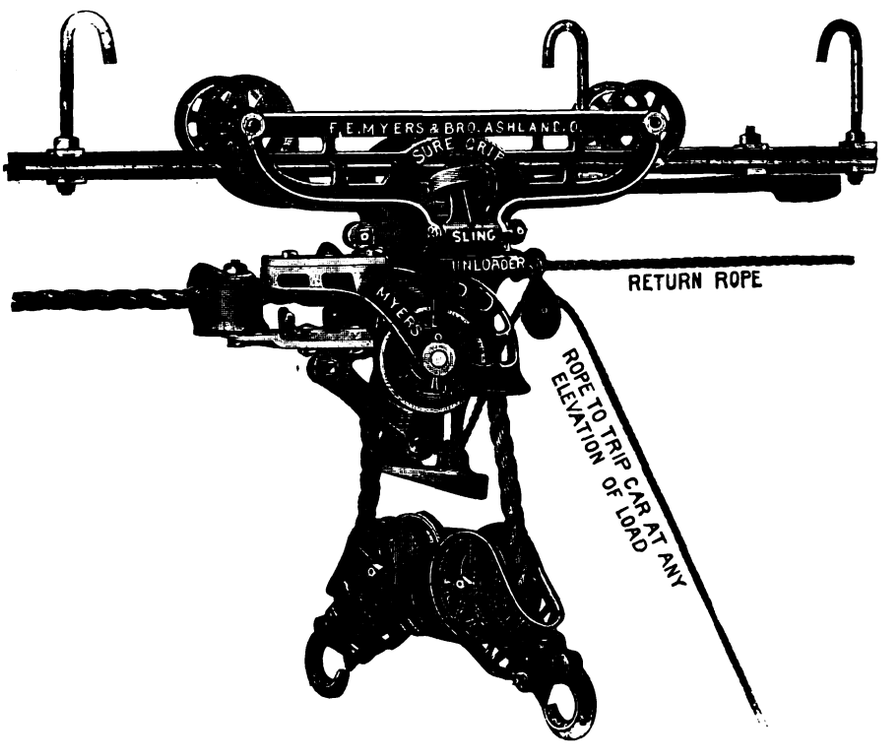


operated with great ease, and is a combination stre tack hammer. A glance at the accompanying illusti show how the "Excelsior" is operated and the extent t has removed the back-aches and profanity so freely pr the old-time article. It weighs only one and a half pou sold to dealers at a price permitting them to realiz profit.

"WELLS" PIPE THREADING MACHINE.

F. E. Wells & Son Co., Greenfield, Mass., are putt market a new pipe threading machine, as shown he threading one-inch to two-inch pipe. It is a very simp little machine, weighing about 45 pounds, that is used a hand die stock, only having gears to multiply the po one man alone can easily thread pipe that usually tak a hand stock. For sizes of pipe, below the sizes list chine one of the regular No. 1 stocks is used, which

Digitized by Google



to the small pinion and is used for operating machine. This can be readily taken off and used as an ordinary hand die stock for above sizes. The die is held in the large gear, which has a threaded shank that screws into the main frame and acts as a lead screw to start dies. The pipe is centered by means of bushings the same as in an ordinary die stock, and is held from turning by two vise jaws on the back of machine operated by set screws. The gears are all machine cut and all castings are of malleable iron to save weight and give ample strength, even for the hardest usage. It can be bolted to either a bench or post and the vise, which is a part of the machine, can be used in the place of an ordinary pipe vise. The "Economy" dies, made by F. E. Wells & Co., are furnished with the machine, but any standard solid square pipe die will fit. The moderate weight and small amount of work permit its being sold at a low price that every one can afford.

"WELLS" PIPE THREADING MACHINE.

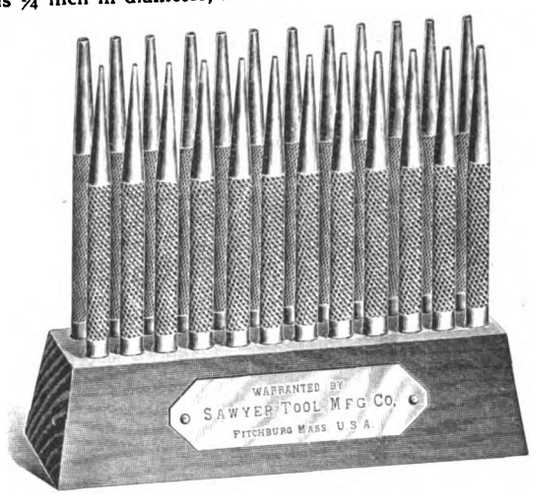
THE MYERS SURE GRIP SLING UNLOADER, WITH EXTRA LONG TRUCK.

F. E. Myers & Bro., Ashland, Ohio, are placing upon the market the Myers Sure Grip Sling Unloader, which has been rebuilt throughout. This machine, as now constructed, is so arranged that it elevates the load at right angles with the track, with a result that when the load is discharged in the mow it lays parallel with the load on the wagon, doing away entirely with the quarter turn of the load which has always been a serious objection on all other sling cars unless they use a separate attachment. The sling unloader is constructed entirely of malleable iron, is very heavy and of sufficient strength to withstand the hard usage to which such machines are subjected. The ordinary sling car is constructed to hold a certain weight load. If by chance the operator overloads the carrier, the result is that the rope slips through the lock. This has been entirely overcome on the Sure Grip Unloader, as it is so arranged that the tension of the rope lock is regulated entirely by the weight of the load. In other words, the heavier the load the greater the tension of the rope lock. The result is that it is impossible for the rope to slip through the lock. The Sure Grip Unloader operates automatically and is tripped by the sling pulleys striking a plate immediately under the machine. It is also arranged with a separate trip rope, by the use of which the load may be carried into the mow at any elevation desired without going entirely to the top of the barn. This is a great advantage when used in modern barns, which are built without cross beams, and saves a great deal of time and walking of the horse. This machine is built for use on their regular Double Angle Steel Track and for Wood Track. Trucks are extra long, so as to distribute the load on two hanging hooks at all times.

THE MYERS SURE GRIP SLING UNLOADER, WITH EXTRA LONG TRUCK.

RIFLE CLEANING ROD No. 605.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., is offering the rifle cleaning rod shown herewith. Instead of having a bristle tip, as in the company's No. 505 rod, this one has a brass wire tip, and is furnished in .22, .32 and .38 calibers. It can also be furnished on special orders in other calibers. The company has also added a line of Government cleaners in .22, .24, .30, .38 and .44 calibers, and on order it will furnish special calibers up to .50.



RIFLE CLEANING ROD, NO. 605.

SAWYER NAIL SETS No. 1,522.

Sawyer Tool Manufacturing Co., Fitchburg, Mass., is offering the new and desirable pattern of Nail Sets shown in the accompanying illustration. They are made of the same quality of steel and treated by the same process as the company's nail sets No. 152, varying only in the diameter of the stock used in their construction. They are offered the Hardware trade to meet the demand for a popular priced set. The stock in the two smaller sizes is ¼ inch in diameter, and in the two larger sizes 5-16 inch.

SAWYER NAIL SETS NO. 1,522.

The illustration shows the excellent method of displaying the goods in the store. Every customer is furnished an ample supply of these nicely finished black walnut boxes, with the company's nickel plated plates guaranteeing the quality of the sets. The sets are made in four sized points: No. 1, 0.055; No. 2, 0.078; No. 3, 0.115, and No. 4, 0.130 inch.

AN INTERESTING BOOKLET.

A booklet recently issued by the Winchester Repeating Arms Co., New Haven, will be of special interest to every one connected with the Hardware trade, who includes in his stock a line of cartridges. It contains a description of a number of instances where cartridges have received very severe tests, by falls and fire, without exploding. A number of interesting illustrations are given. In sending us this booklet the Winchester Co. says:

"We were prompted to issue this booklet in view of the commonly existing misconception on the part of the transportation and fire insurance people and firemen as to the safety of handling and stocking cartridges and loaded shotgun shells. We have found where handling and stocking cartridges and shotgun shells is deemed dangerous that the belief is due to classing cartridges and loaded shotgun shells with bulk powder and other high explosives. This is an entire misconception of the properties and characteristics of the goods. In the introduction to the booklet, we have called attention to the difference between cartridges and loaded shotgun shells and high explosives in bulk, and, by tests which we describe, prove the truth of our contention.

"Since preparing this booklet, we have gone more fully into the subject of the action of cartridges and loaded shotgun shells when subjected to fire, and have compiled statistics which satisfy us conclusively that this class of goods is much less combustible than many other lines carried in the ordinary Hardware dealer's store.

"We wrote 1,322 dealers in metallic cartridges and loaded shotgun shells, asking them whether or not in their experience they had had any fire due to the explosion of metallic cartridges or loaded paper shot shells while in storage, and if they had had fires from this or any other cause, to state whether or not the fact that ammunition was in stock interfered with the firemen in controlling the flames.

"None of the parties written to had suffered from fires caused by the explosion of ammunition.

"One hundred and ninety-one dealers replied that they had suffered from fires, but that the presence of ammunition in the building interfered in no way with the work of the firemen.

"Thirty-nine dealers replied that they had had actual experience with fire, but made no reference to firemen.

"Seven had had fires, and stated that the firemen were somewhat afraid to approach the buildings on account of the fact that bulk powder and ammunition was stored in them

"The remainder of the dealers written to had never had fires and expressed the opinion that metallic cartridges and loaded shotgun shells were not as combustible a stock as many other lines of goods which they regularly carried."

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The New England Hardware Dealers' Association will hold a convention at Boston on March 15th and 16th, 1905, at Hotel Vendome.

MARCH 15TH.

10.30 A. M. An Executive Session.
Election of Officers, etc.
1.30 P. M. Committee Assembly Reception.
2.00 P. M. Convention. Able Speakers on Timely Trade Topics.
6.30 P. M. "Ladies' Night." Promenade, Concert and Reception.
7.00 P. M. Banquet and Entertainment.
Prominent Speakers on National Subjects.

MARCH 16TH.

10.30 A. M. Guests Boston Auto. Dealers' Association at Auto and Power Boat Show.

HIGHEST HONORS AWARDED.

The National Cash Register Company was awarded the highest honors at the Louisiana Purchase Exposition. Two gold medals, two grand prizes, a silver medal and a special honorable mention were adjudged to the company's registers and exhibits by the World's Fair Jury of Awards.

The gold medal for cash registers in the division of Liberal Arts was first and most important of the prizes won in the world competition at St. Louis. A silver medal for electrically-operated registers was also given the National Cash Register exhibit in the division of Electricity—a recognition by the Exposition of a new field opened up by their inventors.

The National Cash Register welfare work for employes was also crowned by the World's Fair authorities with the greenest laurels in their gift. In the division of Education and Social Economy the gold medal for the exhibit showing greatest progress in factory buildings, sanitary working conditions, improved dwellings and general efforts for the betterment of housing conditions was awarded to the Company. In the same division, the grand prize for General Betterment Movements and Employers' Institutions for the benefit of employees was also adjudged to the National Cash Register Company.

The lecture illustrative of welfare work in the National Cash Register auditorium in the Palace of Varied Industries and the showing of welfare features at the main exhibit in the Palace of Liberal Arts were considered by the jury as part of the Company's educational exhibit.

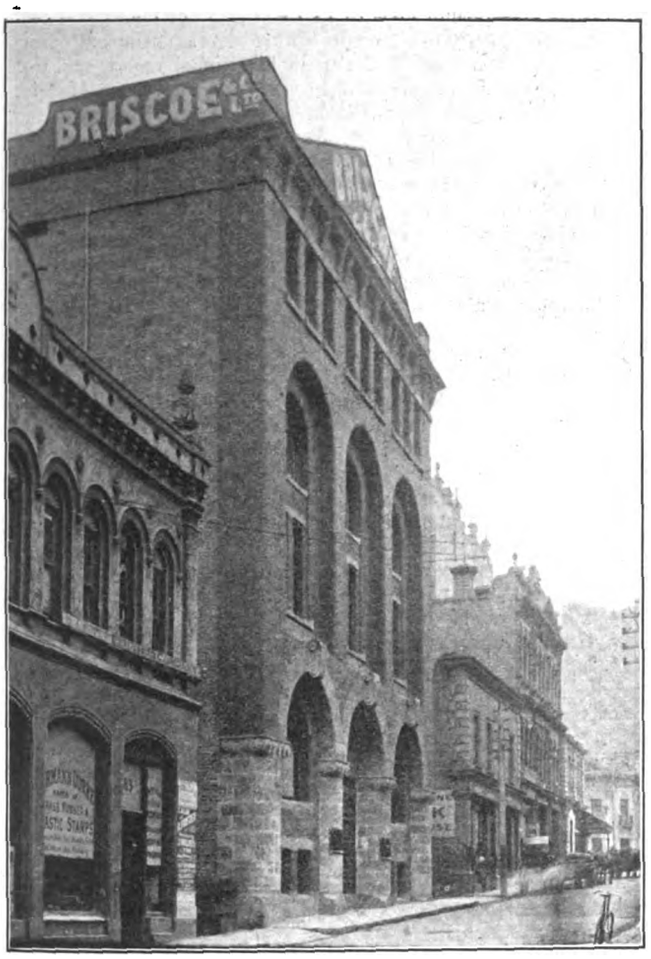
The two other coveted honors won by the Company's main exhibit were the Grand Prize and Special Honorable Mention given for the best, most complete and most attractive exhibit in the Palace of Liberal Arts. In every department in which it made a display the National Cash Register was adjudged the highest honors.

No other manufacturing company was awarded so many and such unusual honors by the Exposition Jury of Awards.

"CO-OPERATION IS THE LIFE OF TRADE."

The J. Stevens Arms & Tool Co., have issued a new Christmas book in pamphlet form which will be particularly appreciated by the "Young Hopefuls" of the family, although without doubt will be found most interesting by all the other members, including the gentler sex, for the book advocates the use of a rifle or shotgun for everyone, and is entitled "Co-Operation is the Life of Trade." They state "Our price-protection co-operation policy strongly commends itself to retailers handling the popular, easy-selling Stevens Arms. Protection in the legitimate profit accruing from each individual sale, and the mighty impetus we give our line because of the thorough and aggressive advertising campaign waged in our mutual interests, are primary reasons for Stevens rifles, pistols and shotguns being 'Leaders' with the Hardware and Sporting Goods Trade." Their Christmas magazine advertisements, as illustrated in the above mentioned book, will appear in more than forty of the leading national publications and sporting goods periodicals, particulars of which cover four pages of their Christmas book. These forty publications have a combined circulation of upward of 6,117,204 copies, and, figuring at a conservative estimate of four readers to each copy, makes it possible for over 24,464,816 people to see their advertisements in the magazines. To realize the importance and extent of this advertising campaign send for a copy of their "Co-Operation is the Life of Trade."

NOT TO BE FOOLED.



DEALER—Five pounds for this beautiful painting? Why, man, the frame is worth more than that.

CONNOISSEUR.—Yes, but not with that picture in it.—*London Tit-Bits.*

A HARDWARE HOUSE IN AUSTRALIA.

The business of Briscoe & Co., Melbourne, Australia, is older than Australia, than White Australia, at any rate. It was founded in Wolverhampton, England, by William Briscoe about the year 1750. The founder traded with South America, principally Valparaiso and Buenos Ayres, at which latter port the first foreign branch was established. A second warehouse was opened some time later in the island of St. Thomas, and a third later still at Kingston, in Jamaica. After a time the Buenos Ayres business was wound up, and the St. Thomas and Kingston businesses

NEW BUILDING OF BRISCOE & CO., MELBOURNE.

sold to the local partners, McDougal & Henderson. One of the Kingston employees, E. C. Blyth, emigrated to Melbourne in 1852, and commenced business as an ironmonger in Lonsdale Street. In the following year this business was taken over by William Briscoe & Son, as the English firm had then become;

BRISCOE & CO.'S IRON STORES, WEST MELBOURNE.

Mr. Brown, of Brown & M'Dougal, joining them and assuming the local management. A few years afterwards Mr. Brown retired, and his partner, Robert M'Dougal, succeeded him as managing partner. In 1862 they found their way to New Zealand, purchasing the business of Alexander Cairns, of Dunedin, which was carried on under the firm name of Arthur Briscoe & Co. Similarly in 1881, they bought the interest of J. A. Roberts in the Sydney business of Drysdale & Roberts, which was continued as Briscoe, Drysdale & Co. A second New Zealand branch was opened at Wellington in 1893, bearing the name Briscoe, Macneil & Co. About the same time Arthur Briscoe & Co., moving South, included Invercargill in their operations, and in 1899 Briscoe, Macneil & Co., reaching Northwards, opened a warehouse at Auckland. During the latter part of the last century the growth of the business was so rapid that it was deemed advisable to convert it into a company. This was done in 1900, since which all the Australasian branches have borne the title, Briscoe & Co., Ltd. The company is a private one, with its head office in London, the present directors being Wm. Arthur Briscoe and George Briscoe, both of London; Hugh Macneil, of Sydney, and Alexander Macneil, of Melbourne.

We illustrate herewith the new building, recently occupied by this firm in Melbourne. In it the American steel system of construction has been adopted, this being its first application in Melbourne to warehouse structures, although it is embodied in the Equitable Insurance Co.'s premises and a later building used for office premises.

Almost every modern apparatus for convenience, and for safety from fire is used in this building, which contains 480,000 cubic feet of space.

The second illustration given herewith shows Briscoe & Co.'s Iron Stores in Adderly Street, West Melbourne.

SOME UNCOMMON MINERALS.

"Cryolite, or kryolite, as it is sometimes spelled, is a salt containing both sodium and aluminum. Both of the latter and some of their compounds have been obtained from Greenland. Colorado and the Ural mountains produce it in limited quantities, but the largest and most available deposits yet found are in Greenland, near the west coast, and this region has been the chief, if not the sole, reliance of commerce," says the New York *Tribune*.

"Aluminum is made from alumina, the oxide of aluminum, and the processes of getting rid of the oxygen is called reducing. In this country the business is controlled by the Pittsburgh Reduction Co., which for a long time purchased its alumina from the Pennsylvania Salt Co., and the latter manufactured the article from cryolite, which it imported from Ivigtut, Greenland. At present, however, practically all of the alumina made in this country— at least, that which is converted into aluminum—is derived from an entirely different ore, bauxite, of which more anon. Still in the final separation of the aluminum and oxygen by the American system, cryolite is used as an important auxiliary. The alumina to be treated is dissolved in a bath of the Greenland mineral melted, and an electric current of enormous volume passes through the fluid. In this operation there is little or no waste of cryolite. It is the alumina which needs constant renewal.

"Caustic soda, or the hydrated oxide of sodium, much used in the industries, and especially in the production of lye for soap, was formerly made by boiling slaked lime with cryolite. But the Solvay and other modern processes of manufacturing soda from common salt—chloride of sodium—are now rapidly displacing that method. Again, the pure metal sodium is obtained more cheaply from cryolite than from other sources. Cryolite is a lustrous mineral, often of a pure or grayish white, but sometimes possessing a yellow tint. Combined with silica by melting, it is wrought into a glass resembling porcelain, and variously known as 'hot cast porcelain' and 'cryolite glass.'

"Beauxite, sometimes spelled bauxite, takes its name from the place where it was first discovered in considerable quantities, Beaux, France. It is now found abundantly in the southern part of this country. A few years ago Alabama and Georgia were the chief producers. But the supply in that quarter is falling off, while Arkansas is yielding bountifully and seems to have almost unlimited deposits.

DEATH OF R. K. CARTER.

Robert K. Carter, president of R. K. Carter & Co., New York, died December 2, of heart failure, after an illness of several months. Mr. Carter was born at Carter Hall, near Winchester, Va., March 12, 1839. He was educated at the University of Virginia, and also graduated from what is now Washington and Lee University Medical School. During the late Civil War he served the South as a surgeon in the Southern army. Coming to New York after the end of the war he entered the employ of Pattee, Yale & Macfarlane in 1866. Later he connected himself with the wholesale Hardware house of Bliven & Mead, subsequently Hart, Bliven & Mead. In 1870 he estbalished himself in business on his own account, that of buying goods for merchants in the line of Hardawre, Iron, Steel, Mill, Mining and Railway supplies. In 1891 a copartnership was formed with Frank R. Blauvelt, under the style of R. K. Carter & Co. The business was incorporated in 1900 under the same title, Mr. Carter becoming president, Frank R. Blauvelt, vice-president, and Alfred C. Greening, secretary and treasurer. Mr. Carter is survived by a widow and two children.

DEATH OF JAMES H. WILLIAMS.

James H. Williams, founder and head of J. H. Williams & Co., died suddenly of apoplexy at his late residence, 6 Pierrepont Street, Brooklyn, Monday morning, December 5, there having been no preceding illness.

Mr. Williams was born at Fort Plain, N. Y., 59 years ago, and for some years he was engaged in the manufacture of axles there. About 1876 he came to Brooklyn and formed the Bliss & Williams Co., manufacturer of pressed tin and steel goods machinery, with E. W. Bliss, who was his cousin. In 1882 he withdrew, and later formed the firm of Williams & Diamond. On July 1, 1884, the business was moved to Brooklyn and re-established at the present location, on Richards, Bowne and Columbia Streets, near Hamilton Ferry, the style changing to J. H. Williams & Co., which has since been retained, and was incorporated July 1, 1895, Mr. Williams becoming president.

Mr. Williams was a public-spirted citizen of the highest character, and interested in religious and philanthropic work, but was exceedingly modest, never having sought publicity or public station. He was very domestic in his tastes and habits. He was a member of the Hamilton Club, Marine and Field Club and the Riding and Driving Club. He is survived by a widow, a daughter and two sons.

A MODERN STORE IN SOUTH AFRICA.

We illustrate herewith the interior of the Kimberley store of the P. Henwood, Son, Soutter & Co., one of the oldest South African Hardware firms. This concern has houses in Dublin, Maritzburg, Johannesburg and Pretoria, and at each of these sections the house of this concern is recognized as the leader. In these stores are carried a general line of Hardware and house-

INTERIOR VIEW.
P. HENWOOD SON, SOUTTER & CO.'S STORE.

furnishing goods, tools, implements and dairy supplies, office furniture and in fact everything that ought to be found in an up-to-date ironmongery establishment. They maintain headquarters in London, and their American business is carried on by Crossman & Sielcken, New York City.

IDAHO RETAIL HARDWARE AND IMPLEMENT DEALERS' ASSOCIATION.

Thirty of the largest Hardware jobbers and manufacturing houses in the United States were represented at a meeting of the Idaho Retail Hardware and Implement Dealers' Association held recently at the Natatorium, Boise City. Many of the houses sent their representatives a distance of 1000 miles especially to attend the meeting which was called for the purpose of settling differences between the retailers and jobbers. The conference was eminently successful, both from a business and social standpoint.

Those in attendance checked their hammers at the door and all was harmony within. At the conclusion of the conference the members of the association and their guests sat down to an elaborate banquet served by the Boston Lunch. President James E. Clinton, Jr., of the association, was toastmaster and in courteous but firm tone he compelled every man at the tables to declare himself. Kegs of nails were on tap and the display of glass was very alluring.

Representatives of St. Paul, Portland, San Francisco, St. Louis and Chicago Hardware houses were present and gave voice to their appreciation of the growing Idaho trade.

The Idaho Retail Hardware and Implement Dealers' Association was formed in Boise last July with a strong membership. The aim of the association is to provide conferences between its members as a body and the big jobbing and manufacturing houses doing business in this territory. Already a great deal of good has been accomplished by the organization and a much better understanding between the retailers and jobbers has be obtained.

The social feature of the association also tends to harmony a those dealers who absented themselves from the festive gath ing missed a royal good time.

WASHINGTON HARDWARE ASSOCIATION.

The sixth annual convention of the Washington Hardware A sociation was held in Tacoma on the 16th and 17th ult. It pro to be one of the most interesting and enjoyable meetings held. President H. D. Cowles' annual address was listened w.th close attention in view of its description of the present c dition of the association and its future development and opp tunities. Secretary A. C. Blake, in his annual report, said t the roll of the association contained forty-six names, nine of wh were new members. Mr. Blake urged the employment of assistant to the secretary, who could give his entire time to organization, canvassing non-affiliated merchants, tracing gri ances, etc. There are said to be about 200 Hardware mercha in the State, so that less than twenty-five per cent of them identified with the association. Special efforts were urged to roll as many of the Hardwaremen of the State in the asso tion as possible. Subsequently it was decided by the associat to adopt Mr. Blake's suggestion and engage an assistant to secretary.

A number of interesting papers were read and discussed, incl ing "Are the Hardware Dealers' Interests Properly Protected the Present Laws of the State?" by E. L. Minard, of Elm "What Benefit Does the Retail Dealer Derive from the S Association?" by Henry Mohr, of Tacoma; "How Should Credit Part of the Retail Hardware Business Be Handled?' N. H. Thedinga, of Seattle, and "What is the Most Effective W to Advertise the Retail Hardware Business?" by J. A. Peel of Seattle.

The following officers were elected for the ensuing year:

F. A. Ernst, Ernst Bros., Seattle, president.

H. W. Myers, Myers Hardware Co., Tacoma, vice-presi

N. H. Thedinga, Thedinga Hardware Co., Seattle, secretar

H. D. Cowles, Washington Hardware Co., Tacoma, treas

A. C. Blake, Munro, Blake & Haskell, Bellingham, membe Executive Committee.

Seattle was selected as the place of the next meeting.

One of the sessions was devoted to a joint meeting in w representatives of the Coast jobbing houses participated. conference was productive of much good, bringing about a b understanding between the two classes, who are evidently sirous of working together in harmony.

The local association of merchants of Tacoma entertainec visiting Hardwaremen at a banquet at the Tacoma Hotel o evening of the 17th. Mr. Mottet, of Hunt & Mottet, acte toastmaster.

♣

THE NATIONAL SUPPLY CO., Baltimore, Md., have forwa us a copy of their latest catalogue which is an exceedingly production of the printer's art. It covers their line of man ture including bolts, nuts, washers and rivets of every de tion. Their works are located at Curtis Bay, Md. The contains a comprehensive index; a tabulated list of all with prices, also gives a list of extra prices for special bolts. All of their bolts are cut U. S. S. thread unless or otherwise. All bolts, except countersunk heads, are mea under head to point. Countersunk head bolts are measured all. They request that orders specify whether cold punche and T., or hot pressed (black) nuts are desired. Beside above the National Supply Company manufacture a full li Furniture casters comprising Philadelphia, bed and plate neck, both steel and cast horn, porcelain shutter and d knobs, etc. Brass Goods, comprising hose pipes of all de tions, hose couplings of all sizes, compression bibbs all ground bibbs for lead or iron pipes, stops, and stops and w etc. Light Hardware, comprising Lull & Porter hinges, C pattern blind hinges, grindstone fixtures, cast iron hatchet hammers, harness, ceiling and clothes line hooks, awnin screw pulleys, stove pipe dampers and lid lifters, porch chest handles, barrel bolts, etc. Write for catalogues.

TIMES HAVE CHANGED.

"Oh, George," complained the young wife, "it was nearl night before you got home last night."

"Well, well!" exclaimed the husband; "you women inconsistent. Before we were married you didn't care ho I got home."—*Philadelphia Press.*

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Husband's Liability to Wife.

QUESTION: I sold a bill of goods to a woman upon her husband's credit, she representing to me that he would pay for them. Afterward when I sent him the bill he refused to do so, and notified me that his wife was not living with him at the time she bought these goods and that he had caused a general notice to be printed in several newspapers stating that he would not be responsible for goods bought by her on his credit. The wife had bought goods of me before and the husband had paid for them without question. Have I a right to sue him?

REPLY: If she had before purchased goods of you for which her husband paid that would tend to create a presumption of her right to buy on his credit similar supplies. On the other hand, if you contracted solely with and gave credit only to the wife, you cannot sue the husband, even though the articles furnished were necessary to the wife's support. The mere fact that the husband and wife are separated and live apart from each other would not necessarily preclude your recovering from him, even though he had given a general notice to all persons not to give credit to his wife. He would still be liable for necessaries furnished to her if she left him with just cause. Thus, where a husband deserts his wife or turns her away, or compels her by ill usage to leave him, he gives her a general credit and is liable to be sued for necessaries furnished her; but this liability would be confined to such articles as may be legitimately called necessary to her suitable maintenance and support and it would not exist in case the wife left the husband without just cause. In an action against a husband for necessaries furnished to a wife who lives apart from him, it is said to be incumbent upon the plaintiff to prove that the separation took place by reason of the husband's misconduct. If, therefore, you can show that the goods were necessaries, that they were furnished on the husband's credit, and that the separation was due to the husband's misconduct, you will succeed in your attempt to hold him responsible.

WHAT FOOLISHNESS.

The little book before us, "An Ounce of Prevention," is a very convincing reminder of the folly of being uncomfortable (to put it mildly) and running the risk of taking cold while driving in cold weather. Fact is, the horse has the best of it under these conditions—for he can exercise and keep warm. The little booklet referred to (as catchy and readable as it is brief) is one of the catalogues of the Chicago Flexible Shaft Co., makers of the Clark Carriage Heater, and illustrates heaters ranging in price from $1.75 up to $10.00—no difference in efficiency—just a matter of finish.

The argument in favor of a heater of this sort is, the heat is uniform—"just as hot at the end of a drive as when you started." Once upon a time our forefathers and foremothers used a piece of soapstone, which has the faculty of retaining heat longer than any other substance, without being too hot at the start—but they were a mere make-shift compared with this modern heater; by the time the traveler began to feel the cold (the natural heat of the body generally escaping) the soapstone got cold, too. Clark Heaters carry, in a drawer, a cake of Clark Coal, a compound substance compressed under 600 tons pressure, which burns 16 hours, and without flame, smoke or odor, or gas (they come in smaller sizes for shorter drives). It is made ready for the drive in about three minutes. The very simple instructions go with each box of coal.

The full sized cakes cost 75 cents a dozen, which makes the comfort of a day's drive cost one-third of a cent an hour—lots cheaper than the sure discomfort and the probable doctor bill, isn't it?

With these in view the heater becomes a paying investment and not only a luxury, but a necessity. All this explains why the Chicago Flexible Shaft Co. have been increasing their sales and their facilities right along, year after year. All their heaters are built to last and do good work, but some of them must be (judging by the photographs and specifications) decidedly ornamental for a handsome carriage. The company encloses a guarantee in every box of Coal. Seems like Clark Heaters are the sort of goods that suit the customers.

It's up to you—Is it not "foolishness" to be miserably cold the whole day's drive, and then have to pay a doctor for the privilege, when a Clark Heater and Clark Coal prevents it all and at such comparatively small cost. Wise dealers are "getting next" to the fact that their customers want this class of goods.

BISSELL'S NEW POSTER.

Always active in creating new advertising features to broaden and increase the demand for their product, the Bissell people have just gotten out a particularly pleasing and seasonable lithograph which they call their "Christmas Poster." Elegantly lithographed and rich in colors, it brightens any window or store in which it is hung. It has already been proven that this will be one of the

most popular posters they have ever brought out, and although but a few lithographs have been sent out as yet, the Bissell Co. have received requests from dealers for these posters in quantities to use for billboard posting, attaching their firm name on a separate sheet at the bottom of the poster. The "Christmas Poster" is 26 inches by 56 inches, and will be sent to any dealer by writing the Bissell Carpet Sweeper Co., of Grand Rapids, Mich., or 25 Warren Street, New York.

S. R. SLAYMAKER ADDS THE "SLAIGHT" LINE OF GOODS.

S. R. Slaymaker, Lancaster, Pa., has bought the entire business, machinery, patterns, tools, contracts, records, etc., of the Thomas Slaight Lock & Mfg. Co., of Newark, N. J., the oldest manufacturer of "Made to Order" padlocks in the United States, and who made a line of the highest possible grade of "Made to Order" padlocks for railroads, governments and corporations using special goods generally. These goods have been moved to Lancaster and will be manufactured by S. R. Slaymaker in a department which will be devoted exclusively to the manufacture of the Slaight locks, and this department will be under the supervision of the former superintendent of the Slaight plant, so as to continue in every particular the most excellent grade of goods made by the Slaight people. This line added to the line of "Made to Order" padlocks already produced as well as to the vast line of padlocks made for the general trade, enables S. R. Slaymaker to offer infinitely the largest and most effective line of padlocks for all purposes, on the market. The Slaight Co. also made Coach locks and Car Hardware generally. The manufacture of these goods will be continued by S. R. Slaymaker, and there will be practically no interruption to the supply of these goods to customers. Orders for the Slaight goods should in future be sent to S. R. Slaymaker, Lancaster, Pa.

John H. Graham & Co., 113 Chambers Street, New York, are their New York and Export Sales Agents.

THE ONONDAGA NOVELTY CO.

THE ONONDAGA NOVELTY CO., of Syracuse, N. Y., are the authors of an attractive pamphlet, which is their descriptive catalogue and list "G" of household conveniences. They request that all previous issues be destroyed and that this one be preserved for ready reference. Included in the contents are—convertible chairs and stepladders in several qualities, but all having the same principle; interchangeable oak tablet chair, which can be used as a desk, writing or luncheon chair or book rest; medicine and toilet cabinets, shoulder boxes, folding tables, mitre boxes, butlers' trays and stands, folding ironing tables and utilities for the laundry, folding clothes dryers, folding bed rests for invalids, folding knock down food safes in several sizes, etc., etc. For those interested in the above class of goods this catalogue will be found useful, and will be gladly sent upon application to the Onondaga Novelty Co.

DIVERSIFIED STOCKS ESSENTIAL.

Many a house furnishing merchant after years of hard work and strenuous effort to progress finds himself making less money than he did during the first period of his career. He is at a loss to account for this and regards it in the light of a phenomenon, but there is really nothing strange about it. Two things would militate to such a condition. First, he may not be devoting so much attention to the business, or his trade may be drifting to more wide-awake competitors. That, of course, would account for his loss of business, but this feature we will not touch upon. The cause and remedy are too apparent.

What concerns us most in this article is the plight of that dealer who seems unable to increase the volume of his business and expand to the extent that his efforts would seem to warrant. We take it for granted that he has done all that mortal man can do to fill the field that lies at his door, but still his profits show a falling off. Now, why is it?

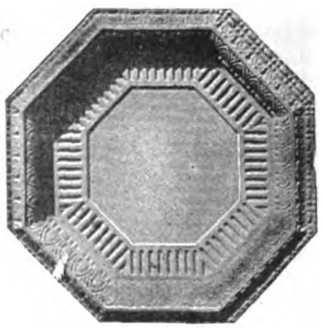
Well, at the start it is well to bear in mind that it costs more to transact a retail business nowadays than it did formerly. Time was when the customer paid very little attention to the general appearance of the store in which she shopped. Then price or quality was the sole consideration, but the gradual development of the retailing business along scientific lines has educated the consumer to demand better service and greater conveniences. Never was the convenience of customers regarded in so important a light as it is at present. Every effort is made to render the store attractive, and expenses for such a purpose which a few years ago would have been regarded as preposterous are now looked upon as a natural and highly necessary outlay. This, then, may be the second reason why our dealer's business appears to be going backward.

One of the features in retailing which has come to be recognized as of the highest importance is quick service. No longer is the time of the customer looked upon as of little importance. The old method of allowing one to wait five or ten minutes for change is becoming obsolete. Just as the central wrapping desk has been replaced by wrappers in each section of the house furnishing department, so the modern method of retailing is turning individual cashiers, in place of allowing all the cash to go to a central office. The purchaser of a can opener or some other trifling article is apt to be seriously annoyed if called upon to wait six or seven minutes for as many cents. And such conditions are accentuated during the holiday season and other rush periods.

But attractive interiors and the installation of quick service features cost a great deal of money. So if a dealer's yearly profit is to increase this outlay must be compensated by increased returns and a largely augmented volume of trade.

The healthy business *grows*. And if your business is healthy it will grow sufficiently to take care of all legitimate expenses. But you must give it room to grow. That is the point we've been trying to arrive at through all this preamble. You must let your business broaden in order to meet the additional cost of running it. For every added expense there should be an added source of income. In a word, you should "branch out."

The big department stores succeed because they handle many lines under one roof with one set of expenses. Your house furnishing store should be operated on the same principles. No merchant is living up to his opportunities who is not working toward the goal of a department store. Perhaps your establishment is a small one to-day, and you are carrying twenty different lines of house furnishings, you have enameled ware, wooden ware, tinware and all the others up to twenty. But sometimes you have had requests for goods you do not handle. These requests have increased as time passed, but by and by they stopped entirely. That was because you have at last told all your customers that you did not carry such goods, and they have gone to buy them elsewhere. Now what should have been done was this: Just before the number of requests reached high water mark you should have had on sale a line of the goods asked for. But you didn't, and so you lost a chance to make a profit, to say nothing of permitting your customers to go elsewhere. Then you wonder why your profits do not keep pace with expenses.



What you need is more lines, so you can supply a larger share of the wants of your customers. No matter how high your percentage of profit may be, you've got to have *volume* to reach that excess of sales over expense which is what you are in business for.

You need something you can talk about in season and out—that appeals to every family in your community—that sells at all seasons—something to put in the show window—to advertise with—something that will help swell both sales and profit. You need a more diversified stock. You need to "branch out."

HOUSE FURNISHER

NEW YORK METAL CEILING CO.'S NEW CATALOG

The New York Metal Ceiling Co., 54 West Twenty-f Street, New York, have issued one of the handsomest and exhaustive catalogues that has been brought to our noti Artistic Metal Ceilings, Mouldings, Borders, Freizes, Side Patterns, etc. It is their catalogue G, and is well wort preservation. It is called "A Thing of Beauty is a Joy ever." Various combinations of the most artistic character, are obtained by combining one or more patterns, are sho this profusely illustrated catalogue by graphic cuts of ever

sible combination of design. The harmony of design an fection of detail are in every instance such as appeals t appreciative taste, and worthy of being perpetuated in son else beside sheet metal. The possible combinations of th ous patterns is almost limitless, and very many patterns hav gotten up with a view to their desirability in this wa meet the demand for a ceiling decoration more artisti sheet metal, the company have placed upon the marke Combination Ceiling. These ceilings, which are fire and proof, having a base of prepared plaster combined with a element, permits of the casting of pieces in large slabs abc an inch thick and often containing ten square feet or n

each piece or section. These are so prepared they ma any depth of relief desired, artistically undercut with p any selected style of decoration and made to fit the r ceiling may be advantageously made up entirely of this sition, or it may be made part of embossed sheet metal of composition. The company say there is no use to wh ceilings have given such perfect satisfaction as in their tion over old plaster ceilings. This can be done withou ing the old plaster, causing no muss, making little or no in much less time than it would take to replaster.

ILLINOIS RETAIL HARDWARE DEALERS' ASSOC

At a meeting of the Executive Committee of the Illin Hardware Dealers' Association, held at Peoria, Novembe was decided that the annual convention should be hel city February 14th, 15th and 16th. No hotel is to be l official headquarters, which they think will prevent the tortionate rates being asked. The convention will be Turner Hall, in which space for exhibitors can more t arranged for. A precedent will be established by havin ber of papers read by experts, not necessarily Hardwar but who will be paid for their services. A discussion o matters, besides those of Catalogue House competition need a more diversified stock. You need to "branc *House Furnisher.*

OUR BRITISH LETTER.

(By our Special Correspondent.)

LONDON, Nov. 25, 1904.

PREPARATIONS FOR CHRISTMAS TRADE.

English ironmongers have learned a lesson from drapers, grocers and storekeepers who have devoted much attention to Christmas trade during recent years. They have gradually discovered that there is something in this season business after all, and slowly yet surely have become accustomed to the annual preparations which give trouble and sometimes disturb ordinary business, although they create new trade and help to swell the cash returns which are normally low during the weeks preceding Christmas. It is curious to note the preparations already begun and to see how hardwaremen, with thoughts usually concentrated upon iron goods of very prosaic types, now give attention to the light and tasty articles offered in fancy goods warehouses. The makers of sundry fancy goods report good enquiries for novelties, and the factors who handle many American sundries speak hopefully of a fairly prosperous time within the next few weeks. Metal toys and working models, which are selling freely, are chiefly imported from Germany. Some of the new goods are of warlike character, including models commemorating episodes in the war going on between Russia and Japan; and miniature war vessels, torpedo boats and forts are much in demand.

THE ABANDONMENT OF THE PROPOSED C. O. D. IN GREAT BRITAIN.

The frequent mention of the proposals of the Postmaster-General, who is very anxious to introduce a system of cash-on-delivery parcels post into the postal arrangements, may be a little wearisome to your readers, but it is a question of importance, constantly brought before retail ironmongers of Great Britain. So far the opposition of retail traders' associations has prevailed and Lord Stanley, for a time at any rate, has withheld the introduction of c. o. d. in the inland postal districts. Lord Stanley, however, is so convinced that the system, which has been adopted in France and other continental countries with success, is calculated to prove a boon to the community at large, that he has consulted India and British Colonies with the intention of instituting a c. o. d. postal system between Great Britain and these far-off parts of the Empire. There are indications that c. o. d. will be welcomed, and that colonists will see visions of the possibility of securing small articles from the old home, at English prices—plus the postage—as well as being able to obtain novelties and sundry articles of the latest English fashions. If Canada joins in the scheme the U. S. A. catalogue houses may to some small extent suffer in consequence, but it is scarcely likely that any material difference will be experienced by the retail traders and storekeepers in the States.

THE SECOND EXAMINATIONS UNDER THE AUSPICES OF THE I. F. A.

It will be remembered that last January the Ironmongers' Federated Association held an examination of assistants in Manchester. It was a successful trial attempt to raise the tone of ironmongers' assistants and inspire a desire to know more about the trade by granting certificates of proficiency to those who were able to pass the required standard. Next January the second examination (of a long series it is hoped) will be held in London, and the examination board of the I. F. A. has just issued a syllabus, together with amended rules for the examination. The new regulations contain several important points. The compulsory groups of subjects have been simplified, at the same time the standard of proficiency has been raised. The importance of technical knowledge has been well kept to the front, and the ironmongers of the future encouraged to study the mathematical side of their trade, in order that the application of that science may be helpful in securing accuracy of measurement and calculation of cost. The reports received from the general secretary of the I. F. A. are very encouraging and it is anticipated that the second examination will be still more successful than the former one. A number of assistants have already given in their names as candidates, and special efforts are being made by the members of the different local ironmongers' associations, in order to secure the attendance of assistants from many different parts of the country. The examination board will receive the support of the London Ironmongers' Association, whose president, Mr. Alderman Pond, is a strong supporter of the examination scheme, and will do his utmost to make the examinations which will be held in London in January a complete success.

ALTERATIONS IN GUN PROOF MARKS.

According to recent regulations made by the Guardians of the London and Birmingham Proof Houses several new marks have been adopted, in order to bring the existing proof marks into line with present day requirements. The chief features in connection with the marks consist in the introduction of a special proof mark applied to barrels proved for use with nitro powders. The new mark consists of the letters "N. P." surmounted by an arm dexter armored holding a scimitar, also a mark used by the Guardians in connection with nitro powder consisting of the letters "N. P." surmounted by a crown. The mark adopted by the Birmingham Guardians as a definite proof mark has also been somewhat modified, and now consists of the letters "B. P." surmounted by a crown instead of the former mark consisting of two crossed sceptres surmounted by a crown, the initials being placed in the angles. Great care is now exercised in order that foreign barrels proved in England may be properly attested, and also much publicity has been given pointing out to traders the principal marks adopted by Belgium manufacturers and gunmakers in other countries. During recent years wholesale forging of the marks of the British Gunmakers' Company has been carried on by continental manufacturers. Heavy penalties are attached to the importation or sale of gun barrels bearing the forged marks of either the Birmingham or London Proof-house. The law demands that any single barrelled gun or revolver must be stamped with the proof mark upon the barrel at the breech end, and that double barrelled guns must be proof marked on each barrel or breech-loading section. The two principal marks are those defined as provisional proof and definite proof.

THE GAS EXHIBITION AT EARL'S COURT.

The Gas Exhibition which has been arranged at Earl's Court, London, will be held from Nov. 19th to Dec. 17th, is likely to be a very successful affair. It will be held under the auspices of the Institute of Gas Engineers, and will include interior lighting appliances, such as incandescent burners and fittings, as well as public street lighting. Heating by gas will be fully dealt with, also the use of gas as a motive power. I am informed by the promoters that upwards of two hundred well known firms have taken space, and that their exhibits will be of an exceptional character. Special invitations have been issued to all the ironmongers of the United Kingdom, so many of whom are interested in this branch of the Hardware trade. The number of new types of burners and incandescent fittings which have been launched upon the market since the Welsbach Company led the van some years ago, has been truly marvelous. Ironmongers realize that this business means money, and are not slow to investigate every good thing which seems promising or appears to be worth taking up. They will have many chances of doing this with beneficial results during the next few weeks. The sale of gas cookers and even of fires has been lost to the Hardwaremen of this country, owing to the nominal cost of hire granted by gas companies. Yet there is a little business in the agency way still being done in several localities where ironmongers have arranged co-operative schemes with the local gas companies for the mutual benefit of gas-maker, stove manufacturer and Hardware dealer

RECENT LEGISLATIVE ACTS.

Not many matters which have engaged the attention of British legislatures during the year 1904 have any special interest of retail ironmongers. There are, however, two or three important Acts which materially affect the interests and well-being of Hardwaremen and other retail dealers. The Act which provides for the hall marking of foreign plate is important. It secures British manufacturers from the possibility of any close imitation of their marks, and provides a definite hall mark which must be stamped upon all plate imported into this country from abroad. The marks denoting its foreign import are clear and distinct, and will be readily understood by every buyer of silver plate. The Weights and Measures Act which has recently been made law makes it possible for retail Hardwaremen to purchase weights and measures stamped in Birmingham and other places of man-

Digitized by Google

ufacture without the necessity for having them re-tested and stamped locally. Hitherto it has been necessary for retail tradesmen to send their weights and measures to the local inspector, each county claiming the right to stamp the weights and measures used therein. By the new Act weights and measures stamped by any legal authority may be used in any part of the United Kingdom. The Shop Hours Act 1904 has caused much discussion and is likely to be brought into active use in many localities where one or more tradesmen have insisted on keeping their establishments open to the detriment and inconvenience of others. The new law provides that upon the representation of a certain proportion of the members of any one trade a compulsory order may be made by which the hours may be limited, and a half holiday provided one day in every week. Doubtless these Acts will work well and tend to promote the common welfare of retail traders.

THE TYPES OF DEALERS.

When the hurrah days of the cycle trade passed away, and were succeeded by the period of stress and strain that begun in 1897, great changes took place in the personnel of the retail army. Those who were drawn in by the lure of fabulous profits withdrew, and were followed by many of the older type of dealers—the poorly equipped financially forming the bulk of them. In course of time those who were left were composed mainly of two classes: Those who had the business ability and the money to face the storm until such time as they could add other seasonable and profitable lines, and those who hang on to the business for much the same reason that the man clung to the bear—that they were afraid to or could not let go.

These two classes still comprise nearly all there is left of the trade. The dealer of the first type is usually a man of substance and standing in his community—a solid citizen, a successful merchant, who often has a sung sum laid aside. But he long ago ceased to be a cycle dealer exclusively. He has added other lines of merchandise, first as side lines, then, frequently, as main lines, until they formed his staples, finding a sale from the beginning of January until the end of December. Bicycles become more or less a subsidiary article, depending on the degree of popularity still retained by cycling in the town.

Whether or not the cycle is given a fair show in his establishment depends to a considerable extent on the feeling the dealer entertains toward it. Sometimes he regards it with disfavor, holding that it is no longer a money maker, and should t be shelved. At other times it is looked upon with favor affection, and pushed just as hard as the selling capabilit rant. Whatever effect an encouraging attitude can have or the increase of riding is produced by this class of dea it is undoubtedly productive of much good; just as an at indifference tends to make matters worse than they wou wise be.

To a greater extent than most people imagine the fu provement of the business is in the hands of this class o By caring for their present limited clientele in the best manner and waiting for a turn of the tide, meanwh everything possible to bring it about, they can accomplis deal. Their other lines, meanwhile, will keep the po But the cycle should not be treated as if it were pe withdrawn from public favor; rather should it be look suffering from a temporary eclipse which may pass aw time.

It is just as easy for a dealer of this sort to lead publ as to follow it. If he should become imbued with the l the approaching season is to be a good one he can do m way of promulgating that belief and in putting it befo tomers in such a way as to arouse interest, if not to ins A few well chosen words dropped casually to Jones o that effect is seed dropped in good ground. A little l riding begins again, he can confide to customers who buy other goods that Brown and Robinson have decid up cycling again; that they have ordered machines, and have been talking of doing the same thing. It is astoni an effect all this will have on others.

In short, if, instead of damning the bicycle by faint p praise at all, dealers would talk cheerfully and hopef cling, tell what is being done, point out how many really riding in spite of the general impression to th they would accomplish a great deal of good.—*Bicycle*

Catagorical.

Said a muscular Moslem of Muscat
To his cat, Cat, you can't catch a muskrat,
And when it is plain
That a cat can't obtain
A muskrat at Muscat, cat must scat.

REVIEW OF THE MARKETS.

WIRE NAILS.—Large and well assorted orders for stock have been a regular thing for some time at the mills; the trade is evidently stocking up, anticipating another advance in this leading commodity. The time limit on these orders has undoubtedly caused many of them to be booked in anticipation of the wants that would naturally be felt after January 1st. The trade is fully prepared for an advance and are apprehensive of its early arrival. Some of the independent mills are already quoting for carload lots, rates 5 cents per keg higher than regular quotations. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent for cash in 10 days:

Carload lots	$1.70
Less than Carload lots	1.75

New York.—On account of the anticipated advance in price the local trade have not waited, but have been steadily stocking up with a month's supply at least, as very few nails in large quantities are needed in January. The market is a firm one, with quotations as follows:

Single carloads on dock	$1.84
Small lots from stores	1.95

CUT NAILS.—The market is a firm one for Cut Nails, with the understanding that if an advance in price takes place in Wire Nails, Cut Nails will immediately be advanced to the same figures without waiting for any meeting. It is referred to that one of the mills outside of the association has already advanced it to $1.75 base, in carload lots, upon learning that other mills were virtually out of the market from excess of orders. Quotations are as follows: $1.70 and $1.75 for carload and less than carload respectively f.o.b. Pittsburgh.

New York.—Cut Nails are selling uniformly with Wire Nails and in about the same quantities, with a moderate demand. Quotations are as follows: Carloads on dock, $1.84; less than carloads, on dock, $1.89; small lots from store, $1.95.

BARB WIRE.—The demand keeps up remarkably well, as the trade believes an advance will be made before long in this active staple. Prices are firm for delivery in 60 days only. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.85	$2.15
Retailers, carload lots	1.90	2.20
Retailers, less than carload lots	2.00	2.30

SMOOTH FENCE WIRE.—Trade still keeps up with a steady demand, ordering in good volume in anticipation of an early advance in prices. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

Jobbers, carload lots	$1.55
Retailers, carload lots	1.60

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advance.

WOOD SCREWS.—At a recent meeting of the Associated Manufacturers of Screws the former prices were reaffirmed. The market for screws is in better shape than it has been for some time.

RIVETS.—Iron and Steel Rivets have been advanced in price 5 per cent by the Associated Manufacturers, and the goods are held firmly at the advance.

HEAVY GOODS.—The trade has been looking for advanced quotations on these goods, lying as they do, so close to the raw material, but the market is a firm one without definite advance, beyond the withdrawal of all special discounts.

SHEET ZINC.—Under date of the 26th ult. a further advance in the price of Sheet Zinc is announced to $7 per 100 pounds in 600-pound casks, f.o.b. mill, subject to the usual discounts.

CLOTHES WRINGERS.—An advance of from $1 to $2 per dozen has been made on Clothes Wringers by the Manufacturers, owing to the higher prices prevailing in the market for rubber.

CORDAGE.—The following prices represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12 to 12½
No. 2 Manila	10¼ to 11¼
Pure Sisal, 7-16 and larger	9½ to 10
No. 2 Sisal, 7-16 and larger	8 to 8½

LINSEED OIL.—The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....42 cents per gallon.
In lots of 5 barrels or more.....41 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....55 cents per gallon.

THE PHILADELPHIA TRADE.

The volume of trade in November has exceeded expectations and we think the total in the Philadelphia jobbing trade will exceed the records of November, 1903. Whatever may be our feelings in regard to the result of the National election, there is but little doubt that the election was the settling egg broken into the coffee. It has clarified and settled the whole situation. Uncertainty is apparently at an end and the whole country has seemingly made up its mind that "There is a good time comin'," which we hope will prove to be true. The market is reflecting the general condition and advances in price are announced almost daily, while extreme quotations on other lines are rapidly withdrawn. The Copper and Brass Market is in an excited condition and all goods of this nature are much affected. The advance in Nails and Wire is, of course, well maintained, and rumors of further advances are current. It is to be hoped that the feeling of buoyancy will not run too high, for conditions do not appear to justify a sensational advance, and we believe that a safe and prudent course is more likely to bring satisfaction in the end. The general trend of trade is now in the direction of holiday goods, and Skates, Sleds, Carvers, Pocketknives and fancy goods are in urgent demand, and it is gratifying to see that consumers will apparently have the money to spend this year for such lines.

THE CLEVELAND TRADE.

The meeting of the National Hardware Association recently held at Atlantic City seemed to the writer to have fully justified the wisdom of those who organized it. The principal manufacturers of the country met the jobbers through whom their goods are distributed and discussed what had been the antagonisms of the past and parted as friends. Both sides are represented by broad-minded, capable men. The audience and occasion eliminating the thought of selfishness gave the opportunity of seeing ourselves as the other side sees us. Nothing better could be devised to accomplish an important purpose. Then the meeting of competitors, the friendly and manly discussions helped to modify the cruelty of competition and had an important educational influence in the ethics of business. Competitors became men and friends of each other in place of fiends and enemies, both among jobbers and manufacturers. Conservatism overruled radicalism. Wise measures were commended and unwise ones disproved. "Thou shalt not" without good and sufficient reasons given, is never enunciated, as one negative vetoes any measure. Such a body of men coming from every State and section prominent in character, in ability and wealth, acting in unity are not inconsiderable in importance in their influence on the business of the country. The importance of such a gathering could hardly be overestimated.

The question of improved conditions is no longer in doubt, but the question of continuance, making genuine prosperity, is the perplexing problem. Our depression was not severe enough to very deeply impress a conservative spirit, so that much depends upon the wisdom of the large manufacturers. The smaller manufacturers who have been extremists in making low prices, are now extreme radicals in their desire to make extremely high prices, hoping to repay the loss of profit during the depression. They seem to choose to depend upon speculation for their success, rather than a legitimate business, hoping to escape through
